Preface

The Veterans Health Information Systems and Architecture (VistA) Laboratory Anatomic Pathology (AP) Alerts and Computerized Patient Record System (CPRS) Report Changes Patch LR*5.2*365 Version 5.2 User Guide provides the Department of Veterans Affairs Medical Centers (DVAMCs) Information Resource Management (IRM) and Laboratory staff with a straightforward means for using the software product.

Staffing Requirements:

IRM Staff

IRM staff is required for installing and supporting the VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 software product.

Laboratory Staff

Laboratory staff is required for supporting and using the VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 software product.

Intended Users:

The intended users of the VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 software product are VA Medical Center's laboratory staff.

VistA BLOOD BANK SOFTWARE V5.2 DEVICE PRODUCT LABELING STATEMENT

Blood Bank Clearance:

EFFECT ON BLOOD BANK FUNCTIONAL REQUIREMENTS: Patch LR*5.2*365 does not contain any changes to the VISTA BLOOD BANK Software as defined by VHA DIRECTIVE 2004-053 titled VISTA BLOOD BANK SOFTWARE VERSION 5.2.

EFFECT ON BLOOD BANK FUNCTIONAL REQUIREMENTS: Patch LR*5.2*365 does not alter or modify any software design safeguards or safety critical elements functions.

RISK ANALYSIS: Changes made by patch LR*5.2*365 have no effect on Blood Bank software functionality, therefore RISK is none.

VALIDATION REQUIREMENTS BY OPTION: Because of the nature of the changes made, no specific validation requirements exist as a result of installation of this patch.

Orientation

This section addresses package-or audience-specific notations or directions (e.g., symbols used to indicate terminal dialogues or user responses).

Screen Captures

The computer dialogue appears in Courier font, no larger than 10 points.

Example: Courier font 10 points

User Response

User entry response appears in boldface type Courier font, no larger than 10 points.

Example: Boldface type

Enter Symbol

User response to computer dialogue is followed by the <ENTER> symbol that appears in Courier font, no larger than 10 points, and bolded.

Example: <ENTER>

Tab Symbol

User response to computer dialogue is followed by the symbol that appears in Courier font, no larger than 10 points, and bolded.

Example: <Tab>

VistA Website Locations:

VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 User Guide is accessible in Portable Document Format (PDF) and MS Word (DOC) Format at the following VistA website locations:

Introduction

Overview

VistA Laboratory Anatomic Pathology (AP) Alerts and Computerized Patient Record System (CPRS) Report Changes Patch LR*5.2*365 software release addresses 7 Patient Safety Issues (PSIs). Individual reports are displayed as one continuous scrolling display. A single row of the equal (=) sign is used to separate one report from the next. Additionally, the text- “Next SURGICAL PATHOLOGY Specimen...” is also used to separate reports. However, with multiple reports and the use of single dashed lines in each report, it can be difficult to distinguish the separation between AP reports. A new API has been created (EN^LR7OSAP4) for retrieving a detailed report for an individual Anatomic Pathology Specimen. This helps resolve the PSI by allowing a package interface, like CPRS, to present each accession and related specimens to the user and then display the related report for the accession/specimens.

Patches OR*3*210 and LR*5.2*311, implemented informational alerts generated for AP pathology results. Recipients of VA view alerts for Anatomic Pathology complained that clicking on the alert did not open up or display the report to them in the same manner as other lab alerts are displayed. Once the recipients click on the alert, it is gone from view. If they did not make a note as to who the patient was, they cannot get the alert back. Providers can easily erase the alerts without recording the patient’s name. A potential malignancy report could be missed. Problem was identified from complaints of surgeons and oncologists/hematologists. To correct this issue the new action alert is provided to display AP reports. The Anatomic Pathology informational alerts are now modified into action alerts that upon processing will direct the user to the associated report in the Clinical Reports section under the Reports tab of the CPRS GUI or to a List manager display of the associated report results.

This patch provides action alerts for Anatomic Pathology tests including Electron Microscopy (EM), Surgical Pathology (SP), Cytology (CY), and Autopsy (AU) results. These action alerts are sent automatically to the Ordering Provider, Primary Physician, or Primary Care Provider at the time the report is released. If requested, alerts may be sent to additional person(s) and mail group(s). These additional alerts are also action alerts. This functionality is now the same whether electronic signature (ES) is turned ON or OFF. Before this patch, additional alerts could not be requested with electronic signature (ES) turned OFF.

This patch provides the **new** Send an AP Alert [LRAP ALERT] option that is available on the Verify/release menu, anat path [LRAPVR] menu which allows a pathologist to send an action alert to a provider, other individuals, or mailgroup(s) after the report has been released. Before this software release if the user did not answer YES to the prompt to send an alert after a report was released, an alert could not be sent unless the AP report was reopened and re-released.

