Purpose

The purpose of this Installation Guide is to provide an explanation of the installation process for the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build. The intended audience for this document is the Information Resources Management Service (IRMS) staff and Pharmacy staff responsible for installing and maintaining the Pharmacy files required for drug selection through Pharmacy and Computerized Patient Record System (CPRS).

The Pharmacy Ordering Enhancements (POE) Phase 2 project completes the work that the POE Pharmacy Data Management (PDM) Pre-Release began. The earlier POE PDM Pre-Release project created new fields and provided reports and options to assist in the population and maintenance of data that would be necessary for the installation of this CPRS/Pharmacy Ordering Enhancements 1.0 Master Build.

The POE Phase 2 project includes the installation of the PSO*7*46, OR*3*94, PSS*1*38, and PSJ*5*50 patches, which will provide or relocate needed functionality and delete obsolete options. These changes will allow for streamlining of the medication order entry process, expanded order checking, and improved medication order transfer between the Inpatient Medications and Outpatient Pharmacy applications.

Scope

The CPRS Clinical Workgroup (the Workgroup) requested changes in the Pharmacy medication ordering dialogs in order to eliminate the need for redundant entry of drug information during medication order entry and to improve the process for transferring orders between the Inpatient Medications and Outpatient Pharmacy applications. Additional enhancement requests from the Workgroup were to provide order checks for all medication orders entered through CPRS and to provide drug specific information during medication order entry.

< This page left blank for two-sided printing. >

Pre-Installation

Significant changes to routines, options, files and fields will occur with the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build. Prior to installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build the installer should carefully read the Pharmacy Ordering Enhancements (POE) Phase 2 Release Notes found on the *VistA* Documentation Library (VDL) web page at <http://vista.med.va.gov/vdl>.

Additionally, before installing the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build, it is imperative that the POE PDM Pre-Release patch PSS*1*34 be installed and that the setup steps in the POE PDM Pre-Release Implementation Guide be completed. Instructions on the installation of PSS*1*34 and the necessary modifications to Pharmacy files can be found in the POE PDM Pre-Release Implementation Guide in the VDL at <http://vista.med.va.gov/vdl>.

Note that the earlier POE PDM Pre-Release changes were made directly into the production account. Therefore, the production account must be mirrored to the test account prior to the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build into the test account, to insure that the test account will be current.

Once the production account has successfully been mirrored to the test account, the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build can then be installed into the test account.

Prior to installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build, as many pending Outpatient Pharmacy and Inpatient Medication orders should be finished as possible.

OR*3*109 and the associated GUI executable file must be installed prior to the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build for all Pharmacy Ordering Enhancements Phase 2 functionality to be available to the CPRS user. See the OR*3*109 patch description for installation instructions and requirements.

Before beginning the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build, the IRMS representative, or party responsible for installing the patch, should mirror the current production account to the test account so that it will be updated to reflect all changes made as a result of the POE PDM Pre-Release project. Once the production account has been mirrored to the test account, the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build may be installed into the **test account**.

Minimum Required Packages

This CPRS/Pharmacy Ordering Enhancements 1.0 Master Build can only be run with a standard MUMPS operating system and requires the following Department of Veterans Affairs (VA) software packages.

Package	Minimum Version Needed
Pharmacy Data Management (PDM)	1.0
VA FileMan	22.0
Kernel	8.0
Patient Information Management System (PIMS)	5.3
National Drug File (NDF)	4.0
Integrated Billing	2.0
Fee Basis	3.5
Adverse Reaction Tracking (ART)	4.0
Inpatient Medications (IM)	5.0
IFCAP	5.0
Laboratory	5.2
Order Entry/Results Reporting (OERR)	3.0
Outpatient Pharmacy (OP)	7.0
Decision Support System	3.0

The above software is not included in this Master Build and must be installed for this build to be completely functional.

< This page left blank for two-sided printing. >

Required Patches

Prior to installation of this CPRS/Pharmacy Ordering Enhancements 1.0 Master Build, the following patches must be installed into each of the applications listed below.

Outpatient Pharmacy V. 7.0

PSO*7*41 PSO*7*55
PSO*7*49 PSO*7*62
PSO*7*51 PSO*7*64
PSO*7*54

Computerized Patient Record System V. 1.0

OR*3*11
OR*3*87
OR*3*97
OR*3*99
OR*3*106
OR*3*108
OR*3*109

Pharmacy Data Management V. 1.0

PSS*1*20
PSS*1*27
PSS*1*33
PSS*1*34
PSS*1*40
PSS*1*45

Inpatient Medications V. 5.0

PSJ*5*47
PSJ*5*49
PSJ*5*51
PSJ*5*60

< This page left blank for two-sided printing. >

Installation

The POE Phase 2 project is comprised of four patches. All four patches will install when the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build is loaded into the test account. Patch PSO*7*46 will load first, followed by OR*3*94, PSS*1*38, and PSJ*5*50. Please read the following installation instructions carefully before beginning the installation. Information on routines, options, protocols, files, and fields that have been deleted or changed can be found in the POE Release Notes in the *VistA* Documentation Library at <http://vista.med.va.gov/vdl>.

Before installing this patch, use the TaskMan *List Tasks* option to list currently running tasks. It is recommended that no Outpatient Pharmacy, Inpatient Medications, PDM or CPRS tasks be running at the time of this installation. The suggested time to install is during non-peak requirement hours for Outpatient Pharmacy, Inpatient Medications, PDM, BCMA, and CPRS users. For best results, it is recommended that this patch not be installed while Outpatient Pharmacy, Inpatient Medications, PDM, BCMA, or CPRS users are using the software. Additionally, Consolidated Mail Outpatient Pharmacy (CMOP) transmissions should not be taking place during the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build.

