1. Introduction

The OneVA Pharmacy software (patch PSO*7*454 - December 2016) provided the Department of Veterans Health Administration (VHA) the capability to allow Veterans traveling across the United States to refill or partial fill their active VA non-controlled substance prescriptions at any VA Pharmacy location regardless of where the prescription originated. Patch PSO*7*454 expanded available pharmacy information in VistA to Pharmacists, providing direct access to any active and refillable prescription from any VA Pharmacy location.

The overall OneVA Pharmacy software design has several components; they are:

1. Veterans Health Information Systems and Technology Architecture (VistA) Patch PSO*7*454.
2. Health Level 7 (HL7) Messaging
3. A middleware application - Veteran Information/Eligibility Record Services (VIERS)
4. Health Data Repository/Clinical Data Service (HDR/CDS) Repository

VistA is the user interface where a Pharmacist uses the *Patient Prescription Processing* [PSO LM BACKDOOR ORDERS] menu found within the VistA Outpatient Pharmacy package to query for and refill/partial fill patient's active and refillable prescriptions from other VA Pharmacy VistA instances. HL7 messaging is used to query and receive remote prescription details to and from the HDR/CDS repository.

The VistA instance where the Veteran is requesting the refill or partial is considered the 'dispensing' VistA instance. The Pharmacist at the 'dispensing' VistA instance refills or partial fills a prescription that originated from another VA Pharmacy VistA instance and prints a prescription label. The VA Pharmacy VistA instance where the prescription originated from and currently exists is the 'host' VistA instance. The 'host' VistA instance is where the update to the prescription record is made once the fill is processed. The label data elements are extracted from the 'host' VistA instance and returned to the dispensing site via HL7 creating the OneVA Pharmacy label. The bar code on the label will only be valid at the host site but not at the dispensing site.

The OneVA Pharmacy software sends the HL7 query message through the VIERS middleware. VIERS executes a Web Service call to query the HDR/CDS repository for specific medication information obtained from all VA Pharmacy's VistA sites. The VIERS configuration contains filtering processes that apply specific business rules against the HDR/CDS Web Service call to return the appropriate prescriptions to the dispensing VistA. VistA and VIERS middleware communicate using HL7 over Minimal Layer Protocol (MLLP). Communication to the HDR/CDS repository takes place via Simple Object Access Protocol (SOAP) Web Services.

The medication data elements return to the dispensing site via HL7 messaging. Once the prescriptions arrive at the dispensing site, they display below any 'local' prescriptions on the Medication Profile view. The prescriptions display to the Pharmacist sorted by VA Pharmacy site and prescription status. The dispensing Pharmacist can view the remote prescriptions and select one to refill or partially fill. For label printing, VistA triggers the HL7 message stream that

executes during the refill or partial fill prescription processes. The host label data elements are returned to the dispensing site within the HL7 segment. The event triggers the Pharmacist to select the dispensing sites printing device to print a host label.

The OneVA Pharmacy patch, PSO*7*479, provided Pharmacists the ability to request a reprint of the label when no error messages are returned when retrieving the label information from the host system.

The OneVA Pharmacy patch PSO*7*497 provided Pharmacists new functionality to fix the auto-suspend defect, limit refill/partial fill permissions to only those personnel who have the 'PSORPH' key(s), block prescriptions that contain a trade name in the "TRADE NAME", identify titration prescriptions at the host site and to disallow refills of such titration prescriptions at the dispensing site.

1.1. System Configuration

The OneVA Pharmacy patch, PSO*7*479 requires the patch PSS*1*212 which delivers the 'ONEVA PHARMACY FLAG Field (#101)' in the 'off' state. When this flag is in the 'off' state, the HDR/CDS Repository is not queried for external prescriptions and other VistA instances will not be able to refill prescriptions that belong to the VistA instance with the flag set to the 'off' state.

Figure 1: OneVA Pharmacy Flag Field Off

```
Select Rx (Prescriptions) <TEST ACCOUNT> Option: PATient Prescription Processing
Select PATIENT NAME: PSOPATIENT,EIGHT 4-4-74 000000001 NO
NSC VETERAN
Enrollment Priority: Category: IN PROCESS End Date:

PSOPATIENT,EIGHT (000-00-0001)

The OneVA Pharmacy flag is turned off. Queries will NOT be made to other VA Pharmacy
locations.

REMOTE PRESCRIPTIONS AVAILABLE!
Display Remote Data? N//
.
.
.
```

When in the 'on' state, all prescription queries and actions may be taken for remote queries, refills, and partial fills. In order to process prescriptions from another VistA instance, that instance will also need to have its 'ONEVA PHARMACY FLAG Field (#101)' set to the 'on' state.

The OneVA pharmacy flag can be turned on/off using the Pharmacy System Parameters Edit [PSS SYS EDIT] option in the Pharmacy Data Management (PDM) package.

Figure 2: OneVA Pharmacy Flag Field On

```
Select OPTION NAME: PSS SYS EDIT      Pharmacy System Parameters Edit
Pharmacy System Parameters Edit

WARNING LABEL SOURCE: NEW//
CMOP WARNING LABEL SOURCE: NEW//
OPAI WARNING LABEL SOURCE: NEW//
AUTOMATE CPRS REFILL:
ONEVA PHARMACY FLAG: ON// <- The flag can be turned on/off here.
```

The OneVA Pharmacy patch, PSO*7*643 provides Pharmacists the ability to send a OneVA prescription refill or partial fill to the Outpatient Pharmacy Automated Interface (OPAI) to be filled by an external automated dispensing robot. No changes in current external interface parameters or setup are required. The same parameter setup used for the sending local prescriptions to the OPAI will be utilized. The activity log at the host site is updated to provide an audit trail and to provide various dispensing information for a OneVA prescription refill or partial fill.

