| Appendix D.4. Remove Field 301 from File 55..... | 34 |
| Appendix D.5. Remove Fields 8-11 from File 603.03..... | 35 |

1. Introduction

This document describes how to deploy and install the multi-build MENTAL HEALTH NCC PROJECT 5.01 (which includes patches YS*5.01*122, PSO*7.0*457, PSJ*5.0*327, and OR*3.0*427) and how to back out the product.

1.1. Purpose

The purpose of this plan is to provide a document that describes how, where, and when the MENTAL HEALTH NCC PROJECT 5.01 multi-build will be installed. Also, the document includes the steps describing how the multi-build can be backed out and the software rolled back, if necessary. The plan also identifies resources and includes communications plan with the rollout schedule.

1.2. Dependencies

All application, system, financial and other dependencies for deployment of the MENTAL HEALTH NCC PROJECT 5.01 have been confirmed and there are no issues. The prerequisite application dependencies include:

- YS*5.01*92: Clozapine Updates
- OR*3*243: CPRS GUI 27
- PSO*7*422: Health Product Sustainment
- PSO*7*518: Mocha 2.1B Warranty Issues
- PSO*7*526: Health Product Sustainment
- PSO*7*537: Health Product Sustainment
- PSO*7*550: Inbound ERX
- PSJ*5*54:
- PSJ*5*344: Health Product Sustainment
- PSJ*5*353: CAS-RXSU2
- PSJ*5*355: Health Product Sustainment
- PSJ*5*357: Health Product Sustainment
- PSJ*5*366: CAS MPDU BUILD 4
- PSJ*5*367: Health Product Sustainment
- PSJ*5*378: Health Product Sustainment

1.3. Constraints

MENTAL HEALTH NCC PROJECT 5.01 is expected to be installed on existing VistA platforms. The hardware may reside at local or regional data centers. MENTAL HEALTH NCC PROJECT 5.01 utilizes existing nationally released security controls to control access.

2. Roles and Responsibilities

Table 1 Deployment, Installation, Back Out and Rollback Roles and Responsibilities

| ID | Team | Phase/Role | Tasks |
|----|-----------------------|------------|--|
| 1 | Field Operations (FO) | Deployment | Plan and schedule deployment (including orchestration with vendors) |
| 2 | FO | Deployment | Determine and document the roles and responsibilities of those involved in the deployment. |

| ID | Team | Phase/Role | Tasks |
|----|------|-----------------|--|
| 3 | FO | Deployment | Test for operational readiness |
| 4 | FO | Deployment | Execute deployment |
| 5 | FO | Installation | Plan and schedule installation |
| 6 | FO | Installation | Ensure authority to operate and that certificate authority security documentation is in place |
| 7 | FO | Installation | Validate through facility POC to ensure that IT equipment has been accepted using asset inventory processes |
| 8 | FO | Installations | Coordinate training |
| 9 | FO | Backout | Confirm availability of backout instructions and backout strategy (what are the criteria that trigger a backout) |
| 10 | FO | Post-deployment | Hardware, Software and System Support |

3. Deployment

The deployment is planned as a standard VistA National Patch Module patch rollout. Once approval has been given for national release, then MENTAL HEALTH NCC PROJECT 5.01 patches will be released via the National Patch Module and will be available for installation and deployment at all sites. The scheduling of test/mirror installs, testing, and the deployment to production will be at the site’s discretion. It is anticipated there will be a 30-day compliance period.

The National Clozapine Coordination (NCC) solution provides FDA-compliant clozapine dispensing for inpatients. A National Release is planned for April 2019 after testing has been successfully completed at two IOC Sites.

Deployment will be performed by the local or regional staff or and supported by team members from one or more of these organizations: Enterprise Systems Engineering (ESE), Field Operations (FO), Enterprise Operations (EO). Other teams may provide additional support.

3.1. Timeline

The deployment and installation are scheduled to run for 30 days, as described in the master deployment schedule.

3.2. Site Readiness Assessment

This section discusses the locations that will receive the MENTAL HEALTH NCC PROJECT 5.01 deployment.

