Table D-1 New Parameters	29

1. Introduction

The Enterprise Health Management Platform (eHMP) project is a multi-year effort to evolve a modern, service-oriented platform which provides a web-based user interface (UI), clinical data services, and assembles patient clinical data from federated Veterans Health Information Systems and Technology Architecture (VistA) repositories, Department of Defense (DoD), and private partner data sources, reflective of each location providing care to the patient. This federated data is aggregated into an enterprise patient record. eHMP service components will span all application layers, including presentation, business and core services, and data access.

Release 1.2 introduces critical viewer edition enhancements to provide new capabilities to the VA beyond what is available today via CPRS, Joint Legacy Viewer (JLV), and VistAWeb. The system provides enhanced presentations of clinical data that range from trend views that provide a quick snapshot of easily understandable data, to detailed views that provide the user with a full range of options for examining longitudinal patient medical records. Users are able to configure these views into a limitless number of custom workspaces in order to support a variety of clinical workflows. There are multiple pre-configured workspaces available to the user, which are filtered for specific conditions. The workspaces provide the appropriate clinical information for a selected condition (e.g., COPD, Diabetes). Further enhancements included adding the Military History applet, improved text search across the entire patient record, and more extensive online help utilizing an expanded User Guide.

1.1. Purpose

These release notes pull together the approved Change Requests (CRs), feature and/or user story updates, and closed and known defects associated with a release.

This version of the release notes covers the release of eHMP Version 1.2.18 that incorporates the release of eHMP UI 1.2.7.

1.2. Scope

These release notes associated with eHMP Release Version 1.2.18 are the first notes for this release.

2. Release Method

Release execution is dependent upon the type of code released. These consolidated release notes will cover both VistA (Kernel Installation and Distribution System (KIDS)) and eHMP UI (web-based) releases, as both comprise the totality of eHMP as an application. Releases will occur first in Pre-production/Test accounts and then in Production.

The rollout strategy for both types of code depends upon the complexity of the release. Complex releases will be executed as a controlled release by wave, while more routine releases will be executed simultaneously nation-wide, following the standard national patch release process.

VistA releases will occur via FORUM and eHMP UI releases will be executed by the Release Team installing eHMP code into the Austin Information Technology Center (AITC) accounts. Following successful deployment to AITC, the Release Team will install the same version into the Philadelphia Information Technology Center (PITC) Production account for a warm-based failover contingency.

3. Installation Requirements

3.1. Prerequisites for Installation

A prerequisite for installation is that sites are up to date, meaning, that previously nationally released patches have been installed.

3.2. Needed DLLs

Not applicable to eHMP.

3.3. M Triggers

Appendix 1 lists a description of triggers/events that impact eHMP.

3.4. Files

Appendix 2 provides a list of new/modified VA FileMan files that are exported with eHMP KIDS patches.

3.5. Approved Integration Control Registrations

Appendix 3 provides the eHMP Integration Control Registrations (ICRs).

3.6. New Parameters

Appendix 4 provides a list of new parameters for eHMP VistA, exported using the Kernel Parameters File. There are no new parameters for the eHMP UI.

3.7. Operational Data Sync and Patient Data Sync

In the current eHMP system, all operational data from the primary VistA site must be complete before any patient sync can occur. The approach for handling operational data in VistA

Exchange Synchronization (VX-Sync), however, must eliminate blocking where possible, avoid bottlenecks, and contribute to the overall scalability of the system.

Implementation Strategy for VX-Sync

Operational Data Subscription Handler - The purpose of the Operational Data Subscription Handler is simply to initiate the operational data sync. It will accept an operational subscription job which contains a list of sites to subscribe for operational data. For each site in the given list, it will send out the appropriate remote procedure call (RPC) so that the site will begin staging and sending operational data.

Integration of metastamps - Metastamps will be applied to operational data up to the "source" layer so that the system can keep track of the progress of the initial operational data sync per site. An operational data metastamp is used to ensure that all the operational data from a site is received during the initial sync with that site. Operational data does not have a last edit time to be used for the metastamp. Therefore, the operational data metastamp will be produced using the request time instead, similar to secondary site data.

