# Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists “All,” replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

</tr>
<tr>
<td>Detailed Allergy Display [DA]</td>
<td>Displays a detailed listing of the selected item from the patient's allergy/ADR list. Entry to the Edit Allergy/ADR Data action is provided with this list also.</td>
</tr>
<tr>
<td>Patient Record Update [PU]</td>
<td>Allows editing of patient data such as SSN, birth date, address, phone, and outpatient narrative. Patient data can also be updated using the Update Patient Record menu option. If implementing Other Language Modifications, either can be used to set a patient's other language preference.</td>
</tr>
<tr>
<td>New Order [NO]</td>
<td>Allows new orders to be entered for the patient.</td>
</tr>
<tr>
<td>Exit Patient List [EX]</td>
<td>Exit patient’s Patient Information screen so that a new patient can be selected.</td>
</tr>
</tbody>
</table>
Chapter 1: Using the Bingo Board

This chapter describes the options available on the Bingo Board User menu.

Bingo Board User
[PSO BINGO USER]

The Bingo Board User menu enables use of the bingo board display. The options on this menu allow a patient’s name or a number to be displayed, entered, or removed from the bingo board display located in the pharmacy area.

When the routing for an order is set to “Window”, the entering of prescription orders stores information in the bingo board PATIENT NOTIFICATION (Rx READY) file. For new, renew, pull early from suspense, refill orders, barcode refill/renew, and finish process for orders entered via CPRS, the date and time is captured when the order is stored in this file. The same occurs for partials, except the time is captured when a prescription number is entered.

Releasing the prescription places the name or ticket number of the patient on the bingo board monitor if a display group exists and stores data in the WAITING TIME file. The options on this menu are used to manually enter, display, or remove a patient’s name or number from the monitor.

The following options are available on the Bingo Board User menu:

- Enter New Patient
- Display Patient’s Name on Monitor
- Remove Patient’s Name from Monitor
- Status of Patient’s Order

Enter New Patient
[PSO BINGO NEW PATIENT]

Use this option to manually enter the name of a new patient on the bingo board. Each prescription number for the patient’s order must also be entered.

A "Ticket #" prompt displays if ticket number was chosen as the method of display in the Enter/Edit Display option on the Bingo Board Manager menu. Enter the ticket number and at the next prompt enter each of the prescription numbers for that patient.

Display Patient’s Name on Monitor
[PSO BINGO DISPLAY PATIENT]

Use this option to begin displaying the name or number of a patient whose prescription is ready. The message, "PRESCRIPTIONS ARE READY FOR:" appears as fixed text on the display screen. This option displays the following reminder for ECME billable prescriptions: “*** This Pharmacy Rx requires a patient signature! ***"
Remove Patient's Name from Monitor

[PSO BINGO DELETE PATIENT]

After the patient picks up the prescription, remove the name or ticket number from the display either manually or through the barcode reader.

It is recommended that a patient’s name be removed from the monitor as soon as the prescription is picked up.

Status of Patient's Order

[PSO BINGO STATUS]

This option enables checking of the number of prescriptions a patient has ready, the division, time in/time out, and the prescription number(s). There are four possible statuses:

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pending</td>
<td>Active order input via CPRS that is in the PENDING OUTPATIENT ORDERS file.</td>
</tr>
<tr>
<td>Being Processed</td>
<td>Order that is in the PATIENT NOTIFICATION (Rx READY) file, but not displayed.</td>
</tr>
<tr>
<td>Ready For Pickup</td>
<td>Order that is in the PATIENT NOTIFICATION (Rx READY) file and is being displayed.</td>
</tr>
<tr>
<td>Picked Up</td>
<td>Order that has been picked up.</td>
</tr>
</tbody>
</table>

Example: Status of Patient's Order

Select Bingo Board User Option: Status of Patient's Order

Enter Patient Name: OPPATIENT17,ONE

OPPATIENT17,ONE has the following orders for 10/31/06

Being Processed: ***Entered on OCT 31, 2006***
Division: GENERAL HOSPITAL   Time In: 10:27   Time Out: 10:46
Rx #: 1022731,

Pending:
Orderable Item: ACETAMINOPHEN Provider: OPPROVIDER24, TWO
Entered By: OPCLERK28, FOUR Time In: 10/31/06@06:46
Drug: ACETAMINOPHEN 325MG TAB UD Routing: MAIL

Ready For Pickup:
Division: GENERAL HOSPITAL   Time In: 10:36   Time Out: 10:46
Rx #: 500416,

Enter Patient Name: <Enter>
Chapter 2: Print from Suspense File

This chapter describes the *Print from Suspense File* option used for printing suspended prescriptions.

**Print from Suspense File**

*[PSO PNDLBL]*

This option allows the user to print labels from the RX SUSPENSE file. First, enter the “Print Through” date. Any prescriptions with a suspense date on or before the date entered will print. Additionally, if a patient has at least one prescription on or before the date entered, any other prescriptions for that patient that are in suspense will be printed for the site parameter specified number of days to be pulled from suspense.

For example, if today’s date is entered and Patient A has a prescription to be printed through the that date, all of Patient A’s prescriptions between the date entered plus the number of days set in the local site parameter will be printed. If there are no prescriptions for Patient A through the date entered, no labels will print.

Labels can be sorted by the patient name, the SSN, or the DEA Special Handling code. If sorted by DEA, the labels must then sort by patient name or SSN. Sorting by DEA will send the labels to the printer in three groups:

- **First group** – will contain all the prescriptions with drugs that contain an “A” (narcotics and alcoholics) or a “C” (controlled substances-non narcotic) in the DEA Special Handling field.
- **Second group** – will contain all the prescriptions with drugs containing an “S” (supply) in the DEA Special Handling field.
- **Third group** – will contain all others. If a patient has prescriptions in suspense that fall in all three categories, that patient's labels will be printed three times, once in each group.

Only one job is tasked for all of the prescriptions in the batch; therefore, if the job is queued by mistake, only one tasked job must be undone. Any prescription that is put in suspense for the "Print Through Date" between the times the job was queued until the time it actually runs will be included in the job.

Labels for each job printed from suspense will be part of a batch. Each batch is identified by the Division, the user who queued the batch, and the date/time that the job was queued to begin.

Prescriptions pulled early from suspense will not be part of a batch, so they will not be able to be reprinted through the *Reprint Batches from Suspense* option.

A short profile for every patient for whom a label for a new prescription is being printed will also be printed if the local Profile with New Prescriptions site parameter is set to Yes.

If a patient has partial prescriptions with regular fills, only one set of trailing documents will print for that patient. (In V. 6.0 trailer documents were printed after each partial.)
If a prescription is determined to be an ePharmacy prescription (e.g., third party electronically billable), an electronic claim will be sent by the Electronic Claims Management Engine (ECME) to the third party payer. TRICARE and CHAMPVA prescriptions are exceptions, as noted in the TRICARE and CHAMPVA section. The communication events between Outpatient Pharmacy and ECME are recorded in the ECME Log section of each prescription. The ECME log can be viewed in the patient Medication Profile screen (Activity Log option - AL) and also from the View Prescriptions option. If the claim submission returns a Refill Too Soon (79) or Drug Utilization Review (88) reject, the label is not printed for the prescription and it is moved to the Refill Too Soon/DUR section of the patient Medication Profile screen until the user resolves the reject. The prescription will also display on the Third Party Payer Reject worklist.

