Introduction

Package Status Update, January 2014:

This package's status has been changed to Class 3 Software, and will no longer be supported nationally.

In the Package file (#9.4), this application is known as Patient Assessment Documentation (PADP). The package namespace is NUPA. File numbers are in the range of 1927.09 to 1927.6. Contents of this package can be found in the VistA Software Documentation Library (VDL) in the Clinical Section.

<http://www4.va.gov/vdl/>

The PADP software application enables Registered Nurses (RNs) to document, in a standardized format, patient care during an inpatient stay. Although the content is standardized for use across the VA system, some parameters can be set to support the unique processes at individual medical centers.

PADP consists of a KIDS build, NUPA 1.0, and four (4) Delphi GUI templates in three executables.

1. The executable, **Admassess.exe**, contains the Admission - RN Assessment template and the Admission - Nursing Data Collection template.
 - **Admission – RN Assessment** allows RNs to document the status of the patient at admission.
 - **Admission – Nursing Data Collection** allows Licensed Practical Nurses (LPNs) and other nursing staff, including the RN, to enter basic patient data, such as vitals and belongings at the time of admission.
2. The executable, **Admassess_Shift.exe**, contains the RN Reassessment template.
RN Reassessment allows RNs to document the condition of the patient on a regular basis and any time during the inpatient stay.
3. The executable, **Admassess_Careplan.exe**, contains the Interdisciplinary Plan of Care template.
Interdisciplinary Plan of Care interfaces with admission and reassessment data, and allows additional information to be entered by the RN and other health care personnel (physicians, social workers, chaplain, etc.). All clinical staff can enter information into the Plan of Care. The Plan of Care can be printed and given to the patient when appropriate.

PADP also adds to VistA new health factors, fourteen (14) files, thirty-six (36) parameters, and five (5) printouts. The 5 printouts are:

1. The Daily Plan® is a health summary designed to be given to the patient and family
Located in Interdisciplinary Plan of Care, view CP tab
2. Plan of Care is a plan designed to guide the nursing staff
Located in Interdisciplinary Plan of Care, view CP tab
3. Discharge Plan is for discharge planners
Located in Interdisciplinary Plan of Care, view CP tab
4. Belongings is a list of patient belongings
Located in Admission – RN Assessment/Admission - Nursing Data Collection
5. Safe Patient Handling is designed to guide the transfer of a patient
Located on the Function tab in Admission - RN Assessment, RN Reassessment, and Interdisciplinary Plan of Care, view CP tab

Pre-installation Instructions

Requirements for M Server Installation

Related Software: All referenced software and patches must be up-to-date.
PADP requires that the following software is installed and fully-patched.

Package	Namespace	Minimum Version
Clinical Reminders	PXRM	2.0*5
CPRS	OR OR	GUI V. 27.90 3.0*243 (V. 27)
Kernel	XU	8.0
MailMan	XM	8.0
Text Integration Utilities	TIU	1.0
VA FileMan	DI	22.0
Vitals/Measurements	GMRV	5.0*22
Adverse Reaction Tracking	GMRA	4.0*42
Consult Request Tracking	GMRC	3.0*1
Remote Procedure Call	XWB	1.1*47
MHA DLL (Mental Health Assistant DLL) Mental Health Assistant	YS*5.01*98 All YS* patches	
Patient Care Encounter	PX	1

Note Titles

PADP is **hard-coded** to look for the **EXACT** TIU Progress Note Title and that title must be associated with the following VHA Enterprise Standard Title.

PADP Delphi Template: Admission – RN Assessment
TIU Progress Note Title: RN Admission Assessment
VHA Enterprise Standard Title: Nursing Admission Evaluation Note

PADP Delphi Template: Admission – Nursing Data Collection
TIU Progress Note Title: Nursing Admission Data Collection
VHA Enterprise Standard Title: Nursing Admission Evaluation Note

PADP Delphi Template: RN Reassessment
TIU Progress Note Title: RN Reassessment
VHA Enterprise Standard Title: Nursing Inpatient E & M Note

PADP Delphi Template: Interdisciplinary Plan of Care
TIU Progress Note Title: Interdisciplinary Plan of Care
VHA Enterprise Standard Title: Interdisciplinary Treatment Plan Note

A Clinical Application Coordinator (CAC) or an Automated Data Processing Application Coordinator (ADPAC) creates the note titles in TIU: *Create Document Definitions under Progress Notes Document Class*.

Note: Do not add boilerplate text. However, if the note titles are already in the system, any associated boilerplate or template will not interfere with PADP process.

Example

Select Document Definitions (Manager) Option: create document definitions

Installation Procedures

Note: If PADP is installed and not implemented, only the Server Installation needs to be completed.

