CPRS GUI v28 Installation Requirements and Notes

CPRS GUI version 28 consists of five host files: PSS_1_151.KID, PSS_1_142.KID, CPRS28_REQUIRED.KID, OR_PSJ_PXRM_28.KID and CPRS28RELATED.KID. These five host files contain software that support CPRS GUI v28 functionality. The host files were created to simplify installation at Veterans Health Administration (VHA) facilities and to assist in the phased implementation release method for CPRS v28. CPRS v28 will follow a phase implementation. To see current status and target dates for sites/VISN please refer to the following site:

http://vaww.itfo.portal.va.gov/svcs/itfopmo/pre05/default.aspx

Required Patches

Before you can install CPRS GUI v.28, you must verify that the following required patches are properly installed on your system:

- OR*3.0*67
- OR*3.0*181
- OR*3.0*293 (Released in CPRS28_REQUIRED.KID with CPRS v28)
- OR*3.0*295
- OR*3.0*296
- OR*3.0*302
- OR*3.0*307
- OR*3.0*316
- OR*3.0*330
- GMRC*3.0*66 (Released in CPRS28_REQUIRED.KID with CPRS v28)
- GMRC*3.0*68
- LR*5.2*395
- PSS*1.0*142 (Released as a host file PSS_1_142.KID with CPRS v28)
- PSS*1.0*147
- PSS*1.0*151 (Released as a host file PSS_1_151.KID with CPRS v28)
- SD*5.3*536
- XU*8.0*474
- POLYTRAUMA MARKER 1.0
  - PXRM*2.0*17
  - USR*1.0*33
Required Patches Distributed in the CPRS v28

These patches are required for OR*3.0*280 installation and should be installed prior to the Primary Bundle of CPRS v28. These patches will be released in conjunction with CPRS v28.

- PSS*1.0*151 (Released as a host file PSS_1_151.KID)
- PSS*1.0*142 (Released as a host file PSS_1_142.KID)

Released in CPRS28_REQUIRED.KID
- OR*3.0*293
- GMRC*3.0*66
- GMRA*4*45

Patches Distributed in the CPRS v28 Primary Bundle (OR_PSJ_PXRM_28.KID)

This host file, OR_PSJ_PXRM_28.KID, contains the CPRS GUI v.28 patch (OR*3.0*280) and a required Inpatient Pharmacy and Clinical Reminders patch. When you install this host file, the three patches listed below will be installed on your system.

- PSJ*5.0*226
- PXRM*2.0*16
- OR*3.0*280

Related Patches to Be Installed after CPRS v28

The following patches support functionality in CPRS v28. These patches will be released in conjunction with CPRS v28.

Released in CPRS28_RELATED.KID
- GMRC*3.0*64
- GMTS*2.7*90
- OR*3.0*337
Software Retrieval

Your site will be contacted when to download the necessary files from a FTP directory. CPRS v28 is following a phased implementation. Please reference the following site for information on when your site is targeted for installation

http://vaww.itfo.portal.va.gov/svcs/itfopmo/pre05/default.aspx

PSS_1_151.KID
PSS_1_142.KID
CPRS28_REQUIRED.KID
OR_PSJ_PXRM_28.KID
CPRS28_RELATED.KID
OR_30_280.ZIP

CPRS GUI v28 Software Installation Instructions

This patch should be installed during non-peak hours to minimize disruption. No users should be accessing CPRS during the install as this prevents you from replacing CPRSChart.exe. Installation will take approximately 15 minutes or more, depending on the menu structure at your site.

Listed below are general installation instructions for installing the CPRS GUI v28 KIDS builds and other patches. For specific installation details, refer to the CPRS GUI v28 Software Installation Capture. Additionally, review the National Patch Module messages for each patch for patch-specific information.