¾ Days Supply Hold

Because of the great number of refill-too-soon third party claim rejections that can occur due to prescriptions being filled too early, the system verifies that ¾ of the days supply has elapsed on the previous fill before the ePharmacy prescription may be refilled. The following list describes this functionality.

- ePharmacy prescriptions are delayed from being sent to CMOP and printed for local mail until ¾ of the days supply has elapsed. For CMOP suspense, a partial day will be rounded up (ex.: ¾ of 30 days will be 23 days). With the release of PSO*7*367, this rounding functionality will also be available for local mail suspense.
- An activity log entry will state the date/time that the Rx will be allowed to be removed from suspense. The activity log will be defined on the initial evaluation. The following is an example of the log entry:

<table>
<thead>
<tr>
<th></th>
<th>06/18/08</th>
<th>SUSPENSE</th>
<th>REFILL 2</th>
<th>OPHARM,ONE</th>
</tr>
</thead>
<tbody>
<tr>
<td>Comments:</td>
<td>3/4 of Days Supply SUSPENSE HOLD until 6/20/08.</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- To fill the prescription earlier, users may pull these types of prescriptions early from suspense.

Host Errors

Prescriptions (ePharmacy only) will be prevented from being filled/sent to CMOP when a host processing error occurs as a claim is submitted through ECME. Host processing errors are identified by reject codes M6, M8, NN, and 99 which are returned by the third party payer. The following conditions apply when this scenario occurs.

- The transmission of the prescription fill will be delayed 1 day in hopes that the host processing issues will be resolved by the third party payer.
- An activity log entry will state the date/time along with a comment stating that the Rx/fill was left in suspense hold due to a host processing error. The following is an example of the log entry:
- The Pull Early from Suspense function is not impacted by this added functionality. Users may pull these type prescriptions early from suspense.

There is no user interaction for this function. It initiates when the Print from Suspense [PSO PNDLBL] option is initiated for CMOP prescriptions.

**TRICARE and CHAMPVA**

If there is an override or bypass for a TRICARE or CHAMPVA prescription and there are no open claim rejections for that prescription, then an electronic claim is not generated from suspense, and the label will be printed when the prescription is processed from suspense. This exception applies to TRICARE and CHAMPVA ePharmacy billable prescriptions and non-billable prescriptions.

If a claim is submitted from suspense for a TRICARE or CHAMPVA prescription, the prescription will be displayed on the Third Party Payer Reject worklist if the claim submission returns any type of reject. Also, non-billable TRICARE and CHAMPVA prescriptions will be displayed on the Third Party Payer Reject worklist. A user must resolve the reject or submit an override before the prescription can be processed through suspense.
(This page included for two-sided copying.)
Chapter 3: Queue CMOP Prescription

This chapter describes the option for suspending prescriptions for mail-routed CMOP drugs.

**QUEUE CMOP Prescription**

*[PSO RX QUEUE CMOP]*

The *Queue CMOP Prescription* option allows the users (including pharmacy technicians) to put mail-routed prescription(s) for CMOP drugs on suspense for CMOP.

Example: Queue CMOP Prescription

Select Suspense Functions Option: **QUEUE** CMOP Prescription
Enter the Rx # to queue to CMOP: **300486**

If the prescription does not have a routing of Mail, has already been released, or is not for a CMOP drug, and does not pass all the other normal checks for CMOP, it will not be put on suspense for CMOP.
(This page included for two-sided copying.)
Changes to Releasing Orders Function – Signature Alert

With Patch PSO*7*385, the release function in the Patient Prescription Processing option has been modified to display a message to the user when an ECME-billable prescription is being released as a window fill. This message will alert the user that the patient’s signature must be obtained. The user is not required to press <Enter> to continue or respond to the alert in any other manner.

Example: Releasing an ePharmacy Window Fill

```
Prescription Number 100003853 Released
No Refill(s) to be Released
No Partial(s) to be Released

@Pharmacy Rx – Obtain Signature
```
Changes to Releasing Orders function – HIPAA NCPDP Global

The release function has been modified with patch PSO*7*148 to perform National Drug Code (NDC) validation for ePharmacy prescriptions. These changes also affect the Controlled Substance prescription release, which is performed through the Controlled Substances package.

The user releasing the third-party electronically billable prescription will be prompted for the NDC for the drug being dispensed to the patient. The NDC code previously retrieved when the prescription was finished will be presented as the current (default) NDC for the prescription. The other possible values that the user will be able to choose from are:

- NDC field value in the DRUG file, if valid and different than the current prescription NDC.
- LAST LOCAL NDC field value in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription, if valid and different that the current prescription NDC.
- NDC CODE field values in the SYNONYM sub-file in the DRUG file, if valid and different that the current prescription NDC.

If the NDC dispensed is not on the list to select, the user must contact the ADPAC or other designated person to add the NDC in a synonym multiple for that drug in file 50.

If the NDC code selected matches the current NDC in the prescription no further NDC processing is required. However, if the user selects a different NDC, the following steps will occur:

1. Outpatient Pharmacy V. 7.0 will instruct ECME to reverse the previous claim for the previous NDC code and submit a new claim for the newly selected NDC code.

2. The newly selected NDC code will be saved in the LAST LOCAL NDC field in NDC BY OUTPATIENT SITE sub-file in the DRUG file for the division filling the prescription.
The following examples show the new prompt for NDC validation during the release process.

**Example: Releasing an ePharmacy Order – Selecting Default NDC**

Select Outpatient Pharmacy Manager Option: RELEASE Medication

Enter PHARMACIST: OPPHARMACIST4,THREE

Enter/Wand PRESCRIPTION number: 100003853

NDC: 00580-0277-10// ?

Select one of the following valid NDC code(s) below:

1 - 00580-0277-10

NDC: 00580-0277-10// <Enter> 00580-0277-10

Prescription Number 100003853 Released

No Refill(s) to be Released

No Partial(s) to be Released

@Pharmacy Rx - Obtain Signature

**Example: Releasing an ePharmacy Order – Selecting Different NDC**

Select Outpatient Pharmacy Manager Option: RELEASE Medication

Enter PHARMACIST: OPPHARMACIST4,THREE

Enter/Wand PRESCRIPTION number: 100003853

NDC: 00580-0277-10// ?

Select one of the following valid NDC code(s) below:

1 - 00580-0277-10

2 - 00580-0277-14

NDC: 00580-0277-10// 2 00580-0277-14

Prescription 100003853 successfully submitted to ECME for claim generation.

Claim Status:

(O)verride, (I)gnore, (Q)uit: Q// O OVERRIDE

When a claim is rejected, typically the Payer provides a “Reason for Service Code”, which displays on the reject as “Reason”. The user can use this reason to then select which code is entered for “Professional Service Code” and “Result of Service Code”. To see a list of service codes, enter ? at the specified prompt.

Reason for Service Code : ER - OVERUSE
Professional Service Code: RT RECOMMENDED LABORATORY TEST
Result of Service Code   : 1G FILLED, WITH PRESCRIBER APPROVAL

Reason for Service Code : ER - OVERUSE
Professional Service Code: RT RECOMMENDED LABORATORY TEST
Result of Service Code   : 1G FILLED, WITH PRESCRIBER APPROVAL

Confirm? ? YES/<Enter>

Prescription 99999999 successfully submitted to ECME for claim generation.

