Introduction

This update contains the following changes:

1. **Update to Reminder Dialog Element: VA-PNEUMOC PPSV23 ZOSTER IMM WARNING**
   The pneumococcal reminder was showing this warning if a patient received a herpes Zoster vaccine:

   ```
   |This patient recently received Zoster vaccine. |
   |Consider waiting 4 weeks from the date of zoster before giving PPSV23 per PPSV23 package insert. |
   |However, per CDC and VA, PPSV23 may be given now if, in the judgment of the provider, the patient might not return soon for PPSV23. |
   ```

   The message was changed and the term VA-ZOSTER IMMUNIZATION 1Y used in the branching logic was changed to look back one year:

   ```
   Prior Zoster immunization is no longer a precaution for administration of PPSV23. These vaccines may be given simultaneously or sequentially at any time.
   ```

   2. **Update of Reminder Dialog Group: VA-BFA GP CONSENT**
   Update to BFA template to change signature informed consent to oral informed consent.

   Before:

   ```
   25  Group: VA-BFA GP CONSENT
   25.5  Element: VA-BFA CONSENT OBTAINED
   25.10  Element: VA-BFA CONSENT STILL VALID
   ```

   Signature Informed Consent for BFA:
   - ✗ Signature informed consent was obtained for this procedure (see chart).
   - ☑ Prior signature informed consent documents continuing treatment through this period of time.

   After:

   ```
   25  Group: VA-BFA GP CONSENT
   ☑ Oral Informed Consent obtained for BFA
   ```
3. **New Reminder term VA-TELEDERM MOBILE HF**
   The new reminder term contains two new health factors and categories for Telederm Mobile App:
   a. VA-TDI Category-Mobile App (Category)
      - VA-TDI Mobile App (HF)
   b. VA-TDR Category-Mobile App (Category)
      - VA-TDR Mobile App (HF)

4. **Two updates to Iraq and Afghan Post-deployment Screen Reminder Dialog**
   a. Added 3 new Operations, (Operation New dawn (OND), Operation Inherent Resolve (OIR) and Operation Freedom’s Sentinel (OFS) in instructions and dialog:

   Initial screen update would include only one Yes:

   ![Image of the reminder screen]

   If Yes, then all locations from the prior options display
b. Update of Reminder Dialog Groups: VA-GP OIF EMBEDDED FRAGMENTS and VA-GP OIF EMBEDDED FRAGMENTS CLOSED replaced VA-HF OIF EMBEDDED FRAGMENTS YES with GP HF OIF/OIF EMBEDDED FRAGMENTS YES from the current embedded fragment screening reminder.

The embedded fragments YES option expands to the same choices in the embedded fragments reminder, before when a user clicked Yes, there were no further questions and they had to open the embedded fragments reminder to answer the questions specific to embedded fragments:
5. The TBI reminder was updated to include operation OFS, it had already been updated to add OND and OIR:
