Introduction

OncoTraX: Cancer Registry is an integrated collection of computer programs and routines, which work together in assisting the Cancer Registrars to create and maintain a cancer patient database. The software creates case listings and registry reports for Cancer Boards (Cancer Conferences), special studies, and the Annual Report recommended by the American College of Surgeons (ACoS).

The software allows the Cancer Registrars to:

1. Perform case finding.
2. Identify potential cases to include in your registry, enter the pertinent data directly into the computer system, and maintain patient follow-up information on an annual basis.
3. Enter abstracts.
4. Download and transmit data electronically to the VA Central Cancer Registry, state central registries, the National Cancer Database for the ACoS Call for Data.
5. Produce several reports by using an option in the Utility menu.
   
   Note: Several reports within the software provide basic information; however, for more specific reports, you need to know basic FileMan functions. Any and all data collected within an abstract can be pulled back into reports.
6. Print out by year the number of cases by site, including sex, race, and stages.
7. Generate follow-up reports as required by the ACoS
   
   Note: OncoTraX is in complete compliance with all ACoS required data elements, and is updated as changes occur.

OncoTraX is used by cancer registrars and meets all requirements set forth by the American College of Surgeons for approved cancer programs.

   Note: OncoTraX makes extensive use of Help screens, but it does not replace the use of your reference manuals.

This manual deals with the three most commonly used areas of the software. These are the main functions of registry work used to maintain the cancer registry.

1. **Case Finding/Suspense Module** allows you to perform an automated case finding search of relevant hospital databases (pathology, radiology, and patient treatment files) for cases meeting specific criteria for inclusion in the registry.

2. **Abstracting/Printing** allows you to enter coded data into the database directly or by utilizing auto-coding techniques. The software is site-specific prompt driven; the only data elements presented are those pertinent to the site you are abstracting.

3. **Follow-Up** in OncoTraX assists you in following your patients. The database automatically reminds you when it is time to do a follow-up on a patient. You can update each patient’s record with new follow-up information. The software comes with a variety of follow-up letters, which may be customized to fit the needs of individual facilities.

When using the electronic version of the manual to search for information, click Edit on the menu bar and select Find (binoculars icon). Enter the word or words for which you are looking and Microsoft Word searches the document.
**Recommended Users**

This manual is intended for VA registrars using the OncoTraX: Cancer Registry software.

**Related Manuals**

Every cancer registry office should have the following reference material.

**Note**: Use the older editions of the reference materials when entering old cases.

- **Facility Oncology Registry Data Standards** (FORDS), 2011 and after
- **Registry Operations and Data Standards** (ROADS), prior to 2003 cases
- **Facility Oncology Registry Data Standards** (FORDS), 2003 and after
- **Collaborative Staging Manual and Coding Instructions**
  Collaborative Staging was added to OncoTraX in July 2004. Use the **Collaborative Staging Manual and Coding Instructions** for all cases diagnosed in 2004 and after.

**Getting Started**

Before using OncoTraX for the first time, you must define your registry’s parameters.
If OncoTraX is already being used by the registry and you are a new registrar, review the registry’s parameters because you may need to update them.

To access the registry’s parameters:
1. From the main OncoTraX menu, select UTL *..Utility Options...
2. From the Utility Options, select TR Define Cancer Registry Parameters

**Example**
SUS *..Case Finding/Suspense ...
ABS *..Abstracting/Printing ...
FOL *..Follow-up Functions ...
LIS *..Registry Lists ...
ANN *..Annual Reports ...
STA *..Statistical Reports ...
UTL *..Utility Options ...
Select OncoTraX Option: UTL *..Utility Options...

**************UTILITY OPTIONS**************
DP Delete OncoTraX Patient

Define Cancer Registry Parameters

Use **Define Cancer Registry Parameters** to update/change parameters, such as the name of the Cancer Registrar.

You are required to put in information for the following fields.