Test Sites

VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 is tested by the following Veteran Affairs Medical Centers (VAMCs) and Health Care Systems (HCS):

Test Sites (At least One Integrated Site)	Operating System Platform	Test Site Size

Enhancements and Modifications

VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 software release contains the following enhancements and modification:

Enhancements:

New Application Program Interface (API)

1. **New** Application Program Interface (API) EN^LR7OSAP4 is created for retrieving a detailed Anatomic Pathology report for an individual AP specimen. This replaces the existing AP reports format within CPRS GUI Reports Tab, Available Reports, Anatomic Path Reports menu with a more clinician-friendly format.

New Action Alerts

Action alerts are automatically sent upon verification of an AP report for all four Anatomic Pathology sections (i.e., Electron Microscopy (EM), Cytology (CY), Surgical Pathology (SP), and Autopsy (AU)) as specified by the pathologist whether electronic signature is turned **ON or OFF**.

Action alerts are automatically sent to both the Ordering Provider (as specified for the accession) and the patient's Primary Care Provider (PCP) (if specified) after an AP report is verified and released whether electronic signature is turned **ON or OFF** for any specified Anatomic Pathology section.

Action alerts displays the patient's last name, first name, and first letter of the patient's last name followed by the last four digits of the patient's social security number.

Example: LRPATIENT, FOUR (**L1111**): Surgical Pathology results available.

New Send an AP Alert [LRAP ALERT] option

The **new** 'Send an AP Alert [LRAP ALERT] option' allows a pathologist to send an action alert to a provider, additional individuals and/or mail group(s) after an AP report is verified and released. This **new** option is located on the Verify/release menu, anatomic pathology [LRAPVR] menu and **locked** with the LRVERIFY key.

Enhanced Verify/release reports, anat path [LRAPR] option

The **enhanced** Verify/release reports, anat path [LRAPR] option automatically sends action alerts to the ordering provider, primary physician, and primary care provider (when specified) at the time the AP report is verified and released. This option also contains the **new** ‘Send the alert to additional names or mail groups? NO//’ prompt. When answered ‘YES’ at this **new** prompt action alerts are automatically sent to additional individuals or mail groups (i.e., as specified by the user) and a **new** alert message is display at this time whether electronic signature is turned **ON or OFF** for any specified Anatomic Pathology section.

Example: Send the alert to additional names or mail groups? NO//**Yes<ENTER>**
Enter name or mail group: LRA LRAPDEVELOPER, TWO
Alerts have been sent to the specified additional users.

Enhanced Supplementary report release, anat path [LRAPRS] option

The **enhanced** Supplementary report release, anat path [LRAPRS] option automatically sends action alerts to the ordering provider, primary physician, and primary care provider (when specified) at the time the AP report is verified and released. This option also contains the **new** ‘Send the alert to additional names or mail groups? NO//’ prompt. When answered “YES” at this **new** prompt action alerts are automatically sent to additional individuals or mail groups (i.e., as specified by the user) and a **new** alert message is display at this time whether electronic signature is turned **ON or OFF** for any specified Anatomic Pathology section.

Example: Send the alert to additional names or mail groups? NO//**Yes<ENTER>**
Enter name or mail group: LRA LRAPDEVELOPER, TWO
Alerts have been sent to the specified additional users.

Modification

Modified Informational Alerts

Patches OR*3*210 and LR*5.2*311 implemented informational alerts for anatomic pathology test results. Informational alerts are now **modified** into action alerts.

Modified Verify/release reports, anat path [LRAPR] option

The Verify/release reports, anat path [LRAPR] option is **modified** to **remove** the prompt ‘Do you wish to send an alert? NO//’ because action alert(s) are automatically sent upon verification of the AP report to the Ordering Provider (on file for the accession) and the Primary Care Provider (PCP) (if one is on file) whether the electronic signature is turned **ON or OFF**.

Use of the Software

This section of the VistA Laboratory AP Alerts and CPRS Report Changes Patch LR*5.2*365 User Guide contains information that allows the END USERS to accurately operate the enhanced software.

New VistA Laboratory Option:

Send an AP Alert [LRAP ALERT] option

The **new** 'Send an AP Alert [LRAP ALERT] option' allows a pathologist to send an action alert to an individual(s) or mailgroup(s) after an AP report is verified and released. The **new** 'Send an AP Alert [LRAP ALERT] option' is located on the Verify/release menu, anatomic pathology [LRAPVR].

NOTE: The **new** Send an AP Alert [LRAP ALERT] option is locked with the LRVERIFY key.

Example: Send an AP Alert [LRAP ALERT] option with patient's results displayed via the View Alert option.

