Table of Contents

1.   Introduction

The SHRPE product makes enhancements to the Computerized Patient Record System (CPRS) to implement functionality that would assist CPRS users with the treatment of two categories of VA patients:

- Patients eligible for Presumptive Psychosis (PP) benefits.

- Patients with inactive Patient Record File (PRF) records.

1.1.   Purpose

These release notes cover description and comment updates in CPRS (OR) routine and Remote Procedure Call (RPC) made in OR*3.0*437 patch. These updates reflect changes made in DG*5.3*1029 patch that sends additional information to the CPRS application in order to display the following in the Other Than Honorable (OTH) button of the CPRS screen:

- PP status with details.

- Inactive PRF status with the history of changes.

1.2.   Audience

This document targets users and administrators of the CPRS (OR) application and applies to the changes made between this release and any previous release of this software.

2.   This Release

The following sections provide a summary of the new features and functions added, enhancements and modifications to the existing software, and any known issues for OR*3.0*437.

2.1.   New Features and Functions Added

The are no new features and functions added by OR*3.0*437.

2.2.   Enhancements and Modifications to Existing

The following are the enhancements and modifications by OR*3.0*437:

- Updated comments in the existing routine OROTHCL in the CPRS (OR) application to reflect the additional ways how the GET subroutine is used and to provide examples for PP status and inactive PRF.

- Updated the description of the existing OROTHCL GET RPC in the CPRS (OR) application to reflect the additional scenarios for which this RPC is used and to provide examples for PP status and inactive PRF scenarios.

2.3.   Known Issues

None at this time.

2.4. Product Documentation

The following documents apply to this release:

- Deployment, Installation, Back-out, and Rollback Guide (DIBRG).

Appendix A - Acronyms

Acronym	Definition