Both the dispensing site and host site must have patch PSO*7*643 installed for the OneVA prescription refill or partial fill to be sent to the OPAI to be filled by a supported external automated dispensing robot. If the dispensing site has patch PSO*7*643 installed and requests a OneVA prescription refill from a host site that does not have patch PSO*7*643 installed, the following message will be displayed “The OneVA refill cannot be sent to the OPAI to be filled by a supported external automated dispensing robot. Both your site and the remote site must have this capability available at the same time. The remote site does not have this capability yet.”

Figure 3: Message for Dispensing Site Requesting OneVA refill from Host Site That Does Not Have Patch PSO*7*643 Installed

```
.

Would you like to use the system matched drug for this refill/partial fill? NO// YES

Processing refill request. Please be patient as it may take a moment for the host site to respond and generate your label data...

The OneVA refill cannot be sent to the Outpatient Pharmacy Automation Interface (OPAI) to be filled by supported the Automated Dispensing Device (ADD). Both your site and the remote site must have this capability available at the same time. The remote site does not have this capability yet.

TRANSACTION SUCCESSFUL... The refill for RX #763261 has been recorded on the prescription at the host system.

Select a printer to generate the label or '^' to bypass printing.

QUEUE TO PRINT ON
DEVICE: ONEVA NULL

.
. .
.

If the host site has patch PSO*7*643 installed and a dispensing site that does not have patch PSO*7*643 installed requests a OneVA prescription refill or partial fill, no message will be displayed. The functionality (current state) present at the dispensing site will be used to process the OneVA prescription refill or partial fill. The OneVA refill or partial fill will NOT be sent to the OPAI to be filled by an external automated dispensing robot.

1.1.1. Documentation Conventions

This *Outpatient Pharmacy V. 7.0 OneVA Pharmacy User Manual* includes documentation conventions, also known as notations, which are used consistently throughout this manual. Each convention is outlined below.

Table 1: Conventions

Convention	Example
Menu option text is italicized.	There are eight options on the Archiving menu.
Screen prompts are denoted with quotation marks around them.	The "Dosage:" prompt displays next.
Responses in bold face indicate user input.	Select Orders by number: (1-6): 5

Convention	Example
<p><Enter> indicates that the Enter key (or Return key on some keyboards) must be pressed.</p> <p><Tab> indicates that the Tab key must be pressed.</p>	<p>Type Y for Yes or N for No and press <Enter>.</p> <p>Press <Tab> to move the cursor to the next field.</p>
 <p>Indicates especially important or helpful information.</p>	 <p>Up to four of the last LAB results can be displayed in the message.</p>
 <p>Indicates that options are locked with a particular security key. The user must hold the particular security key to be able to perform the menu option.</p>	 <p>This option requires the security key PSOLOCKCLOZ.</p>

1.2. Getting Help

?, ??, ??? One, two or three question marks can be entered at any of the prompts for online help. One question mark elicits a brief statement of what information is appropriate for the prompt. Two question marks provide more help, plus the hidden actions, and three question marks will provide more detailed help, including a list of possible answers, if appropriate.

1.2.1. Related Manuals

The following manuals are located in the [Outpatient](#) folder located on the [VistA Documentation Library \(VDL\)](#).

1.2.1.1. Main Package Documentation

- Outpatient Pharmacy V. 7.0 Release Notes
- Outpatient Pharmacy V. 7.0 Manager's User Manual
- Outpatient Pharmacy V. 7.0 Pharmacist's User Manual
- Outpatient Pharmacy V. 7.0 Technician's User Manual
- Outpatient Pharmacy V. 7.0 User Manual – Supplemental
- Outpatient Pharmacy V. 7.0 Technical Manual/Security Guide
- Dosing Order Check User Manual
- VistA to MOCHA Interface Document
- Outpatient Pharmacy V. 7.0 OneVA Pharmacy Installation Guide
- Outpatient Pharmacy V. 7.0 OneVA Pharmacy User Manual

1.2.1.2. Additional Documentation

Additional documentation related to specific projects is also located on the VDL. For example, there may be several different Release Notes documents that apply to specific projects. Also, there may be several sets of “Change Page” documents, which apply to changes made only for a specific package patch.

2. OneVA Pharmacy and Medication Profile

2.1. OneVA Pharmacy and Medication Profile

Effective with the OneVA Pharmacy patch (PSO*7*454 – December 2016), the Medication Profile displays all active medications from other facilities. The medications are retrieved from the HDR/CDS Repository and are displayed below the ‘local’ or ‘Non-VA Med’ orders and are sorted/grouped by facility. The prescriptions originating from other VA Pharmacy locations display under a divider header line showing the site name, site number, and prescription status.

The example shown below displays three pages of a test patient’s Medication Profile, displaying the ‘local’ prescription orders followed by prescription orders that originated at other facilities.

The OneVA Pharmacy patch (PSO*7*454 – December 2016) introduces the new view, ‘REMOTE OP Medications’, which displays the details of the remote prescription order. When selecting a OneVA Pharmacy prescription order from the Medication Profile screen, the new ‘REMOTE OP Medications’ page displays as shown in Figure 5.

The OneVA Pharmacy patch PSO*7*497 updates the ‘REMOTE OP Medications’ display and introduces the new view for prescription orders that originated from other VA Pharmacy locations, the dispensing Pharmacy only has two actions available. They are:

- RF Refill Rx from Another VA Pharmacy
- PR Partial Fill Rx from Another VA Pharmacy

Figure 5: REMOTE OP Medications

3. Processing OneVA Refill/Partial

3.1. OneVA Pharmacy Processing within Patient Prescription Processing

OneVA Pharmacy patch PSO*7*454 introduces new messaging to query the HDR/CDS Repository for prescriptions from other VA Pharmacy locations and displays them in the Medications Profile view. The new query will only execute if the patient has been treated at more than one VA Medical Center. The query retrieves all prescriptions associated with the patient from the repository, which requires additional time. To execute the HDR/CDS Repository query, the user must answer 'YES' to the 'Would you like to query prescriptions from other OneVA Pharmacy locations?' prompt. When the user responds 'YES' to the OneVA Pharmacy prompt, the system displays the OneVA Pharmacy Query Message.

The OneVA Pharmacy's feature to query the HDR/CDS Repository will not execute if the patient has only one entry in the 'TREATING FACILITY LIST file (#391.91)'. Prior to validating the TREATING FACILITY LIST entries, the process filters on the following list of valid facility types: VAMC, M&ROC, M&ROC(M&RO), OC, OPC, CBOC, PR RTP, DOM, HCS, MC(M), MC(M&D), MORC, NHC, VANPH, SOC, SARRTP.

If there are not two or more valid entries, the system will not display the 'Executing OneVA Pharmacy Query Message' listed in the figure above nor will medications that originated from another VA Pharmacy location display on the Medication Profile view.

The system identifies and queries the HDR/CDS Repository for all the prescriptions that are active, suspended, on hold, expired (within 120 days), or discontinued (within 120 days).

If the query connection to the HDR/CDS Repository fails, a message will display stating 'The system is down or not responding. Could not query prescriptions at other VA Pharmacy locations. The user should press return to continue and contact local support if this problem persists.'

When the system is down message displays, the VistA session will continue to display the local/dispensing sites prescriptions on the Medication Profile view. There will be no indication if a patient is registered or has prescriptions on other sites (i.e., remote site/OneVA Pharmacy prescriptions will not display on the Medication Profile view.)

If the patient does not have any prescription records from other VA Pharmacy locations, matching the search criteria, a message will display stating the "Patient found with no prescription records matching search criteria."

The OneVA Pharmacy patch PSO*7*643 introduces the sending of OneVA Rx refills/partial fills to the OPAI to be filled by an external automated dispensing robot when a OneVA Rx refill or partial is processed. The user is not prompted with whether or not to send the refill/partial fill to the OPAI. Whether or not the OneVA Rx refill/partial fill is sent to the OPAI is determined by the EXTERNAL INTERFACE parameter setting in the OUTPATIENT SITE File (#59). Additional parameters in the OUTPATIENT SITE File (#59) and DRUG File (#50) determine which supported external automated dispensing robot the refill/partial fill is routed to if more than one automated dispensing robot is associated with an Outpatient site.

The initial ability to send OneVA refill/partial fill to the OPAI excludes the release functionality regardless of whether or not the parameter ‘FILE RELEASE DATE/TIME’ in the OUTPATIENT SITE File (#59) is set to ‘Yes’. Specific release functions for a dispensing site versus a host site will be provided in a future release.