- **Select ONCOLOGY SITE PARAMETERS**
  - **HOSPITAL NAME:** Type the name of your medical center as you want it to display.
  - **STREET ADDRESS:** Type the street address of your medical center.
  - **ZIP CODE:** Type the zip code for your medical center.
  - **REFERENCE DATE:** Type the year: *first* day of the *first* month of the year the registry *first* starts capturing data.
  - **TUMOR REGISTRAR:** Type the name of the cancer registrar (3 - 30 characters in length) as you want it to display on letters and reports.
  - **PHONE NUMBER:** Type the phone number of the cancer registrar's office.
  - **STATE HOSPITAL #:** Type the number assigned by the state to your medical center.
  - **FACILITY ID #:** Type the registry number assigned by the American College of Surgeons. Use the ID to define the registry in the ACoS Call for Data.
  - **CENTRAL REGISTRY #:** Type the registry number assigned by the state central registry, where applicable.

  **Note:** This field may be left blank.

- **VISN:** Type the Veterans Integrated Service Network number.

- **CS URL:** Type the URL address for the Collaborative Staging computer algorithms: [http://vaww.va.gov/cstage/cgi-bin/cstage.exe](http://vaww.va.gov/cstage/cgi-bin/cstage.exe)

  **Note:** Copy and paste the address, so as not to make a mistake when typing.

- **DIVISION:** Type in your division or site number. It is a required field, even for a single division site.

  **Note:** Case finding does not work when Division is blank; type in the name of the hospital or the division.

- **COC ACCREDITATION:** Type 00 (Not accredited) or 01 (Coc Accredited)

- **Select AFFILIATED DIVISION:** Type the name of the division that is associated with the primary division for purposes of the cancer registry.

  - If you are not an integrated site, bypass the Define Cancer Registry Parameters prompt by pressing `<RET>`.
  - If you are an integrated site and each site/division manages its own cancer registry, bypass the Define Cancer Registry Parameters prompt by pressing `<RET>`.
• If you are an integrated site and one or more sites/divisions do not have a cancer registry and you are responsible for tracking patients from one or more of those sites in your cancer registry, type the name of each in Select AFFILIATED DIVISION.

Select QA USER: Type the name of the cancer registrar.

Example
REFERENCE DATE: ??

1. Record the reference date for the registry. This date is listed as the first day of the first month of the year the registry first starts keeping data.
2. Enter the date in format: 010106.
**SUS Case Finding and Suspense Module**

The SUS Case Finding and Suspense module provides a way to automatically find eligible cases or manually add the patients to Suspense.

Case finding is a systematic method of locating all eligible cases to enter (accession for abstracting) into your database. One of the unique features of the OncoTraX software is Automatic Case Finding. Enter a range, start date and end date, and the computer searches pathology (CF), radiology (RA) and the Patient Treatment File (PT) for eligible cases in that date range. Each search is run separately according to your input. Cases meeting the defined criteria are captured electronically and added to Suspense.

The **Suspense Date** field, the cases are held in Suspense until they are accessioned for abstracting or manually deleted.

- The suspense date is pulled into the abstract as the DATE DX. The date can be changed, if necessary.
- After reviewing the Suspense cases, you may find some that are not required in the registry. You can manually delete them; refer to Deleting a VA Patient from Suspense, page 14.
- You may find some cases that are recurrences of an already documented primary. Recurrences require a follow up. The recurrences must be updated using **RF Recurrence/Sub Tx Follow-up**, page 27 in the Follow-up Module. Update the follow-up using **PF Post/Edit Follow-up**, page 26.
- After you do a follow up for a patient, you must manually delete the patient from the Suspense file; refer to Deleting a VA Patient from Suspense, page 14.
- Cases that are accessioned are automatically deleted from Suspense.

**Case Finding/Suspense Menu**
- CF Automatic Case Finding-Lab Search
- LR Print Case Finding-Lab Report
- RA Automatic Case Finding-Radiology Search
- PT Automatic Case Finding-PTF Search
- SE Add/Edit/Delete from Suspense
- SP Print Suspense List by Suspense Date (132c)
- NP Patients in Suspense with no primaries
- DI Disease Index

**Note:** For your date range, run CF, RA, and PT only once. If you repeat the search for your date range, cases already reviewed end up in your Suspense file.

**CF Automatic Case Finding - Lab Search**

Use this option to search the Lab files to build a Suspense list of cases. When the search is complete, you can print the Suspense list on a selected device/printer.