Claim Status:
IN PROGRESS-Waiting to start
IN PROGRESS-Waiting for packet build
IN PROGRESS-Packet being built
IN PROGRESS-Waiting for transmit
IN PROGRESS-Transmitting
IN PROGRESS-Waiting to process response
E PAYABLE

For Refill Too Soon rejects, the same choices apply.
Example: Handling a TRICARE Rejected New Order for ePharmacy Billing

Rejected TRICARE claims will be denoted with “TRICARE” during submission to ECME and within the subsequent reject notification screen. Also, the reject codes will be displayed in both places. The following example shows a prescription being submitted to ECME and this process occurs directly following the “Is this correct? YES//” prompt during finish. Where DUR or RTS are one of the reject codes, the user will be able to select from (D)iscontinue the prescription, submit (O)verride codes, or (Q)uit which sends the rejection to the Third Party Payer Rejects - Worklist. A TRICARE rejection may not be (I)gnored.

PP   Pull Rx (OP)         ADPL Auto Display(On/Off) SL  Search List
IP   Inpat. Profile (OP)  DN  Down a Line       UP  Up a Line

Copy is a hidden action used to create a new order exactly like the original order. Any field of the new order can be edited. This action does not affect the status of the original order but the duplicate order checks will occur.

This status refers to the original prescription.

This status refers to the newly created prescription.
ePharmacy Menu

[PSO EPHARMACY MENU]

The following menu items are locked with the PSORPH key: ePharmacy Medication Profile Division Preferences, ePharmacy Site Parameters, Third Party Payer Rejects – View/Process and Third Party Payer Rejects – Worklist. The following menu item is locked with the PSO TRICARE/CHAMPVA MGR key: TRICARE CHAMPVA Bypass/Override Report.

These menu items allow the user to perform ePharmacy specific functions including rejections by third party payers including DUR/RTS and has the following options:

- Ignored Rejects Report
- ePharmacy Medication Profile (View Only)
- NDC Validation
- ePharmacy Medication Profile Division Preferences
- ePharmacy Site Parameters
- Third Party Payer Rejects – View/Process
- Third Party Payer Rejects – Worklist
- TRICARE CHAMPVA Bypass/Override Report
- View ePharmacy Rx

DURs can occur when a third party determines there are safety issues involved with an Rx claim submission, and they can be due to high dose, drug interaction, and excessive utilization. The third party payer returns an NCPDP rejection code of 88 to indicate a DUR.

Refill Too Soon rejections happen when a third party payer determines that a prescription is being processed too early compared to the last time the prescription was filled. This can occur for several reasons, including third party payer’s policy differs from VA policy, patient receiving medication at another pharmacy, or the provider may have increased the dosage or frequency of the medication. The third party payer returns an NCPDP rejection code of 79 to indicate a Refill Too Soon.

Prescriptions rejected as DUR and Refill Too Soon are moved to the REFILL TOO SOON/DUR REJECTS (Third Party) section of the Medication Profile. The user must resolve a rejected prescription before other actions such as release, label print, renew, and refill, among others, can be performed on it. Actions may still be taken on these prescriptions through CPRS.
Ignored Rejects Report

**[PSO IGNORED REJECTS REPORT]**

This option gives the user the ability to run a report for third-party rejects that have been ignored and consequently closed by the pharmacy users.

The user can select one of the following parameters to filter the data in the report:

- **DIVISION**: Allows the user to select one, some or all divisions.
- **DATE RANGE**: Allows the user to select a date range.
- **SORT BY**: Allows the user to choose different fields to sort the report by. Any combination can be selected:
  - **PATIENT**: Allows the user to select a single, multiple or all patients
  - **DRUG**: Allows the user to select a single, multiple or all drugs.
  - **USER**: Allows the user to select a single, multiple or all users that have ignored third party rejects.

**Example: Ignored Rejects Report**

Select ePharmacy Menu Option: IR Ignored Rejects Report

You may select a single or multiple DIVISIONS, or enter ^ALL to select all DIVISIONS.

DIVISION: ^ALL

BEGIN REJECT DATE: 030606 (MAR 06, 2006)

END REJECT DATE: 061407 (JUN 14, 2007)

Enter the SORT field(s) for this Report:

1 - PATIENT
2 - DRUG
3 - USER

Or any combination of the above, separated by comma, as in these examples:

2,1 - BY PATIENT, THEN DRUG
3,1,2 - BY USER, THEN BY PATIENT, THEN BY DRUG

SORT BY: PATIENT// 1,2

SORT BY PATIENT
THEN BY DRUG

You may select a single or multiple PATIENTS, or enter ^ALL to select all PATIENTS.

PATIENT: ^ALL

You may select a single or multiple DRUGS, or enter ^ALL to select all DRUGS.

DRUG: ^ALL

DEVICE: HOME// [Select Printer Device]
ePharmacy Medication Profile Division Preferences

[PSO PMP SITE PREFERENCES]

This option allows the user to specify certain settings that will control how the ePharmacy Medication Profile option works for that user. Below is the list of settings that can be specified through this option:

- **EXP/CANCEL CUTOFF**: Indicates the maximum number of days for an expired and/or discontinued prescription to be cut from the profile.
- **SORT BY**: Indicates the default sorting column. The options are: Rx#, Drug Name, Issue Date or Last Fill Date.
- **SORT ORDER**: Indicates the order in which the column above will be sorted: Ascending or Descending.
- **DISPLAY SIG**: Indicates whether the SIG should be displayed under each prescription or if it should be hidden.
- **GROUP BY STATUS**: Indicates whether the list should be grouped by status (Active, Discontinued, Hold, etc…) or not.
- **DISPLAY ORDER COUNT**: Indicates whether the number of orders under each group should be displayed beside the group name. Example ______ACTIVE (3 orders)_____

Select ePharmacy Menu Option: PF  ePharmacy Medication Profile Division Preferences

ALBANY ISC's current default view:

<table>
<thead>
<tr>
<th>Setting</th>
<th>Value</th>

GROUP BY STATUS: OFF//<Enter>
DISPLAY ORDER COUNT: OFF//<Enter>

Saving...OK!

If there is a set of preferences already on file for the division the user is logged under, the option to delete such preferences is presented to the user as seen above.

ePharmacy Site Parameters

The ePharmacy Site Parameters file (#52.86) has been added to store ePharmacy Site parameters by division. Along with this, a new EPHARMACY SITE PARAMETERS [PSO ePHARM SITE PARAMETERS] option has been added to the existing ePharmacy Menu [PSO EPHARMACY MENU].
This new option requires the PSORPH security key.

The following site parameters are definable using this option:

- **ALLOW ALL REJECTS**: Requires a YES or NO answer. It is highly suggested that NO be answered at this prompt. Answering YES to this prompt will signify that all prescription fills with ePharmacy rejected claims will automatically be placed on the Third Party Payer Rejects - Worklist, also known as the Pharmacy Reject Worklist. This is in addition to Refill-Too-Soon (79), Drug Utilization Review (DUR/88), CHAMPVA rejects and TRICARE rejects, which are automatically placed on the Pharmacy Reject Worklist. Any individually defined reject codes in this file will be overridden when a “YES” answer is given.

- **REJECT WORKLIST DAYS**: This is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message.

The following prompts appear consecutively and the user may enter as many reject codes as they desire along with the manner in which each will be allowed to be placed on the reject worklist.