```

Remote site drug name: IBUPROFEN 800MG TAB
Matching Drug Found for Dispensing: IBUPROFEN 800MG TAB
Would you like to use the system matched drug for this refill/partial fill? NO//

```

3.1.1.2. Drug Matching: One-to-Many

When the drug matching logic identifies a one-to-many match at the dispensing site for the selected host prescription, the system provides a list of drugs to select from. Once the user selects the matching local drug from the list, the system prompts the user to respond 'Yes' or 'No' to confirm using the drug.

Figure 10: One-to-Many Match

```
Remote site drug name: FAMOTIDINE 20MG TAB

1. 2439 FAMOTIDINE 20MG TAB 60'S      GA301  This drug will not be processed without Drug Request
Form 10-7144
2. 7744 FAMOTIDINE 10MG (1/2 OF 20MG) TAB      GA301
3. 7745 FAMOTIDINE 20MG TAB 90'S      GA301

Select matching local drug:

Select matching local drug: 3 7745 FAMOTIDINE 20MG TAB 90'S      GA301
Would you like to use this drug?
```

3.1.1.3. Drug Matching: No Drug Match

The following example illustrates when the drug matching logic does not identify any drug match at the dispensing site for the selected remote site drug.

Figure 11: Drug Matching: No Drug Match

```
Remote site drug name: CABERGOLINE 0.5MG TAB

No local match could be found for CABERGOLINE 0.5MG TAB.
```

3.1.2. OneVA Pharmacy Exception Messages

There are certain conditions under which a OneVA Prescription refill/partial fill cannot be processed. Those conditions are as follows:

- Patient's prescription that originated from another VA Pharmacy location will deny the request for a prescription refill to be completed if it is requested "too soon" after the last refill so that prescriptions are not over-distributed.

Unable to complete transaction. Cannot be refilled until MM/DD/YYYY.

- Patient's prescription that originated from another VA Pharmacy location is not fillable when the prescription status is 'discontinued', 'expired', is on 'hold', or 'suspended'.

Only 'ACTIVE' remote prescriptions may be refilled at this time.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refilled) when there are zero remaining refills. **Note:** Partial fills are allowed.

Unable to complete transaction. Cannot refill Rx # xxxxxxxx. No refills left.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refill or partial fill) when the drug is classified as a controlled substance on the dispensing site.

This is a controlled substance. Cannot refill Rx # xxxxxxxx.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refill or partial fill) when the drug is classified as a controlled substance on the host site.

Unable to complete transaction. Rx #xxxxxxx cannot be refilled.

The associated drug is considered a controlled substance at the host facility.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refill or partial fill) when the drug is inactive on the dispensing site.

Matched Drug <DRUG NAME> is inactive. Cannot refill.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refill or partial fill) when the drug has no dispensing site match.

No local match could be found for <DRUG NAME>.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refill or partial fill) when no drug on the dispensing site has a matching VA Product ID.

Missing VA Product ID. Rx #xxxxxxx cannot be refilled.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refilled or partial fill) when the prescription has a trade name.

Unable to complete transaction.

This prescription cannot be refilled or partial filled because it has a value entered in the Rx trade name field. Please follow local policy for obtaining a new prescription.

- Patient's prescription that originated from another VA Pharmacy location and cannot be dispensed (refilled or partial fill) when the prescription type is Titration.

Unable to complete transaction.

Cannot refill prescription - type is Titration. You may request a partial fill.

Figure 12. Transaction Successful

```

Processing refill request. Please be patient as it may take a moment for the host site to
respond and generate your label data...

