## Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists “All,” replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

Inpatient Medications V. 5.0
Pharmacist’s User Manual
PSJ*5*175
(This page included for two-sided copying.)
3. List Manager

The new screen, which was designed using List Manager, has dramatically changed from the previous release.

This new screen will give the user:

- More pertinent information
- Easier accessibility to vital reports and areas of a patient’s chart the user may wish to see.

Please take the time to read over the explanation of the screen and the actions that can now be executed at the touch of a button. This type of preparation before using List Manager is effective in saving time and effort.

Inpatient List Manager

**Screen Title**

Patient Information  Sep 15, 2000 11:32:08  Page: 1 of 1

PSJPATIENT2,TWO  Ward: 1 West

PID: 000-00-0002  Room-Bed: A-6  Ht(cm): 167.64 (04/21/99)
DOB: 02/22/42 (58)  Wt(kg): 85.00 (04/21/99)
Sex: MALE  Admitted: 09/16/99
Dx: TEST PATIENT  Last transferred: ********

Allergies - Verified: CARAMEL, CN900, LOMEFLOXACIN, PENTAMIDINE, PENTAZOCINE, CHOCOLATE, NUTS, STRAWBERRIES, DUST
Non-Verified: AMOXICILLIN, AMPICILLIN, TAPE, FISH, FLUPHENAZINE DECANOATE

Remote:
Adverse Reactions:
Inpatient Narrative: Inpatient narrative for PSJPATIENT2
Outpatient Narrative: This patient doesn't like waiting at the pickup window. He gets very angry.

PU Patient Record Update  NO New Order Entry
DA Detailed Allergy/ADR List  IN Intervention Menu
VP View Profile
Select Action: View Profile//

* Crises, Warnings, Allergies, and Directives (CWAD)
**Screen Title:** The screen title changes according to what type of information List Manager is displaying (e.g., Patient Information, Non-Verified Order, Inpatient Order Entry, etc).

**CWAD Indicator:** This indicator will display when the crises, warnings, allergies, and directives information has been entered for the patient. (This information is entered via the Text Integration Utilities (TIU) package.) When the patient has Allergy/ADR data defined, an “<A>” is displayed to the right of the ward location to alert the user of the existence of this information.

**Note:** This data may be displayed using the Detailed Allergy/ADR List action). Crises, warnings, and directives are displayed respectively, “<C>”,”<W>”, “<D>”. This data may be displayed using the CWAD hidden action). Any combination of the four indicators can display.

**Header Area:** The header area is a “fixed” (non-scrollable) area that displays the patient’s demographic information. This also includes information about the patient’s current admission. The status and type of order are displayed in the top left corner of the heading, and will include the priority (if defined) for pending orders.

**List Area:** (scrolling region): This is the section that will scroll (like the previous version) and display the information that an action can be taken on. The Allergies/Reactions line includes non-verified and verified Allergy/ADR information as defined in the Allergy package. The allergy data is sorted by type (DRUG, OTHER, FOOD). If no data is found for a category, the heading for that category is not displayed. The Inpatient and Outpatient Narrative lines may be used by the inpatient pharmacy staff to display information specific to the current admission for the patient.

**Message Window:** This section displays a plus sign (+), if the list is longer than one screen, and informational text (e.g., Enter ?? for more actions). If the plus sign is entered at the action prompt, List Manager will “jump” forward to the next screen. The plus sign is only a valid action if it is displayed in the message window.

**Action Area:** The list of valid actions available to the user display in this area of the screen. If a double question mark (?) is entered at the “Select Action:” prompt, a “hidden” list of additional actions that are available will be displayed.
4.1.3 Inpatient Order Entry
[PSJ OE]

The *Inpatient Order Entry* option allows the pharmacist to create, edit, renew, hold, and discontinue Unit Dose and IV orders, as well as put existing IV orders on call for any patient, while remaining in the Unit Dose Medications module.

When the user accesses the *Inpatient Order Entry* option from the Unit Dose Medications module for the first time within a session, a prompt is displayed to select the IV room in which to enter orders. When only one active IV room exists, the system will automatically select that IV room. The user is then given the label and report devices defined for the IV room chosen. If no devices have been defined, the user will be given the opportunity to choose them. If this option is exited and then re-entered within the same session, the current label and report devices are shown. The following example shows the option re-entered during the same session.

