1. Introduction

The Clinical Capacity Search Tool (CCST) is a new web tool utilizing the JavaScript React framework and provides users with a single user interface for scheduling staff to identify, in real-time, the best-fit available appointments for Veteran patients that align with the clinical services and clinical encounter modalities needed to provide health care. The purpose of CCST is to provide a single point of access to available appointment data, which reduces operating costs and improves operational efficiency.

1.1. Purpose

The purpose of this document is to provide a summary of the maintenance and defect corrections that make up Clinic Capacity Search Tool (CCST) Release 2.6.1. The release software package is comprised of the following:

- CCST application 2.6.1

1.2. Audience

This document targets the administrators and users of CCST.

2. This Release

Please see Features and Functionality for a summary of the maintenance and defect corrections implemented with CCST Release 2.6.1.