TRANSACTION SUCCESSFUL... The refill for RX #2718862 has been recorded on the prescription
at the host system.

Select a printer to generate the label or '^' to bypass printing.

QUEUE TO PRINT ON

Choose 1-2> 1 ONEVA NULL    NUL

Label queued!

Refill complete for RX #2718862.
Press RETURN to continue:

Updating prescription order list...

```

At the device prompt, if a user up-carets (“^”) to bypass printing a refill or partial fill, whichever was requested, will not be sent to the OPAI and will not be dispensed by the supported external automated dispensing robot.

At the device prompt, if a user enters a printer that is not defined in the DISPENSING SYSTEM PRINTER field (#2008) of the OUTPATIENT SITE FILE (#59), the prescription will not be sent to the OPAI for dispensing. A label will however print. An exception to this is if a laser label device is not selected, the label will also NOT print.

At the device prompt, if a user enters a printer and no printers are defined in the DISPENSING SYSTEM PRINTER field (#2008) of the OUTPATIENT SITE FILE (#59), the prescription will be sent to the OPAI for dispensing for a single external automated dispensing robot setup. For a multi dispensing robot setup, if no printers are defined in the DISPENSING SYSTEM PRINTER Field (#2008), and the DISPENSE DNS NAME field (#2006) and the DISPENSE DNS PORT Field (#2007) are not defined, the prescription WILL NOT be sent to the OPAI. If the DISPENSE DNS NAME and DISPENSE DNS PORT fields are populated for the multi dispensing robot setup, the prescription will be sent to the dispensing robot defined by the fields. In all three cases the label will print. An exception to this is if a laser label device is not selected, the label will also NOT print in all three cases.

OneVA Pharmacy remote refill and remote partial fill actions at times receives the following exception message:

MESSAGE SENT TO TARGET VISTA; TIME OUT AWAITING REPLY

Press RETURN to continue:

The user pressed RETURN and must execute the transaction steps for a second time. If the user repeats the transaction, the process successfully executes.

During the remote refill or partial fill of a prescription order that originated from another VA Pharmacy location, the number of refills remaining is decremented by one and the last refill date

is updated with the current date on the host VistA database. In the example displayed in the following image, the patient has '11' refills remaining, and the last refill date was '05/31/16'.

The VA Notice of Privacy Practices, IB 10-163, which outlines your privacy rights, is available online at
http://www.va.gov/Health/ or you may obtain a copy by writing the VHA Privacy Office (19F2), REDACTED,
Washington, DC 20420.

The OneVA Pharmacy patch retrieves the prescription information for the label from the host site and transmits the data back to the dispensing site for printing. As of this writing, there is no 'REMOTE REPRINT' option available for OneVA Pharmacy orders. The 'REPRINT' action is not operational for the OneVA Pharmacy refills or partials; however, plans are being made to release a new action option as part of a future OneVA Pharmacy project.

In order to reprint a label due to a paper jam, a malfunction of the printer, or the need to label multiple packages like inhalers, it is suggested to use the OneVA Pharmacy *Partial Fill Rx from Another VA Pharmacy* process and perform the transaction again.

OneVA Pharmacy Patch PSO*7*643 removed the 'REPRINT' notation on the refill/partial fill labels. It was also removed from the Label log section in the Activity Log at the host site.

4. Activity Log Entries

Patch PSO*7*643 enhances the current activity log entries to provide an audit trail for OneVA refills and partial fills sent through the OPAI to a supported external automated dispensing robot for dispensing. The host site's Activity log and label log entries document the facility name and station number where the OneVA refill/partial fill was dispensed. The 'Initiator of Activity' was corrected to reflect the remote Pharmacist's name instead of 'Postmaster'. Entries 4-5 illustrate a OneVA refill filled at a dispensing site DAYTSHR TEST LAB (984). Entries 6-9 illustrate a OneVA partial filled at a dispensing site, CHYSHR (983) which has multiple supported external automated dispensing robots.

Host Site Activity Log entries for a OneVA refill and Partial filled at dispensing facilities.

5. Reports

5.1. OneVA Pharmacy Prescription Report

[PSO REMOTE RX REPORT]

Note: To account for copay billing, insurance billing, and subsequent refill capabilities all sites are asked to review the OneVA Pharmacy Reports and manually release prescriptions filled by other stations. Recommended frequency of reviewing these reports is no less than weekly.

The OneVA Pharmacy patch PSO*7*454 – December 2016 introduces the new menu option for retrieving the OneVA Pharmacy Prescription Reports. The *ONEVA Pharmacy Prescription Report* [PSO REMOTE RX REPORT] menu is located on the *Rx (Prescriptions)* [PSO RX] menu.

There are three new reports available on the menu with self-describing titles, they are:

1. Prescriptions dispensed for other Host Pharmacies
2. Our prescriptions, filled by other facilities as the Dispensing Pharmacy
3. All OneVA Pharmacy Prescription Activity

Each report can be searched by (1) Date Range (2) Patient or (3) Site. The type of report and search option selected determines the content shown on a report. All OneVA Pharmacy Prescription reports contain a summary page and a detailed page. All three reports have the same format and basic information.

A row number identifies each refill/partial fill. For each row the date processed, patient name, drug name, quantity dispensed, and the quantity supplied displays. There are four refill type values, they are:

- RF – refills
- PR - partial fills
- OR – refills performed by other sites
- OP – partial fills performed by other sites

The total cost is the sum of the costs of all items included in this report and is available on the report ‘Prescriptions we have dispensed for other Host Pharmacies’. The cost is calculated by using the dispensing sites ‘Price Per Dispense Unit’ and multiplying that by the quantity being dispensed.

To review more detailed information about a specific order, perform the following steps:

1. Enter <SI> at the ‘Select Action’ prompt and press <ENTER>.

The system displays the action name and prompts for the item to display:

2. Enter <11> at the 'Enter a number' prompt and press <ENTER>.

The following image displays the 'Select Action' and 'Enter a number' prompts.