3.2.1. Deployment Topology (Targeted Architecture)

MENTAL HEALTH NCC PROJECT 5.01 will be deployed to each VistA instance at the local sites or the regional data processing centers.

3.2.2. Site Information (Locations, Deployment Recipients)

The initial deployment will be to Initial Operating Capabilities (IOC) sites for verification of functionality. Once that testing is completed and approval is given for national release, MENTAL HEALTH NCC PROJECT 5.01 will be deployed to all VistA systems.

The Production (IOC) Test sites are:

- Battle Creek VA Medical Center, Battle Creek, MI
- VA Black Hills Health Care System, Fort Meade, SD

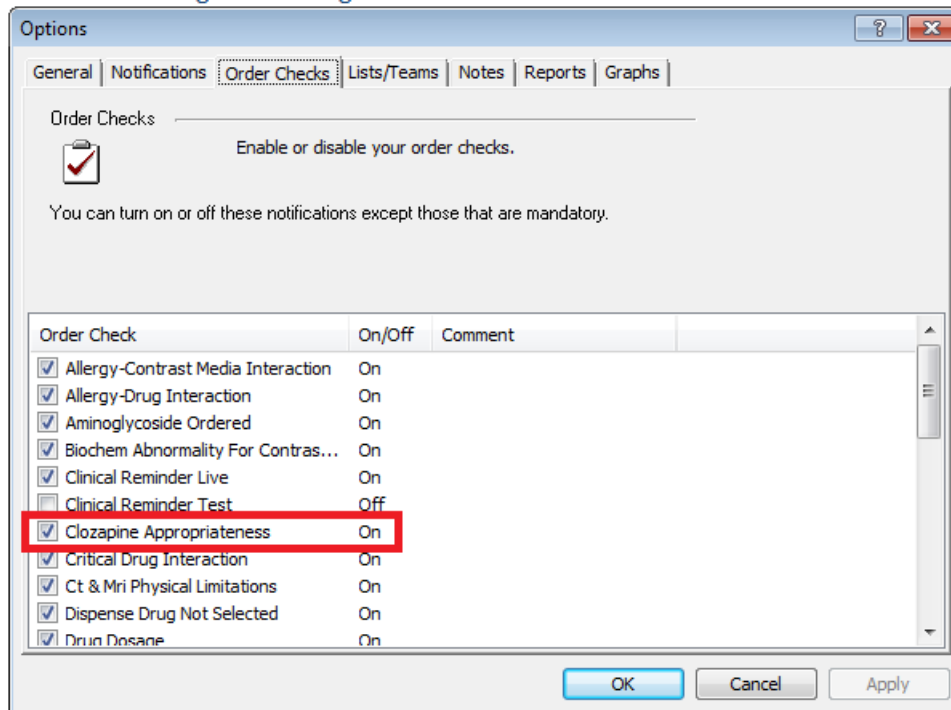

3.2.3. Site Preparation

Installation of these patches is **mandatory** at all VHA facilities. FDA and clozapine Risk Evaluation and Mitigation Strategies (REMS) have both agreed that the National Clozapine Coordinating Center (NCCC) will maintain the authority to dispense clozapine anywhere in the VA Facility.

*Note: To ensure that the clozapine order checks are triggered correctly, the Clozapine Appropriateness check box must be selected at the user level in the Computerized Patient Record System (CPRS). There are multiple levels of an order check being enabled: Package, System, and User with the user level having the highest priority. If the System level is turned on, then the User will also have it on, unless it has been specifically disabled.

The Clozapine Appropriateness check box can be accessed by navigating the following menu items – Tools > Options and then by selecting the Order Checks tab. See Figure 1.

Figure 1 Clozapine Appropriateness Check Box

The following table describes preparation required by the site prior to deployment.

