NATIONAL DRUG FILE (NDF)

USER MANUAL

Version 4.0
October 1998

(Revised April 2011)
# Revision History

The table below lists changes made since the initial release of this manual. Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. Either update the existing manual with the Change Pages document, or replace it with the updated manual.

**Note:** The Change Pages document may include unedited pages needed for two-sided copying. Only edited pages display the patch number and revision date in the page footer.

Auto-Creation of Supra-Therapeutic Possible Dosages

In order to prevent inadvertent creation of supra-therapeutic possible dosages for high risk medications during the dosage creation segment of Pharmacy Data Management and National Drug File updates, three patches have been released. Patch PSN*4*261 added three new fields to the VA PRODUCT file (#50.68). Patch PSN*4*262, in conjunction with Pharmacy Data Management patch PSS*1*155, provides the functionality to determine if possible dosages should be auto-created or not during the match/re-match process.

PSN*4*262 contains changes to the Inquire to VA Product Info For Local Drug [PSNLOOK] option to include the display of the new fields.
For more information about the new fields, refer to PSN*4*261. For information on how the new fields affect auto-creation of possible dosages during the match and re-match process, refer to patch PSS*1*155. For more information about the supra-therapeutic dosages project, refer to the Release Notes for these patches.

**Example 1: Auto-Create Default Possible Dosage=Yes [PSNLOOK]**

Select **OPTION NAME**: PSNLOOK

This option will allow you to look up entries in your local DRUG file. It will display National Drug File software match information.

Select **DRUG GENERIC NAME**: NIFEDIPINE 20MG CAPS CV200

- **DRUG Generic Name**: NIFEDIPINE 20MG CAPS
- **VA Product Name**: NIFEDIPINE 20MG CAP
- **VA Generic Name**: NIFEDIPINE
- **Dosage Form**: CAP, ORAL
- **Strength**: 20 Units: MG
- **National Formulary Name**: NIFEDIPINE, ORAL
- **VA Print Name**: NIFEDIPINE 20MG CAP
- **VA Product Identifier**: N0042
- **Transmit To CMOP**: YES
- **VA Dispense Unit**: CAP
- **PMIS**: NIFEDIPINE - ORAL
- **Active Ingredients**: NIFEDIPINE
- **Str**: 20
- **Unt**: MG

Printing a Patient Medication Information Sheet

Print a PMI Sheet  
[PSNPMIS]  Synonym: PMIS

This option allows you to print a Patient Medication Information Sheet (PMI).

These medication information sheets can be provided to patients, explaining how and why to take a medication and the possible side effects. A commercial vendor supplies the information provided in the Patient Medication Information Sheets. This information is updated periodically to provide new medication information sheets and changes to existing sheets.

If the PMI Sheet does not print and the message “Drug is not linked to a valid Medication Information Sheet for language selected” is printed instead, the user should select another language and re-print the medication sheet. If this still does not work, then the user should contact the NDF Manager for further assistance.

Example: Print a PMI Sheet

Select National Drug File Menu Option: PMIS  Print a PMI Sheet
Select DRUG GENERIC NAME: ACET <RET>

Displaying an FDA Medication Guide

Display FDA Medication Guide
[PSN MED GUIDE] Synonym: FDA

This option allows you to display a Food and Drug Administration (FDA) Medication Guide.

Medication guides are paper handouts that come with many prescription medicines. These guides address issues that are specific to particular drugs and drug classes, and they contain FDA approved information that can help patients avoid serious adverse events. The FDA requires that medication guides be issued with certain prescribed drugs and biological products when the agency determines that: certain information is necessary to prevent serious adverse effect; patient decision-making should be informed by information about a known serious side effect with a product; or patient adherence to directions for the use of a product are essential to its effectiveness.

The system allows the user to select the appropriate document through the generic drug name. If there is no associated medication guide, the system shall inform the user and allow the user to select another drug.

If there is no medication guide associated with the medication, the message: “There is no FDA Medication Guide associated with this medication” is displayed.

If the FDA Medication Guide does not automatically open in a .pdf format when the user presses <Enter>, the desktop may not have the required software installed. The user should contact local technical support for assistance.

Example 1: Displaying an FDA Medication Guide for a VA Product without a Medication Guide Associated

When unable to get the FDA Medication Guide to display, review the following suggestion(s) for troubleshooting potential problems:

1) If no FDA Medication Guide exists for a product that you believe should have one, confirm that one is required by visiting the FDA website (www.fda.gov). If one is required, log a support ticket to request its addition. Please understand that there may be a delay between the time that a new Medication Guide is posted to the FDA website and when it is made available in VistA through a National Drug File data update patch.

Example 2: Displaying an FDA Medication Guide for a VA Product when the Java Software Component is not Installed or is not Running (cont.)

The following URL provides the link to the FDA Medication Guide associated with this medication. Thin Client users: copy/paste the URL below into a browser to access the FDA Medication Guide for this drug:

Please wait...

The system is unable to display FDA Med Guide automatically.

The FDA Medication Guide will not automatically open on Thin Client and some types of encrypted sessions. If you do not believe this is the reason contact your local technical support for assistance.

You can copy/paste the link above into your browser's address bar to retrieve the FDA Medication Guide.

Enter RETURN to continue, '?' for HELP, or '^' to exit: ?

When unable to get the FDA Medication Guide to display, review the following suggestion(s) for troubleshooting potential problems:

1) The browser did not open automatically. This may be due to the following:
   - You might be connected to VistA via Thin Client or an encrypted session that prevents the FDA Med Guide from automatically displaying. Please copy and paste the URL link below into your browser's address bar to retrieve the FDA Medication Guide:
   - The computer might not have the required Java software component installed or the software might not be functioning properly. Please, contact technical support for assistance.

2) When doing a copy/paste of the link into the browser's address and an HTTP 404 - File Not Found error is received. This may be due to the following:
   - A common issue exists when the link is displayed in two lines in the terminal screen. When you copy both lines at the same time and paste it into the browser's address, the second line is ignored by the browser resulting in a 'broken' link. To resolve this issue, copy and paste one line at a time from the terminal screen into the browser's address to make sure the complete link is used.
   - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.

3) The browser opened automatically, however you receive an HTTP 404 - File Not Found error. This may be due to the following:
   - The FDA Medication Guide Server may be down at the moment. Please, wait a few minutes and try again. If the problem persists, contact technical support for assistance.