If the application is implemented, both the Server Installation and VistA Setup must be completed. This includes assigning menu and file access, as well as setting up the TIU Progress Note Titles, the Tools links, and the Parameters for all Required and Optional Consult Services the facility is using.

- The IRM installs the M component and three Graphical User Interface (GUI) components. All the required M files are contained in the KIDS distribution file NUPA_1_0.KID. The executable files and help files are bundled into a zip file, NUPA.ZIP.
- Installation should take less than 3 minutes, but installing at non-peak hours is recommended.

Anonymous Software and Documentation

PADP software and documentation files are available in the following names and formats:

Document File Description	File Names	FTP Mode
KIDS Build	NUPA_1_0.KID	ASCII
Executable and Help files	NUPA.ZIP	Binary
PADP Installation Guide	NUPA1_0IG.DOCX NUPA1_0IG.PDF	
PADP Technical Manual	NUPA1_0TM. DOCX NUPA1_0TM.PDF	
PADP Admission – RN Assessment User Manual	NUPA1_0_AUM. DOCX NUPA1_0_AUM.PDF	
PADP RN Reassessment User Manual	NUPA1_0_RUM. DOCX NUPA1_0_RUM.PDF	
PADP Admission – Nursing Data Collection User Manual	NUPA1_0_DCUM. DOCX NUPA1_0_DCUM.PDF	
PADP Interdisciplinary Plan of Care User Manual	NUPA1_0_IUM. DOCX NUPA1_0_IUM.PDF	

Retrieve these files via FTP from **download.vista.med.va.gov**, which transmits the files from the first available FTP server (preferred method). You can also retrieve the files directly from one of the following FTP sites:

OIFO	FTP Address	Directory
REDACTED	REDACTED	REDACTED
REDACTED	REDACTED	REDACTED
REDACTED	REDACTED	REDACTED

Server Installation/Kernel Installation and Distribution System (KIDS)

1. Download **NUPA_1_0.KID** (ASCII mode), and **NUPA.ZIP** (BINARY mode), from the FTP server listed on the previous page.
2. Move the files to the appropriate directory on your system.
3. Select the Load a Distribution option and enter **NUPA_1_0.KID** when prompted at the host file prompt. You may need to prefix a directory name.

Example

```
Select Installation Option: LOAD a Distribution
  Enter a Host File: VA16$[SMAVISTA.IRMPERSON]NUPA_1_0.KID

KIDS Distribution saved on Jan 19, 2012@10:16:50
Comment: NUPA 1.0

This Distribution contains Transport Globals for the following Package(s):
  NUPA*1.0*0
Distribution OK!

Want to Continue with Load? YES//
Loading Distribution...

  NUPA*1.0*0
Use INSTALL NAME: NUPA*1.0*0 to install this Distribution.
```

4. Select any or all of the following options (KIDS Installation Menu) as desired:
 - Print Transport Global
 - Compare Transport Global to Current System
 - Verify Checksums in Transport Global

5. From the Kernel Installation & Distribution System menu, select the **Backup a Transport Global menu**.

```
Select Installation Option: Backup a Transport Global
Select INSTALL NAME:  NUPA*1.0*0    Loaded from Distribution 1/19/12@10:16:05
=> Completed/Released NUPA*1.0*0
It consists of the following Install(s):
    NUPA*1.0*0

7. Verify new Checksums.

Select Programmer Options Option: Calculate and Show Checksum Values

This option determines the current Old (CHECK^XTSUMBLD) or New (CHECK1^XTSUMBLD) logic checksum of selected routine(s).

Select one of the following:

- | | |
|---|-----|
| 1 | Old |
| 2 | New |

New or Old Checksums: New//

New CheckSum CHECK1^XTSUMBLD: This option determines the current checksum of selected routine(s).

The Checksum of the routine is determined as follows:

1. Any comment line with a single semi-colon is presumed to be followed by comments and only the line tag will be included.
2. Line 2 will be excluded from the count.
3. The total value of the routine is determined (excluding exceptions noted above) by multiplying the ASCII value of each character by its position on the line and position of the line in the routine being checked.

Select one of the following:

- | | |
|---|---------|
| P | Package |
| B | Build |

Build from: Package

All Routines? No => No

Routine: NUPABCL

```

Routine: NUPABCL1
Routine: NUPABCL2
Routine: NUPAOBJ
Routine: NUPAOBJ1
Routine: NUPAPI
Routine: NUPAPI1
Routine: NUPAPI2
Routine:
8 routines