- **Start with Date:**
- **Go to Date:** Type the end date of the search, such as 1/31/04
  - If the year is omitted, the computer uses Current Year.
************* LAB CASE FINDING *************

This option will search the LAB DATA file for cases to add to the Suspense List.

Start Date: Type the begin date of the search.
If this option was used previously, the previous end date is the begin date, such as JUL 1, 2005

End Date: JUL 31, 2005

Dates OK? Y//
Press Enter.

Note: The option searches for ICD-O morphology codes 800-998, excluding Behavior Code /0 (Benign) codes.

Exceptions to the search criteria:
- Benign Cancers of the central nervous system will be included.
- Squamous cell neoplasms (805-808) of the skin will be excluded.
- Basal cell neoplasms (809) will be excluded.

SE Add/Edit/Delete from Suspense

Use this option to manually add patients to the Suspense file, to modify patient information in the file, or to manually delete patients from Suspense.

Adding a VA Patient to Suspense

To enter a patient in the Suspense file:

1. Type the patient PID#; refer to the Glossary on page 107.
2. The program asks: do you want to add the patient as a New OncoTraX Patient?
   Response is YES.
3. At the Suspense Date: prompt, type the provisional date of the diagnosis. You can edit the date when the abstract is complete.
   Note: You must enter a date; this date becomes the Date of Diagnosis in the abstract.

Editing a VA Patient in Suspense

To modify patient information in the Suspense file:
1. Type the patient PID#; refer to the Glossary on page 107.
2. At the Suspense Date: prompt, change the date.

Deleting a VA Patient from Suspense

To remove a patient from the Suspense file:

1. Type the patient PID#; refer to the Glossary on page 107.
2. Press @ (shift + 2) to delete the patient.

SP Print Suspense List by Suspense Date (132c)

Use this option to print a list of patients currently in Suspense by the suspense date. The printout lists patients according to how they are identified; first by the source (through Surgical Pathology, Cytopathology, Electron Microscopy, Autopsy, PTF, Radiology, or manual entry) and then in the order of the suspense date. The printout lists the patient's name, the patient's SSN or identifier, Organ/Tissue, Lab Morphology, and Suspense, Admission and Discharge Dates.

Note: 132c (132 columns) does not present an easy-to-read display on the computer screen because the text wraps; select a device that can print 132 columns.

Start with Suspense Date: FIRST//:
Press the <ret> key to accept FIRST. All the cases with suspense dates display.

ABS  Abstract Entry and Printing Module

The Abstract Entry and Printing module is used for abstracting cases. An abstract is a summary of pertinent information about the patient, the cancer, the treatment, and the outcome. Components include patient demographic information, cancer identification, extent of disease, stage at diagnosis, first course of treatment, recurrence, and subsequent therapies or progression and follow-up.

- An abstract must be completed for all cases that meet the criteria for inclusion in the registry. (The standards are set forth by the American College of Surgeons and VACCR reportable lists.)
- If a patient has multiple primary malignancies, an abstract must be prepared for each additional primary.
- An abstract must be completed within six months from the date of first contact.

AI  Complete Abstract

Note: To complete an abstract, you need the Facility Oncology Registry Data Standards (FORDS), which describe every field in the abstract and the selections for those fields. Keep a copy of FORDS close at hand for reference.

The Complete Abstract option is the main entry point for abstracting new cases or editing existing abstracted cases.

OncoTraX is prompt driven. Once a specific Topography Code is selected, all successive prompts displayed are specific. Some of the data captured in the case finding and suspense process, as well as demographic data, are automatically transferred and inserted into the appropriate fields within the abstract; however you can edit the data if necessary.

Note: The OncoTrax Conventions on page 3 are helpful in maneuvering around an abstract.
Abstracting a Case

You begin an abstract by searching for the patient to determine if the patient is new to the VA. If you do not enter data in all required fields, you cannot change the status of the abstract to Complete (3).

Adding a New Patient

1. At the prompt, type the patient PID#; refer to the Glossary on page 107.
2. Respond YES to the prompt: Are you adding 'LAST, FIRST' as a new ONCOTRAX PATIENT (the 24673RD)? No//

Completing an Abstract

After you finish an abstract, you must change the abstract status to Complete (3).
OncoTraX reviews all mandatory fields and if any are not filled in, you are unable to code the abstract status as Complete. When an abstract is not complete and you have a large amount of data, you can change the status to partial or minimal.