- **REJECT CODE**: A valid third party claim reject code should be entered. A listing of these codes is provided when double question marks (??) are entered for this prompt. Valid codes are contained within the BPS NCPDP REJECT CODES file (#9002313.93). Also, a value defined in this field triggers definition of USER field (#2) and DATE OF LAST UPDATE field (#3). Any individually defined codes will be overridden when the ALLOW ALL REJECTS prompt is answered as YES.

- **AUTO SEND**: This prompt is a companion to the REJECT CODE prompt. Enter YES to allow the entered REJECT CODE to be automatically placed on the Pharmacy Reject Worklist or NO to require Outpatient Pharmacy Electronic Claims Coordinator (OPECC) intervention to do so. A null value will be treated the same as entering NO in this field.
The following is an example of definition of ePharmacy Site Parameters:

Select ePharmacy Menu Option: SP  ePharmacy Site Parameters

Regardless of any parameters defined, Refill-Too-Soon, Drug Utilization Review(DUR), CHAMPVA and TRICARE rejects will always be placed on the Third Party Payer Rejects - Worklist, also known as Pharmacy Reject Worklist. These parameters are uneditable and are the default parameters.

Division: ALBANY ISC  500
...OK? Yes// (Yes)

ALLOW ALL REJECTS: NO//

Third Party Payer Rejects - View/Process

[PSO REJECTS VIEW/PROCESS]

This option provides information about rejects that have been on the Third Party Payer Rejects – Worklist. This option allows the user to find, display and reopen rejects previously resolved from the Third Party Payer Rejects – Worklist in order to take action on them again.

The user can choose to view rejects for one, multiple, or all Outpatient Pharmacy Divisions.

Example: Viewing and Resolving Open Rejects

Select ePharmacy Menu Option: VP Third Party Payer Rejects – View/Process

You may select a single or multiple DIVISIONS, or enter "ALL to select all DIVISIONS.

DIVISION: *ALL

The user can select one of the following selections to filter the data displayed:

- **DATE RANGE**: Selects a date range (Default: Last 90 days).

  BEGIN REJECT DATE: T-90/ / <Enter> (MAR 09, 2007)
  END REJECT DATE: T/ / <Enter> (JUN 07, 2007)

- **(P)ATIENT**: Selects a single patient, multiple patients, or all patients.
- **(D)RUG**: Selects a single drug, multiple drugs, or all drugs.
- **(R)x**: Selects a single prescription number, or multiple prescription numbers.
- **(I)NSURANCE**: Selects a single insurance, multiple insurances, or all insurances.

Select one of the following:

P  PATIENT
D  DRUG
R  Rx
I  INSURANCE

By (P)atient, (D)rug, (R)x or (I)nsurance: P/ / INSURANCE

Enter the whole or part of the Insurance Company name for which you want to view/process REJECTS.

INSURANCE: TEST INS
ANOTHER ONE: <Enter>
Next, the user can choose to display either Unresolved, Resolved, or Both types of rejects.

Select one of the following:

<table>
<thead>
<tr>
<th>U</th>
<th>UNRESOLVED</th>
</tr>
</thead>
<tbody>
<tr>
<td>R</td>
<td>RESOLVED</td>
</tr>
<tr>
<td>B</td>
<td>BOTH</td>
</tr>
</tbody>
</table>

(U)NRESOLVED, (R)RESOLVED or (B)OTH REJECT statuses: B/<Enter> BOTH

Please wait...

--------------------------------- example continues---------------------------------------
### Example: Viewing and Resolving Open Rejects (continued)

<table>
<thead>
<tr>
<th>Rx#</th>
<th>PATIENT(ID)</th>

<table>
<thead>
<tr>
<th>DR</th>
<th>Sort by Drug</th>
<th>RE</th>
<th>Sort by Reason</th>
<th>RX</th>
<th>Sort by Prescription</th>
</tr>
</thead>
<tbody>
<tr>
<td>PA</td>
<td>Sort by Patient</td>
<td>RF</td>
<td>Screen Refresh</td>
<td>GI</td>
<td>Group by Insurance</td>
</tr>
</tbody>
</table>

Select: Quit/

The following options are available on the screen above:

- **DR** – Sorts the list by the drug name.
- **PA** – Sorts the list by the patient’s last name.
- **RE** – Sorts the list by the reject reason.
- **RF** – Refreshes the screen. (This selection retrieves DUR/ REFILL TOO SOON rejects that happened after the screen was originally populated.)
- **RX** – Sorts the list by Prescription number.
- **GI** – Groups the rejects by Insurance Company name.

The following two sets of characters denote the order by which the list is being sorted: [^] for ascending and [v] for descending. The order inverts every time the user selects the same column by which the list is already ordered. Thus, if the list is currently ordered by Patient in ascending order ([^]) and the user types “PA”, the list will be re-sorted in descending order and the order indicator will change to ([v]).

The user selects a specific record to display all relevant information about the prescription and the claim submitted to the payer.

---

These options are available on the screen above:

- **VW (View)** – Takes the user to the View Prescription option to review details for that prescription.
- **MP (Medication Profile)** – Invokes the patient’s list of medication.
- **IGN (Ignore Reject)** – Allows the user to close or resolve the DUR/REFILL TOO SOON Reject without resubmission to the payer. The user will be required to enter a free-text comment and his/her electronic signature.
- **RES (Resubmit Claim)** – Allows the user to re-submit the claim to the payer. This will automatically mark the reject resolved.
- **OVR (Submit Override Codes)** – Allows the user to re-submit the claim by entering NCPDP override codes, which shall trigger a new claim submission be sent to the payer.
- **CSD (Change Suspense Date)** – Allows the user to change the fill date for suspended prescriptions.

**Hidden actions:**

- **COM (Add Comments)** – Allows the user to add reject specific comments. This comments are local to the Reject Worklist and View/Process options and are not transmitted to ECME.
- **CLA (Submit Clarif. Code)** – Allows the user to re-submit a claim with Clarification Codes.
- **ED (Edit Rx)** – Allows the user to edit the prescription.
- **PA (Submit Prior Auth.)** – Allows the user to re-submit a claim with Prior Authorization information.
- **ARI (View Addtnl Rej Info)** – Allows the user to display additional reject information from the payer, if available.
- SDC (Suspense Date Calculation) – Allows the user to calculate a new suspense date based on Last Date of Service and Last Days Supply.
- SMA (Submit Multiple Actions) – Allows the user to resubmit a claim with multiple actions, including the following information: Prior Authorization, Submission Clarification Code, Reason for Service Code, Professional Service Code, and Result of Service Code.
Example: Viewing and Resolving Open Rejects (continued)

Enter your Current Signature Code: SIGNATURE VERIFIED

Comments: changed quantity

When you confirm this REJECT will be marked RESOLVED.

Confirm? ? NO// Y YES [Closing...OK]

The following is a sample of the ECME Activity Log update that occurs when a reject is resolved:

Third Party Payer Rejects - Worklist

[PSO REJECTS WORKLIST]

This option gives the user the ability to process Third Party Payer Rejects, CHAMPVA Non-billable rejects and TRICARE Non-billable rejects for one, multiple, or all Outpatient Pharmacy Divisions. Only OPEN/UNRESOLVED rejects that have clinical significance, such as DUR and Fill Too Soon, and rejects transferred from the ECME user screen, are added to the Worklist. Once the reject is marked CLOSED/RESOLVED, it is automatically removed from the Worklist.