NUPABCL    value = 28658049
NUPABCL1   value = 34269162
NUPABCL2   value = 92151696
NUPAOBJ     value = 46106373
NUPAOBJ1    value = 73459792
NUPAPI      value = 36387812
NUPAPI1     value = 181278121
NUPAPI2     value = 181599162
done

```

8. The IRM support staff unzips the **NUPA.ZIP** file and places the files in a designated folder on an application server, i.e., \\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment.

The NUPA.ZIP file contains the following files:

1. Admassess.exe
2. Admassess_Shift.exe
3. Admassess_Careplan.exe
4. Admassess_CRC.txt
5. borIndmm.dll
6. Nupa1_0um help DC.chm
7. Nupa1_0um help R.chm
8. Nupa1_0um help IPofC.chm
9. Nupa1_0um help A.chm

Note: If the site chooses to only INSTALL Patient Assessment Documentation Package and not implement, you have completed the install process. The VistA set up of PADP is only required if you are planning to implement the new application.

Post-installation VistA Setup

IRM Support Staff

Assign Menu and FileMan Access

1. Assign menu and FileMan access.
 - a. For all staff who will enter data into the four templates:
Assign the **NUPA ASSESSMENT GUI** as a secondary menu option.
 - b. For the person responsible for the NUPA parameters:
Assign **FileMan Codes: Nn** and give **Read, Write, Delete and Laygo** access for the NUPA ASSESSMENT HEALTH FACTORS/PCE INFO file (#1927.32).
The other NUPA files must not be edited locally.

Note: Assigning the FileMan menu is optional.

If the site is not setting up Nursing Reminders to be resolved in PADP, do not edit this file.

If your site is setting up Nursing Reminders, discuss this with the Clinical Reminders CAC at your site and refer to **Edit File NUPA PCE Info** in the *PADP Technical Manual* for setup examples.

Schedule NUPA Purge Saved Notes Option

2. Schedule the NUPA PURGE SAVED NOTES option.
 - a. Information from notes *saved for later*: Nursing Admission Data Collection, RN Admission Assessment and RN Reassessment, is in the NUPA SAVED NOTES file (#1927.09).
 - b. To purge the NUPA SAVED NOTES file (#1927.09) on a regular basis, the IRM staff must set up the purge option. This purges any saved (unsigned) information older than five days.
 - c. Queue the NUPA PURGE SAVED NOTES option to run via Taskman's Schedule/Unschedule Options (XUTM SCHEDULE) menu to run on a daily basis shortly after midnight.

```
Select OPTION to schedule or reschedule: NUPA PURGE SAVED NOTES          Purge Saved
Notes Over 5 Days Old
      ...OK? Yes//      (Yes)
                        Edit Option Schedule

CAC or ADPAC Staff

The IRM support staff provides to the CAC the exact server folder name in which the NUPA.zip file was placed. The CAC uses this server address to set up the executables on the Tools menu in CPRS.

Set up Executables on the Tools Menus

1. Set up the executables on the CPRS Tools menu.
 - **Admassess.exe** contains the templates: Admission - RN Assessment and Admission - Nursing Data Collection
 - **Admassess_Shift.exe** contains the template: RN Reassessment
 - **Admassess_Careplan.exe** contains the template: Interdisciplinary Plan of Care

Follow the steps in the example

- a. Select the **CPRS Manager Menu** option: PE CPRS Configuration (Clin Coord).
Select **GP**, GUI Parameters to set up the Tools link for **admassess.exe**.

```
Select GUI Parameters Option:  TM  GUI Tool Menu Items

CPRS GUI Tools Menu may be set for the following:

      1  User          USR      [choose from NEW PERSON]
      2  Location      LOC      [choose from HOSPITAL LOCATION]
      2.5 Service      SRV      [choose from SERVICE/SECTION]
      3  Division      DIV      [choose from INSTITUTION]
      4  System        SYS      [DEVCUR.FO-SLC.MED.VA.GOV]

Enter selection: 3  Division  INSTITUTION
Select INSTITUTION NAME: SALT LAKE CITY OIFO  UT  ISC  5000

----- Setting CPRS GUI Tools Menu  for Division: SALT LAKE CITY OIFO -----
Select Sequence: 2
Are you adding 2 as a new Sequence? Yes// y YES

Sequence: 2// 2
Name=Command: Admission Assessment=
"\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment\Admassess.exe" %SRV
%PORT %DFN
```

Note: The Assessment is not CCOW compliant; including **%DFN** in the command line, forces the chart to open at the same patient to which CPRS is currently open.

- b. For Admission - Nursing Data Collection, set up the item as in the example, but add the parameter **datacoll** to the end of the **Name:Command** line.
- c. Repeat step a for the Interdisciplinary Plan of Care (**admassess_careplan.exe**) and RN Reassessment (**admassess_shift.exe**).

Summary of display from the CPRS Manager Menu

```

Admission Assessment=
"\\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment\Admassess.exe" %SRV
%PORT %DFN

Nursing Data Collection=
"\\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment\Admassess.exe" %SRV
%PORT %DFN datacoll

RN Reassessment=
"\\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment\Admassess_shift.exe"
%SRV %PORT %DFN

Interdisciplinary Plan of Care=
"\\vhaxxxmul##\VISTA_Software\CPRS\NursingAssessment\admassess_Careplan.exe"
%SRV %PORT %DFN

```

Parameters for Consults Ordered from the PADP Templates

The following parameters control consults that can be ordered from the PADP templates.