An incomplete abstract generates a list of empty required fields. Go back into the abstract and fill in the empty required fields—leave no blanks.
In Abstract Status, you decide when to call an incomplete abstract. You can leave it as incomplete and do nothing more. To change the status, type the number, the first letter, or the entire word.

   Note: You cannot set the abstract to Complete, if any of the required fields are left blank.

Example

ABSTRACT STATUS
ABSTRACT STATUS: Incomplete// ?
Choose from:
0 Incomplete
1 Minimal data
2 Partial
3 Complete

ABSTRACT STATUS: Incomplete// c  Complete??

Abstract Status may not be set to COMPLETE unless ALL REQUIRED DATA FIELDS HAVE BEEN ENTERED.

The following REQUIRED fields have not been entered for this primary:
ALCOHOL HISTORY
DATE OF SURGICAL DISCHARGE
DATE RADIATION STARTED
DIAGNOSTIC CONFIRMATION
EXTENSION

Note: Alcohol History, Tobacco History, Family History, and Occupation Information are considered patient demographic fields.
You cannot ^ from these fields back to the patient. You must exit out of the abstract and go back into AI.
You can ^ to any primary field, such as Date of Surgical Discharge, Date Radiation Started, Diagnostic Confirmation, and Extension, and so on. Example: ^Date of Surgical Discharge.

**ABSTRACT STATUS** = Complete will also perform a checksum of the values and an API call-up to the current EDITS metafile. An EDITS report will generate containing any inter-field edit check errors or warnings. Abstract status will reset to INCOMPLETE. Correct these edits and reset **ABSTRACT STATUS** to Complete to re-run the current EDITS metafile.

## EE Abstract Edit Primary

The Abstract Edit Primary option allows you to edit only information related to the cancer and not to a patient’s demographics. Only the primary fields of the abstract are brought up. This option allows you to pull up a patient using only the **Accession/Sequence Number**.

**Note:** The **Accession/Sequence Number** must be typed exactly as in the example.

Select *..Abstracting/Printing Option: EE Abstract Edit Primary

Select primary or patient name: 2000-00163/00

PROSTATE Last, First

**Note:** The site and patient’s name are echoed back to you.

## NC Print Abstract NOT Complete List

The Print Abstract NOT Complete List option allows you to print a list of records with an Abstract Status of Incomplete, Minimal, and Partial. The report shows the accession/sequence number, patient name, SSN, ICDO topography, and the date of diagnosis. Records are sorted according to the Status and Patient Name.

## IR Patient Summary

The Patient Summary option allows you to produce a brief summary of the data found in a patient’s abstract.
QA  **Print Abstract QA (80c)**

The Print Abstract QA option allows you to print a user-friendly abstract, which physicians can use when doing the ACoS required QA portion of registry abstracts.

  *Note: 80c (80 columns) presents an easy-to-read display on the computer screen.*

EX  **Print Abstract-Extended (80c)**

The Print Abstract Extended option allows you to print a condensed version of a complete abstract.

  *Note: 80c (80 columns) presents an easy-to-read display on the computer screen.*

PA  **Print Complete Abstract (132c)**

The Print Complete Abstract option allows you to print a complete abstract, which includes capturing the extended data set or to print without personal identifiers (sensitive information), specifically name and SSN.

  *Note: 132c (132 columns) does not present an easy-to-read display on the computer screen because the text wraps; select a device that can print 132 columns.*

MA  **Print QA/Multiple Abstracts**

The Print QA/Multiple Abstracts option allows you to print quality assurance/multiple abstracts.

AS  **Abstract Screens Menu (80c)**

The Abstract Screens Menu option allows you to print or view on your screen, various portions of a patient’s abstract.

  *Note: 80c (80 columns) presents an easy-to-read display on the computer screen.*
FOL Follow-up Module

The Follow-up module provides follow up information based on the date of last contact. A patient is considered delinquent or lost to follow-up when no contact is made within 15 months after the date of last contact. Lost cases remain delinquent in follow-up until further information is obtained.

PF Post/Edit Follow-up

The Post Follow-up option allows you to post and edit follow-up information.