**Example: Inpatient Order Entry**

Select Unit Dose Medications Option: *IOE*  Inpatient Order Entry
You are signed on under the BIRMINGHAM ISC IV ROOM
Current IV LABEL device is: NT TELNET TERMINAL
Current IV REPORT device is: NT TELNET TERMINAL
Select PATIENT: PSJPATIENT1

At the “Select PATIENT:” prompt, the user can enter the patient’s name or enter the first letter of the patient’s last name and the last four digits of the patient’s social security number (e.g., P0001). The Patient Information Screen is displayed:

**Example: Patient Information Screen**

Patient Information           Sep 12, 2000 10:36:38          Page:    1 of    1

VP View Profile
Select Action: View Profile//

The pharmacist can now enter a Patient Action at the “Select Action: View Profile//” prompt in the Action Area of the screen.
4.1.4. **Patient Actions**

The Patient Actions are the actions available in the Action Area of the List Manager Screen. These actions pertain to the patient information and include editing, viewing, and new order entry.

4.1.4.1. **Patient Record Update**

The Patient Record Update action allows editing of the Inpatient Narrative and the Patient’s Default Stop Date and Time for Unit Dose Order entry.

**Example: Patient Record Update**

<td></td>
</tr>
<tr>
<td>UD DEFAULT STOP DATE/TIME: SEP 21,2000@24:00//</td>
<td></td>
</tr>
</tbody>
</table>

The “INPATIENT NARRATIVE: INP NARR...//” prompt allows the pharmacist to enter information in a free text format, up to 250 characters.

The “UD DEFAULT STOP DATE/TIME:” prompt is the date and time entry to be used as the default value for the STOP DATE/TIME of the Unit Dose orders during order entry and renewal processes. This value is used only if the corresponding ward parameter is enabled. The order entry and renewal processes will sometimes change this date and time.

**Note:** If the Unit Dose order, being finished by the pharmacist, is received from CPRS and has a duration assigned, the UD DEFAULT STOP DATE/TIME is displayed as the Calc Stop Date/Time.

When the SAME STOP DATE ON ALL ORDERS parameter is set to Yes, the module will assign the same default stop date for each patient. This date is initially set when the first order is entered for the patient, and can change when an order for the patient is renewed. This date is shown as the default value for the stop date of each of the orders entered for the patient.

The Detailed Allergy/ADR List action displays a detailed listing of the selected item from the patient’s Allergy/ADR List. Entry to the *Edit Allergy/ADR Data* option is provided with this list also.

- **Enter/Edit Allergy/ADR Data**
  
  Provides access to the Adverse Reaction Tracking (ART) package to allow entry and/or edit of allergy adverse reaction data for the patient. See the Allergy package documentation for more information on Allergy/ADR processing.

- **Select Allergy**
  
  Allows the user to view a specific allergy.

4.1.4.4. **Intervention Menu**

*This option is only available to those users who hold the PSJ RPHARM key.*

The Intervention Menu action allows entry of new interventions and existing interventions to be edited, deleted, viewed, or printed. Each kind of intervention will be discussed and an example will follow.
- **New**: This option is used to add an entry into the APSP INTERVENTION file.

**Example: New Intervention**

### 4.1.4.6. Patient Information

The Patient Information screen is displayed for the selected patient. This header contains the patient’s demographic data, while the list area contains the Allergy/Adverse Reaction data, and Pharmacy Narratives. If an outpatient is selected, all future appointments in clinics that allow Inpatient Medications unit dose orders will display in the list area, too.

The pharmacist can now enter a Patient Action at the “Select Action: View Profile//” prompt in the Action Area of the screen.

4.2.2. Inpatient Order Entry

[PSJ OE]

The Inpatient Order Entry option allows the pharmacist to complete, create, edit, renew, and discontinue IV and Unit Dose orders, as well as put existing IV and Unit Dose orders on hold for any patient, while remaining in the IV module. The IV orders can also be put on call. This option expedites order entry since the pharmacist is not required to change modules to enter IV and Unit Dose orders.

When the user accesses the Inpatient Order Entry option for the first time within a session, a prompt is displayed to select the IV room in which to enter orders. When only one active IV room exists, the system will automatically select that IV room. The user is then given the label and report devices defined for the IV room chosen. If no devices have been defined, the user will be given the opportunity to choose them. If this option is exited and then re-entered within the same session, the current label and report devices are shown. The following example shows the option re-entered during the same session.