Example: Resolving Open Rejects

Select Rx (Prescriptions) Option: EPHARMACY Menu

| IR | Ignored Rejects Report |
| MP | ePharmacy Medication Profile (View Only) |
| NV | NDC Validation |
| PF | ePharmacy Medication Profile Division Preferences |

TRICARE CHAMPVA Bypass/Override Report

[PSO Bypass/Override Report]

This menu option is locked with the PSO TRICARE/CHAMPVA MGR security key.

This option provides information in a detail or summary report format that will list prescriptions where the Bypass or Override was performed to enable processing of these TRICARE and CHAMPVA prescriptions. The user has the ability to list (I)npatient; (N)on-Billable Product; (R)eject Override; or (A)ll. Besides allowing the selection of all types, the report allows the selection of one or two types. For example, the user can select Non-billable and Reject for the same report.

Example: Accessing the TRICARE CHAMPVA Bypass/Override Report

Select Rx (Prescriptions) Option: epharmacy Menu

**TRICARE/CHAMPVA Reject Processing**

The Third Party Payer Rejects - Worklist [PSO REJECTS WORKLIST] and Third Party Payer Rejects - View/Process [PSO REJECTS VIEW/PROCESS] options have been modified in the following manner:

1. Display of non-DUR/RTS rejects

   - Non-DUR/RTS TRICARE and CHAMPVA rejections each will be segregated at the end of the displayed information. They will be denoted with a "TRICARE - Non-DUR/RTS" or "CHAMPVA - Non-DUR/RTS" header. This header remains regardless of whether the GI - Group by Insurance action is toggled on or off. The TRICARE and CHAMPVA sections sort in the same manner as the main sort for non-TRICARE/CHAMPVA prescriptions (by Rx, drug, patient).
<table>

<td>M/I Eligible</td>
</tr>
</tbody>
</table>

Select the entry # to view or ?? for more actions

The TRI - Show/Hide TRICARE and CVA - Show/Hide CHAMPVA toggle actions appear on the hidden menu on the Insurance Rejects screen. When the TRI action is toggled to Show, TRICARE Non-DUR/RTS rejects will automatically display at the end of the listing. Toggling the TRI action to Hide will remove them from the screen. The CVA action behaves likewise for CHAMPVA Non-DUR/RTS rejects.

Example with TRICARE and CHAMPVA rejects displayed:

<table>
<thead>
<tr>
<th># Rx#</th>
<th>PATIENT (ID)</th>
<th>DRUG</th>
<th>REASON</th>
</tr>
</thead>

2. Processing of TRICARE and CHAMPVA Rejections – TRICARE/CHAMPVA Eligible Bypass/Override Functions

- A bypass function is provided to allow continued processing of prescriptions for TRICARE and CHAMPVA eligible inpatients who’s Patient status = Inpatient at the time the prescription is issued.

In the following example a patient who has been admitted into a VA hospital (Patient status = Inpatient) is allowed to go on a weekend “pass” and issued outpatient medications such as OTC drugs or supplies for the weekend. The system displays the Non-Billable Reason “TRICARE INPATIENT/DISCHARGE” on the screen. The display of this Non-Billable Reason is due to the patient having Patient status = Inpatient, the patient is a TRICARE patient with TRICARE Insurance and an outpatient medication, OTC or Supply was issued.
The following is a sample of the View Prescription ECME Log update. The Non-Billable Reason “TRICARE INPATIENT/DISCHARGE” is now displayed on the View Prescription ECME Log. The TRICARE INPATIENT/DISCHARGE status allows the system to record why a TRICARE prescription was allowed to be bypassed.

Example: View Prescription ECME Log entry: TRICARE INPATIENT/DISCHARGE

```
Rx View (Active)  Oct 26, 2010@17:07:34  Page: 4 of 4
TRICARE,ONE  <NO ALLERGY ASSESSMENT>

=============================================================================
There are NO Labels printed.

ECME Log:
#   Date/Time           Rx Ref          Initiator Of Activity
==============================================================================
1  10/26/10@16:04:50   ORIGINAL       JOHN,DOE
Comments: TRICARE-Not ECME Billable: TRICARE INPATIENT/DISCHARGE
```

Enter ?? for more actions

Select Action: Quit/

In a similar situation where a prescription is issued to a CHAMPVA patient with Patient status = Inpatient, the Non-Billable Reason “CHAMPVA INPATIENT/DISCHARGE” would be displayed on the reject processing screen and in the View Prescription ECME Log.

