1 Introduction

Department of Veterans Affairs (VA) Veterans Health Information Systems and Technology Architecture (VistA) Scheduling Graphical User Interface (VS GUI) module is the Windows GUI version of the Patient Information Management System (PIMS) Scheduling module. It provides appointment management functions included in PIMS Scheduling, but with the added convenience and usability of a GUI.

1.1 Purpose

The Veterans Health Administration (VHA) Office of Veterans Access to Care (OVAC) requested an enterprise enhancement for the VS package that supports COVID-19 response. The enhancement reduces operating costs for VHA and improves operational efficiencies, resulting in patient-centered access to care, coordinated care, increased customer satisfaction, and the reduction of excessive cycle/wait time for scheduling patients.

1.2 Overview

VS GUI is a software module that allows schedulers to make appointments quickly by viewing multiple appointment request types and multiple clinics in one screen. A scheduler can easily view patient requests for service, find the next available open appointment, view the provider’s availability in multiple clinics, and track a patient’s appointment process. Refer to System Summary for a more detailed description of VS GUI functionality.

1.3 Disclaimers

1.3.1 Software Disclaimers

This software was developed at the Department of Veterans Affairs (VA) by employees of the Federal Government in the course of their official duties. Pursuant to title 17 Section 105 of the United States Code this software is not subject to copyright protection and is in the public domain. VA assumes no responsibility whatsoever for its use by other parties, and makes no guarantees, expressed or implied, about its quality, reliability, or any other characteristic. We would appreciate acknowledgement if the software is used. This software can be redistributed and/or modified freely if any derivative works bear some notice that they are derived from it, and any modified versions bear some notice that they have been modified.

1.3.2 Documentation Disclaimers

The appearance of external hyperlink references in this manual does not constitute endorsement by the Department of Veterans Affairs (VA) of this Web site or the information, products, or services contained therein. The VA does not exercise any editorial control over the information you may find at these locations. Such links are provided and are consistent with the stated purpose of the VA.

2 System Summary

The VSE project delivers a series of enhancements to legacy VistA Scheduling Version 5.3 via the VS GUI application.

This update is for the nationally released version 1.7.7.4, which includes VS GUI 1.7.7.4 and Emergency VistA patch SD*5.3*785. At time of publishing, install period is projected for July 2021.

VS GUI Release 1.7.7.4 update includes enhancements to the Request Management (RM) Grid to improve overall performance, an update to the patient search function, an update to patient letters to remove title from the salutation and 508 issue fixes.

Accompanying patch SD*5.3*785 enhances two options available in the Scheduling Supervisor menu:

» Pending Return to Clinic (RTC) cleanup - by Date

» Pending Return to Clinic (RTC) cleanup – FULL

These options now include prompts for the user before running, as well as a report of changes made.

3 Key Feature Update in Version 1.7.7.4

3.1 New Patient Search

Patient search is now a pop-up window. Click on the Search Patients link to open patient search.
Enter search criteria—results will display in real time in the results pane.

Figure 2: Patient Search Pop-up Window

Select a patient from the list to pull up that patient record.

Figure 3: Selected Patient Records

3.2 Modified Patient Letter

Patient letters now address the patient by name only, rather than by title (Mr./Ms.) and name.
3.3 Pending Return to Clinic (RTC) Order Cleanup

The Pending RTC Order Cleanup options address a scenario where RTC orders with scheduled appointments are stuck in “Pending” status in CPRS. The option is for emergency use to address a data issue resulting from improper use of FileMan to disposition RTC requests and is available only to users with the SDSUP key.

To run the Pending RTC Cleanup option, navigate to the Scheduling Supervisor menu.
3.3.1 Pending RTC cleanup – by Date

To run the cleanup by date, select Pending RTC cleanup – by Date.

You will be prompted to enter a start date, as shown below.

```
Selection will be made based off of the create date of the Request
SDEC APPOINTMENT REQUEST CREATE DATE to start selection: 5/4/2021//
```

Input a start date and press Enter.

```
SDEC APPOINTMENT REQUEST CREATE DATE to start selection: 5/4/2021// 4/1/2021 (APR 01, 2021)
```
Input an end date and press Enter.

**SDEC APPOINTMENT REQUEST CREATE DATE to end selection: 6/3/2021// (JUN 03, 2021)**

You will be prompted to confirm that you want to run the cleanup. Enter Y or N.

**Are you sure you would like to run the SDEC PENDING RTC clean-up? Y (Yes)**

**DEVICE: HOME// HOME (CRT) Right Margin: 80/**

Starting search and clean-up....

When complete, the option will print results to the screen, including specific orders updated, their original status, and any orders skipped and why.

Orders updated via the Clean-up Tool:

Request IEN = 248291 Patient = HOGUE Clinic = LORI AUDIO
Order IEN10790223
Original Order Status = PENDING
Order Status After Cleanup = COMPLETE
Request Disposition = REMOVED/SCHEDULED-ASSIGNED
Disposition Date = May 14, 2021
Dispositioned By = BARBER

Request IEN = 248293 Patient = HOGUE Clinic = LORI 20 MINUTE
Order IEN10790242
Original Order Status = PENDING
Order Status After Cleanup = COMPLETE
Request Disposition = REMOVED/SCHEDULED-ASSIGNED
Disposition Date = May 14, 2021
Dispositioned By = BARBER

Request IEN = 248294 Patient = BARBER,TEST Clinic = LORI AUDIO
Order IEN10790269
Original Order Status = PENDING
Order Status After Cleanup = COMPLETE
Request Disposition = REMOVED/SCHEDULED-ASSIGNED
Disposition Date = May 14, 2021
Dispositioned By = BARBER

Request IEN = 248295 Patient = BARBER Clinic = LORI TEST 20
Order IEN10790269
Original Order Status = PENDING
Order Status After Cleanup = COMPLETE
Request Disposition = REMOVED/SCHEDULED-ASSIGNED
Disposition Date = May 13, 2021
Dispositioned By = BUTLER

Request IEN = 248388 Patient = HOGUE Clinic = LORI ENCOUNTER CLINIC
Order IEN10790638
Original Order Status = PENDING
Order Status After Cleanup = COMPLETE
Request Disposition = REMOVED/SCHEDULED-ASSIGNED
Disposition Date = May 14, 2021
Dispositioned By = BARBER

*********************************************************************************************

The following SDEC APPOINTMENT REQUEST IENs were skipped:

Request IEN 248296:
Disposition By field is Missing
Disposition Date field is Missing
Request IEN 248353:
Disposition By field is Missing
Disposition Date field is Missing

Search and clean-up is complete!!!!
5 Orders were updated!

Orders that are updated will be saved for 7 days in the "XTMP"OR PENDING RTC CLEAN-UP-May 14, 2021",21076 global.

Figure 6: Pending RTC Clean-up by Date Results