1. From the Kernel Installation and Distribution System (KIDS) Menu, select the Installation menu.
2. Use Load a Distribution. You may need to prepend a directory name.
3. If given the option to run any Environment Check Routine(s), answer "YES."
4. From this menu, you may then elect to use the following options:
   - Backup a Transport Global
   - Compare Transport Global to Current System
   - Verify Checksums in Transport Global
5. When ready, select the Install Packages option.
6. When prompted "Want KIDS to Rebuild Menu Trees Upon Completion of Install? Yes/", respond "YES."
7. When prompted 'Want KIDS to INHIBIT LOGONs during the install? YES/", respond "YES."
8 When prompted 'Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES//', respond YES. When prompted to select the options you would like to place out of order, enter the following:

<table>
<thead>
<tr>
<th>Option</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>OR OE/RR MENU CLINICIAN</td>
<td>CPRS Clinician Menu</td>
</tr>
<tr>
<td>OR OE/RR MENU NURSE</td>
<td>CPRS Nurse Menu</td>
</tr>
<tr>
<td>OR OE/RR MENU WARD CLERK</td>
<td>CPRS Ward Clerk Menu</td>
</tr>
<tr>
<td>OR CPRS GUI CHART</td>
<td></td>
</tr>
</tbody>
</table>

9 When prompted 'Delay Install (Minutes): (0-60): 0//; respond '0.'

10 Move the routines to other CPUs if appropriate.

CPRS GUI v28 Software Installation Sequence

1. Make sure all Nationally Released Required patches are installed.
   - OR*3.0*67
   - OR*3.0*181
   - OR*3.0*295
   - OR*3.0*296
   - OR*3.0*302
   - OR*3.0*307
   - OR*3.0*316
   - OR*3.0*330
   - GMRC*3.0*68
   - LR*5.2*395
   - PSS*1.0*147
   - SD*5.3*536
   - XU*8.0*474
   - POLYTRAUMA MARKER 1.0
     - PXRM*2.0*17
     - USR*1.0*33

2. Install PSS*1.0*151. Distributed as PSS_1_151.KID host file.
   Please refer to the CPRS GUI v28 Installation Capture for installation details.

3. Install PSS*1.0*142. Distributed as PSS_1_142.KID host file.
   Please refer to the CPRS GUI v28 Installation Capture for installation details.

4. Install OR*3.0*293, GMRC*3.0*66 and GMRA*4.0*45. Distributed in CPRS28_REQUIRED.KID host file.
   **Note:** The OR*3*293 patch schedules a task which converts the entries that are currently in file 100 on node 9 of each order and puts them into the
new file 100.05. This process may take a long time and thus the patch should be installed when the system is not highly loaded. Also, since the task takes the current data from file 100 it is possible that control characters that existed there could get copied over into the new file as well.

**Further Note:**

As the above said task will create new entries in file 100.05 based off of existing order checks in file 100, file 100.05 has the potential to grow to a large size. Depending on your system configuration, this may cause you to need extra journal files. If you are monitoring the system and notice you need to allocate additional system resources for this task/process you may kill off the task in order to perform the necessary tasks. Once you are ready you will then need to restart the process by running the following at programmer prompt:

```
D TASK^ORY293
```

The task will pick back up where it left off when you killed off the original task.

Please refer to the CPRS GUI v28 Installation Capture for installation details.

---

5. Install OR*3.0*280 (CPRS GUI v28), PSJ*5.0*226 and PXRM*2.0*16: Distributed in OR_PSJ_PXRM_28.KID host file.
   Please refer to the CPRS GUI v28 Installation Capture for installation details.

6. Install GMRC*3.0*64, GMTS*2.7*90 and OR*3.0*337. Distributed as CPRS28_RELATED.KID host file.
   Please refer to the CPRS GUI v28 Installation Capture for installation details.

**Note:**

The OR*3*337 patch adds a new option, IV Additive Frequency Utility [OR IV ADD FREQ UTILITY] to the existing ORDER MENU MANAGEMENT [ORCM MENU]. This new option allows the Clinical Application Coordinators (CACs) to define an additive frequency value to existing Continuous IV Quick Orders. Input from Pharmacy ADPAC is recommended.

7. Distribute CPRSCHART.EXE, CPRS.HLP, CPRS.CNT located in OR_30_280.ZIP.
   These three files should be distributed to the same directory as the brolndmm.dll. Usually, these files are located in the CPRS directory.

8. Place the User and Technical Manual files in a location that can be accessed by CPRS users.
9. After CPRS v28 is installed into production, do the following:
   a) Review the new or changed Parameters exported with CPRS GUI v28 (see listing below). You will need to set the values for all new parameters.
   b) Review the Quick Orders Mail Man message generated when you installed OR*3.0*280 (Subj: Order Check Compiler Status) or generate a new message by running the following option:
      MR Medication Quick Order Report [OR MEDICATION QO CHECKER] which is located on ORDER MENU MANAGEMENT [ORCM MGM]
   c) Correct the Continuous IV quick orders you have identified. Use the utility provided with patch OR*3.0*337.