Operational data pathway (Store Operational Data Handler and additions to Vista Site Data Poller) - Data sent by the Vista systems will be received by the Vista Site Data Pollers. The Data Pollers will receive both operational and patient data from the primary sources; however, it is not appropriate for operational data to be sent to the Record Enrichment Handler. Therefore, the Vista-Record-Processor determines which type of data it receives and subsequently send that data on the appropriate pathway. If the handler receives operational data, it will send it to a Store Operational Data Handler. The Store Operational Data Handler will send the operational data to JSON Data Store (JDS) to be stored in the appropriate section of JDS.

Determining when a site is ready to sync patients - The Sync Rules Engine includes rules to make sure that a primary site is not synchronized until its operational data has been successfully loaded.

4. Known Issues

4.1. Known Patient Safety Issues

There are no registered patient safety issues addressed in this version of eHMP.

4.2. Other Known Issues

At the time of this writing, all known issues are listed in Table 4-1.

Table 4-1 Other Known Issues

ID	Name	Severity	Opened Date	Planned Release
DE2248	Slow interaction Performance on the CBW workspace	Critical	9/2/2015	
DE2566	IV&V_User Defined Applet Filters - Drug Class Search works in Medications Review but does not work in Active Meds applet	Medium	9/28/2015	
DE2567	IV&V_User Defined Applet Filter - Filter for Active and Recent Medications does not carry over to the expanded view 'Medications Review'	Medium	9/28/2015	
DE2957	Numeric Lab Results: Dates in graphs overlap in detail view	Low	10/27/2015	
DE3824	Pre-Prod_Workspace 'Author' Field is Not Displaying Correctly	Low	2/19/2016	
DE3851	RDK: Change artifact from zip to tar	Low	2/22/2016	
DE4024	Allergy and Orders applet summary detail view not working	Low	3/7/2016	
DE4130	Depression/Hypertension/Pre-Procedure CBWs - Numeric Lab Results applet: ""Count"" listed twice in filter container	Cosmetic	3/16/2016	
DE4170	Workspace Editor: ""Select A View"" pop-up gets partially obscured by other applets	Low	3/22/2016	

ID	Name	Severity	Opened Date	Planned Release
DE4360	VA-320 - Stacked Graphs has missing headers and one missing column	Low	4/7/2016	
DE4361	VA-320 - An increase in the number of lab results that are not graphed in Stacked Graphs	Medium	4/7/2016	
DE4630	GDT: After selecting dates, cannot select enter to exit date fields	Low	4/29/2016	
DE5242	VA-385 - An error has interrupted the patient synchronization process	Critical	6/10/2016	
DE5319	1.2 Cosmetic: Kodak: Scroll bar is displaying in "" Audiology"" quick look and unable to scroll to view the facility which is being cut off.	Cosmetic	6/15/2016	
DE5360	VA-421 'F281 Inpatient Immunizations Applet - Not able to ADD filter'	Low	6/17/2016	
DE5375	Vitals (Trend/Expanded/Maximized views): Only most recent BMI calculation is displayed when multiple height and/or weight entries are entered in the same day	Low	6/20/2016	
DE5376	1.2 - Cosmetic: ETS_Patient Flag is Missing Scroll Bar	Medium	6/20/2016	eHMP 1.2.x RC31
DE5409	VA-382 - Meds Review data integrity issue (New Test Data Defect)	Medium	6/22/2016	
DE5414	Allergies Detail View Next and Previous buttons don't work	Low	6/22/2016	
DE5450	VA-436 - Unable to get property appletId error	High	6/24/2016	
DE5451	GDF (Timeline Summary) is not displaying the last Date/Events in the timeline when loaded with (ALL-Range)Data	Cosmetic	6/24/2016	
DE5465	1.2 - Cosmetic: Demographics and Primary Care header: arrow pointing in wrong direction	Low	6/27/2016	
DE5632	Vitals Applet: Trend View data does not match after switching to expanded view and back to trend view	Medium	7/11/2016	