Example: Inpatient Order Entry

Select IV MENU Option: IOE Inpatient Order Entry
You are signed on under the BIRMINGHAM ISC IV ROOM
Current IV LABEL device is: NT TELNET TERMINAL
Current IV REPORT device is: NT TELNET TERMINAL
Select PATIENT: PSJPATIENT1,ONE
At the “Select PATIENT:” prompt, the user can enter the patient’s name or enter the first letter of the patient’s last name and the last four digits of the patient’s social security number (e.g., P0001). The Patient Information Screen is displayed:

**Example: Patient Information**

### 4.2.3. Patient Actions

The Patient Actions are the actions available in the Action Area of the List Manager Screen. These actions pertain to the patient information and include editing, viewing, and new order entry.
4.2.3.1. Patient Record Update

The Patient Record Update action allows editing of the Inpatient Narrative and the Patient’s Default Stop Date and Time for Unit Dose Order entry.

Example: Patient Record Update

<table>
<thead>
<tr>
<th>Patient Information</th>
<th>Sep 12, 2000 14:39:07</th>
<th>Page: 1 of 1</th>
</tr>
</thead>
<tbody>
<tr>

<td>Last transferred: *****</td>
<td></td>
</tr>
</tbody>
</table>

Allergies/Reactions: No Allergy Assessment
Remote:
Adverse Reactions:
Inpatient Narrative: INP NARR...
Outpatient Narrative:

The “INPATIENT NARRATIVE: INP NARR.../” prompt allows the pharmacist to enter information in a free text format, up to 250 characters.

The “UD DEFAULT STOP DATE/TIME:” prompt accepts the date and time entry to be used as the default value for the STOP DATE/TIME of the Unit Dose orders during order entry and renewal processes. This value is used only if the corresponding ward parameter is enabled. The order entry and renewal processes will sometimes change this date and time.

**Note:** If the Unit Dose order, being finished by the pharmacist, is received from CPRS and has a duration assigned, the UD DEFAULT STOP DATE/TIME is displayed as the Calc Stop Date/Time.

When the SAME STOP DATE ON ALL ORDERS parameter is set to Yes, the module will assign the same default stop date for each patient. This date is initially set when the first order is entered for the patient, and can change when an order for the patient is renewed. This date is shown as the default value for the stop date of each of the orders entered for the patient.

**Note:** If this parameter is not enabled, the user can still edit a patient’s default stop date. Unless the parameter is enabled, the default stop date will not be seen or used by the module.
Examples of Valid Dates and Times:

- JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
- T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
- T-1 (for YESTERDAY), T-3W (for 3 WEEKS AGO), etc.
- If the year is omitted, the computer uses CURRENT YEAR. Two-digit year assumes no more than 20 years in the future, or 80 years in the past.
- If only the time is entered, the current date is assumed.
- Follow the date with a time, such as JAN 20@10, T@10AM, 10:30, etc.
- The pharmacist may enter a time, such as NOON, MIDNIGHT, or NOW.
- The pharmacist may enter NOW+3’ (for current date and time Plus 3 minutes *Note--the Apostrophe following the number of minutes)
- Time is REQUIRED in this response.

4.2.3.2. New Order Entry

The New Order Entry action, from the Inpatient Order Entry option, allows the pharmacist to enter new Unit Dose and IV orders for the patient. Only one user is able to enter new orders on a selected patient due to the patient lock within the VistA applications. This minimizes the chance of duplicate orders.

For IV order entry, the pharmacist must bypass the “Select DRUG:” prompt (by pressing <Enter>) and then choosing the IV Type at the “Select IV TYPE:” prompt. The following are the prompts that the pharmacist can expect to encounter while entering a new IV order for the patient.

- “Select IV TYPE:”
  These types include admixture, piggyback, hyperal, syringe, or chemotherapy. An admixture is a Large Volume Parenteral (LVP) solution intended for continuous parenteral infusion. A piggyback is a small volume parenteral solution used for intermittent infusion. Hyperalimentation (hyperal) is long-term feeding of a protein-carbohydrate solution. A syringe type order is a type of IV that uses a syringe rather than a bottle or a bag. Chemotherapy is the treatment and prevention of cancer with chemical agents.