The following is an example of the summary page layout for one of the OneVA Pharmacy reports and a detailed display of an individual order on the report.

Patch PSO*7*643 added new fields from the REMOTE PRESCRIPTION LOG File (#52.09) to the detailed display below. There are some minor differences between the request type(s) of outside refill/outside partial fill for the host site and refill/partial fill for the dispensing site. The Internal Entry Number (IEN) of the Local (matched) drug displays next to the drug name in parenthesis for a Dispensing site entry. The Remote Filling Person, Remote Checking Pharmacist, OPAI Message ID, DISP ADD Name, and DISP ADD DNS are found for both the Dispensing and Host site entries. Patch PSO*7*643 corrected an issue that caused the Quantity and Days Supply not to display in the detailed view.

Figure 20: Dispensing Site Entry Example

OneVA PHARMACY RX DETAILS		Dec 13, 2021@11:37:33	Page: 1 of 1
Detailed report of Prescriptions dispensed for other Host Pharmacies			
Request Date/Time:	DEC 13, 2021@11:36:17		
Patient:	PSOPATIENT,ONE		
RX #:	10001164		
Rx Hosted at Site:	CHYSHR TEST LAB		
Request Type:	PARTIAL FILL		
Requesting Pharmacist:	PHARMACIST, DAYTSHR		
Quantity:	1		
Days Supply:	1		
Dispensed Date:	DEC 13, 2021		
Drug Name at Host site:	CETIRIZINE HCL 10MG TAB		
Local (matched) drug:	CETIRIZINE HCL 10MG TAB (6519)		
Cost of Local Refill/Partial:	\$11.90		
Remote Filling Person:	TECHNICIAN, DAYTSHR		
Remote Checking Pharmacist:	PHARMACIST, DAYTSHR		
OPAI Message ID:	98473896894		
Disp ADD Name:	OPTIFILL1		
Disp ADD DNS:	10.000.00.000

6. Appendix A: Troubleshooting

OneVA Pharmacy introduces new functionality that allows a Pharmacist to refill or partial fill a prescription from another VA Pharmacy location. This software patch uses HL7 messaging to send and receive remote prescription details from another VA Pharmacy location. This allows a ‘dispensing’ (‘non-custodial’ or ‘local’ pharmacy) facility to refill a prescription that originated from another VA Pharmacy location. The VA Pharmacy location where the prescription originated is the ‘host’ (‘remote’) facility.

The OneVA Pharmacy software sends the HL7 query message through the VIERS middleware. VIERS executes a Web Service call to query the HDR/CDS repository for specific medication information obtained from all VA Pharmacy’s VistA sites. The VIERS configuration contains filtering processes that applies specific business rules against the HDR/CDS Web Service call to return the appropriate prescriptions to the dispensing VistA.

The prescriptions display below any ‘local’ prescriptions on the Medication Profile view. The Pharmacist can then view and choose a remote (host) prescription and will be able to refill or partially fill any active non-controlled substance prescription at either facility.

All OneVA Prescription refills and partial fills are logged into a new file called REMOTE PRESCRIPTION LOG (#52.09) for host and dispensing facilities. The entries are viewable using the *OneVA Pharmacy Prescription Report* functionality.

With this integrated VistA patch, several points of failure could occur. The systems design will allow the process to continue if any of the various integration points fail, however, remote prescriptions will not display to the Pharmacist on the Medication Profile view.

There are application error messages that will display during the search for the patient and the patient’s prescriptions. They are:

- No patient error message:
PATIENT IDENTIFIER NOT FOUND
- Multiple patients returned error messages:
MORE THAN ONE PATIENT RETURNED IN CALL TO HDR-CDS
MORE THAN ONE PATIENT FOUND ON RX DATABASE, CHECK ICN
- Patient returned; no prescription data returned error message:
PATIENT FOUND WITH NO PRESCRIPTION RECORDS
- Patient returned; no prescription data matching filters returned error message:
PATIENT FOUND WITH NO PRESCRIPTION RECORDS MATCHING SEARCH
CRITERIA

6.1. Special Instructions for Error Correction

Significant errors are errors or conditions that affect the system stability, availability, performance, or otherwise make the system unavailable to its user base. For any significant error, please contact your local support.

7. Appendix B: Acronyms and Abbreviations

The following table provides the list of acronyms used throughout the document along with their descriptions.

Table 2: Acronym & Abbreviation Table

Acronym/Abbreviation	Description
[DIUSER]	FileMan Menu
[PSO LM BACKDOOR ORDERS]	Patient Prescription Processing Menu
[PSO MANAGER]	Outpatient Pharmacy Manager Menu
[PSO MENU]	Pharmacy Menu
[PSO REMOTE RX REPORT]	OneVA Pharmacy Prescription Report Menu
[PSO RX]	Rx (Prescriptions) Menu
AITC	Austin Information Technology Center
C/HDR	Clinical/Health Data Repository
CDS	Clinical Data Services
CHYSHR	Chyshr Test Laboratory VistA instance
Clin1	Clinical Product Support Team 1
DAYTSHR	Daytshr Test Laboratory VistA instance
DoD	Department of Defense
EPMO	Office of Information and Technology Enterprise Program Management Office
GOV	Government
HDR	Health Data Repository
HL7	Health Level 7
ICN	Integrated Control Number
IEN	Internal Entry Number
IOC	Initial Operating Capability
IT	Information Technology
MLLP	Minimal Layer Protocol
MVI	Master Veteran Index
NPI	National Provider Identifier
NSD	National Service Desk
OIT	Office of Information and Technology
OMB	Office of Management and Budget
OP	Outpatient Pharmacy
OP	OneVA Pharmacy Partial Fill

Acronym/Abbreviation	Description
OPAI	Outpatient Pharmacy Automated Interface
OR	OneVA Pharmacy Refill
PDM	Pharmacy Data Management application namespace
PII	Personally Identifiable Information
PR	Partial Refill (Local)
PSO	Outpatient Pharmacy application namespace
RF	Refill (Local)
Rx	Prescription
SDM	Service Desk Manager
SOAP	Simple Object Access Protocol
VA	Department of Veterans Affairs
VAMC	Veterans Affairs Medical Center
VDL	VA Software Document Library
VHA	Department of Veterans Health Administration
VIERS	Veteran Information/Eligibility Record Services
VistA	Veterans Health Information Systems and Technology Architecture

8. Appendix C: Frequently Asked Questions (FAQ)

- 1) What is the Value to me as the Veteran?

The previous 'Coordinated Care for Traveling Veterans' handbook required either a visit to the Emergency Room/Urgent Care Center or a pharmacy clinic visit to obtain a new prescription. OneVA Pharmacy makes the best use of the prescription already on file at another VA medical center.

Audience: Veteran

- 2) What if I have never been registered at the VA where I'm trying to pick up my prescription?

