05/23/2022	0.1	Baseline for VS GUI 1.7.24.1 and SD*5.3*815	Booz Allen Hamilton

Table of Contents

Table of Tables

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.24.1. The release software package is comprised of the following:

- VS GUI application 1.7.24.1
- VistA M patch SD*5.3*815

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.24.1 and VistA patch SD*5.3*815.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.24.1 package and VistA patch SD*5.3*815.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.24.1. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-1936	VistA: Create SDES get consult request RPCs
VSE-2589	Fix code to handle 503 error message for the application/GUI to exit gracefully
VSE-2737	Duplicate records appear in the RM Grid
VSE-2781	VistA: Add VEText Cancellation Reasons
