I. Introduction

Patch SD*5.3*297 consists of new functionality and enhancements to a number of features in PCMM. It also addresses a significant number of NOIS or Remedy tickets, and puts mechanisms in place to enforce business rules in PCMM by inactivating patient/provider PCMM assignments determined to be invalid based on established business rules. This includes adherence to rules related to Person Class. These enhancements include associated changes to the graphical user interface (GUI).

II. Description of Functionality

Three specific modifications, identified as critical, will be implemented in Patch SD*5.3*297, along with a significant number of feature enhancements, associated reports, and options.

The first modification will inactivate patients who have not seen their Primary Care provider(s) for specified lengths of time, from their Primary Care team and position/provider panels in PCMM. PCMM patients are assigned scheduled inactivation dates if their Primary Care team assignment has been established for 11 months and they have not been seen in those last 11 months by a provider assigned to the Primary Care Provider (PCP) or Associate Primary Care Provider (AP) positions assigned to the patient on their primary care team. After 30 days, these patients will be inactivated from their Team Position assignment if they still have not been seen. Similarly, PCMM patients that have been assigned to a Primary Care team for 12 months or longer and have not been seen within the last 23 months by a provider (assigned to the PCP or AP positions assigned to the patient on that team) will also be given scheduled inactivation dates. After 30 days, these patients will be inactivated from their Team & Position assignment if they still have not been seen. PCMM patients that have been identified for inactivation may have one 60-day extension on an individual basis. Reports will be available based on these new modifications. The inactivation timeframes may change if there have been changes to the provider assignment to the position during this period.

The second modification will provide for screening of staff that has been selected as a Primary Care Provider (PCP) or Associate Primary Care Provider (AP) to assure that only Physicians, Nurse Practitioners, Physician Assistants, and Residents/Interns (physicians) are designated as PCPs and APs in PCMM. Additionally, any current staff inappropriately identified in PCMM as a PCP or AP will be flagged and inactivated six months after installation of this patch. Reports and bulletins will communicate the flagging of these staff for potential inactivation. A separate report lists those staff members who were inactivated. Staff to be inactivated will receive a MailMan notification message regardless of settings on the message tab of the Primary Care Team Position Setup tab in the PCMM GUI.
The third enhancement will restrict the type of provider who may be selected as the PCP. Although the business rule states that only a Physician, a Nurse Practitioner, or Physician’s Assistant may be designated as a PCP, users have selected other provider types as PCP. It has become necessary to put limitations on who may be designated as PCPs. Restricting the provider type will improve data integrity and validity.

Other enhancements introduced by this patch include:

Functionality to schedule Providers, with a Person Class that is inconsistent with their PCMM Team position role, for inactivation 6 months after installation of SD*5.3*297. VistA text-based reports detail the automatic inactivation of patients and providers.

Mechanisms to assure that FTEE (Full Time Employee Equivalent) and Maximum Panel sizes are entered for each PCP and AP/PCP. FTEE and maximum Panel Size entries for APs and PCPs shall be required.

A new report called the “Direct PC FTEE and Panel Size Report” [SC PCMM DIRECT PC FTEE].

A mechanism to assure a total FTEE for each PC Provider does not exceed one (1.0) for both AP/PCPs and PCPs of Record. The FTEE cannot be greater than one for one institution or for all institutions with the first three digits of the institution number.

HL7 / Messaging enhancements:

- Enhancements introduced in order to meet new PCMM HL7 messaging requirements for the PCMM messages sent to the Austin Automation Center.
- Correct problem with date field.
- Prevent transmission of inactive provider data.
- Correct 608M error messages. A post installation routine will review existing PCMM 608M errors (Invalid Area of Specialization) and mark them for retransmission to the Austin Automation Center (AAC). These records will be corrected for erroneously sending inactive providers' information on the Provider Workload transmission prior to this patch.
- Add new fields to HL7 message for date a patient is flagged for inactivation, the date an extended inactivation is entered, the new date of inactivation for patients with an extended period before inactivation, and the actual date a patient is inactivated.
- Include a reason for the patient’s inactivation: inactive patient, death of patient, patient requested inactivation, or staff inactivated.
- Send date a provider is flagged for inactivation and date provider is inactivated by this patch, SD*5.3*297.
- Transmit AP/PCPs FTEE and “Maximum Allowed Panel size.”
- Transmit each patient’s Race and Ethnicity data to the Austin Automation Center (AAC) using the new Race/Ethnicity API to the Patient file and current PCMM Patient HL7 message. (DG*5.3*415, SD*5.3*254)
Entry and display of non-Primary Care teams and providers in VistA options is now available. Also, prevent removal of non-Primary Care wait list entries when a Primary Care team or provider is assigned to a patient on the wait list.