Table 2 Site Preparation

| Site/Other | Problem/Change Needed | Features to Adapt/Modify to New Product | Actions/Steps | Owner |
|------------|---|---|--|----------------|
| All | Determine changes to current processes. | Inpatient dispensing of clozapine | Evaluate how new processes differ from current processes and adapt training accordingly. | Pharmacy ADPAC |

3.3. Resources

N/A

3.3.1. Facility Specifics (Optional)

N/A

3.3.2. Hardware

N/A

3.3.3. Software

The following describes the software prerequisite dependencies at each site prior to deployment

Table 3 Software Specifications

| Required Software | Make | Version | Configuration | Manufacturer | Other |
|-------------------|--------------|------------|-------------------------------|--------------|-------|
| | JU 7, 2008 | YS*5.01*92 | MENTAL HEALTH | | |
| | AUG 20, 2008 | OR*3*243 | ORDER ENTRY/RESULTS REPORTING | | |
| | MAR 23, 2001 | PSJ*5*54 | INPATIENT MEDICATIONS | | |
| | SEP 13, 2018 | PSJ*5*344 | INPATIENT MEDICATIONS | | |
| | OCT 25, 2018 | PSJ*5*353 | INPATIENT MEDICATIONS | | |
| | MAR 8, 2018 | PSJ*5*355 | INPATIENT MEDICATIONS | | |
| | JUN 7, 2018 | PSJ*5*357 | INPATIENT MEDICATIONS | | |
| | JAN 2, 2019 | PSJ*5*366 | INPATIENT MEDICATIONS | | |
| | OCT 22, 2018 | PSJ*5*367 | INPATIENT MEDICATIONS | | |
| | JAN 23, 2019 | PSJ*5*378 | INPATIENT MEDICATIONS | | |
| | OCT 2, 2017 | PSO*7*422 | OUTPATIENT PHARMACY | | |

| Required Software | Make | Version | Configuration | Manufacturer | Other |
|-------------------|--------------|-----------|---------------------|--------------|-------|
| | JUL 2, 2018 | PSO*7*518 | OUTPATIENT PHARMACY | | |
| | JUL 19, 2018 | PSO*7*526 | OUTPATIENT PHARMACY | | |
| | JAN 28, 2019 | PSO*7*537 | OUTPATIENT PHARMACY | | |
| | JAN 8, 2019 | PSO*7*550 | OUTPATIENT PHARMACY | | |

Please see the Roles and Responsibilities table in Section 2 above for details about who is responsible for preparing the site to meet these software specifications.

3.4. Communications

Technicians will use email and conference calls for communication during the deployment; email and/or conference calls will be utilized to notify the stakeholders of the successful release of the product.

4. Installation

4.1. Pre-installation and System Requirements

Multi-build MENTAL HEALTH NCC PROJECT 5.01 is installable on a fully patched Veterans Health Information Systems and Technology Architecture (VistA) system and is within the VistA infrastructure packages listed above.

4.2. Platform Installation and Preparation

The MENTAL HEALTH NCC PROJECT 5.01 installation must be coordinated with the Pharmacy Automated Data Processing Application Coordinator (ADPAC) at each site.

These patches may be installed with users on the system. You may wish to install it during non-peak hours. *These patches* should take less than 15 minutes to install.

NOTE: “Before” and “after” checksums are used to verify if your account is where it needs to be before and after installing a software release. Checksum values before the software was modified can be used to verify if an account is up-to-date or if a site has made local modifications to the software. Checksum values after the software has been modified are used to verify that the installed routines are the correct version.

4.3. Download and Extract Files

Software and Documentation Retrieval Instructions:

The software being released is a host file system (HFS) file created by the Kernel Installation and Distribution System (KIDS); the HFS file name has the extension .KID. Documentation describing the new functionality introduced by this patch is available.