Veterans must register/enroll at the VA medical center in order for the pharmacy to see their records.

Audience: Veteran

- 3) Does OneVA pharmacy benefit me if I'm not traveling?

Use existing processes to contact the VA where your prescription is on file to request a refill.

Audience: Veteran

- 4) Do you still need to enter Allergies into the Pharmacy profile?

VistA pharmacy will display allergies and adverse reactions from all remote facilities.

Audience: Pharmacy

- 5) Can we send the prescription to CMOP?

OneVA Pharmacy is designed to provide an immediate fill at the Pharmacy window.

Audience: Pharmacy

- 6) Can any prescription be filled by OneVA pharmacy?

Controlled substances (CS at one or both facilities) cannot be filled via OneVA pharmacy. Drugs not matched to the National Drug file cannot be filled via OneVA Pharmacy. Prescriptions with no remaining refills, on suspense or on hold cannot be filled.

Audience: Pharmacy, Veteran

- 7) What should I do if I do not have the medication in stock?

Order the medication if the Veteran can return the next day, mail from CMOP to a temporary address, utilize the Coordinated Care for Traveling Veteran Handbook. “What would a prudent Pharmacist do?”

Audience: Pharmacy

- 8) What information is kept in my VistA system and what information is kept at the host VistA system?

The dispensing VistA system tracks the information in a new OneVA Pharmacy file – REMOTE PRESCRIPTION LOG File (#52.09) for reporting purposes. The refill or partial fill is tracked in the host system’s prescription file and activity log.

Audience: Pharmacy

- 9) What if it is too soon to fill?

Prescription will not be available to refill. Partial fills will be an available option. Sites can use Remote Data Views to see the fill history from the host station, especially if there are concerns for frequent partial fill requests of the same Rx.

Audience: Pharmacy

- 10) What is the dispensing name and address on the label?

The host pharmacy will be the name and address printed on the label which is consistent with how CMOP processes prescriptions.

Audience: Pharmacy

- 11) Are there any responsibilities for the host pharmacy in OneVA pharmacy?

To account for copay billing, insurance billing and subsequent refill capabilities all sites are asked to review the ONEVA PHARMACY PRESCRIPTION REPORT [PSO REMOTE RX REPORT] and manually release prescriptions filled by other stations. Recommended frequency of reviewing report is no less than weekly.

Audience: Pharmacy

- 12) How does OneVA pharmacy select the drug from my drug file?

The original prescription resides in the Health Data Repository (HDR). OneVA pharmacy identifies the national drug file (NDF) “VA Product” for the prescription. Matching drugs in your local drug file are identified based on that NDF product. If there is a 1:1 match found, OneVA pharmacy will recommend that drug. If there are multiple possible matches found, OneVA pharmacy will present a pick list to select from.

Audience: Pharmacy

13) How much information can you see from the Host prescription file?

OneVA pharmacy displays a limited subset of the prescription. Once the patient is registered, VistA Web can be utilized to see details of the prescription.

Audience: Pharmacy

14) What if the original prescription uses an abbreviation that is not in our instruction file?

The prescription label is generated from the host prescription file. This is consistent with how CMOP processes prescriptions.

Audience: Pharmacy

15) OneVA pharmacy reports show cost information, which system is used to calculate medication cost?

The dispensing system's cost is used in the report.

Audience: Pharmacy

16) Can I send an OneVA Pharmacy prescription to automation via the Outpatient Pharmacy Automation Interfaces (OPAI)?

Yes, patch PSO*7*643 allows OneVA Pharmacy prescription refills and partial fills to be sent to an external automated dispensing robot via the OPAI.

Audience: Pharmacy

17) If a patient is requesting a medication that requires in-clinic administration, could I use OneVA pharmacy?

OneVA pharmacy functionality is intended for outpatient prescriptions to be dispensed at the Pharmacy window.

Audience: Pharmacy

18) How will a patient be notified that their OneVA prescription is ready for pick up?

OneVA Pharmacy does not interface with prescription ready notification boards. Consider alternative processes and workflow. If however, the OneVA Pharmacy refill/partial fill is sent to an external automated dispensing robot via the OPAI, the patient will be notified that their OneVA prescription is ready for pick up.

9. Appendix D: Glossary

The following table provides definitions for common acronyms and terms used in this manual.

Table 3: Glossary

Acronym/Term	Definition
Action Profile	A list of all active and recently canceled or expired prescriptions for a patient sorted by classification. This profile also includes a signature line for each prescription to allow the physician to cancel or renew it.
Activity Log	A log, by date, of changes made to or actions taken on a prescription. An entry is made in this log each time the prescription is edited, canceled, reinstated after being canceled, or renewed. An entry will be made into this log each time a label is reprinted. A CMOP activity log will contain information related to CMOP dispensing activities.
Allergy/ADR Information	Includes non-verified and verified allergy and/or adverse reaction information as defined in the Adverse Reaction Tracking (ART) package. The allergy data is sorted by type (DRUG, OTHER, FOOD). If no data is found for a category, the heading for that category is not displayed.
Allergy Order Checks	The process that compares the drugs prescribed for a patient against that patient's recorded allergies.
AMIS	Automated Management Information System
Answer Sheet	An entry in the DUE ANSWER SHEET file. It contains the questions and answers of a DUE questionnaire. This term is also used to refer to the hard copy representation of a DUE ANSWER SHEET entry.
API	Application Programming Interface
APSP	Originally Indian Health Service Pharmacy's name space now owned by the Outpatient Pharmacy software.
BSA	<p>Body Surface Area. The Dubois formula is used to calculate the Body Surface Area using the following formula:</p> $BSA (m^2) = 0.20247 \times \text{Height (m)}^{0.725} \times \text{Weight (kg)}^{0.425}$ <p>The equation is performed using the most recent patient height and weight values that are entered into the vitals package.</p> <p>The calculation is not intended to be a replacement for independent clinical judgment.</p>