ID	Name	Severity	Opened Date	Planned Release
DE5716	ETS: Quick Look tool- tip window displays if there is no dot within the orange diamond.	Medium	7/14/2016	
DE5718	1.2 No double arrows on the horizontal bar for CBWs	Cosmetic	7/14/2016	
DE5720	1.2 No scroll bar on flags on a patients record	Low	7/14/2016	
DE5724	Diabetes Mellitus renders slow in VA Performance environment	Medium	7/15/2016	
DE5725	Meds Review renders slow in VA Performance environment	Medium	7/15/2016	
DE5816	Production - Patient will not sync	High	7/20/2016	
DE5882	Patient Search Logs Missing Demographics As An Error	Medium	7/22/2016	
DE5883	Numeric Lab Results: Lab Results are overlapping.	Cosmetic	7/22/2016	
DE5947	VA-435 Patient demographics errors	Low	7/25/2016	
DE5970	Search box results are not aligned	Low	7/26/2016	
DE6043	Problems Applet- Quick look display Last Updated Value instead of Onset Date	Low	7/29/2016	
DE6045	Stack Graphs: Unable to open details of medications.	Medium	7/29/2016	
DE6110	R 1.2: Console error: View Type: 'undefined' is not available for the undefined applet.	Low	8/2/2016	
DE6148	Need to validate logged in site when changing patient context	High	8/3/2016	
DE6161	User Log In - Performance Issue	High	8/4/2016	
DE6171	Depression workspace from dropdown menu - Performance Issue	Medium	8/4/2016	
DE6175	Hypertension workspace drop down menu - Performance Issue	Medium	8/4/2016	

ID	Name	Severity	Opened Date	Planned Release
DE6196	VA-490 - Inaccurate Filter Results on Documents Applet	Low	8/5/2016	
DE6212	Lab Results - GTDF - Issue	High	8/5/2016	
DE6213	Access eHmp home page - Issue	High	8/5/2016	
DE6238	R10047049FY16 - Slow link between CPRS and eHMP (CCOW)	Medium	8/8/2016	
DE6250	1.2 Orders applet- Bottom scroll arrow is missing from Expanded view.	Medium	8/8/2016	
DE6270	VA-494 New Workspace has Problems applets in it	Low	8/9/2016	
DE6286	VA - 497 - Patients coming up for confirmation without being selected	High	8/10/2016	
DE6287	1.2 Appointments&Visits applet: Bottom scroll arrow is missing from applet.	Low	8/10/2016	
DE6290	VA-492 Status Error - 500 received when searching wards	Medium	8/10/2016	
DE6294	VA -493 - Things that are not outpatient meds are showing up in the outpatient meds section of Meds Review applet	Medium	8/10/2016	
DE6341	Allergies applet : Next and Previous buttons always take user to first and last records in the applet when first clicked	Medium	8/14/2016	
DE6345	1.2 - Functionality: Narrative Lab Results Applet: Type Column is Not Sorting	Low	8/15/2016	
DE6347	Ensure PID VistA Site Matches User's Authenticated VistA Site	Medium	8/15/2016	
DE6463	Production_Photo not showing in eHMP	Medium	8/22/2016	
DE6470	(Copy of) Numeric Lab Results: Details form icon for a lab test in a panel grouping does not work after the applet view is changed	Low	8/22/2016	

ID	Name	Severity	Opened Date	Planned Release
DE6477	I9986543FY16 - User cannot log into eHMP at Madison to perform smoke testing	High	8/22/2016	
DE6496	Update 1.2 user guide to latest version	Low	8/23/2016	
DE6527	Clear Object Test	Medium	8/24/2016	
DE6528	Nationwide Search Failure, Portland	High	8/24/2016	
DE6530	Global Date Timeline Filter (Meds Review)	Medium	8/24/2016	
DE6553	1.2 VA-503 - The ""PDF Version"" button is missing	Medium	8/25/2016	eHMP 1.2.x RC31
DE6584	CPRS - 'Library Not Registered' error message	Medium	8/26/2016	
DE6597	Navigation to eHMP Production splash screen exceeds 5 seconds	Low	8/29/2016	
DE6631	VA-502 CCOW - Patient Context After Logging Back On	Medium	8/31/2016	
DE6654	Associated conditions for some Problems are not working	Medium	9/1/2016	
DE6657	Clinics list performance issues	Medium	9/1/2016	
DE6658	Ward List performance issues	Medium	9/1/2016	
DE6680	Prod_Loma Linda_Medications are not displayed when maximizing the A&R applet for patient with large amount of Meds (2000+)	High	9/2/2016	
DE6727	1.2-Workspace manager-Tooltip for default workspace does not display	Low	9/6/2016	
DE6741	Documents applet (Pre-Prod): applet doesn't load if a large amount of document records should be returned	High	9/7/2016	
DE6745	Documents: ""Added Comment"" Activity created within CPRS Missing within eHMP Consult Detail View	High	9/7/2016	