The preferred method is to retrieve files from download directory at **vista.med.va.gov**. This transmits the files from the first available server. Sites may also elect to retrieve files directly from a specific server. Sites may retrieve the software and/or documentation directly using Secure File Transfer Protocol (SFTP) from the ANONYMOUS.SOFTWARE directory at the following OI Field Offices:

Hines: fo-hines.med.va.gov
 Salt Lake City: fo-slc.med.va.gov

The documentation will be in the form of Adobe Acrobat files. Documentation can also be found on the VA Software Documentation Library (VDL) at: <https://www.va.gov/vdl/>

Table 4 Files for Retrieval

| File Name | Contents | Retrieval Format |
|---------------------------------------|--|------------------|
| MH_NCC_PROJ_5_01.KID | HFS file with the VistA software components | ASCII |
| MH_NCC_Proj_5_01_UG_R0719.pdf | NCC User Guide/Training Guide New Features in CPRS, Outpatient Pharmacy and Inpatient Medications | Binary |
| psj_5_p327_phar_um.pdf | Inpatient Medications: Pharmacist’s User Manual | Binary |
| psj_5_p327_nurse_um.pdf | Inpatient Medications: Nurse’s User Manual | Binary |
| psj_5_p327_tm. pdf | Inpatient Medications Technical Manual/Security Guide | Binary |
| pso_7_P457_man_um. pdf | Outpatient Pharmacy (PSO): Managers User Manual | Binary |
| pso_7_p457_phar_um.pdf | Outpatient Pharmacy (PSO): Pharmacist’s User Manual | Binary |
| MH_NCC_Proj_5_01_PSO_Psj_QR_R0719.pdf | Inpatient Medications and Outpatient Pharmacy Clozapine Changes– Quick Reference Card | Binary |
| or_3_p427_cprs_ug.pdf | Computerized Patient Record System (CPRS) User Guide: GUI Version | Binary |
| or_3_p427_cprs_QR.pdf | Quick Reference Guide for Prescribing/Ordering Clozapine in CPRS | Binary |

4.4. Database Creation

Performed by the KIDS Installation.

4.5. Installation Scripts

Performed by the KIDS Installation.

4.6. Cron Scripts

N/A

4.7. Access Requirements and Skills Needed for the Installation

This guide is written with the assumption that the reader is experienced or familiar with the following:

- The VistA computing environment
- The VA File Manager (FileMan)
- Microsoft Windows

Local or Regional OI&T staff will coordinate the patch installation with the Pharmacy at each site. The Local or Regional OI&T staff have the necessary access and skill set to conduct the installation.

4.8. Installation Procedure

This patch should less than 15 minutes to install.

Note: Do not queue the installation of this patch.

To avoid disruptions, these patches should be installed during non-peak hours when there is minimal activity on the system. Refer to Appendix A for an example of the installation log.

| Step | Pre-Installation Instructions |
|------|--|

4.9. Sample Install Log

Please refer to [Appendix A](#) for an example of an installation log.

4.10. Post Install Steps and Post-Install Verification Procedures

After installation, the following post-installation tasks should be performed:

- Queue transmission option. Please see [Appendix B](#) for instructions.
- Assign new menu options, e.g. YSCL RETRANSMIT DATA, PSJL MANAGER. Please notify the site's Clozapine Treatment team about the new options available with this patch so they may request assignment.
- Delete the obsolete options from the TaskMan queue. The options are YSCL WEEKLY TRANSMISSION and YSCL TRANSMIT DEMOGRAPHICS. The steps shown below should be done for both options.

```
Select Systems Manager Menu <CLOZA> Option: TASKman Management
```

```
Schedule/Unschedule Options
One-time Option Queue
Taskman Management Utilities ...
List Tasks
Dequeue Tasks
Requeue Tasks
Delete Tasks
Print Options that are Scheduled to run
Cleanup Task List
Print Options Recommended for Queueing
```

```
Select Taskman Management <CLOZA> Option: SCHEDULE/Unschedule Options
```

```
Select OPTION to schedule or reschedule: YSCL TRANSMIT DEMOGRAPHICS (R)
```

```
Edit Option Schedule
```

INPUT TRANSFORM: K:+X'=X!(X>3000)!(X<0)!(X?.E1"."1N.N) X

LAST EDITED: JUN 06, 2016

HELP-PROMPT: Type a number between 0 and 3000, 0 decimal digits.

DESCRIPTION: This is the total daily dosage of clozapine if this order is for the drug clozapine. This is used only for clozapine.