The user who installs the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build should receive several mail messages when the installation is complete. These messages are sent only to the person who performs the installation. Installers may want to consider forwarding these messages to additional staff as deemed appropriate. Examples of these messages are contained in the Post-Installation section of this manual.

PSO*7*46 queues a background job within the post-install routine. This routine sets the field POE RX in the Prescription file (#52) equal to 1. The setting of this field is not dependant on any other data entered into the file. Because this background is not dependant on any other data there is not a restart entry point. The background job will display as “Flagging All Prescriptions as POE Orders.”

This patch will be available only as a host file. The name of the file is CPRS_POE_10.KID. This file needs to be retrieved in ASCII format.

Sites will retrieve *VistA* software from the following FTP addresses. The preferred method is to FTP the files from REDACTED. This transmits the files from the first available FTP server. Sites may also elect to retrieve software directly from a specific server as follows.

<u>OI Field Office</u>	<u>FTP Address</u>	<u>Directory</u>
REDACTED		

Installation should take no longer than 30 minutes.

< This page left blank for two-sided printing. >

Installation Steps

1. Download the KIDS file CPRS_POE_10.KID via FTP. This file needs to be retrieved in ASCII format.
2. Review mapped sets for the PSO*, OR*, PSS*, PSJ*, PSG*, -PSGW* and PSIV* namespaces. If the routines are mapped, they should be removed from the mapped set at this time.
3. From the *Kernel Installation & Distribution System* menu, select the *Installation* menu.
4. From this menu, select the *Load a Distribution* option. When prompted for a file name, enter CPRS_POE_10.KID
5. From this menu, the installer may select to use the following options:

(When prompted for INSTALL NAME, enter CPRS/PHARMACY ORDERING ENHANCEMENTS 1.0)
 - a. *Backup a Transport Global* - This option will create a backup message of any routines exported with the patch. It will NOT backup any other changes such as DDs or templates.
 - b. *Compare Transport Global to Current System* - This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).
 - c. *Verify Checksums in Transport Global* - This option will ensure the integrity of the routines that are in the transport global.
6. Use the *Install Package(s)* option and select the package CPRS/PHARMACY ORDERING ENHANCEMENTS 1.0.
7. When prompted, "Want KIDS to Rebuild Menu Trees Upon Completion of Install? YES/" respond **NO**.
8. When prompted, "Want KIDS to INHIBIT LOGONs during the install? YES/" respond **NO**.
9. When prompted, "Want to DISABLE Scheduled Options, Menu Options, and Protocols? YES/" respond **NO**.
10. If routines were unmapped as part of step 2, they should be returned to the mapped set once the installation has run to completion.

Post-Installation

Outpatient Pharmacy V. 7.0

There are no Outpatient Pharmacy mail messages delivered to the installer or any other users as a result of the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build.

Computerized Patient Record System V. 1.0

The user who installs the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build should receive a mail message similar to the following when the CPRS conversion is complete. The IRMS representative may find it helpful to forward this information to the Pharmacy Automated Data Processing Application Coordinator (ADPAC). The number of Pharmacy quick orders listed in this example is typical of an active site.

```

```

In addition to the mail message, after the installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build, CPRS has a post-init routine that loops through all of the Pharmacy quick orders stored in CPRS to fix the following two problems.

1. CPRS looks for any Pharmacy quick orders that use Orderable Items that PDM has inactivated and makes a call to see if PDM has a new Orderable Item to replace the old Orderable Item. If a new Orderable Item is returned, CPRS updates the Pharmacy quick order automatically. If a new Orderable Item is not returned, a bulletin is generated at the end of the post-init that contains a list of all Pharmacy quick orders that still have inactive Orderable Items, and the bulletin is sent to the user who ran the install.
2. Because this patch changes the way that dose instructions are prompted for in the Outpatient Pharmacy ordering dialog, the same routine will also attempt to convert the dose saved with Outpatient Pharmacy quick orders into the new format. Any Outpatient Pharmacy quick order that cannot be automatically converted will be listed in the bulletin generated at the end of the post-init.

Pharmacy Data Management V. 1.0

The person who installs the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build should receive the following message when the PDM post-installation is complete. The message captures the start time and end time of the installation.

```
Subj: Pharmacy Ordering Enhancements Install [#83473] 01 Jun 01 12:20
3 lines
From: PHARMACY DATA MANAGEMENT PACKAGE In 'IN' basket. Page 1 *New*
-----
The Pharmacy Ordering Enhancements installation is complete.
It started on JUN 01, 2000@12:14:07.
It ended on JUN 01, 2001@12:20:45.

Enter message action (in IN basket): Ignore//
```

The Pharmacy Data Management post-install routine, PSSPOST2, has a line tag that can be called from programmer mode in the event that this routine generates an error. The line tag is RESTART^PSSPOST2. By calling that line tag, the entire post-install routine will run again. The code has been written so it can run multiple times, but the routine will only run on the first installation of the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build.

Inpatient Medications V. 5.0

The person who installs the CPRS/Pharmacy Ordering Enhancements 1.0 Master Build should receive the following message when the conversion for Inpatient Medications is complete. The IRMS representative may find it helpful to forward this information to the Pharmacy ADPAC.

```
Subj: Inpatient Meds IV conversion [#44950402] 29 Apr 01 22:37 2 lines
From: INPATIENT MEDS POE In 'IN' basket. Page 1 *New*
-----
The conversion was first started: Apr 29, 2001@21:52:31
It ran to completion: Apr 29, 2001@22:37:23

Enter message action (in IN basket): Delete//