Bypass	Take no action on a medication order.
CHAMPVA	CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs) is a cost-shared health benefits program established for the dependents and survivors of certain severely disabled and/or deceased veterans.

Acronym/Term	Definition
Clinical Reminder Order Checks (CROC)	CPRS Order Checks that use Clinical Reminder functionality, both reminder terms and reminder definitions, to perform checks for groups of orderable items.
CMOP	Consolidated Mail Outpatient Pharmacy
CPRS	Computerized Patient Record System. CPRS is an entry point in VistA that allows the user to enter all necessary orders for a patient in different packages (e.g., Outpatient Pharmacy, Inpatient Pharmacy, etc.) from a single entry point.
CrCL	<p>Creatinine Clearance. The CrCl value which displays in the pharmacy header is identical to the CrCl value calculated in CPRS. The formula approved by the CPRS Clinical Workgroup is the following:</p> <p>Modified Cockcroft-Gault equation using Adjusted Body Weight in kg (if ht > 60in)</p> <p>This calculation is not intended to be a replacement for independent clinical judgment.</p>
Critical	Interactions with severe consequences that require some type of action (finding facts, contacting prescribers) to prevent potential serious harm.
DATUP	Data Update. Functionality that allows the Pharmacy Enterprise Customization System (PECS) to send out custom and standard commercial-off-the-shelf (COTS) vendor database changes to update the two centralized databases at Austin and Martinsburg.
DEA	Drug Enforcement Agency
DEA Special Handling	The Drug Enforcement Agency special Handling code used for drugs to designate if they are over-the counter, narcotics, bulk compounds, supply items, etc.
DHCP	See VistA.
DIF	Drug Information Framework
Dispense Drug	The Dispense Drug name has the strength attached to it (e.g., Acetaminophen 325 mg). The name alone without a strength attached is the Orderable Item name.
DNS	Domain Name Server
DoD	Department of Defense
Dosage Ordered	After the user has selected the drug during order entry, the dosage ordered prompt is displayed.
Drug/Drug Interaction	The pharmacological or clinical response to the administration of a drug combination different from that anticipated from the known effects of the two agents when given alone.

Acronym/Term	Definition
DUE	Drug Usage Evaluation
Enhanced Order Check	Drug – Drug Interaction, Duplicate Therapy, and Dosing order checks that are executed utilizing FDB’s MedKnowledge Framework APIs and database.
ETC	Enhanced Therapeutic Classification
Expiration/Stop	The date on which a prescription is no longer active. Typically, this date is 30 days after the issue date for narcotics, 365 days after the issue date for other medications and 365 days after the issue date for supplies.
FDB	First DataBank
Finish	Term used for completing orders from Order Entry/Results Reporting.
GUI	Graphical User Interface
HDR/CDS	Health Data Repository/Clinical Data Services Repository
HDR-Hx	Health Data Repository Historical
HDR-IMS	Health Data Repository- Interim Messaging Solution
Issue Date	The date on which the prescription was written. This date is usually, but not always, the same as the first fill date. This date cannot be later than the first fill date.
HFS	Host File Server
Health Insurance Portability and Accountability Act of 1996 (HIPAA)	A Federal law that makes a number of changes that have the goal of allowing persons to qualify immediately for comparable health insurance coverage when they change their employment relationships. Title II, Subtitle F, of HIPAA gives HHS the authority to mandate the use of standards for the electronic exchange of health care data; to specify what medical and administrative code sets should be used within those standards; to require the use of national identification systems for health care patients, providers, payers (or plans), and employers (or sponsors); and to specify the types of measures required to protect the security and privacy of personally identifiable health care information. Also known as the Kennedy-Kassebaum Bill, the Kassebaum-Kennedy Bill, K2, or Public Law 104-191.
JCAHO	Joint Commission on Accreditation of Healthcare Organizations
Label/Profile Monitor	A file for each printer which records, in the order in which they were printed, the last 1000 labels or profiles printed on that printer. This allows a rapid reprint of a series of labels or profiles that were damaged by a printer malfunction or other event.
Local Possible Dosages	Free text dosages that are associated with drugs that do not meet all of the criteria for Possible Dosages.

Acronym/Term	Definition
Medication Instruction File	The MEDICATION INSTRUCTION file is used by Unit Dose and Outpatient Pharmacy. It contains the medication instruction name, expansion and intended use.
Medication Order	A prescription.
Medication Profile	A list of all active or recently canceled or expired prescriptions for a patient sorted either by date, drug, or classification. Unlike the action profile, this profile is for information only and does not provide a signature line for a physician to indicate action to be taken on the prescription.
Medication Routes File	The MEDICATION ROUTES file contains medication route names. The user can enter an abbreviation for each route to be used at the local site. The abbreviation will most likely be the Latin abbreviation for the term.
Med Route	The method in which the prescription is to be administered (e.g., oral, injection).
NCCC	Acronym for National Clozapine Coordinating Center.
Non-Formulary Drugs	The medications that are defined as commercially available drug products not included in the VA National Formulary.
Non-VA Meds	Term that encompasses any Over-the-Counter (OTC) medications, Herbal supplements, Veterans Health Administration (VHA) prescribed medications but purchased by the patient at an outside pharmacy, and medications prescribed by providers outside VHA. All Non-VA Meds must be documented in patients' medical records.
OneVA Pharmacy	Prescriptions that originated from another VistA instance other than the site dispensing the prescription.
OPAI	Outpatient Pharmacy Automated Interface.
Order	Request for medication.
Order Check	Order checks (drug-allergy/ADR interactions, drug-drug, duplicate drug, duplicate therapy, and dosing) are performed when a new medication order is placed through either the CPRS or Outpatient Pharmacy applications. They are also performed when medication orders are renewed, when Orderable Items are edited, or during the finishing process in Outpatient Pharmacy. This functionality will ensure the user is alerted to possible adverse drug reactions and will reduce the possibility of a medication error.