**TRICARE/CHAMPVA Eligible Outpatient Override Function**

- An override function is provided to allow continued processing of prescriptions for TRICARE or CHAMPVA eligible outpatients when a rejected response is received from the TRICARE or CHAMPVA payer/PBM.
- The Reject Action prompt will default to “Quit”. If the Q (Quit) action is selected, the rejected claim will go to the TRICARE or CHAMPVA section, as appropriate, of the Pharmacy Third Party Payer Rejects – Worklist. If the D (Discontinue) action is selected, the next prompt “Nature of Order” will default to “Service Reject”. The I (Ignore) action is available if the user holds the “PSO TRICARE/CHAMPVA” security key and if selected, continued processing will occur.
- The Reject Action prompt will be updated to a default of “Quit”.

```

- The Non-Billable TRICARE prescriptions will appear on the Reject Information screen shown in the example below once the TRICARE Non-Billable claim has been selected from the Pharmacy Third Party Payer Rejects – Worklist. The screen will display:
  - **ECME#** field – will be blank
  - **Insurance Information** – will be blank
  - **Reject code section** will have the reject code eT and status will state “NO CLAIM SUBMITTED”
  - **Available Actions** will be DC – Discontinue Rx, VW - View Rx, MP – Medication Profile, FIL – Fill Rx and IGN Ignore Reject (FIL and IGN will require PSO TRICARE/CHAMPVA Security key)
  - **Available Hidden Actions** will be COM – Add Comments, ED – Edit Rx and all other standard List Manager hidden actions
  - If the action DC is chosen, the system will discontinue the prescription and the prompt “Nature of Order” will default to “SERVICE REJECT”
  - The following actions will **not** be selectable when processing a TRICARE or CHAMPVA eligible Non-Billable reject: Resubmit Claim (RES)/Change Suspense Date (CSD)/Submit Override Codes (OVR)/Submit Clarif Code (CLA)/Submit Prior Auth (PA)/Suspense Date Calculation (SDC)/Submit Mult Actions (SMA). If selected for a TRICARE reject, an error message will appear: “[action] not allowed for TRICARE Non-Billable claim”. If selected for a CHAMPVA reject, an error message will appear: “[action] not allowed for CHAMPVA Non-Billable claim”. The only actions available are to Discontinue, Fill the prescription, View prescription or Medication Profile.

Reject Information Screen – Electronic Signature and TRICARE/CHAMPVA Justification

This action requires the security key PSO TRICARE/CHAMPVA.

- A user must hold the “PSO TRICARE/CHAMPVA” security key to perform the Fill Rx (FIL) and Ignore Reject (IGN) actions on the Third Party Payer Rejects – Worklist and the “Ignore” action on the TRICARE or CHAMPVA Reject Notification screen. If the user holds the security key “PSO TRICARE/CHAMPVA”, the prompt will display: “You are bypassing claims processing. Do you wish to continue?” If the user enters (No=Default), the user will return to the reject notification screen. If the user selects Yes to continue, the system will mimic the current Ignore action/functionality and allow processing of the prescription. The user will be prompted to enter their electronic signature code and asked to enter data into the TRICARE Justification or CHAMPVA Justification field, which is required. The user will be allowed to “^” out of the process. If the user opts to “^” out of the process, they will be taken back to the Reject Information screen prompt.

In the following example a TRICARE patient with Outpatient status submits a prescription for processing and a rejected response is received from the TRICARE payer/PBM. The pharmacist initially sends the prescription to the Third Party Payer Rejects – Worklist then later decides to finish processing the prescription and chooses the FIL action.

Select Item(s): Next Screen/

- The person that resolves TRICARE and CHAMPVA non-DUR/RTS rejects is dependent upon the type of reject. Dispense As Written (DAW) reject code 22 can be resolved by the pharmacy staff by editing the prescription and entering the appropriate DAW code which results in a claims resubmission. Other insurance-related rejects (missing eligibility or cardholder ID number) are resolved by the Outpatient Pharmacy Electronic Claims Coordinator (OPECC). Once the rejection has been resolved, the Reject Information screen under the pharmacy reject worklist shows the status of the prescription as E PAYABLE. At this point the user may select the FIL action that will prompt for label print.
For rejects that remain in suspense, the user will be allowed to process the rejection as indicated above; however no labels will be printed until the prescription is pulled early or printed from suspense. Upon resolving the reject, the user will be notified of this information. CMOP prescriptions will function in the same manner.
Other Rejects

[PSO REJECTS WORKLIST]

Rejects under the OTHER REJECTS section of the screen contain non-clinical rejects and are resolved in the same manner as DUR/RTS rejects. The comments section denotes whether the reject was transferred automatically as is the case in the example below or “Transferred by OPECC” will denote those rejects where the OPECC manually transferred them to pharmacy for resolution.

The following example shows the user selecting to resolve sequence 16 from the Third Party Payer Rejects - Worklist option shown above. The user selects ED to edit the DAW code for the prescription, then resubmits the claim afterward. Since the claim was payable, both the RTS reject in sequence 13 and the DAW reject in sequence 16 were marked resolved. Also both are removed from the worklist after submission. The user then proceeds to Patient Prescription Processing option to view the ECME logs which show that claim resubmission was payable and that both rejects have been resolved.

[BPS RPT VIEW ECME RX]

The *View ePharmacy Rx* option allows you to view information for one prescription, combining information from Outpatient Pharmacy, Integrated Billing and ECME. More information on this report is available in the *Electronic Claims Management Engine (ECME) User Manual.*
(This page included for two-sided copying.)
MailMan Message for Open/Unresolved Rejects

When prescriptions remain on the Third Party Payer Reject – Worklist over the specified number of days, the system will send a Mailman Message. This message will be sent to the PSO REJECTS BACKGROUND MESSAGE mail group. Those users needing access to this information will need to be added manually to this mail group.

The specified number of days referred to above is the number of days an uncommented reject can remain on the reject worklist without being included in the nightly reject worklist alert mail message. The number of days are defined in the EPHARMACY SITE PARAMETERS file (#52.86) in the REJECT WORKLIST DAYS field.

The following are the criteria for generating a Mailman message regarding a rejected claim:

- Prescription is active
- Prescription is unreleased
- Claim is on the Reject Worklist for specified number of days or greater, and
- Claim has no comments added within date range.

Adding a comment to the reject will automatically reset the clock for the alert. The specified number of days will be site configurable and stored in EPHARMACY SITE PARAMETERS file (#52.86). The initial patch default setting will be five (5) days; however, the site will be able to reset the parameter between one (1) and thirty (30) to generate the alert message. MailMan message will be sent as a Priority message, and there will be a separate MailMan message for each division. The following is an example of the message:

```
Subj: ePharmacy - OPEN/UNRESOLVED REJECTS LIST for ALBANY ISC [#2680833]
07/25/08@11:52  53 lines
From: OUTPATIENT PHARMACY PACKAGE In 'IN' basket.  Page 1 *New*

The prescriptions listed below are third party electronically billable and can not be filled until the rejection is resolved. No action to resolve the rejection has taken place within the past 1 days.

Please use the THIRD PARTY PAYER REJECTS WORKLIST option to resolve the rejection or add a comment to the rejection.

Unresolved rejects will not be sent to CMOP or the local print queue for filling. They will continue to show on the rejects list until acted upon.

Alerts for Discontinued CMOP Prescription

Discontinued by a Background Process

When a CMOP prescription with a status of Transmitted or Retransmitted is discontinued by a background process to the Outpatient Pharmacy options, e.g. CPRS or Registration V. 5.3 packages, an email will be sent to the PSX EXTERNAL DISPENSE ALERTS mail group. If no recipients are defined in the new mail group, the message will be sent to PSXCMOPMGR key holders stating that a prescription was just discontinued and that the CMOP status for the discontinued prescription was either Transmitted or Retransmitted.

Chapter 4: Security Keys

A security key is a unique entry in the Security Key file (^DIC(19.1,) which may prevent access to a specific option or action by including the key as part of the option’s entry in the Option file (^DIC(19,). Only users entered in the Holder field of the Security Key file may access the option or action.

New or Modified Security Keys

PSO TRICARE/CHAMPVA
PSO*7*385 renamed the PSO TRICARE security key to PSO TRICARE/CHAMPVA. Please see TRICARE/CHAMPVA Eligible Outpatient Override Function for further information on this security key.

PSO TRICARE/CHAMPVA MGR
PSO*7*385 renamed the PSO TRICARE MGR security key to PSO TRICARE/CHAMPVA MGR. Please see TRICARE CHAMPVA Bypass/Override Report for further information on this security key.

## Glossary

The following table provides definitions for common acronyms and terms used in this manual.

