1. Introduction

1.1 Overview

The Integrated Scheduling Solution (ISS) is a web version of the VistA Scheduling Enhancements (VSE) GUI, utilizing the JavaScript React framework and providing equivalent appointment management functions used in the original application. The purpose of ISS is to deliver users with a modernized look and feel while reducing operating costs and improving operational efficiencies. With this document, users can familiarize themselves with important features and navigational elements of ISS, including patient search, patient appointments and requests, calendar search, query tool, privileged user functionality, and clinic group creation.

This document is intended for ISS users supporting the Veterans Health Administration (VHA). See below for details on the authorized users and their responsibilities.

Table 1: ISS User Profiles

User	Description and Responsibilities
Scheduler	Users responsible for creating and processing patient requests and scheduling appropriate care.
Scheduling Supervisor	Users can create requests and schedule appointments. These users also have additional capabilities such as creating clinic groups or adding privileged users to prohibited clinics.
View Only	This user profile is intended for those who need the ability to view clinic schedules and patient appointment information, but do not need the ability to schedule appointments.

1.2 Prerequisite Credentials

1. The user's PIV card must be linked to the VistA site (See link for guidance).
2. After confirming that the user's PIV card is linked to the user's VistA account, the user will be able to sign into the ISS.
3. The user will also need to ensure that the specific VistA keys are assigned to their account before being able to complete certain tasks. Schedulers will need SDECZMENU. Scheduling Supervisors will need SDECZMGR. For overbook privileges, users will need either SDOB or SDMOB (See **4.3.7 Overbooking an Appointment** for more information).
    - ❖ *Note: For users who do not have the appropriate keys, please contact your Supervisor or yourIT for assistance.*

1.3 PIV Login

1. Begin by opening a browser and going to the following web address: ISS - Home Page (va.gov). The VA Single Sign-On page will then appear. Select the PIV card image, as seen in **Figure 1**, to proceed with the log in process.

Figure 1: PIV Card Sign-On Image

2. After selecting the PIV card image, an ActivClient Login dialog box will appear to prompt you to enter your PIN. Type the numbers of your PIN as prompted in **Figure 2**. If authentication is successful, ISS will load. If it is not successful, you will be prompted to enter your correct PIN instead.

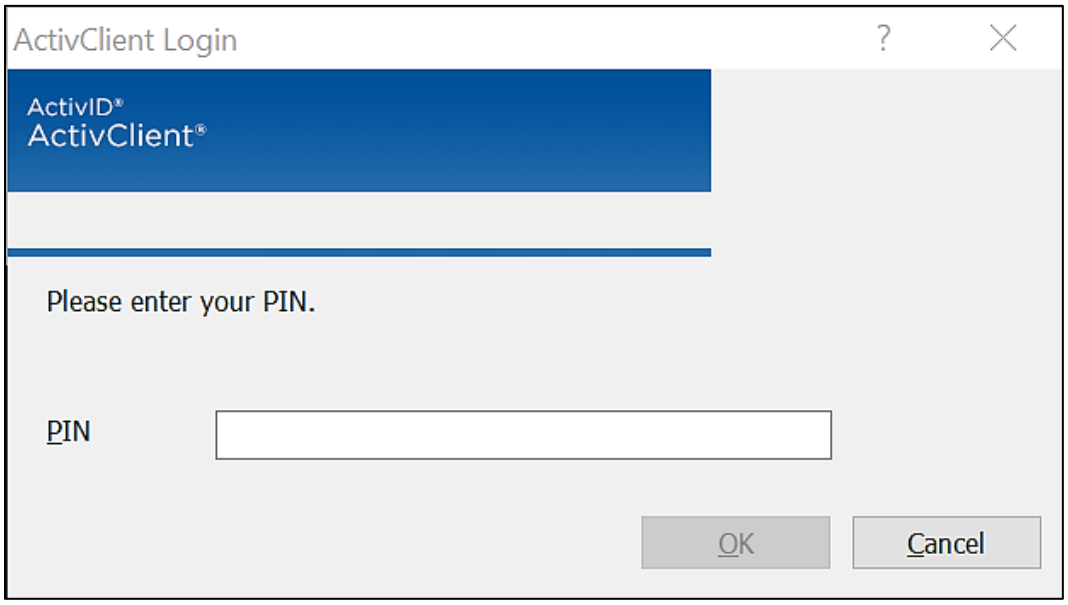

Figure 2: ActivClient Login Pop-Up Window

2. Familiarizing Yourself with ISS

2.1 Home Page

Once log in is complete, users will see the ISS homepage as seen in **Figure 3**.

2.3.2 Sort by Ascending and Descending

1. When looking for availability within the grid, the user can sort rows within the table. To begin, the user will need to select the vertical ellipsis next to the desired column, as seen below in **Figure 30**.