PF Post/Edit Follow-up: Type the patient's PID#; refer to the Glossary on page 107.
Date of Last Contact or Death: Date of last contact with the patient and not the date you are entering the patient information.
To edit the date of contact, select the date and press Enter.
To add new follow-up information, type a new date.

DATE ENTERED, REGISTRAR: The system automatically enters the date you are entering the follow-up and the registrar’s name.

VITAL STATUS: Type A for Alive or D for Dead.

FOLLOW-SOURCE: From the FORDS manual, select allowable fields.

COMMENTS: Type information from the patient’s last contact.
Example
Patient seen in Oncology clinic, no evidence of disease recurrence.
or
Patient seen in urology clinic, PSA <0.05.

CANCER STATUS: Choose from the following:
1 No evidence of this tumor
2 Evidence of this tumor
9 Unknown/not stated if this tumor present

Note: Every Complete abstract must have follow-up and TYPE OF FIRST RECURRENCE posted.
RF  Recurrence/Sub Tx Follow-up

The Recurrence/Sub Tx Follow-up option allows you to document the first recurrence and/or subsequent treatment. Date of first recurrence is the date a medical practitioner diagnoses a recurrence of a cancer after a disease-free period. Recurrence means the return or reappearance of the cancer after a disease-free period.

Select Initiation Date:
Recurrence/Sub Tx Follow-up: Type the patient's or PID#; refer to the Glossary on page 107.
Type of First Recurrence: Enter the appropriate code for the first recurrence for this primary.

Note: To bring up a list of selections, type ?? at the prompt.

**FH Patient Follow-up History**

The Patient Follow-up History allows you to print the patient's follow-up history, including when the next follow-up is due. Type the patient's name and a device, or print to your screen.

**DF Print Due Follow-up List by Month Due**

The Print Due Follow-up List by Month Due option allows you to print a list of follow-ups that are due for a selected date range. They display by month due, along with the SSN, primary site, last date of contact, and date of diagnosis.

Your previous date range selection displays automatically. You want to be current by doing a patient due for follow-up in the month that the follow-up is scheduled; however, with other duties to perform, you may not be able to do this. In this case, work on the **Lost To Follow-up** list.

**Example**

**LF Print Delinquent (LTF) List**

The Print Delinquent (LTF) List option allows you to print a list of all patients whose Due Follow-up date is over 3 months (are not seen/contacted for over 15 months). These patients are considered lost to follow-up. The report is sorted by the month and year the follow-up was due and prints the SSN, date of last contact, Site/Gp, and date of diagnosis.

**Note:** You may want to use this option frequently; if you are in a crunch, run only this list and work to reduce these numbers.

**LIS Registry Lists Module**

The Registry Lists module is a menu of registry listings containing various accession registers, and patient and site reports.

Any 132c report requires a printer that prints 132 columns. Any 80c report requires a printer that prints 80 columns. The majority of the reports produce information that includes the entire database. If you have 20 years of data in your registry, the report contains all 20 years of data. For data from a specific year, use the options in the ANN *Annual Reports* module.

SDX Annual Status/Site/Dx-Age (132c)

The Annual Status/Site/Dx-Age is an annual report listing patients for a specific accession year.

Note: 132c (132 columns) does not present an easy-to-read display on the computer screen because the text wraps; select a device that can print 132 columns.

Annual report - sorted first by Accession year
Then by Class Category (Non-analytic/Analytic)
Then by Status, Site/GP, and Diagnosis Age Gp.
Enter four digit ACCESSION YEAR,
For Class category: either 'A'
for Analytic, or first to last.

Example

ACT  Annual Cross Tabs (80c)

The Annual Cross Tabs is an annual report that is very long. Queue this report after hours.
   Note: 80c (80 columns) presents an easy-to-read display on the computer screen.

CPR  PRINT Custom Reports

The PRINT Custom Reports option allows you to create custom reports using VA FileMan.
   Note: It is very helpful to have some FileMan training from the computer
department at your facility. Also, with knowledge of capturing files and
opening them in Microsoft Excel, you can create a very usable and
professional document.
You can retrieve any data that you enter into an abstract. Create a report by specifying:

- file from which the information is coming, OncoTraX Primary (#165.5), OncoTraX Patient (#160), or OncoTraX Contact (#165);
- fields that contain the data;
- how to separate/sort the data; and
- information to be printed.
This page intentionally left blank for double-sided printing.
STA Statistical Reporting Module

The Statistical Reporting module allows you to obtain 5-year survival information on your data. You can search for user-defined criteria.