- “Select ADDTIVE:”
  There can be any number of additives for an order, including zero. An additive or additive synonym can be entered. If the Information Resources Management Service (IRMS) Chief/Site Manager or Application Coordinator has defined it in the IV ADDITIVES file, the pharmacist may enter a quick code for an additive. The quick code allows the user to pre-define certain fields, thus speeding up the order entry process. The entire quick code name must be entered to receive all pre-defined fields in the order.
4.2.3.3. **Detailed Allergy/ADR List**

The Detailed Allergy/ADR List action displays a detailed listing of the selected item from the patient’s Allergy/ADR List. Entry to the *Edit Allergy/ADR Data* option is provided with this list also.

- **Enter/Edit Allergy/ADR Data**
  Provides access to the Adverse Reaction Tracking (ART) package to allow entry and/or edit of allergy adverse reaction data for the patient. See the Allergy package documentation for more information on Allergy/ADR processing.

- **Select Allergy**
  Allows the user to view a specific allergy.

4.2.3.4. **Intervention Menu**

This option is only available to those users who hold the PSJ RPHARM key.

The Intervention Menu action allows entry of new interventions and edit, delete, view, or printing of an existing intervention. Each kind of intervention will be discussed and an example will follow.
- **New:** This option is used to add an entry into the APSP Intervention file.

**Example: New Intervention**

PI Patient Information
PU Patient Record Update
Select Action: Select Order

-----------------------------------------report continues----------------------------------------
The detailed view of the order presents all available data pertaining to the order. This includes patient identification and location, status of the order, additive(s) with strength, solution(s), infusion rate, medication route, the schedule, administration times, remarks, and other print information. Other information includes type of order, IV room, start and stop date and time, entry date and time (when order was entered into the system), last fill (date and time when last label was printed), and quantity (the number of labels printed). The entry by field of the user placing the order, provider, provider comments, and the number of cumulative doses is also included.

After the detailed view is displayed, the user may select the activity log, label log, or both for the order. The activity log provides a trace of every action taken on an order since the original entry. The activity log contains a log number, the date and time of the activity, the reason of activity (i.e., edit, renew, place on call, or discontinue an order), and the user entering the activity. The reason for activity comment allows the user to explain why the activity was necessary. Also, the system will display the field(s) that was affected, the original data contained in that field, and what it was changed to as a result of the activity.

The label log contains a log number, date/time the label is printed, action on the order, user, number of labels printed, track (possible entries are individual, scheduled, suspended, order action labels, or other), and count (which indicates whether the label was counted for that particular day).

4.3 Order Checks

Order checks (allergy/adverse drug reactions, drug-drug interactions, duplicate drug, and duplicate class) are performed when a new medication order is placed through either the Inpatient Medications or CPRS applications. They are also performed when medication orders are renewed or during the finishing processes. This functionality will ensure the user is alerted to possible adverse drug reactions and will reduce the possibility of a medication error due to the omission of an order check when a non-active medication order is renewed.

Note: The check for remote data availability is performed when entering a patient’s chart, rather than on each order.

The following actions will initiate an order check:

- Action taken through Inpatient Medications to enter a medication order will initiate order checks (allergy, drug-drug interaction, duplicate drug, and duplicate class) against existing medication orders.
- Action taken through Inpatient Medications to finish a medication order placed through CPRS will initiate order checks (allergy, drug-drug interaction, duplicate drug, and duplicate class) against existing medication orders.
- Action taken through IV Menu to finish a medication order placed through CPRS will initiate order checks (allergy, drug-drug interaction, duplicate drug, and duplicate class) against existing medication orders.
- Action taken through Inpatient Medications to renew a medication order will initiate order checks (allergy, drug-drug interaction, duplicate drug, and duplicate class) against existing medication orders.
- Action taken through IV Menu to renew a medication order will initiate order checks (allergy, drug-drug interaction, duplicate drug, and duplicate class) against existing medication orders.