ID	Name	Severity	Opened Date	Planned Release
DE6767	Numeric Lab Results Applet: Graph in the numeric lab results applet is cut off on the far right.	Low	9/8/2016	
DE6795	1.2 Orders Applet not filtering by GDF at the coversheet workspace	Medium	9/9/2016	
DE6831	(VA Reported Issue) PreProd: Search Record Inconsistencies	High	9/12/2016	
DE6833	Record Search displays negative number when changing the date filter	Medium	9/12/2016	
DE6869	VA-515 Empty Data Source Modal in eHMP	High	9/14/2016	eHMP 1.2.x RC31
DE6881	New JDS index for CWAD filter (performance)	Medium	9/14/2016	
DE6889	User Metrics Visuals__ Successful Unique User Logins AND Successful Total Unique User Logins DO NOT Agree	Medium	9/15/2016	
DE6896	Encounters quick look will not close	Medium	9/15/2016	
DE6911	Sync status incomplete on footer after loadForced call	High	9/15/2016	
DE6927	CWADF Postings: Hover Over Text Lingers Even Though Mouse is Moved Over a Different Posting Category	Cosmetic	9/16/2016	
DE6933	Search Record: Search on ""em"" Returns Numeric Lab Results that Were Identified as Matches Based on """" HTML tags	Medium	9/16/2016	
DE6942	VA-514 Not all Progress Notes display within eHMP	High	9/19/2016	eHMP 1.2.x RC31
DE6960	Res-server logs need to contain records counts	High	9/20/2016	
DE6969	VA-512 Search results do not display the name of inactive consults	High	9/20/2016	
DE6971	(1.2) Military History entries do not preserve the way the user enters in data	Medium	9/21/2016	eHMP 1.2.x RC31

ID	Name	Severity	Opened Date	Planned Release
DE6975	I10568329FY16 - MAXSTRING error STRING+6^HMPD in Minneapolis	Medium	9/21/2016	
DE6979	Remove VistA-specific fields from basis demographics	Medium	9/21/2016	
DE6982	1.2 DIT Meds Review: Incorrect ""Stop Date/Time"" for infusion order	High	9/21/2016	eHMP 1.2.x RC31
DE6985	(1.2) UDW - User can create new user defined workspace without any name	Medium	9/22/2016	eHMP 1.2.x RC31
DE6986	Update deployment to write large documents directly to NFS file share	Medium	9/22/2016	
DE6988	Global VPRJSES empty causes XpoLog User Session to not work	High	9/22/2016	
DE6990	TIMELINE : Filters on Timeline Applet does not give all the data (1.2)	Medium	9/22/2016	eHMP 1.2.x RC31
DE7009	CWAD Display/Format not retained from CPRS - I10765623FY16	Medium	9/27/2016	
DE7019	Active & Recent Medications Applet: Unable to Filter Status and Facility columns	High	9/28/2016	eHMP 1.2.x RC31
DE7026	1.2 Pre-Prod: Can't Add Graphs to Stacked Graphs Applet in UDW	High	9/28/2016	
DE7027	Pre-Prod Record Search: first search appears to time out (no results found), second search of same term yields results	High	9/29/2016	
DE7028	Record Search: Row Disappears After Expansion	High	9/29/2016	
DE7029	Record Search: Results in Rows Increase After Expanding	High	9/29/2016	
DE7032	Details view in Orders Applet has a grid for Blood Bank Orders	Cosmetic	9/29/2016	
DE7033	The Sorting option doesn't work in Narrative Lab results	Medium	9/29/2016	