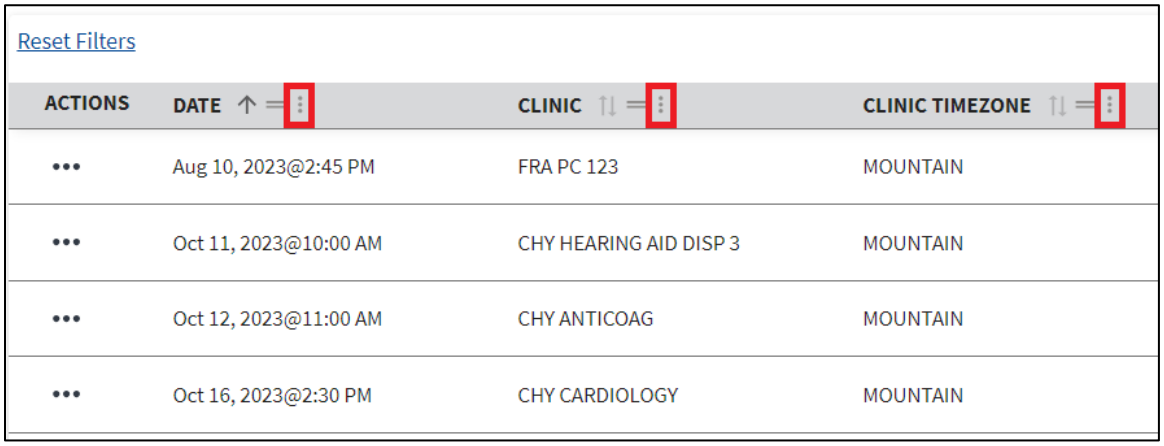

Figure 30: Selecting Column Actions Button to Sort Order

2. The user can then select either “Sort by (Column Name) Ascending” or “Sort by (Column Name) descending” to sort rows in an ascending or descending order within the table, outlined within **Figure 31**.

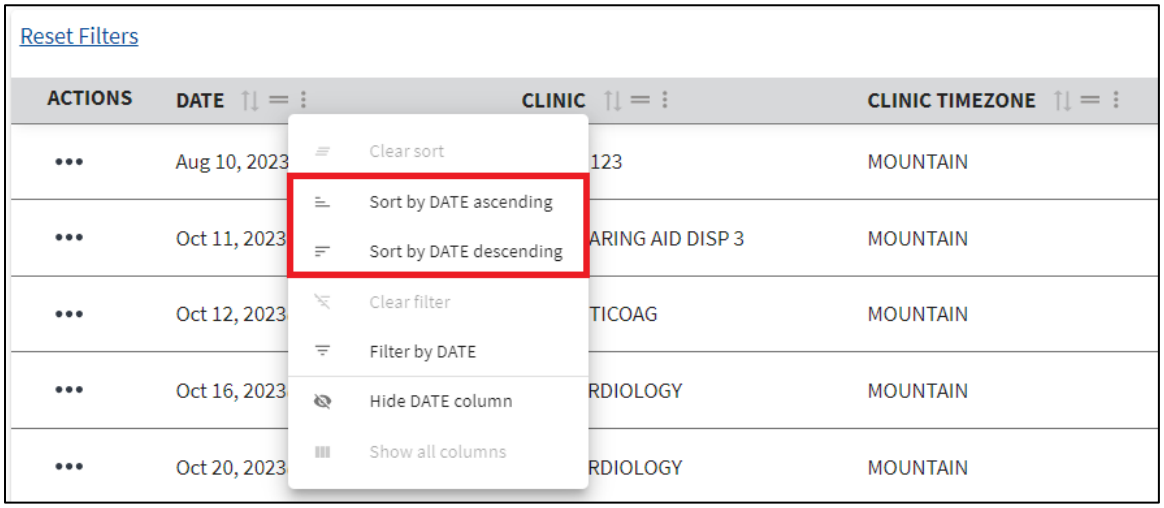

Figure 31: Sort Options for Table Information

3. To return the sorting to default, the user will need to select the vertical ellipsis seen in figure x, then select the “Clear Sort” button shown in **Figure 32**.