Addressing a significant number of NOIS and Remedy tickets

In addition, the ability to associate multiple Team Position Associated Clinics is included. The field has been changed to a multiple, and the post-init routine will populate this multiple with the current entry.

1. GUI Changes

Assign Positions to a Team

Settings Tab

![Primary Care Team Position Setup]

Primary Care Team Position PCP

The position assignment of PCP is limited to Physicians, Nurse Practitioners (NP), and Physician’s Assistants (PA) only.

Additional instructions are displayed to assist in correctly setting the PCP, ACP, and Preceptor check boxes. The displayed instructions are based on the Role of the team position.
Primary Care Team Position PCP Associate

Only a Resident/Intern, NP, or PA shall be designated as an “Associate Provider” providing primary care.

Primary Care Team Position Preceptor

Only an attending Physician (MD or DO), NP or PA can be designated a Preceptor to Associate Primary Care Providers.

Patients for Position (text box)

**Allowed** - The number of patients that should be assigned to this position. Users are not prevented from exceeding this number. **NOTE:** It is required that you enter a value in the “Patients for Position” field “Allowed” before you can save Resident/Intern, NP or PA as Primary Care Provider.

**Actual** - This is the number of patients that are currently assigned to this position. **NOTE:** If a provider other than an Attending, Resident/Intern, PA or NP is selected, then both boxes A and B as well as “Allowed” under “Patients for Position” will not be selectable.

User Class (lookup box)

This is the user class that must be used when selecting an individual to fill this position. **NOTE:** This field may be disabled at some sites.
Staff FTEE and Panel Size Entry Required for PCP/AP

New software enhancements assure that FTE (Full Time Equivalent) and Maximum Panel sizes are entered for each PCP and AP/PCP.

New software enhancements also assure a total FTE for each PC Provider does not exceed one (1.0) for both AP/PCPs and PCPs of Record. The FTE cannot be greater than one for one institution or for all institutions with the first three digits of the institution number.

STAFF/FTEE Window

![Staff Assignment Add/Edit Window]

- **Name:** PCPS/PROVIDER, TEN
- **Effective Date:** 1/1/2005
- **Status:** ACTIVE
- **Status Reason:** EMPLOYEE ASSISTED
- **Direct Primary Care FTEE:** 2

![Warning Message]

The total FTE for this provider is 2. The cumulative FTE cannot be greater than 1.0. By running the "FTEE" report sorted on provider only, one can view all FTEE entries for a provider.

![Close, Save, Cancel, Help Buttons]
Associated Clinic TAB

The application provides for entering and saving multiple Associated Clinics for Primary Care Providers and for Associate Primary Care Providers. If there is an existing clinic you wish to associate with this position, it should be entered here. The Associated Clinics will print on all PCMM reports with an associated clinic column or field.

Messages Tab Settings
Notifications

The released PCMM patch and software will automatically select/check the “DO NOT SEND” option of the “Automatic Inactivations Notifications” line on the “Messages” tab for all active positions in PCMM at the time patch SD*5.3*297 is installed. [Most providers do not want to receive these notifications per expert user feedback.]

Selecting “TEAM,” “POSITION,” or “PRECEPTOR” on the “Automatic Inactivations Notifications” row of the “Messages” tab shall result in only designated staff receiving patient inactivation messages for only their patients and staff/provider inactivation messages for only their staff.

PCMM patch SD*5.3*297 does not overwrite or change users’ notification selections previously saved prior to the installation of this patch.

STAFF Assignment Display

Display Features: History and FTEE

When the user selects the “Staff/FTEE” icon on the “Primary Care Team Position Set Up” window in PCMM GUI after selecting a position, the system displays the currently active provider’s name highlighted in blue, the Effective date, Status Reason, and FTEE if there is one, as well as the history of assignments/unassignments.

Each time the FTEE is entered or edited, the value and the date of the entry or editing is now saved by the PCMM software, creating and maintaining a history of the FTEE for each provider.
Assignments - Staff, Positions, patients, and Team assignments now have a default date of the current date.

Inactivations - Staff, Positions, patients, and Team inactivations shall have a default date of T-1 (today minus one day.)

2. Inactivation Messages

Inactivation messages are addressed to the PCMM PATIENT/PROVIDER INACTIVATION mail group. PCMM Coordinators and others who will be monitoring inactivations should have membership in this group. Examples of the five new Bulletins are provided on the following pages:

Patients Scheduled for Inactivation from Primary Care Panel:

Subj: Patients Scheduled for Inactivation from Primary Care Panels  [#5404]
12/20/05@09:43  33 lines
From: POSTMASTER  In 'IN' basket.  Page 1

Patients scheduled for inactivation from their Primary Care team and Primary Care Provider assignments appear below. Inactivation will occur on the Scheduled Date for Inactivation date unless the patient has a completed appointment encounter with their current Primary Care Provider (PCP) or their Associate Primary Care Provider (AP) before that date. The patient may be reactivated to their previous PCP and PC team if they return for care.