ID	Name	Severity	Opened Date	Planned Release
DE7036	Problems: Quicklook View Within Tile Displays Incorrect Facility Code for New Problems	Medium	9/30/2016

DE7226	VA-567 : Active and Recent Meds applet displaying old completed medications	Medium	11/23/2016	
DE7244	ETS_RC30_UI Performance has degraded from RC26	High	11/30/2016	
DE7246	Birthdates without month or days will result in invalid calculations	Medium	11/30/2016	

5. Included New Functionality and Defect Fixes

5.1. Included User Stories

No user stories were implemented in eHMP Release 1.2.18.

5.2. Fixed Defects

Defects specifically resolved in eHMP Release 1.2.18 are listed in Table 5-1.

Table 5-1 Fixed Defects

ID	Name	Severity	Opened Date	Test Method / Test Case Identifier
DE3826	Numeric Lab Results- quick menu and details view works intermittently when switching between maximized and minimized views	Medium	2/19/2016	
DE4023	Discontinued Medications do not display correct value within the applets	Medium	3/7/2016	
DE4173	Reports- Note text in reports is missing from the report in eHMP	Critical	3/22/2016	
DE5298	Text Search Not Returning Results	High	6/14/2016	
DE5316	Creating an Infusion Order prevents Active & Recent Applet Meds from loading in 1.2 DIT	High	6/15/2016	
DE5440	Military applet is missing the help icon in both environments 1.2 DIT and Combo	Medium	6/24/2016	
DE5717	Med Review filter doesn't persist in a CBW after maximizing	Medium	7/14/2016	
DE5854	Possible memory leak or garbage collection issue detected during endurance stress test against single RDK VM	High	7/21/2016	
DE5880	SNOMED CT external site unreachable in VA environments	Medium	7/22/2016	
DE5917	RDK r1.2 logs sensitive information at info level for suggestSearch	High	7/22/2016	
DE5932	CCOW- Context link to vault server not set in eHMP	Medium	7/24/2016	
DE5983	eHMP using old version of vista-js node module.	Medium	7/26/2016	
DE6003	R1.2: Patient information is not cleared after a user logs out	High	7/27/2016	
DE6020	JDS exists filter does not return all data	Medium	7/28/2016	
DE6041	Unable to access patient record following nationwide search if one of the VX-Sync sources fails/unavailable	Medium	7/29/2016	

ID	Name	Severity	Opened Date	Test Method / Test Case Identifier
DE6112	Pre-Prod: Performance Lag when loading clinics - JDS	High	8/2/2016	
DE6119	Document localTitle field was received as numeric field rather than a string field.	Critical	8/3/2016	
DE6120	Add try/catch to Job Framework so that any unexpected exceptions when processing jobs are caught	High	8/3/2016	
DE6121	Port R2.0 Shutdown solution to R1.2 (See DE5262)	High	8/3/2016	
DE6188	Patient Search - Performance Issue	High	8/5/2016	
DE6275	VA Prod - Encounters is not showing charts	High	8/9/2016	
DE6281	Load Clinic data once per user session	Critical	8/10/2016	
DE6282	Add index for get-op-data RDK resource	Medium	8/10/2016	
DE6291	suggestSearch.js logs the entire rdk config	Medium	8/10/2016	
DE6295	Disable ODS check in RDK	Critical	8/10/2016	
DE6301	RDK Logging performance	Medium	8/10/2016	
DE6306	get-op-data uses inefficient JDS queries	Medium	8/11/2016	
DE6308	RDK Operational Data Interceptor Performance Issue	High	8/11/2016	
DE6309	Pre-Prod/Prod: Performance Lag when loading clinics - RDK	Medium	8/11/2016	
DE6310	Sync Interceptor Clears and Re-syncs patients 24 hours after Sync	Critical	8/11/2016	
DE6313	Fix OrderNumber Transformation	Critical	8/11/2016	
DE6323	Transform Status for DOD Orders	Medium	8/11/2016	
DE6339	Debug 2 RDK tests that are failing in Jenkins due to Cache upgrade	High	8/12/2016	
DE6349	Port Solr query execution in RDK from r2.0 to r1.2	High	8/15/2016	
DE6350	Remove unnecessary ICN/PID validation from sync interceptor	Medium	8/15/2016	
DE6455	UI makes REST call on every navigation to refresh patient data	Medium	8/19/2016	
DE6464	Production_Hampton_Patient with appointment is not displaying in clinic patient list	High	8/22/2016	
DE6475	DoD Documents are blank within the details view in 1.2 DIT	High	8/22/2016	
DE6483	r1.2 RDK Uses Incorrect Document Endpoint Port	High	8/23/2016	

