New Hidden Action	3
Action Profile (132 Column Printout) Update.....	4
Remote Prescriptions Text on Report.....	5

(This page included for two-sided copying.)

Introduction

PSO*7*320 provides the ability to view a patient's remote prescription data within Outpatient Pharmacy V. 7.0 using the Remote Data Interoperability (RDI) interface to retrieve data from the Health Data Repository (HDR).

Several areas of Outpatient Pharmacy were updated to accommodate for the enhancement. These areas include *Patient Prescription Processing* [PSO LM BACKDOOR ORDERS], *Complete Orders from OERR* [PSO LMOE FINISH], *Action Profile (132 COLUMN PRINTOUT)* [PSO ACTION PROFILE], *Pull Early from Suspense* [PSO PNDRX], and *Print from Suspense File* [PSO PNDLBL].

Additionally, three new protocols and two new list templates were added. The following are the three new protocols: PSO RDI VISITS MENU, PSO RDI BOTH, and PSO RDI REMOTE. The new list templates are PSO RDI VISITS and PSO RDI VISITS DETAIL.

The following information provides descriptions of the enhancement details within each option.

New “Display Remote Data” Prompt

The user can access the patient’s remote prescription data from two areas: *Patient Prescription Processing* and *Complete Orders from OERR*. After entering from one of the two areas, the same prompt is presented to the user in order to proceed to the remote data. Additionally, a hidden action to display those remote prescriptions has been added to each area.

Patient Prescription Processing

If RDI is active and a patient has prescriptions at another location, when the user selects the patient to enter a new order from *Patient Prescription Processing*, the new “Display Remote Data?” prompt appears.

Complete Orders from OERR

From *Complete Orders from OERR*, when the user answers **YES** to the “Do you want to see Medication Profile?” prompt, if RDI is active and a patient has prescriptions at another location, the user is prompted with the new “Display Remote Data?” prompt.

New “Display Remote Data” Prompt

```
REMOTE PRESCRIPTIONS AVAILABLE!  
Display Remote Data? N//
```

If the user responds **NO**, then the normal procedure occurs for each area. If the user responds **YES**, the “Remote Facilities Visited” screen appears such as the following example.

Example: Patient’s Remote Facilities Visited

```
Remote Facilities Visited      Dec 30, 2008@17:26:47      Page: 1 of 1  
Patient: PSOPATIENT,ONE      (000-00-0000)      DOB: 01/02/1967  
  
Station  
HDR CHEYENNE  
  
Enter ?? for more actions  
DR  Display Remote Pharmacy Data      DB  Display Both Pharmacy Data  
Action:Quit//DR
```

To display the prescriptions at the remote pharmacy location, enter **DR** (for Display Remote Pharmacy Data) at the “Action” prompt. The “Medication Profile – Remote” screen appears such as the following example.

Example: Patient's Remote Medication Profile

```