The following are the different items used for the order checks:

- Checks each Dispense Drug within the Unit Dose order for allergy/adverse drug reactions.
- Checks each Dispense Drug within the Unit Dose order against existing orders for drug-drug interaction, duplicate drug, and duplicate class.
- Checks each additive within an IV order for drug-drug interaction, duplicate drug, and duplicate class against solutions or other additives within the order.
- Checks each IV order solution for allergy/adverse reactions.
- Checks each IV order solution for drug-drug interaction against other solutions or additives within the order.
- Checks each IV order additive for allergy/adverse reaction.
- Checks each IV order additive for drug-drug interaction, duplicate drug, and duplicate class against existing orders for the patient.
- Checks each IV order solution for drug-drug interaction against existing orders for the patient.
Override capabilities are provided based on the severity of the order check, if appropriate.

Order Checks warnings will be displayed/processed in the following order:

- Duplicate drug or class
- Critical or significant drug-drug interactions
- Critical or significant drug-allergy interactions

These checks will be performed at the Dispense Drug level. Order checks for IV orders will use the Dispense Drugs linked to each additive/solution in the order. All pending, non-verified, active and renewed Inpatient orders, active Outpatient orders and active Non-Veterans Affairs (VA) Meds documented in CPRS will be included in the check. In addition, with the release of OR*3*238, order checks will be available using data from the Health Data Repository Historical (HDR-Hx) and the Health Data Repository Interim Messaging Solution (HDR-IMS). This will contain both Outpatient orders from other VAMCs as well as from Department of Defense (DoD) facilities, if available. Any remote Outpatient order that has been expired for 30 days or less will be included in the list of medications to be checked.

There is a slight difference in the display of local Outpatient orders compared with remote Outpatient orders. Below are examples of the two displays:

**Example: Local Outpatient Order Display**

The patient has the following Outpatient order(s):

<table>
<thead>
<tr>
<th>Rx #: 40074</th>
<th>PHENYTOIN 100MG (Extended) CAP</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status: Active</td>
<td>Issued: 07/11/05</td>
</tr>
<tr>
<td>SIG: TAKE ONE CAPSULE BY MOUTH TWICE A DAY</td>
<td></td>
</tr>
<tr>
<td>QTY: 60</td>
<td># of refills: 11</td>
</tr>
<tr>
<td>Provider: PSOPROVIDER,ONE</td>
<td>Refills remaining: 11</td>
</tr>
<tr>
<td>Last filled on: 07/11/05</td>
<td></td>
</tr>
<tr>
<td>Days Supply: 30</td>
<td></td>
</tr>
</tbody>
</table>

**Example: Remote Outpatient Order Display**

<table>
<thead>
<tr>
<th>DAYTON</th>
<th>Rx #: 2663878</th>
<th>WARFARIN NA 10MG TAB</th>
</tr>
</thead>
<tbody>
<tr>
<td>Status: ACTIVE</td>
<td>Issued: 07/11/05</td>
<td></td>
</tr>
<tr>
<td>SIG: TAKE ONE-HALF TABLET BY MOUTH BEFORE BREAKFAST --TO THIN BLOOD--</td>
<td></td>
<td></td>
</tr>
<tr>
<td>QTY: 4</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Provider: PSOPROVIDER,TWO</td>
<td>Refills remaining: 0</td>
<td></td>
</tr>
<tr>
<td>Last filled on: 07/11/05</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Days Supply: 1</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

In the Remote Outpatient Order Display example above, notice the name of the remote location has been added. In addition, the number of refills is not available.
If the order is entered by Orderable Item only, these checks will be performed at the time the Dispense Drug(s) are specified. The checks performed include:

- **Duplicate Drug** - If the patient is already receiving orders containing the Dispense Drug selected for the new order, these duplicate orders are displayed. Inpatient duplicate orders of this kind are displayed in a numbered list. The user is first asked whether or not to continue the current order. If the user selects to continue the order then the user is prompted with which, if any, numbered Inpatient duplicate orders to discontinue. The user may enter a range of numbers from the numbered list of duplicate orders or bypass the prompt by selecting <Enter> and continue with the order. Entry of duplicate drug orders will be allowed. Only Additives are included in the duplicate drug check for IV orders. The solutions are excluded from this check.

- **Duplicate Class** - If the patient is already receiving orders containing a Dispense Drug in the same class as one of the Dispense Drugs in the new order, the orders containing the drug in that class are displayed. Inpatient duplicate orders of this kind are displayed in a numbered list. The user is first asked whether or not to continue the current order. If the user selects to continue the order then the user is prompted with which, if any, numbered Inpatient duplicate orders to discontinue. The user may enter a range of numbers from the numbered list of duplicate orders or bypass the prompt by selecting <Enter> and continue with the order. Entry of orders with duplicate drugs of the same class will be allowed.