ID	Name	Severity	Opened Date	Test Method / Test Case Identifier
DE6501	VistA Sites with numeric hash codes and leading zeros crash site poller	High	8/23/2016	
DE6511	Resource server performance failed to meet IOC performance requirement	High	8/23/2016	
DE6518	Record Search performance failing in San Antonio	High	8/24/2016	
DE6534	1.2 Cleanup unused writeback support/applets (performance)	Medium	8/24/2016	
DE6576	R10425916FY16 - Cannot receive or see Columbia Missouri reminders (R1.2)	Critical	8/26/2016	TC6429
DE6604	RDK UA tracker not sending data6	Medium	8/29/2016	
DE6618	2.0-Search record-Invalid search result returns 500 internal server error instead of displaying ""No results""	Medium	8/30/2016	
DE6621	Production_CCOW_ActiveX Not Engaging from CPRS to eHMP	High	8/30/2016	
DE6635	Document Load Performance 1.2/2.0	Medium	8/31/2016	
DE6640	1.2 DIT_Error with Nationwide Search	High	8/31/2016	
DE6641	Modify RDK sync interceptor (synchronize.js) to handle case where sync is in progress and not send redundant sync request	Medium	8/31/2016	
DE6655	1.2 Scroll bar down arrow is not visible in expanded applet	Medium	9/1/2016	
DE6661	STX Production_Problems do not display to eHMP	Critical	9/1/2016	
DE6664	Modify 1.2 RDK jdsSync subsystem (jdsSync.js) to use simple sync status	Medium	9/2/2016	
DE6688	Session ID missing from RDK Logging	High	9/2/2016	
DE6751	Creating a Workspace Named ""Problems"" Disables the ""Problems Applet""	High	9/7/2016	
DE6753	Applet Filter: Medication Review applet filter container is open in all CBWs	Low	9/7/2016	
DE6784	Vista-js Add support for multidivisional users	High	9/9/2016	
DE6794	1.2 _Narrative Lab Results, Documents, Reports: Missing Detail View	Medium	9/9/2016	
DE6799	Active Meds and RDK looping unnecessarily over large data sets	High	9/9/2016	
DE6822	osync crashes in production	High	9/12/2016	

ID	Name	Severity	Opened Date	Test Method / Test Case Identifier
DE6843	Encounters Gist: Cannot sort by visit Type, Hx Occurrence (TypeError: Cannot read property 'toLowerCase' of undefined)	Medium	9/13/2016	
DE6852	ETS 1.2: Medication review: There is an unnecessary comma after the word Garlic	Cosmetic	9/13/2016	
DE6887	eHMP 1.2 Stored Cross-Site Scripting (XSS) Vulnerabilities	Critical	9/15/2016	

5.3. Fixed VA Defects

VA reported defects specifically resolved in this version are listed in Table 5-2.