DS Define Search Criteria

The Define Search Criteria option allows you to define criteria to obtain 5-year survival information from:

SP Survival by Site
SS Survival by Stage
TX Survival by Treatment

In order to use SP, SS, TX, or SU (Survival Routines), you must first create a template using DS Define Search Criteria.

Use DS to create search templates for Survival Analysis.

Note: Name templates beginning with ONCOZ for user-defined templates rather than software-distributed names, ONCOS.

Select one of the following:
1 ONCOTRAX PRIMARY
2 ONCOTRAX PATIENT
3 ONCOTRAX CONTACT

SP Survival by Site

Survival by Site produces a 5-year survival by site, from the criteria you set in the DS Define Search Criteria.

SS Survival by Stage

Survival by stage produces a 5-year survival by AJCC Stage, from the criteria you set in the DS Define Search Criteria.
**TX Survival by Treatment**

Survival by Treatment produces a 5-year survival by the treatment, from the criteria you set in the DS Define Search Criteria.

Each of the three options also generates a list of patients who are dropped from the search and why.

RS Registry Summary Reports

The Registry Summary Reports provide a quick count for:

- T--Today
- A--Annual (132c)
- F--Follow-up

The Today report gives you an overview of the entire registry on the day and time you run the report.

Analytical:  10144
Non-Analytical:  1515
Total:  11659
WORKLOAD STATISTICS

The Annual report gives you the number of cases for the selected year by site, race, sex, and the AJCC Stage. There are two options to choose from after you select the year.

Select year for summary:  (1952-2006):  2005/
Analytic cases only? YES// m

Answer 'YES' if you want only analytic cases (CLASS OF CASE 0-2) displayed.
Answer 'NO' if you want all cases (analytic and non-analytic) displayed.

The Follow-up report offers two options that meet the ACoS requirements.

Follow-up rate calculation parameters (select 1 or 2):
1) All analytic patients from the cancer registry reference date
2) All analytic patients diagnosed within the last five years, or from the cancer registry reference date, whichever is shorter

Example of selection 1

FOLLOW-UP RATE FOR ALL PATIENTS (LIVING AND DEAD) | NUMBER | PERCENT
--- | --- | ---
Total patients from registry reference date | 11808 | 100%
1. Less benign/borderline (behavior code 0/1) | - 183 |
2. Less Carcinoma in situ CERVIX cases | - 9 |
3. Less cases of in situ/localized basal and squamous cell carcinoma of skin | - 1068 |
4. Less foreign residents | - 0 |
5. Less nonanalytic (includes recurrent cases of case 3, 4, 5, 8 & 9) | - 1234 |

SUBTOTAL CASES = ANALYTIC CASES (class of case 0, 1, 2) | 9314 | 100%

1. Less number dead | 6881 | 74%

SUBTOTAL CASES (NUMBER LIVING) | 2433 | 26%

1. Less number current (known to be alive in the last 15 months) | 2380 | 26%

TOTAL (LOST TO FOLLOW UP OR NOT CURRENT) | 53 | 1%

Note: Percent should be 20% or less.

Successful follow-up currency (all patients) | 9261 ** 99%

Note: Percent should be 80% or greater.

---

FOLLOW-UP RATE FOR LIVING PATIENTS ONLY | NUMBER | PERCENT
--- | --- | ---
Enter the total number from Line C | 2433 | 100%
Subtract the total number from Line D | - 2380 | 98%
Total lost/not current of living patients | - 53 | 2%

DP  Delete OncoTraX Patient

The Delete OncoTraX Patient option allows you to delete an OncoTraX patient from the OncoTraX Patient file. You can also delete any associated records in the OncoTraX Primary file.

Note: Once you delete an abstract, you cannot undelete it. If you delete a patient by mistake, you have to manually re-enter the patient’s abstract.
**DS Delete Primary Site/Gp Record**

The Delete Primary Site/Gp Record option allows you to delete a selected primary record for a specific OncoTraX patient.