Orderable Item	An Orderable Item name has no strength attached to it (e.g., Acetaminophen). The name with a strength attached to it is the Dispense drug name (e.g., Acetaminophen 325mg).

Acronym/Term	Definition
Partial Prescription	A prescription that has been filled for a quantity smaller than requested. A possible reason for a partial fill is that a patient is to return to the clinic in ten days but the prescription calls for a thirty-day supply. Partials do count as workload but do not count against the total number of refills for a prescription.
Payer	In health care, an entity that assumes the risk of paying for medical treatments. This can be an uninsured patient, a self-insured employer, or a health care plan or Health Maintenance Organization (HMO).
Pending Order	A pending order is one that has been entered by a provider through CPRS without Pharmacy finishing the order. Once Pharmacy has finished the order, it will become active.
Pharmacy Narrative	OUTPATIENT NARRATIVE field that may be used by pharmacy staff to display information specific to the patient.
Polypharmacy	The administration of many drugs together.
POE	Acronym for Pharmacy Ordering Enhancements (POE) project. Patch PSO*7*46 contains all the related changes for Outpatient Pharmacy.
Possible Dosages	Dosages that have a numeric dosage and numeric dispense units per dose appropriate for administration. For a drug to have possible dosages, it must be a single ingredient product that is matched to the DRUG file. The DRUG file entry must have a numeric strength and the dosage form/unit combination must be such that a numeric strength combined with the unit can be an appropriate dosage selection.
Prescription	This term is now referred to throughout the software as medication orders.

Acronym/Term	Definition
Prescription Status	<p>A prescription can have one of the following statuses.</p> <p>Active - A prescription with this status can be filled or refilled.</p> <p>Canceled - This term is now referred to throughout the software as Discontinued. (See Discontinued.)</p> <p>Discontinued - This status is used when a prescription was made inactive either by a new prescription or by the request of a physician.</p> <p>Discontinued (Edit) - Discontinued (Edit) is the status used when a medication order has been edited and causes a new order to be created due to the editing of certain data elements.</p> <p>Deleted - This status is used when a prescription is deleted. Prescriptions are no longer physically deleted from the system, but marked as deleted. Once a prescription is marked deleted no access is allowed other than view.</p> <p>Expired - This status indicates the expiration date has passed.</p> <p>*Note: A prescription that was canceled or has expired more recently than the date specified by the cutoff date, typically 120 days in the past, can still be acted upon.</p> <p>Hold - A prescription that was placed on hold due to reasons determined by the Pharmacist.</p> <p>Non-verified - There are two types of non-verified statuses. Depending on a site parameter, prescriptions entered by a technician do not become active until a Pharmacist reviews them. Until such review, they remain non-verified and cannot be printed, canceled, or edited except through the Verification menu. The second non-verified status is given to prescriptions when a drug/drug interaction is encountered during the new order entry or editing of a prescription.</p> <p>Pending - A prescription that has been entered through OERR.</p> <p>Refill - A second or subsequent filling authorized by the provider.</p> <p>Suspended - A prescription that will be filled at some future date.</p>
Progress Notes	A component of Text Integration Utilities (TIU) that can function as part of CPRS.
Provider	The person who authorized an order. Only users identified as providers who are authorized to write medication orders may be selected.
Reprinted Label	Unlike a partial prescription, a reprint does not count as workload.
Questionnaire	An entry in the DUE QUESTIONNAIRE file. This file entry contains the set of questions related to a DUE as well as the drugs being evaluated.
Schedule	The frequency by which the doses are to be administered, such as Q8H, BID, NOW, etc.
Sig	The instructions printed on the label.

Acronym/Term	Definition
Significant	The potential for harm is either rare or generally known so that it is reasonable to expect that all prescribers have taken this information into account.
SOAP	Simple Object Access Protocol
Speed Actions	See Actions.
Suspense	A prescription may not be able to be filled on the day it was requested. When the prescription is entered, a label is not printed. Rather, the prescription is put in the RX SUSPENSE file to be printed at a later date.
Third (3rd) Party Claims	Health care insurance claims submitted to an entity for reimbursement of health care bills.
Time In	This is the time that the patient's name was entered in the computer.
Time Out	This is the time that the patient's name was entered on the bingo board monitor.
TIU	Text Integration Utilities; a package for document handling, that includes Consults, Discharge summary, and Progress Notes, and will later add other document types such as surgical pathology reports. TIU components can be accessed for individual patients through the CPRS, or for multiple patients through the TIU interface.
Titration	Titration is the process of gradually adjusting the dose of a medication until optimal results are reached.
TRICARE	TRICARE is the uniformed service health care program for: active duty service members and their families retired service members and their families members of the National Guard and Reserves and their families survivors, and others who are eligible. There are differences in how prescriptions for TRICARE beneficiaries are processed versus how prescriptions are processed for veterans.
Units per Dose	The number of Units (tablets, capsules, etc.) to be dispensed as a Dose for an order. Fractional numbers will be accepted for medications that can be split.
VistA	Acronym for Veterans Health Information Systems and Technology Architecture, the new name for Decentralized Hospital Computer Program (DHCP).
Wait Time	This is the amount of time it took to fill the prescription. It is the difference between Time In and Time Out. For orders with more than one prescription, the wait time is the same for each.
