Date	Version	Description	Author
07/11/2022	1.0	Final version after review	Liberty ITS
07/01/2022	0.1	Baseline for VS GUI 1.7.26.1 and SD*5.3*818	Liberty ITS

Table of Contents

Table of Tables

1.   Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1.   Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.26.1. The release software package is comprised of the following:

- VS GUI application 1.7.26.1
- VistA M patch SD*5.3*818

1.2.   Audience

This document targets the administrators and users of the VistA Scheduling package.

2.   This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.26.1 and VistA patch SD*5.3*818.

3.   Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.26.1 package and VistA patch SD*5.3*818.

3.1.   Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.26.1. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-855	Calendar not opening during scheduling of appt when RM grid contains more than 25 requests (1 page).
VSE-1299	GUI: MRTC: able to schedule child request from Parent even when the child request has been removed.
VSE-2435	VistA: Create wrapper RPC to cancel an appointment.
VSE-2558	VistA: Create new RPC to retrieve all national flags and the fugitive felon flag.
VSE-2868	VistA: Error with clinic not having the appointment length field set.
VSE-2876	VistA: add new "station number" parameter when creating appointment requests.
VSE-2884	VistA: update SDES GET APPT REQ * RPCs to return ScheduledDateOfAppt in external format.

Work Item ID	Summary of Change