4.11. System Configuration

The KIDS post-installation scripts perform all necessary system configuration required by the build. There are no additional actions required.

5. Backout Procedure

During the VistA Installation Procedure of the KIDS build, the installer has backed up the modified routines by using the *Backup a Transport Global action*. The installer can restore the routines using the MailMan message that were saved prior to installing the patch. See Appendix C for details on backing out database and order rules checking routines. All software components (routines and other items) must be restored to their previous state at the same time and in conjunction with restoration of the data.

This backout may need to include a database cleanup process.

Contact the product development team for assistance if the installed patch that needs to be backed out contains anything at all other than routines, before trying to back out the patch. If the installed patch that needs to be backed out includes a pre- or post-install routine, please contact the product development team before attempting the backout.

5.1. Backout Strategy

During installation, if the option to back up routines was performed, 'Backup a Transport Global,' then sites can restore routines from the backup PackMan message that was generated. The KIDS installation software does not restore other VistA components, such as data dictionaries, cross-references, template changes, etc. Refer to Appendix D for specific steps to back out other components of the multi-build.

Prior to attempting a backout of the software, please contact the IT Enterprise Service Desk at 1-855-673-4357 for support or assistance.

5.2. Backout Considerations

The Pharmacy ADPAC and OI&T have the authority to order the backout.

5.2.1. Load Testing

N/A

5.2.2. User Acceptance Testing

The User Acceptance Testing was conducted by the test sites listed in section 3.2.2.

The sites followed the provided test plan and executed the test cases for the first build of MENTAL HEALTH NCC PROJECT 5.01. The sites either passed or failed any item based on testing. Any items that failed were corrected and sent back to the sites via a new build for further acceptance testing following the same process.

Once in production, the test cases from the last build were performed in production. No subsequent builds were created as the test cases passed and sites signed off on concurrence for release of the product.

5.3. Backout Criteria

Criteria for a backout include, but are not limited, to the following:

- a. Failed baseline testing.
- b. Non-recoverable software error.

5.4. Backout Risks

Client data entered prior to the backout may be lost depending on the circumstances surrounding the backout (e.g., backout performed after several hours after new release deployed to production and several hours of client data being received, etc.).

5.5. Authority for Backout

The authorization for a backout includes a combination of the Chief of Pharmacy, Chief of Mental Health and Chief of Staff and Director of the Facility.

5.6. Backout Procedure

The YS*5.01*122, PSO*7*457, PSJ*5*327, OR*3*427 patches (part of the combined build, NCC Build 3) as well as any installed dependent patch changes that follow these releases need to be taken out in reverse of the order in which they were installed; routines and data dictionary modifications and populated data must also be rolled back in reverse order.

Please contact the IT Enterprise Service Desk at 1-855-673-4357 for support or assistance regarding roll-back procedures.

5.7. Backout Verification Procedure

Inspect the versions of the YS, PSO, PSJ and OR prior to installation.

Please contact the IT Enterprise Service Desk at 1-855-673-4357 for support or assistance regarding roll-back procedures.

6. Rollback Procedure

The YS*5.01*122, PSO*7*457, PSJ*5*327, OR*3*427 patches (part of the combined build, NCC Release 1), as well as any installed dependent patch changes that follow these releases, need to be removed reverse order in which they were installed; routines, data dictionary modifications, and populated data must also be rolled back in reverse order.

Please contact the IT Enterprise Service Desk at 855-673-4357 for support or assistance regarding roll-back procedures.

6.1. Rollback Considerations

No rollback considerations have been determined at this time.

6.2. Rollback Criteria

The only criterion for a rollback that has been determined at this time is that the installation failed baseline testing and the software has been backed out as described in Section 5 of this document.

6.3. Rollback Risks

Client data entered prior to the rollback may be lost depending on the circumstances surrounding the rollback (i.e., rollback performed after several hours after new release deployed to production and several hours of client data being received, etc.).

6.4. Authority for Rollback

The authorization for a rollback includes a combination of the Chief of Pharmacy, Chief of Mental Health and Chief of Staff and Director of the Facility.