<table>
<thead>
<tr>
<th>Acronym/Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Action Profile</td>
<td>A list of all active and recently canceled or expired prescriptions for a patient sorted by classification. This profile also includes a signature line for each prescription to allow the physician to cancel or renew it.</td>
</tr>
<tr>
<td>Activity Log</td>
<td>A log, by date, of changes made to or actions taken on a prescription. An entry is made in this log each time the prescription is edited, canceled, reinstated after being canceled, or renewed. An entry will be made into this log each time a label is reprinted. A CMOP activity log will contain information related to CMOP dispensing activities.</td>
</tr>
<tr>
<td>ADD</td>
<td>Automated Dispensing Device</td>
</tr>
<tr>
<td>Allergy/ADR Information</td>
<td>Includes non-verified and verified allergy and/or adverse reaction information as defined in the Adverse Reaction Tracking (ART) package. The allergy data is sorted by type (DRUG, OTHER, FOOD). If no data is found for a category, the heading for that category is not displayed.</td>
</tr>
<tr>
<td>AMIS</td>
<td>Automated Management Information System</td>
</tr>
<tr>
<td>Answer Sheet</td>
<td>An entry in the DUE ANSWER SHEET file. It contains the questions and answers of a DUE questionnaire. This term is also used to refer to the hard copy representation of a DUE ANSWER SHEET entry.</td>
</tr>
<tr>
<td>API</td>
<td>Application Programming Interfaces</td>
</tr>
<tr>
<td>APSP</td>
<td>Originally Indian Health Service Pharmacy's name space now owned by the Outpatient Pharmacy software.</td>
</tr>
<tr>
<td>Bypass</td>
<td>Take no action on a medication order.</td>
</tr>
<tr>
<td>CHAMPVA</td>
<td>CHAMPVA (Civilian Health and Medical Program of the Department of Veterans Affairs) is a cost-shared health benefits program established for the dependents and survivors of certain severely disabled and/or deceased veterans.</td>
</tr>
<tr>
<td>CMOP</td>
<td>Consolidated Mail Outpatient Pharmacy.</td>
</tr>
<tr>
<td>CPRS</td>
<td>Computerized Patient Record System. CPRS is an entry point in VistA that allows the user to enter all necessary orders for a patient in different packages (e.g., Outpatient Pharmacy, Inpatient Pharmacy, etc.) from a single entry point.</td>
</tr>
<tr>
<td>Critical</td>
<td>Interactions with severe consequences that require some type of action (finding facts, contacting prescribers) to prevent potential serious harm.</td>
</tr>
<tr>
<td>DATUP</td>
<td>Data Update (DATUP). Functionality that allows the Pharmacy Enterprise Customization System (PECS) to send out custom and standard commercial-off-the-shelf (COTS) vendor database changes to update the two centralized databases at Austin and Martinsburg.</td>
</tr>
<tr>
<td>Acronym/Term</td>
<td>Definition</td>
</tr>
<tr>
<td>--------------</td>
<td>------------</td>
</tr>
<tr>
<td>DEA</td>
<td>Drug Enforcement Agency</td>
</tr>
<tr>
<td>DEA Special Handling</td>
<td>The Drug Enforcement Agency special Handling code used for drugs to designate if they are over-the-counter, narcotics, bulk compounds, supply items, etc.</td>
</tr>
<tr>
<td>DHCP</td>
<td>See VistA.</td>
</tr>
<tr>
<td>DIF</td>
<td>Drug Information Framework</td>
</tr>
<tr>
<td>Dispense Drug</td>
<td>The Dispense Drug name has the strength attached to it (e.g., Acetaminophen 325 mg). The name alone without a strength attached is the Orderable Item name.</td>
</tr>
<tr>
<td>DNS</td>
<td>Domain Name Server</td>
</tr>
<tr>
<td>DoD</td>
<td>Department of Defense</td>
</tr>
<tr>
<td>Dosage Ordered</td>
<td>After the user has selected the drug during order entry, the dosage ordered prompt is displayed.</td>
</tr>
<tr>
<td>Drug/Drug Interaction</td>
<td>The pharmacological or clinical response to the administration of a drug combination different from that anticipated from the known effects of the two agents when given alone.</td>
</tr>
<tr>
<td>DUE</td>
<td>Drug Usage Evaluation</td>
</tr>
<tr>
<td>ETC</td>
<td>Enhanced Therapeutic Classification</td>
</tr>
<tr>
<td>Expiration/Stop</td>
<td>The date on which a prescription is no longer active. Typically, this date is 30 days after the issue date for narcotics, 365 days after the issue date for other medications and 365 days after the issue date for supplies.</td>
</tr>
<tr>
<td>FDB</td>
<td>First DataBank</td>
</tr>
<tr>
<td>Finish</td>
<td>Term used for completing orders from Order Entry/Results Reporting V. 3.0.</td>
</tr>
<tr>
<td>GUI</td>
<td>Acronym for Graphical User Interface.</td>
</tr>
<tr>
<td>HDR-Hx</td>
<td>Health Data Repository Historical</td>
</tr>
<tr>
<td>HDR-IMS</td>
<td>Health Data Repository- Interim Messaging Solution</td>
</tr>
<tr>
<td>Issue Date</td>
<td>The date on which the prescription was written. This date is usually, but not always, the same as the first fill date. This date cannot be later than the first fill date.</td>
</tr>
<tr>
<td>HFS</td>
<td>Host File Server.</td>
</tr>
<tr>
<td>Health Insurance Portability and Accountability Act of 1996 (HIPAA)</td>
<td>A Federal law that makes a number of changes that have the goal of allowing persons to qualify immediately for comparable health insurance coverage when they change their employment relationships. Title II, Subtitle F, of HIPAA gives HHS the authority to mandate the use of standards for the electronic exchange of health care data; to specify what medical and administrative code sets should be used within those standards; to require the use of national identification systems for health care patients, providers, payers (or plans), and employers (or sponsors); and to specify the</td>
</tr>
<tr>
<td>Acronym/Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------------</td>
<td>-------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td><strong>Acronym/Term</strong></td>
<td>types of measures required to protect the security and privacy of personally identifiable health care information. Also known as the Kennedy-Kassebaum Bill, the Kassebaum-Kennedy Bill, K2, or Public Law 104-191.</td>
</tr>
<tr>
<td><strong>JCAHO</strong></td>
<td>Acronym for Joint Commission on Accreditation of Healthcare Organizations</td>
</tr>
<tr>
<td><strong>Label/Profile Monitor</strong></td>
<td>A file for each printer which records, in the order in which they were printed, the last 1000 labels or profiles printed on that printer. This allows a rapid reprint of a series of labels or profiles that were damaged by a printer malfunction or other event.</td>
</tr>
<tr>
<td><strong>Local Possible Dosages</strong></td>
<td>Free text dosages that are associated with drugs that do not meet all of the criteria for Possible Dosages.</td>
</tr>
<tr>
<td><strong>Medication Instruction File</strong></td>
<td>The MEDICATION INSTRUCTION file is used by Unit Dose and Outpatient Pharmacy. It contains the medication instruction name, expansion and intended use.</td>
</tr>
<tr>
<td><strong>Medication Order</strong></td>
<td>A prescription.</td>
</tr>
<tr>
<td><strong>Medication Profile</strong></td>
<td>A list of all active or recently canceled or expired prescriptions for a patient sorted either by date, drug, or classification. Unlike the action profile, this profile is for information only and does not provide a signature line for a physician to indicate action to be taken on the prescription.</td>
</tr>
<tr>
<td><strong>Medication Routes File</strong></td>
<td>The MEDICATION ROUTES file contains medication route names. The user can enter an abbreviation for each route to be used at the local site. The abbreviation will most likely be the Latin abbreviation for the term.</td>
</tr>
<tr>
<td><strong>Med Route</strong></td>
<td>The method in which the prescription is to be administered (e.g., oral, injection).</td>
</tr>
<tr>
<td><strong>NCCC</strong></td>
<td>Acronym for National Clozapine Coordinating Center.</td>
</tr>
<tr>
<td><strong>Non-Formulary Drugs</strong></td>
<td>The medications, which are defined as commercially available drug products not included in the VA National Formulary.</td>
</tr>
<tr>
<td><strong>Non-VA Meds</strong></td>