- **Drug-Drug Interactions** - Drug-drug interactions will be either critical or significant. If the Dispense Drug selected is identified as having an interaction with one of the drugs the patient is already receiving, the order the new drug interacts with will be displayed.

- **Drug-Allergy Interactions** - Drug-allergy interactions will be either critical or significant. If the Dispense Drug selected is identified as having an interaction with one of the patient’s allergies, the allergy the drug interacts with will be displayed.

  **Note:** For a Significant Interaction, the pharmacist is allowed to enter an intervention, but one is not required. For a Critical Interaction, the pharmacist must enter an intervention before continuing.

### 4.3.1 Outpatient Duplicate Orders

Outpatient duplicate order check results display together on the first screen before all other order check information. These results are displayed for informational purposes only. The header for Outpatient duplicate orders reads as follows:

| The patient has the following Outpatient order(s): |
4.3.2 Inpatient Duplicate Orders

Duplicate drug and duplicate drug class Inpatient orders display together in a numbered sequence. The user selects from the numbered sequence the order(s) to be discontinued, if any. The header for Inpatient duplicate orders reads as follows:

This patient is already receiving the following INPATIENT order(s) for the same drug or in the same drug class as WARFARIN SOD. 50MG COMB. PACK.:

After the user has discontinued an order, if any duplicate Inpatient orders remain, they are displayed again in a numbered list. The following header is displayed:

Now, this patient is already receiving the following INPATIENT order(s) for the same drug or in the same drug class as WARFARIN SOD. 50MG COMB. PACK.:

This cycle repeats until no more duplicate Inpatient orders exist, or until the user indicates there are no more duplicate Inpatient orders they wish to discontinue.

Example: Duplicate Order Entry Screen

Do you wish to log an intervention? NO// yes  YES

Now creating Pharmacy Intervention

PROVIDER: PSJPROVIDER,ONE       BIRMINGHAM ALABAMA RR  SYSTEMS ANALYST
RECOMMENDATION: no change
4.3.3. Discontinuing Duplicate Inpatient Orders

When duplicate Inpatient orders are found, the following prompt is presented after each display (or redisplay) of a numbered list:

| Do you wish to DISCONTINUE any of the listed orders? NO// |

**Note:** If the user selects the default of NO, the order process continues.

If the user enters YES to the DISCONTINUE prompt, the following prompt is presented to allow selecting orders:

| Choose for DISCONTINUE 1-N: |

**Note:** N represents the highest numbered duplicate order in the numbered list.

4.3.3.1. Exiting the Order Process

When duplicate Inpatient orders have been found, the following prompt is displayed after the first numbered list of duplicate Inpatient orders:

| Do you wish to continue with the current order? YES// |

**Note:** The wording of this existing prompt has been slightly modified. Also, the current default of NO has been changed to YES.

Each time a user chooses to discontinue an Inpatient duplicate order(s), a prompt is presented to enter a value for NATURE OF ORDER. This value applies to all orders just selected to be discontinued.

Also, each time a user chooses to discontinue an Inpatient duplicate order(s), a prompt is presented to enter a value for Requesting PROVIDER. This value applies to all orders just selected to be discontinued.

**8.2.3.2. Individual Order Suspension (IV)**

[PSJI INDIVIDUAL SUSPENSE]

The *Individual Order Suspension (IV)* option allows the user to suspend labels for a specific active order. The user can only suspend ten labels at a time.

These labels will then be available for the IV room to release for doses due within the present coverage interval or for the next coverage interval if the Ward List for that batch has already been run.

**Example: IV Individual Order Suspension**

Select SUSpense Functions (IV) Option: **Individual Order Suspension (IV)**

8.2.3.3. Labels from Suspense (IV)
[PSJI SUSLBLE]

The Labels from Suspense (IV) option prints all labels that have been suspended since the last print of labels from suspense. Once labels have been printed, they are erased from this file and may not be printed again using this option. Use the Reprint Labels from Suspense (IV) option if the labels need to be reprinted.

Example: Printing IV Labels from Suspense

Select SUSpense Functions (IV) Option: Labels from Suspense (IV)