VHA DIRECTIVE 2003-063, ACTIVE PATIENTS IN PCMM, establishes the rules for PCMM automated inactivation of patients. The following is from that Directive.

Inactivation of primary care patients from a PCMM panel occurs under the following circumstances:
(2) (a) The patient expires and
(b) Newly assigned patients (either newly-enrolled patients or patients who have been re-assigned to a different provider) who have not been seen by their PCP or Associate Provider (AP) and 12 months have passed since the time of assignment to that provider. This provides every PCP a 1-year grace period for seeing patients added to their panel (either newly-enrolled patients or patients transferred from a different panel) before they are inactivated. Patients must be seen by their PCP or AP within 12 months of being assigned, or they need to be inactivated from the PCP's panel.
(c) Established patients that have been assigned to the PCP's panel for more than 12 months, but have not been seen by their PCP or AP in the past 24 months need to be inactivated.
(3) Patients appropriate for removal are to be identified and inactivated on a regular basis.

With PCMM patch SD*5.3*297 installed, inactivations occur on the fifteenth and the last day of the month.

Patients with Extended PCMM Inactivation Dates:

Subj: Patients With Extended PCMM Inactivation Dates [#5405] 12/20/05@09:43 39 lines
From: POSTMASTER In 'IN' basket. Page 1

By using the Extend Patients Inactivation Date option, these patients' PCMM inactivation dates are now 60 days from their original inactivation date. Inactivation will occur on the Date Scheduled for Inactivation unless the patient has a completed appointment encounter with their current Primary Care Provider (PCP) or their Associate Primary Care Provider (AP) before that date. VHA DIRECTIVE 2003-063, ACTIVE PATIENTS IN PCMM, establishes the rules for PCMM automated inactivation of patients. The following is from that Directive.

Inactivation of primary care patients from a PCMM panel occurs under the following circumstances:
(2) (a) The patient expires and
(b) Newly assigned patients (either newly-enrolled patients or patients who have been re-assigned to a different provider) who have not been seen by their PCP or Associate Provider (AP) and 12 months have passed since the time of assignment to that provider. This provides every PCP a 1-year grace period for seeing patients added to their panel (either newly-enrolled patients or patients transferred from a different panel) before they are inactivated. Patients must be seen by their PCP or AP within 12 months of being assigned, or they need to be inactivated from the PCP's panel.
(c) Established patients that have been assigned to the PCP's panel for more than 12 months, but have not been seen by their PCP or AP in the past 24 months need to be inactivated.
(3) Patients appropriate for removal are to be identified and inactivated on a regular basis.

With PCMM patch SD*5.3*297 installed, inactivations occur on the fifteenth and the last day of the month.

Primary Care Providers Scheduled for Inactivation:

Note: In the following example, patch SD*5.3*297 was installed on July 12, 2006. When you run the report, the date your site installed patch SD*5.3*297 will be displayed.

Subj: Primary Care Providers Scheduled for Inactivation  [##408] 12/20/05@09:44  64 lines
From: POSTMASTER  In 'IN' basket.  Page 1

WARNING- The following primary care staff will be automatically inactivated in PCMM software if a correct 'Person Class' and 'Provider Type' are not entered in the New Person File (#200) or their role and position in the 'Position Setup' window is not corrected to correspond with their 'Provider Type', 'Person Class' and the Primary Care business rules stated below:

1. Staff designated as Primary Care Providers (PCPs) in PCMM that are not an Attending physician (Attending MD or Attending DO), NP or PA, shall be inactivated from PCMM
2. Staff designated as Associate Providers (APs) in PCMM, that are not a Resident/Intern (Physician), NP or PA shall be inactivated in PCMM
3. All persons designated as an Associate Provider or Primary Care Provider, who do not have the correct 'Provider Type' and 'Person Class' entered in the New Person file (#200) in VistA, shall be inactivated from their Primary Care positions in PCMM six months after installation of patch SD*5.3*297 Date: JUL 12, 2006.
4. Please contact your PCMM Coordinator or Information Systems to correct these problems

3. Managing Inactivations

Inactivations are automatic, and are processed by the tasked job [SCMC PCMM NIGHTLY TASK] PCMM NIGHTLY TASK. Although the task runs each night, inactivations occur on the 15th and the last day of the month.

On demand reports for listing patient inactivations are available from the PATIENT REPORTS AND OPTIONS menu.