6.5. Rollback Procedure

The need for a rollback is highly unlikely, however if it is required, contact the product development team for assistance if needed. The rollback procedure may require Pharmacy downtime and a reinstall of any previous KIDS versions. Additional files, options and settings will be ignored by the prior versions of the patches and do not present an operational risk.

Refer to Appendix C and D for steps to remove the following data dictionary changes:

| | | |
|------------------------------------|------|-----|
| CLOZAPINE OVERRIDE REASONS (52.54) | File | New |
|------------------------------------|------|-----|

| | | |
|--|-------|----------|

| RX LAB PROD LISTENER #8 | Field | New |
| DEMOGRAPHIC PROD LISTENER #9 | Field | New |
| RX LAB TEST LISTENER #10 | Field | New |
| DEMOGRAPHIC TEST LISTENER #11 | Field | New |

6.6. Rollback Verification Procedure

After backing out Patch PSJ*5*327, PSO*7*457 and YS*5.01*122 the Database may be verified by running a global listings from the VistA server command line. Global listings should be performed for the following global nodes, after which the following should be listed if the backout was successful:

Global listings should be performed for the following global nodes:

```
Global ^DD(52.52,4,0
Global ^DD(52.54,,0
Global ^DD(53.8,,0
Global ^DD(55.06,301,0

Appendix B. Daily Transmission Details

The VistA Daily Clozapine Transmission [YSCL DAILY TRANSMISSION] option is designed to transmit the Clozapine dispensing, lab data, and demographics information for all Inpatient and Outpatient Clozapine dispenses from the previous day's dispenses and has been designed to only send the data once a day.

A. VistA Daily Clozapine Transmission [YSCL DAILY TRANSMISSION]

The VistA Daily Clozapine Transmission [YSCL DAILY TRANSMISSION] option should be queued to run after midnight via TaskMan. If needed, it can also be run manually in the foreground.

Example: Scheduling the new Daily Transmission Option

Note: The option should be scheduled to run daily during off-peak. Sites should choose an appropriate time based on their workload.

B. VistA Retransmit Clozapine Roll-up Data [YSCL RETRANSMIT DATA]

The VistA Retransmit Clozapine Roll-up Data [YSCL RETRANSMIT DATA] option has been added in the event the NCCC needs to resend the Clozapine Data to the NCCC Server. The NCC application coordinator at each site will determine who is assigned the option.

This option can send a single day's transactions or consecutive days of transactions. This option must be run manually in VistA.

When running the option, the user will need to provide the start date and ending date for retransmission. The system will then create and send the Clozapine lab data via a MailMan message to the NCC.

Example: Retransmit Clozapine Roll-up Data

C. Options Being Disabled by this Patch

The VistA Weekly Clozapine Report [YSCL WEEKLY TRANSMISSION] and the Transmit Clozapine Demographics [YSCL TRANSMIT DEMOGRAPHICS] options have been marked 'Out of Service' and display 'Replaced by the Daily Clozapine Transmission' message.

Verification of the OPTION entries being disabled:

```

Select VA FileMan <CLOZA> Option:  Inquire to File Entries

Output from what File: OPTION//          (10342 entries)

Select OPTION NAME: YSCL WEEKLY TRANSMISSION      Weekly Clozapine Report

Another one: YSCL TRANSMIT DEMOGRAPHICS          Transmit Clozapine Demographics

Another one:

Standard Captioned Output? Yes// N  (No)

First Print FIELD: .01  NAME
Then Print FIELD: 1  MENU TEXT
Then Print FIELD: OUT OF ORDER MESSAGE
Then Print FIELD:

Heading (S/C): OPTION List//

DEVICE:  TELNET

OPTION List          JUL 08, 2019@14:42  PAGE 1
NAME
  MENU TEXT
  OUT OF ORDER MESSAGE
-----

```

YSCL WEEKLY TRANSMISSION
Weekly Clozapine Report
Replaced by YSCL DAILY TRANSMISSION
YSCL TRANSMIT DEMOGRAPHICS
Transmit Clozapine Demographics
Replaced by YSCL DAILY TRANSMISSION.

Appendix C. Order Checking Rules Backout

Warning: Do not attempt rollback without contacting the Clozapine Modernization development team.

The Clozapine project implemented several order checking rules to comply with the project's requirements. As part of the roll-back and backout, those rules need to be restored to the prior state. The below semi-manual steps are required to restore the order checking rules to their prior state.

1. Edit the CLOZAPINE record (57) in the Order Rule file (#860.2) to the 'before values' (See Order Rule File previous settings below Appendix C.1)
2. Compile the Order Rule file (#860.2)
3. Use the commands provided in Appendix D to revert the data dictionary (File #603.03), File #52.52. changes, File 52.54, File 53.8, and a field in File 55.
4. Restore YS, PSO, PSJ, OR routines from the Backup of YS*5.01*122 install

Appendix C.1. Order Entry Rules Settings for Backout

ORDER CHECK RULE LIST

 STATUS: ACTIVE
 RELATION INDEX: 1 ORDER CHECK: CLOZAPINE APPROPRIATENESS
 RELATION EXPRESSION: CLOZAPINE AND (NO WBC W/IN 7 DAYS OR NO ANC
 W/IN 7 DAYS)
 ORDER CHECK MESSAGE: Clozapine orders require a CBC/Diff within past 7 days.
 Please order CBC/Diff with WBC and ANC immediately.
 Most recent results - |CLOZ LAB RSLTS|
 RELATION INDEX: 2 ORDER CHECK: CLOZAPINE APPROPRIATENESS
 RELATION EXPRESSION: CLOZAPINE AND (WBC < 3.0 OR ANC < 1.5)
 ORDER CHECK MESSAGE: WBC < 3.0 and/or ANC < 1.5 - pharmacy cannot fill
 clozapine order. Most recent results - |CLOZ LAB RSLTS|
 RELATION INDEX: 3 ORDER CHECK: CLOZAPINE APPROPRIATENESS
 RELATION EXPRESSION: CLOZAPINE AND 3.0 <= WBC < 3.5 AND ANC >= 1.5
 ORDER CHECK MESSAGE: WBC between 3.0 and 3.5 with ANC >= 1.5 - please repeat
 CBC/Diff including WBC and ANC immediately and twice
 weekly. Most recent results - |CLOZ LAB RSLTS|
 RELATION INDEX: 4 ORDER CHECK: CLOZAPINE APPROPRIATENESS
 RELATION EXPRESSION: CLOZAPINE AND 1.5 <= ANC < 2.0
 ORDER CHECK MESSAGE: ANC between 1.5 and 2.0 - please repeat CBC/Diff
 including WBC and ANC immediately and twice weekly.
 Most recent results - |CLOZ LAB RSLTS|

Appendix D. Backout Steps

Warning: Do not attempt rollback without contacting the Clozapine Modernization development team.

Appendix D.1. Remove Data Dictionary File 52.54

To permanently remove the file from the data dictionary, the developer should enter the following:

```
VISTA> S DIK="^DIC(",DA=52.54 D ^DIK <Enter>
VISTA>K ^DD(52.54),^PS(52.54) → removes data too
```

Appendix D.2. Modify Field 4 of the File 52.52

To change field 4 of the file 52.52 back to pre-install, the developer should use FileMan:

```
VISTA>D P^DI
```

```
VA FileMan 22.2
```

```
Select OPTION: MODIFY FILE ATTRIBUTES
Do you want to use the screen-mode version? YES//
```