Parameters that control required consults

The following consult parameters control required consults.

NUPA CHAPLAIN CONSULT	Chaplain Consult
NUPA NUTRITION CONSULT	Nutrition consult name
NUPA PRESSURE ULCER SITE	Pressure ulcer site
NUPA SOCIAL WORK CONSULT	Social Work consult name
NUPA SPEECH CONSULT	Speech consult name
NUPA WOUND CARE CONSULT	Wound care consult

Parameters that control optional consults

The following parameters control optional consults.

1. If you will use the Associated Consult in your Patient Assessment Documentation system, set the SEND parameter value to YES.

NUPA SEND DIAB NURSE CONS	Send Diabetes Nurse Consult
NUPA SEND DISCH PLAN CONSULT	Send Discharge Planning Consult
NUPA SEND HOME CARE CONSULT	Send Home Care Consult
NUPA SEND NURSE REHAB CONSULT	Send Nurse Rehab consult
NUPA SEND NURSE REST CONSULT	Send Nurse Rest. consult
NUPA SEND RESPIRATORY CONSULT	Send respiratory consult
NUPA SEND TELEHEALTH CONSULT	Send Telehealth Consult
NUPA SEND WOMENS H CONSULT	Send Women's Health consult

2. For the eight SEND parameters above with a value set to YES, now enter the name of the Associated Consult specialty in the NUPA Consult parameters below.

NUPA DIAB NURSE CONSULT	Diabetes Nurse Consult
NUPA DISCH PLAN CONSULT	Discharge Planning consult name
NUPA HOME CARE CONSULT	Home Care consult name
NUPA NURSE REHAB CONSULT	Rehab consult name
NUPA NURSE REST CONSULT	Nurse Restorative consult name
NUPA RESPIRATORY CONSULT	Respiratory consult name
NUPA TELEHEALTH CONSULT	Telehealth Consult name
NUPA WOMENS HEALTH CONSULT	Women's Health Consult name

Set up Consult Parameters

To set up the parameters, use the XPAR Menu Tools, Edit Parameter Values [XPAR EDIT PARAMETER].

1. Review the consults in your system.
2. Identify the consult specialties that you order via the notes: RN Admission Assessment and RN Reassessment.
3. Keep the following considerations in mind:
 - If you are a single division medical center, set the parameter at **System** or **Division** level. Associate the System or Division with the appropriate consult.
 - If there is only one consult for a Specialty for the entire system or division, set the parameter at the **System** or **Division** level. Associate the System or Division with the appropriate consult.
 - If there is one consult for a Specialty per Division, set the parameter at the **Division** level. Associate the Division with the appropriate consult.
 - If there is more than one consult per Specialty for a Division, like one social work consult for Med/Surg units and another one for Mental Health/Psych units, set the parameter at the **Location** (MAS bed section, ward) level. Associate each Location with the appropriate consult.

Example: Set One Consult Service per Specialty at the System Level

Set up NUPA CHAPLAIN CONSULT as:

```
Select Menu Option:  IR  CPRS Configuration (IRM)

Select CPRS Configuration (IRM) Option:  XX  General Parameter Tools

Select General Parameter Tools Option:  EP  Edit Parameter Values
          --- Edit Parameter Values ---

Select PARAMETER DEFINITION NAME:NUPA CHAPLAIN CONSULT

NUPA CHAPLAIN CONSULT may be set for the following:

    1  Location      LOC      [choose from HOSPITAL LOCATION]
    2  Division      DIV      [choose from INSTITUTION]
    3  System        SYS      [TEST.BRONX.MED.VA.GOV]

Enter selection:  3 System
Select SYSTEM NAME:  TEST.BRONX.MED.VA.GOV

----- Setting NUPA CHAPLAIN CONSULT  for System:
Consult name: CHAPLAIN
```

Attention: Site ISOs and Privacy Officers

Update your existing site PIA

You must add the following information to the appropriate Minor Application tab of your existing site PIA.

- Tab 10 is for a minor application that gets security controls from VistA.
- Tab 11 is for a standalone minor application.

Name	Patient Assessment Documentation Package (PADP)
Description	The Patient Assessment Documentation Package (PADP) is a Veterans Health Information Systems and Technology Architecture (VistA) software application that enables Registered Nurses (RNs) to document, in a standardized format, patient care during an inpatient stay. NUPA namespace
Comments	
Is PII collected by this minor application?	Yes
Does this minor application store PII?	Yes
If yes, where?	VistA
Who has access to this data?	Local VA clinicians