Enhanced and Modified VistA Laboratory Options

1. Verify/release reports, anat path [LRAPR] option

This option is used to verify/release pathology reports. The user is prompted for the accession number of the report to be released. If electronic signature is not activated, the user is asked if the report is to be released, yes or no. If electronic signature has been activated, the option is used to electronically sign and store pathology reports. It also allows CPT coding to be performed regardless of the release status of the chosen report. Another feature is the ability to print SNOMED codes for the given accession/report. Action alerts are sent automatically to the ordering provider and the primary physician or PCP at the time the report is released. If requested, alerts may be sent to additional person(s). These additional alerts are also action alerts. These alerts are sent whether electronic signature is on or off.

1. The ‘Verify/release reports, anat path [LRAPR] option’ is **modified** to remove the “Do you wish to send an alert? NO//” prompt because the **new** action alerts are automatically sent upon verification and release of AP reports to the ordering provider (as specified for the accession) and the primary care provider (PCP) (when specified) whether electronic signature is turned **ON** or **OFF**.

2. The ‘Verify/release reports, anat path [LRAPR] option’ is **enhanced** to include all four Anatomic Pathology sections (i.e., Electron Microscopy (EM), Cytology (CY), Surgical Pathology (SP), and Autopsy (AU)). Previously EM and Autopsy were **not** included in the following AP sections:

Example: Select ANATOMIC PATHOLOGY SECTION: ?<ENTER>
 Electron Microscopy
 Cytology
 SURGICAL PATHOLOGY
 Autopsy

3. The ‘Verify/release reports, anat path [LRAPR] option’ is **enhanced** to automatically send action alerts upon verification and release of AP reports to both the ordering provider (as specified for the accession) and primary care provider (PCP) (when specified). whether electronic signature is turned **ON** or **OFF**.

Example: Alert will be sent to: LRORDERING PROVIDER, EIGHT
 LRPRIMARY CARE PROVIDER, ONE

4. The ‘Verify/release reports, anat path [LRAPR] option’ is **enhanced** upon verification and release of an AP report to include the following two **new** prompts and a **new** display message whether electronic signature is turned **ON** or **OFF**.

Example: Send the alert to additional names or mail groups? NO//**Yes**<ENTER>
 Enter name or mail group: LRA LRAPDEVELOPER, TWO
 Alerts have been sent to the specified additional users.

5. The **new** action alerts will display the patient’s last name, first name, and first letter of the patient’s last name followed by the last four digits of the social security number.

Example: LRPATIENT, FOUR (L1111): Surgical Pathology results available.

Example #1: Verify/release reports, anat path [LRAPR] option when Electronic Signature turned **ON** and action alerts are automatically being sent to specified providers, additional individuals, and mail groups.

2. Supplementary report release, anat path [LRAPRS] option

This option releases supplementary reports for Surgical Pathology, Cytopathology, Electron Microscopy, or Autopsy. If all supplementary reports that exist for the chosen accession have already been released or if no supplementary reports exist for the accession, the user will be notified. If electronic signature is not activated, the user is asked if the report is to be released, yes or no. If electronic signature has been activated, the option is used to sign and store the supplementary report. Action alerts are sent automatically to the ordering provider and the primary physician or PCP at the time the supplementary reports are released. If requested, alerts may be sent to additional person(s). These additional alerts are also action alerts. These alerts are sent whether electronic signature is on or off.

Example #1: Supplementary report release, anat path [LRAPRS] option when Electronic Signature turned **ON** and action alerts are automatically being sent to specified providers and additional individuals and mail groups.

Glossary

This Glossary contains terms and their definitions, acronyms, and phrases that are used throughout the VistA Laboratory environments:

Glossary of Terms	Definitions
ADPAC:	Automated Data Processing Application Coordinator
AP:	Anatomic Pathology
API:	Application Program Interface
AU:	Autopsy
CPRS:	Computerized Patient Record System
CY:	Cytology
EM:	Electron Microscopy
ES:	Electronic Signature
GUI:	Graphic User Interface
HCS:	Health Care Systems
HL7:	Health Level Seven
ICD-CM	International Classification of Diseases, Clinical Modification
KIDS:	Kernel Installation & Distribution System
LAN:	Local Area Network
LEDI:	Laboratory Electronic Data Interchange
MUMPS:	Massachusetts General Hospital Utility Multi-Programming System
OI:	Office of Information
NLTF:	VA National Laboratory Test File

Glossary of Terms	Definitions
PIMS:	Patient Information Management System
PLMS:	Pathology and Laboratory Medicine Service
PSI:	Patient Safety Issue
PTF:	Patient Treatment File
SP:	Surgical Pathology
TCP/IP:	Transmission Control Protocol/Internet Protocol
TIU:	Text Integration Utilities
UI:	Universal Interface
VA:	Department of Veterans Affairs (never use DVA)
VAMC:	Department of Veterans Affairs Medical Centers
VAO:	VA Office
VISN:	Veterans Integrated Service Network
VistA:	Veterans Health Information Systems and Architecture