```
Modify what File: CLOZAPINE PRESCRIPTION OVERRIDES// (515 entries)
```

```
Select FIELD: 4 REASON FOR OVERRIDE
```

Field #4 in File #52.52

FIELD LABEL: **REASON FOR OVERRIDE** DATA TYPE... SET

| | |
|---------|--|
| CODE: 1 | WILL STAND FOR: NO WBC IN LAST 7 DAYS |
| CODE: 2 | WILL STAND FOR: NO VERIFIED WBC |
| CODE: 3 | WILL STAND FOR: LAST WBC RESULT < 3500 |
| CODE: 4 | WILL STAND FOR: 3 SEQ. WBC DECREASE |
| CODE: 5 | WILL STAND FOR: LAST ANC RESULT < 2000 |
| CODE: 6 | WILL STAND FOR: 3 SEQ. ANC DECREASE |
| CODE: 7 | WILL STAND FOR: NCCC AUTHORIZED |
| CODE: | WILL STAND FOR: |
| CODE: | WILL STAND FOR: |
| CODE: | WILL STAND FOR: |
| CODE: | WILL STAND FOR: |
| CODE: | WILL STAND FOR: |
| CODE: | WILL STAND FOR: |

Field #4 in File #52.52

FIELD LABEL: **REASON FOR OVERRIDE** DATA TYPE... SET

```

```

DELETE ACCESS: ^
WRITE ACCESS: ^
SOURCE:
DESCRIPTION...          TECHNICAL DESCRIPTION...

IS THIS FIELD MULTIPLE... NO

MANDATORY: YES
HELP-PROMPT: Enter the reason for the override of this prescription.
EXECUTABLE HELP:

```

```

Exit      Save      Refresh      Quit

Enter a COMMAND, or "^" followed by the CAPTION of a FIELD to jump to.

COMMAND: E                      Press <PF1>H for help  Insert

SINCE YOU HAVE CHANGED THE FIELD DEFINITION,
EXISTING 'REASON FOR OVERRIDE' DATA WILL NOW BE CHECKED FOR INCONSISTENCIES
OK? Yes// N (No)

```

Appendix D.3. Remove Data Dictionary File 53.8

To permanently remove the file from the data dictionary, the developer enters the following:

***** Warning: This should only be done by a programmer familiar with VistA utilities and conventions. A mistake could cause severe data loss. *****

```

VISTA> S DIK="^DIC(",DA=53.8 D ^DIK
; the following command removes data too
VISTA>K ^DD(53.8),^PS(53.8)

```

Appendix D.4. Remove Field 301 from File 55

To remove the field 301 definition from the file 55, the developer should use FileMan:

```

VISTA>D P^DI

VA FileMan 22.2

Select OPTION: MODIFY FILE ATTRIBUTES
Do you want to use the screen-mode version? YES// NO

Modify what File: PHARMACY PATIENT//          (44820 entries)

Select FIELD: UNIT DOSE      (multiple)
LABEL: UNIT DOSE//
READ ACCESS (OPTIONAL):
WRITE ACCESS (OPTIONAL):

```

```

SOURCE:
Select DESTINATION:
Select GROUP: PSJU//
DESCRIPTION:
  1> This represents the 'top' of the UNIT DOSE SUB-FILE, where all of
  2>a patient's active (and expired & dc'd) UNIT DOSE orders are kept.
  3>Although orders are initially entered into ^PS(53.1), the order is
  4>transferred into this sub-file (^PSGOT) upon verification.
EDIT Option:
TECHNICAL DESCRIPTION:
  1>

Select UNIT DOSE SUB-FIELD: 301  CLOZAPINE DOSAGE (MG/DAY)
LABEL: CLOZAPINE DOSAGE (MG/DAY)  Replace @
  SURE YOU WANT TO DELETE THE ENTIRE 'CLOZAPINE DOSAGE (MG/DAY)' UNIT DOSE
SUB-FIELD? Y (Yes)

```

Appendix D.5. Remove Fields 8-11 from File 603.03

To remove fields 8-11 definition from the file 603.03, the developer should use FileMan:

```

VISTA>D P^DI

VA FileMan 22.2

Select OPTION: MODIFY FILE ATTRIBUTES
Do you want to use the screen-mode version? YES// YES

Modify what File: CLOZAPINE OVERRIDE REASONS// 603.03  CLOZAPINE PARAMETERS
                  (1 entry)

Select FIELD: 8  RX LAB PROD LISTENER