Parameters Introduced/Changed with CPRS GUI v28

- **Enhance ORWOR CATEGORY SEQUENCE Parameter Definition to Include USER as a Selection (Remedy 105173, CQ 16601)** – Developers added the User-level setting for the parameter.

- **Modify the OR RA RFS CARRY ON Parameter to Include Division, Location, User, Service, System and Package Levels (CQ 16920)** – As requested, this parameter was expanded to have more levels at which it can be set: Package, System, Division, Service, and User.

- **Two CPRS Parameters Have the Same Parameter Description (Remedy 69631, CQ 17700)** – While researching the similar descriptions, developers discovered that the parameter ORW ADDORD INPT was no longer in use. The CPRS GUI v.28 installation will delete this parameter at sites. In addition, the developers added to the ORWOR WRITE ORDER LIST parameter description that it has been superseded by the parameter ORWDX WRITE ORDERS LIST and that it is there only for backwards compatibility.

- **VBECS: Test Site Wants a Parameter for Changing Order of Diagnostic Tests (Remedy 380789, CQ 18426)** – Developers added a new parameter OR VBECS DIAGNOSTIC TEST ORDER to enable sites to rearrange the order of diagnostic tests at the System, Division, or User level. Sites can change sequence numbers to put the list of tests in whatever order the site chooses. The site can also remove a test from the list by deleting the corresponding sequence number.

- **Need Parameter ORWT TOOLS MENU Description Updated for Submenu Info (Remedy 162367, CQ 19054)** – Developers changed the description to reflect the changes to this parameter.
VBECQ QO without a Start Date Is Rejected by VBECQ with a Message Sent to Provider (Remedy 379127, CQ 19097) – Developers corrected the problem and the start date will now be stored and sent correctly. Based on the collection type, the start date will have a default value, which the user can change if needed.
• **VBECS: A Site Requested a Parameter that Removes Collection Date/Time Defaults e.g., NOW (CQ 19167)** – CPRS developers created a new parameter OR VBECS REMOVE COLL TIME to enable the sites to remove the Collection Time Default when entering Diagnostic Test orders. The parameter has no affect on Quick orders. Quick order values will be displayed.

• **VBECS Create a Parameter that Would Allow Sites to Change Diagnostic Side with Blood Component Side (CQ 19266)** – Developers created a new parameter, OR VBECS DIAGNOSTIC PANEL 1ST, to enable users to switch the location of the panels. This parameter can be set at the Package, System, and Division levels.

**Note:** The OR*3*293 patch schedules a task that converts the entries currently in file 100 on node 9 of each order and puts them into the new file 100.05. This process may take a long time and thus the patch should be installed when the system is not highly loaded. Also, since the task takes the current data from file 100 it is possible that control characters that existed there could get copied over into the new file as well.

**Further Note:**
As the above said task will create new entries in file 100.05 based off of existing order checks in file 100, file 100.05 has the potential to grow to a large size. Depending on your system configuration, this may cause you to need extra journal files. If you are monitoring the system and notice you need to allocate additional system resources for this task/process you may kill off the task in order to perform the necessary tasks. Once you are ready you will then need to restart the process by running the following at programmer prompt:

```
D TASK^ORY293
```

The task will pick back up where it left off when you killed off the original task.

Note: The OR*3*337 patch adds a new option, IV Additive Frequency Utility [OR IV ADD FREQ UTILITY] to the existing ORDER MENU MANAGEMENT [ORCM MENU]. This new option allows the Clinical Application Coordinators (CACs) to define an additive frequency value to existing Continuous IV Quick Orders. Input from Pharmacy ADPAC is recommended.

Note: Checksums values for the following routines (ORCHECK, ORCSAVE, ORCSAVE2, ORMBLDPS and ORQ2) have been updated by both OR*3*293 and OR*3*280 patches; therefore, when validating checksums against OR*3*293 patch, the above mentioned routines values have been updated to OR*3*280 checksums.