On demand reports for listing provider inactivations are available from the PROVIDER / POSITION REPORTS AND OPTIONS menu.

A patient’s inactivation may be extended once, for 60 days from the original inactivation date. If the patient does not complete an appointment encounter with their current Primary Care Provider (PCP) within the extension date, the inactivation occurs on the extended inactivation date. Extension of the patient inactivation date is available from the PATIENT REPORTS AND OPTIONS menu in VistA and from the PATIENT tab in the PCMM GUI.

4. PCMM Main Menu Option

A number of new reports and options have been included in this patch. In addition, PCMM menus will be consolidated as a result of patch installation. A listing of menus and associated options are provided below:

PCMM Main Menu Option

5. Team/Position Assignment/Re-Assignment Option

This VistA option determines a patient's Primary Care status. Based on status, it will prompt the user to select from the following choices:

- Assign patient to Primary Care (PC) or non-primary care team (if not currently assigned).
- Assign patient to PC or non-primary care Practitioner position (if assigned to a team, but not PC practitioner). User can perform a look-up by either position name or the current practitioner assigned to the position.
- Un-assign from team (if assigned to a PC or non-PC team). If patient is assigned to PC position, both the PC position and PC team will be unassigned.
- Un-assign from position
- While assigning/unassigning from a position: If the position has an Associated Clinic, the user will be prompted to enroll/discharge the patient from that Associated Clinic.

Limitations:
- Does not provide edit or delete functionality.
- Does not allow for re-assignment for patients with future PC assignments
- Requires that position has a practitioner currently assigned to it
- To overcome the above limitations, the PCMM GUI must be used.

6. Patient Reactivation of an Automatically Inactivated Patient

The Select Team Assignment Screen can be used to reactivate a patient who was automatically inactivated by the system.

- This functionality is accessed by clicking the Reactivate button
- The Reactivate button will be enabled if the patient had an automatic inactivation by the system.
- After clicking the Reactivate button a message box will appear showing the previously deactivated team and position and will confirm that you would like to reactivate the patient to the previous team and position
- Click Yes to confirm and reactivate the patient, which reactivates the original team and position assignment, keeping the original assigned date and removing the discharged date to reactivate the old assignment
III. Installation and Implementation

Specific information pertaining to the installation of this patch can be found in the patch description and section referred to as ‘INSTALLATION INSTRUCTIONS’ in patch SD*5.3*297.

IV. Technical Information

</tr>
<tr>
<td>PERSON CLASS FILE</td>
<td>Consists of provider taxonomy developed by Health Care Finance Administration (HCFA). The taxonomy codifies provider type and provider area of specialization for all medical related providers.</td>
</tr>
<tr>
<td>PHYSICIAN ASSISTANT</td>
<td>Performs patient care duties in accordance with Scope of Practice under the supervision of a designated physician or physicians and Medical Center Policy. Duties include, but are not limited to, diagnostic and therapeutic medical care and services, taking case histories, conducting physical examinations, and ordering lab and other studies. Physician Assistants also may carry out special procedures, such as giving injections or other medication, apply, or change dressings, or suturing minor lacerations. The ability to act as a Primary Care Practitioner is decided by individual facilities.</td>
</tr>
<tr>
<td>PHYSICIAN-PRIMARY CARE</td>
<td>As a physician, incumbent's duties are to advise on, administer, supervise, or perform professional and scientific work in one or more fields of medicine. The degree of Doctor of Medicine or Doctor of Osteopathy is a fundamental requirement, along with a current license to practice medicine and surgery in a US State, territory or the District of Columbia. As a Primary Care practitioner, the incumbent provides the first point of assistance for a patient seeking care. Primary Care duties include: (1) Intake and initial needs assessment, (2) Health promotion and disease prevention, (3) Management of acute and chronic biopsychosocial conditions, (4) Access to other components of health care, (5) Continuity, and (6) Patient and non-professional care giver education &amp; training. (from IL 10-93-031, Under Secretary for Health's Letter) Can act as Primary Care Practitioner.</td>
</tr>
<tr>
<td>PHYSICIAN-PSYCHIATRIST</td>
<td>As a physician, incumbent's duties are to advise on, administer, supervise, or perform professional and scientific work in one or more fields of medicine. The degree of Doctor of Medicine or Doctor of Osteopathy is a fundamental requirement, along with a current license to practice medicine and surgery in a US State, territory or the District of Columbia. The incumbent is also granted clinical privileges (by the appropriate governing Credentials committee) in regard to the practice of Psychiatry.</td>
</tr>
<tr>
<td>POSITION</td>
<td>Teams are comprised of one or more staff positions. Individual practitioners are assigned to a team position. A position is designated to serve certain roles in the overall primary care setting.</td>