**SQ Find Duplicate Acc/Seq Numbers**

The Find Duplicate Ac/Seq Numbers option will check for any existing duplicates in the system.

**EA Edit Site/AccSeq# Data**

The Edit Site/AccSeq# Data option allows you to edit/correct accession numbers, sequence numbers, diagnosis dates, and so on.

**AR Create a Report to Preview ACoS Output**

The Create a Report to Preview ACoS Output option allows the cancer registrar to preview the contents of the specified accessions intended as output for the ACoS.

**CT Create ACoS Data Download**

The Create ACoS Data Download option allows you to create the file for submission to the American College of Surgeons (ACoS), in response to the annual call for data.

**SR Create a Report to Preview State/VACCR Output**

The Create a Report to Preview State/VACCR Output option allows you to print the state extract data in a report format.

**CC Create State/VACCR Data Download**

The Create State/VACCR Data Download option allows you to create a file for the transmission of cancer registry information, including confidential patient identity data to the State collecting agencies. This extraction routine includes/downloads only patients from your state based on ZIPCODE and COUNTY AT DIAGNOSIS. It also blanks out communicable diseases and substance abuse, which are protected by federal law.

**TR Define Cancer Registry Parameters**

The Define Cancer Registry Parameters option allows you to set up the OncoTraX: Cancer Registry software. You must use this option first, in order to make several of the follow-up options work. For more information, refer to software implementation in the *Oncology Technical Manual and Software Security Guide* at [http://www.va.gov/vdl/documents/Clinical/Oncology/onc211_tm.doc](http://www.va.gov/vdl/documents/Clinical/Oncology/onc211_tm.doc).
**AC  Enter/Edit Facility File**

The Enter/Edit Facility File option allows you to enter new facilities in the Facility file or change the data for a facility.

**CDD1  Print Condensed DD--OncoTraX Patient file**

The Print Condensed DD-OncoTraX Patient file option allows you to view the data dictionary, which lists all patient information files in the abstract. Use this option when doing custom reports.

**CDD2  Print Condensed DD--OncoTraX Primary file**

The Print Condensed DD-OncoTraX Primary file option allows you to view the data dictionary, which lists all primary information files in the abstract. Use this option when doing custom reports.

**PSR  Purge Suspense Records**

The Purge Suspense Records option allows you to enter multiple dates in the suspense file when deleting. *Use this option with caution.*

**SP  Purge Patient Records with No Suspense/Primaries**

The Purge Patient Records with No Suspense/Primaries option allows you to purge OncoTraX Patient records with no suspense records and no primaries

**CS  Restage CS Cases**

The Restage CS Cases option allows you to correct a problem in Collaborative Staging; use the most current version of collaborative staging. *Run it only once.*

**TNM  Compute Percentage of TNM Forms Completed**

The Compute Percentage of TNM Forms Completed option allows you to compute the percentage of Primary Tumor, Regional Lymph Nodes, and Distant Metastasis forms completed.

**TIME  Timeliness Report**

The Timeliness Report computes the percentage of cases within the selected date range, which have an ELAPSED DAYS TO COMPLETION value less than 180 days.

**CHEM Enter/Edit chemotherapeutic Drug File**

The Chem module allows user to enter chemotherapeutic drugs for use in CHEMOTHERAPY #1-10 fields. Enter generic chemotherapeutic drug name with its NSC number
RQRS  Create RQRS Extract

The RQRS module allows user to create a RQRS file for submission to ACoS- NCDB.

VistA can be set up in different ways.

**Line Editor**

If you are set up with **Line Editor** in VistA, your screen for entering text can look like the example, TEXT-DX PROC-PE:.. The number lines make editing a little difficult.

**Example of the Line Editor Screen**
**Screen Editor**

You can change to a more user-friendly word processing screen. Using the **Screen Editor**, you are able to move around easily, format your text, and do many things that are impossible with the line editor.

1. To change to the **Screen Editor**, type `^EDIT USER CHARACTERISTICS`.
2. Tab or arrow down to PREFERRED EDITOR: LINE EDITOR – VA FILEMAN.

