1 Introduction

This document provides a brief description of the enhanced features of the Duplicate Order Check Modifications and Modifications for Remote Allergies projects. These Release Notes address Inpatient Medications patches PSJ*5*175 and PSJ*5*160, respectively.

1.1 Patch PSJ*5*175 – Duplicate Order Check Modifications

Patch PSJ*5*175 changes Order Check to allow users to select for discontinuation any duplicate Inpatient orders found. The Outpatient Pharmacy medication-related order checks are grouped together on the first screen as information only, and Inpatient Medications order checks are displayed in a numbered list. Results from both Duplicate Drug and Duplicate Drug Class order checks are displayed together. The user is prompted to select which, if any, of the listed duplicate orders should be discontinued. The user may choose to select none, thus leaving all orders intact.

Duplicate order checks are performed on the following order processes:

- Entering a New Medication Order
- Selecting an Existing Medication Order
- Finishing a Medication Order
- Renewing a Medication Order
- Order Set Entry

1.2 Patch PSJ*5*160 – Modifications for Remote Allergies

Patch PSJ*5*160 provides the following functionality:

- Order checks for remote allergies using VA Drug Class now include all remote allergies.
- Order checks for Analgesics match only against the specific class. For example, CN101 matches only to CN101, not to CN102 also, as was previously the case.
- The check for remote data availability is now performed when entering the patient's chart, not on each order, as was previously the case.
- The list of remote allergies has been added to the Patient Information screen. If a patient has the same allergy information from several remote sites, it will only be listed once.

2 Duplicate Order Check Enhancements

The enhancements to Outpatient and Inpatient Duplicate Order Check displays provided in Patch PSJ*5*175, as seen in the screen capture on page 4, are described in the following sections.

2.1 Outpatient Duplicate Orders

Outpatient duplicate order check results display together on the first screen before all other order check information. These results are displayed for informational purposes only. The header for Outpatient duplicate orders reads as follows:

```
The patient has the following Outpatient order(s) :
```

2.2 Inpatient Duplicate Orders

Duplicate drug and duplicate drug class Inpatient orders display together in a numbered sequence. The user selects from the numbered sequence the order(s) to be discontinued, if any. The header for Inpatient duplicate orders reads as follows:

```
This patient is already receiving the following INPATIENT order(s) for  
the same drug or in the same drug class as WARFARIN SOD. 50MG COMB.  
PACK.:
```

After the user has discontinued an order, if any duplicate Inpatient orders remain, they are displayed again in a numbered list. The following header is displayed:

```
Now, this patient is already receiving the following INPATIENT order(s)  
for the same drug or in the same drug class as WARFARIN SOD. 50MG COMB.  
PACK.:
```

This cycle repeats until there are no more duplicate Inpatient orders or until the user indicates there are no more duplicate Inpatient orders they wish to discontinue.

RECOMMENDATION: no change
```

2.3 Discontinuing Duplicate Inpatient Orders

When duplicate Inpatient orders are found, the following prompt is presented after each display or redisplay of a numbered list:

```
Do you wish to DISCONTINUE any of the listed orders? NO//
```

Note: If the user selects the default of NO, the order process continues.

If the user enters YES to the DISCONTINUE prompt, the following prompt is presented to allow selecting orders:

```
Choose for DISCONTINUE 1-N:
```

Note: N represents the highest numbered duplicate order in the numbered list.

Exiting the Order Process

When duplicate Inpatient orders have been found, the following prompt is displayed after the first numbered list of duplicate Inpatient orders:

```
Do you wish to continue with the current order? YES//
```

Note: The wording of this existing prompt has been slightly modified. Also, the current default of NO has been changed to YES.

Each time a user chooses to discontinue an Inpatient duplicate order(s), a prompt is presented to enter a value for NATURE OF ORDER. This value applies to all of those orders just selected to be discontinued.

Also, each time a user chooses to discontinue an Inpatient duplicate order(s), a prompt is presented to enter a value for Requesting PROVIDER. This value applies to all of those orders just selected to be discontinued.

(This page included for two-sided copying.)

3 Modifications for Remote Allergies

The modifications to Remote Allergies now provides a list of remote allergies on the Patient Information screen.

Note: If a patient has the same allergy information from several remote sites, it will only be listed once.