Table 5-2 Fixed VA Defects

VA ID	ID	Name	Severity	Opened Date	Test Method / Test Case Identifier
VA-186	DE2813	Patient record flags not correctly displayed	Critical	10/13/2015	
VA-358, VA-487, VA-489	DE4841	1.2 and 2.0: - VA-358 Nationwide search instructions incomplete and cause confusion.	Cosmetic	5/17/2016	
VA-382	DE5408	VA-382 - Meds Review data integrity issue (RDK/UI defect)	Critical	6/22/2016	
VA-500	DE5956	(1.2 only) Pre Prod is displaying the wrong error message when Access/Verify codes need to be changed	Medium	7/25/2016	
VA-491	DE6288	VA-491 - Vitals applet performance slow	Medium	8/10/2016	
VA-501, VA- 505	DE6525	VA-501 -Synching and Loading Patient Data Issues	Critical	8/24/2016	
VA-506	DE6772	VA-506 Numeric Lab Results Overview Incorrect value for ""Last"" Column (1.2)	Critical	9/8/2016	
VA-516	DE6928	VA-516 Document title is all lowercase	Cosmetic	9/16/2016	

A. Appendix 1 – M Triggers

Table A-1 details the M Triggers.

Table A-1 M Triggers

M Triggers	
Protocol Name	New/Modified/Deleted
HMP DGPF ASSIGN FLAG	Modified
PROTOCOL List	NOV 15, 2016@20:00 PAGE 1
NUMBER: 6193	NAME: HMP DGPF ASSIGN FLAG
TYPE: action	CREATOR: PROGRAMMER,ONE
PACKAGE: HEALTH MANAGEMENT PLATFORM	
DESCRIPTION: Used to trigger a JDS update when the DGPF ASSIGN FLAG action protocol is used. A patient must have been selected and the DFN value is in DGDFN.	
ENTRY ACTION: I \$G(DGDFN),\$L(\$T(POST^HMPEVNT)) D POST^HMPEVNT(DGDFN,"patient",DGDFN)	

B. Appendix 2 – Files

Table B-1 details the new/modified VA FileMan files that are exported with eHMP KIDS patches.

VA FileMan Files

'C' FOR corruption;
'I' FOR informational;
'M' FOR missing entry;
'O' FOR other;
LAST EDITED: JUN 13, 2016
HELP-PROMPT: Indicate the type of event that was logged.
This value is optional.
DESCRIPTION: A set of codes that will be used to classify
the type of event logged.

C - Corrupt entry was found. For example, the
value in a field would not pass
the Input Transform.

I - Informational. An event of note that would
not cause an error.
For example, an entry was missing a field
that was expected, but not required.

M - Missing entry. An internal entry number
(IEN) was found without a corresponding
entry. Also called a "broken pointer" or
"dangling pointer".

O - Other type of event. Use this code for
all other event types.

CROSS-REFERENCE: 800003^ATYP

D. Appendix 4 – New Parameters

Table D-1 details the new parameters.

Table D-1 New Parameters

New Parameters	
PARAMETER DEFINITION List	NOV 15, 2016@20:14 PAGE 1

NAME: HMPMON DASHBOARD UPDATE	DISPLAY TEXT: HMP Dashboard Update Rate
VALUE DATA TYPE: numeric	VALUE DOMAIN: 3:300
VALUE HELP: Enter a number between 3 and 300 seconds inclusively.	
DESCRIPTION:	
This parameter controls the behavior of option eHMP Dashboard [HMPMON DASHBOARD]. Most of this option's prompts time out normally, but its Action Prompts control monitoring screens that auto-update the screen when they time out, to provide dashboard functionality for monitoring the Vista-side eHMP software.	
This parameter ships with three settings:	
1) a package default setting, defined by the eHMP development team using parameter template HMPMON DASHBOARD PKG, accessed through menu option Set Package's Dashboard Auto-update Rate [HMPMON SET PKG DASHBOARD RATE], which should not be changed at local sites;	
2) a system setting that will override the package setting; it can be defined by the local system manager using parameter template HMPMON DASHBOARD SYS, accessed through menu option Set System's Dashboard Auto-update Rate [HMPMON SET SYS DASHBOARD RATE];	
3) a user setting that overrides the other two; it is defined by the current user using parameter HMPMON DASHBOARD USR, accessed by the dashboard action Change Auto-update Rate action within option eHMP Dashboard [HMPMON DASHBOARD].	
It is usually set to 3 to 30 seconds, but can be set as high as 300 seconds to support demonstration or teaching situations. If it is wholly absent, the user's default Vista time-out rate is used.