3. Change **LINE** to **SCREEN**.
Example of the Screen Editor Screen

You can type in this screen, just like in Microsoft Word or Word Perfect. You are able to change margins, format text, join lines together, cut and paste text, easily delete text, and so on. Type **F1H** (H for help) to access word processing Help commands for the Screen Editor.
There are four Help screens to which you can navigate. Use the Arrow keys (to the left of the number pad) to move around the Help screens. Help Screen 3 of 4 is the most useful of the Help screens.

Instituted May 2007 with OncoTraX: Cancer Registry V.2.11 - Patch ONC*2.11*47

Subject: EDITS Application Program Interface (API)

Category: INPUT TEMPLATE
ROUTINE
DATA DICTIONARY
ENHANCEMENT
PRINT TEMPLATE

Description:

This patch is available via FTP in a KIDS distribution file. The Host File is named ONC211P47.KID and is located in the [ANONYMOUS.SOFTWARE] directory of the following OI Field Offices.

Preferred Address:

First available ftp server download.vista.med.va.gov

All Data Dictionary modifications and additions have been reviewed and approved by the Data Base Administrator.

This patch will implement the EDITS API.

When the registrar attempts to set the ABSTRACT STATUS (#165.5,91) to 3 (Complete), three things will occur:

1. The program will first check to make sure that all of the "required" data items have been filled in. This is currently being done.

2. Once all of the "required" data items have been filled in, the program will pass the abstract through a series of local inter-field edit checks. This is also currently being done.
3. Once all of the local inter-field edit checks have been resolved (or overridden), the program will invoke the EDITS API and pass the abstract through the EDITS application. This feature is new with this patch.

Example:

ABSTRACT STATUS: Incomplete// Complete
All required data fields have been entered.
Beginning inter-field edit checks...
No inter-field edit check warnings.

Calling EDITS API... — new with this patch

If the EDITS API encounters errors the error messages will be displayed followed by the following message:

EDITS errors were encountered. ABSTRACT STATUS is unchanged.

Example:

Calling EDITS API...

Date of Last Contact, Date of Diag. (NAACCR IF19)
E:Date of Diagnosis and Date of Last Contact conflict
Date of Diagnosis (283) = 12092004
Date of Last Contact (1294) = 09052003

RETURN to continue, '^' to exit, or Edit# for help:

<table>
<thead>
<tr>
<th>Edit Set</th>
<th>Errors</th>
<th>Warnings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Veterans Administration</td>
<td>1</td>
<td>0</td>
</tr>
</tbody>
</table>

EDITS errors were encountered. ABSTRACT STATUS is unchanged.

Note: Each error will be numbered sequentially. If the registrar wishes to see additional information about a specific error, he/she may enter the sequential error number after the "RETURN to continue, '^' to exit, or Edit# for help:" prompt for additional error information.

If EDITS errors are encountered, the registrar should then review the error messages and resolve any data conflicts.
If the EDITS API does not encounter any errors the program will do the following:
- ABSTRACT STATUS will be set to 3 (Complete).
- A unique checksum value will be computed for the abstract.
- DATE CASE COMPLETED will be set to the current date.
- ABSTRACTED BY will be set to the registrar who 'completed' the abstract.
The following messages will be displayed:

No EDITS errors or warnings.

ABSTRACT STATUS.......: Complete
DATE CASE COMPLETED....: 03/21/2007
ABSTRACTED BY.........: REGISTAR,TEST
DATE CASE LAST CHANGED:
CASE LAST CHANGED BY...:

Computing checksum value for this abstract...

Once an abstract has successfully passed through the EDITS API and its ABSTRACT STATUS set to 3 (Complete), if the registrar makes a change which will affect the abstract's NAACCR record, he/she will see the following message:

You have made a change to a 'Completed' abstract.
This abstract needs to be re-run through the EDITS API.

Calling EDITS API...

If no EDITS errors are encountered the registrar will see the following message:

No EDITS errors or warnings.  ABSTRACT STATUS = 3 (Complete).

If EDITS errors are encountered the registrar will see the following message:

EDITS errors were encountered.

The ABSTRACT STATUS has been changed to 0 (Incomplete).

Each time a 'complete' abstract is changed the abstract will be date-stamped with the date of the most recent change and the name of registrar making the change.