<td>Term that encompasses any Over-the-Counter (OTC) medications, Herbal supplements, Veterans Health Administration (VHA) prescribed medications but purchased by the patient at an outside pharmacy, and medications prescribed by providers outside VHA. All Non-VA Meds must be documented in patients’ medical records.</td>
</tr>
<tr>
<td><strong>Order</strong></td>
<td>Request for medication.</td>
</tr>
<tr>
<td><strong>Orderable Item</strong></td>
<td>An Orderable Item name has no strength attached to it (e.g., Acetaminophen). The name with a strength attached to it is the Dispense drug name (e.g., Acetaminophen 325mg).</td>
</tr>
<tr>
<td><strong>Partial Prescription</strong></td>
<td>A prescription that has been filled for a quantity smaller than requested. A possible reason for a partial fill is that a patient is to return to the clinic in ten days but the prescription calls for a thirty-day supply. Partials do count as workload but do not count against the total number of refills for a prescription.</td>
</tr>
<tr>
<td>Acronym/Term</td>
<td>Definition</td>
</tr>
<tr>
<td>-------------</td>
<td>------------</td>
</tr>
<tr>
<td>Payer</td>
<td>In health care, an entity that assumes the risk of paying for medical treatments. This can be an uninsured patient, a self-insured employer, or a health care plan or Health Maintenance Organization (HMO).</td>
</tr>
<tr>
<td>Pending Order</td>
<td>A pending order is one that has been entered by a provider through CPRS without Pharmacy finishing the order. Once Pharmacy has finished the order, it will become active.</td>
</tr>
<tr>
<td>Pharmacy Narrative</td>
<td>OUTPATIENT NARRATIVE field that may be used by pharmacy staff to display information specific to the patient.</td>
</tr>
<tr>
<td>Polypharmacy</td>
<td>The administration of many drugs together.</td>
</tr>
<tr>
<td>POE</td>
<td>Acronym for Pharmacy Ordering Enhancements (POE) project. Patch PSO<em>7</em>46 contains all the related changes for Outpatient Pharmacy.</td>
</tr>
<tr>
<td>Possible Dosages</td>
<td>Dosages that have a numeric dosage and numeric dispense units per dose appropriate for administration. For a drug to have possible dosages, it must be a single ingredient product that is matched to the DRUG file. The DRUG file entry must have a numeric strength and the dosage form/unit combination must be such that a numeric strength combined with the unit can be an appropriate dosage selection.</td>
</tr>
<tr>
<td>Prescription</td>
<td>This term is now referred to throughout the software as medication orders.</td>
</tr>
</tbody>
</table>
| Prescription Status | A prescription can have one of the following statuses.  
  **Active** - A prescription with this status can be filled or refilled.  
  **Canceled** - This term is now referred to throughout the software as Discontinued. (See Discontinued.)  
  **Discontinued** - This status is used when a prescription was made inactive either by a new prescription or by the request of a physician.  
  **Discontinued (Edit)** - Discontinued (Edit) is the status used when a medication order has been edited and causes a new order to be created due to the editing of certain data elements.  
  **Deleted** - This status is used when a prescription is deleted. Prescriptions are no longer physically deleted from the system, but marked as deleted. Once a prescription is marked deleted no access is allowed other than view.  
  **Expired** - This status indicates the expiration date has passed.  
  *Note: A prescription that was canceled or has expired more recently than the date specified by the cutoff date, typically 120 days in the past, can still be acted upon.  
  **Hold** - A prescription that was placed on hold due to reasons determined by the pharmacist.  
  **Non-verified** - There are two types of non-verified statuses. Depending on a site parameter, prescriptions entered by a technician do not become active until a pharmacist reviews them. Until such review, they remain non-verified and cannot be printed, canceled or edited except through the Verification menu.  
  The second non-verified status is given to prescriptions when a drug/drug interaction is encountered during the new order entry or editing of a prescription. |
<table>
<thead>
<tr>
<th>Acronym/Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pending</strong></td>
<td>A prescription that has been entered through OERR.</td>
</tr>
<tr>
<td><strong>Refill</strong></td>
<td>A second or subsequent filling authorized by the provider.</td>
</tr>
<tr>
<td><strong>Suspended</strong></td>
<td>A prescription that will be filled at some future date.</td>
</tr>
<tr>
<td><strong>Progress Notes</strong></td>
<td>A component of Text Integration Utilities (TIU) that can function as part of CPRS.</td>
</tr>
<tr>
<td><strong>Provider</strong></td>
<td>The person who authorized an order. Only users identified as providers who are authorized to write medication orders may be selected.</td>
</tr>
<tr>
<td><strong>Reprinted Label</strong></td>
<td>Unlike a partial prescription, a reprint does not count as workload.</td>
</tr>
<tr>
<td><strong>Questionnaire</strong></td>
<td>An entry in the DUE QUESTIONNAIRE file. This file entry contains the set of questions related to a DUE as well as the drugs being evaluated.</td>
</tr>
<tr>
<td><strong>Schedule</strong></td>
<td>The frequency by which the doses are to be administered, such as Q8H, BID, NOW, etc.</td>
</tr>
<tr>
<td><strong>Sig</strong></td>
<td>The instructions printed on the label.</td>
</tr>
<tr>
<td><strong>Significant</strong></td>
<td>The potential for harm is either rare or generally known so that it is reasonable to expect that all prescribers have taken this information into account.</td>
</tr>
<tr>
<td><strong>Speed Actions</strong></td>
<td>See Actions.</td>
</tr>
<tr>
<td><strong>Suspense</strong></td>
<td>A prescription may not be able to be filled on the day it was requested. When the prescription is entered, a label is not printed. Rather, the prescription is put in the RX SUSPENSE file to be printed at a later date.</td>
</tr>
<tr>
<td><strong>Third (3 rd) Party Claims</strong></td>
<td>Health care insurance claims submitted to an entity for reimbursement of health care bills.</td>
</tr>
<tr>
<td><strong>Time In</strong></td>
<td>This is the time that the patient's name was entered in the computer.</td>
</tr>
<tr>
<td><strong>Time Out</strong></td>
<td>This is the time that the patient's name was entered on the bingo board monitor.</td>
</tr>
<tr>
<td><strong>TIU</strong></td>
<td>Text Integration Utilities; a package for document handling, that includes Consults, Discharge summary, and Progress Notes, and will later add other document types such as surgical pathology reports. TIU components can be accessed for individual patients through the CPRS, or for multiple patients through the TIU interface.</td>
</tr>
<tr>
<td><strong>TRICARE</strong></td>
<td>TRICARE is the uniformed service health care program for:</td>
</tr>
<tr>
<td></td>
<td>• active duty service members and their families</td>
</tr>
<tr>
<td></td>
<td>• retired service members and their families</td>
</tr>
<tr>
<td></td>
<td>• members of the National Guard and Reserves and their families</td>
</tr>
<tr>
<td></td>
<td>• survivors, and</td>
</tr>
<tr>
<td></td>
<td>• others who are eligible</td>
</tr>
<tr>
<td></td>
<td>There are differences in how prescriptions for TRICARE beneficiaries are processed versus how prescriptions are processed for veterans.</td>
</tr>
<tr>
<td>Acronym/Term</td>
<td>Definition</td>
</tr>
<tr>
<td>--------------------</td>
<td>------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td>Units per Dose</td>
<td>The number of Units (tablets, capsules, etc.) to be dispensed as a Dose for an order. Fractional numbers will be accepted for medications that can be split.</td>
</tr>
<tr>
<td>VistA</td>
<td>Acronym for Veterans Health Information Systems and Technology Architecture, the new name for Decentralized Hospital Computer Program (DHCP).</td>
</tr>
<tr>
<td>Wait Time</td>
<td>This is the amount of time it took to fill the prescription. It is the difference between Time In and Time Out. For orders with more than one prescription, the wait time is the same for each.</td>
</tr>