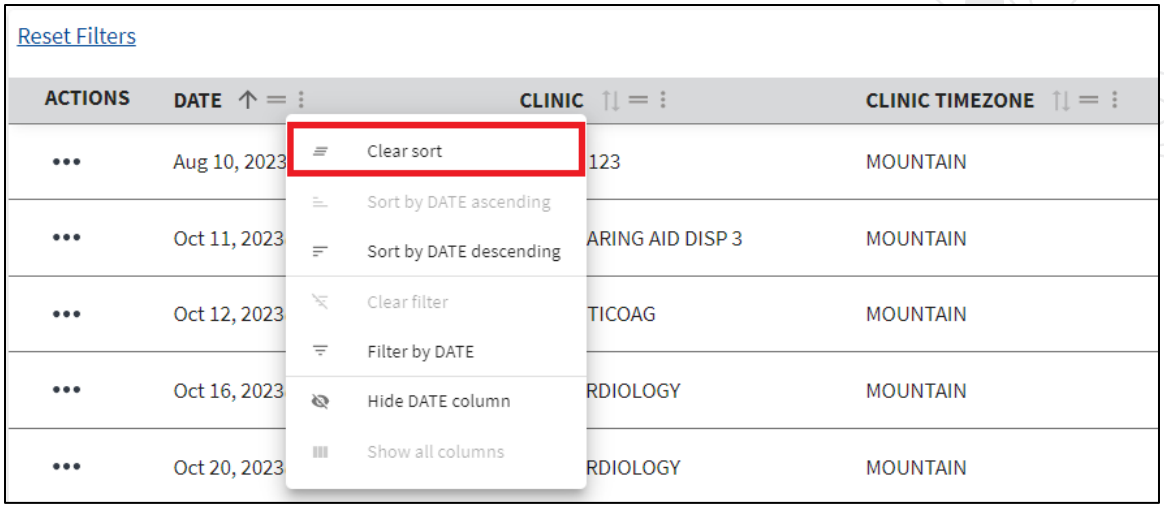

Figure 32: Clear Sort Button

4. Optionally, the user can sort rows by hovering the cursor next to a column's name and selecting the arrow button that appears in **Figure 33**.

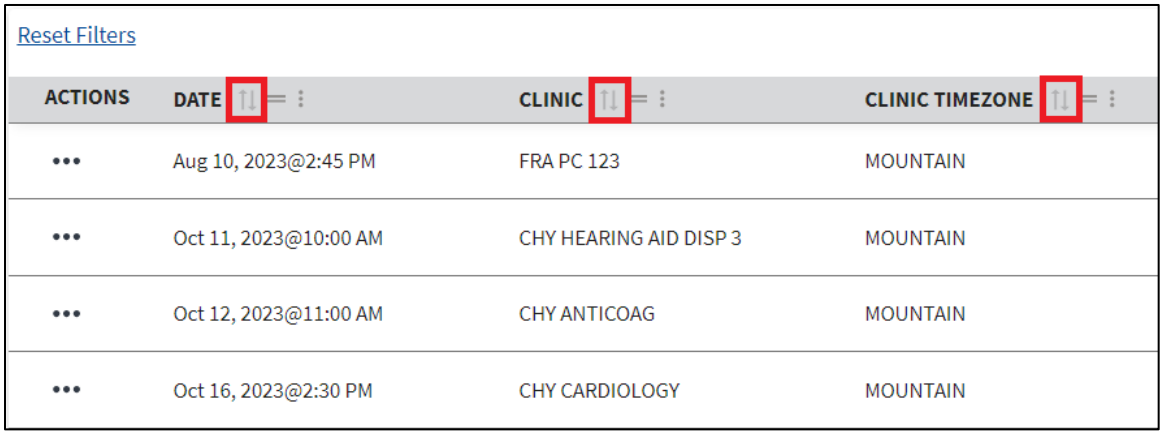

Figure 33: Sort Order Button

5. Selecting the arrow once will cause results to sort by ascending order (↑), a second time to sort by descending order (notated by ↓), and a third time to cause results to appear in the default order again (notated with no arrow).

2.3.3 Show/Hide Columns

1. The user can also hide a column from appearing. To do so, the user will need to select the vertical ellipsis next to the column they wish to hide, seen in **Figure 34** below.

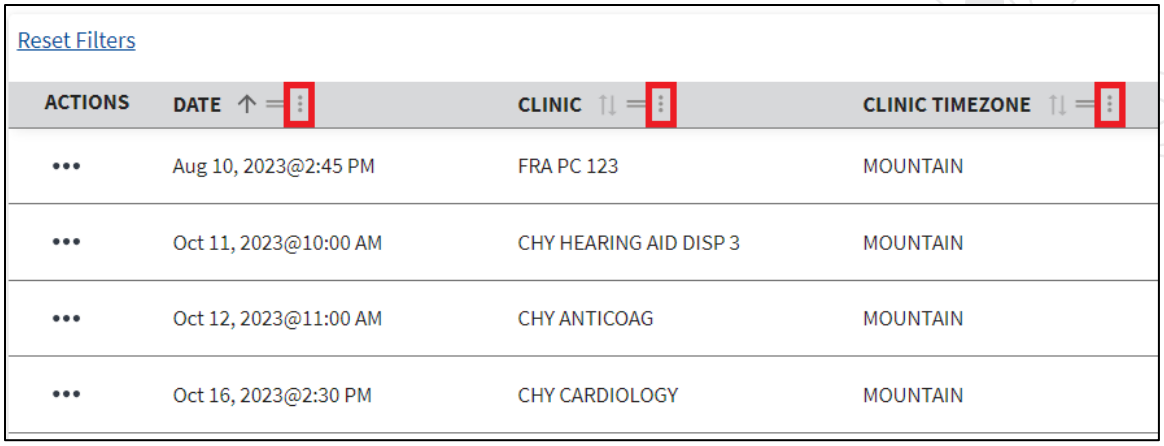

Figure 34: Selecting Column Actions to Show/Hide Columns

2. The user can then select "Hide (Column Name) column," seen below in **Figure 35**, to hide the column.

- ❖ *Note: The "Actions" column cannot be moved or removed from the table.*

3. To reveal any columns that have been hidden, select the "Show all columns" button seen in **Figure 36.**

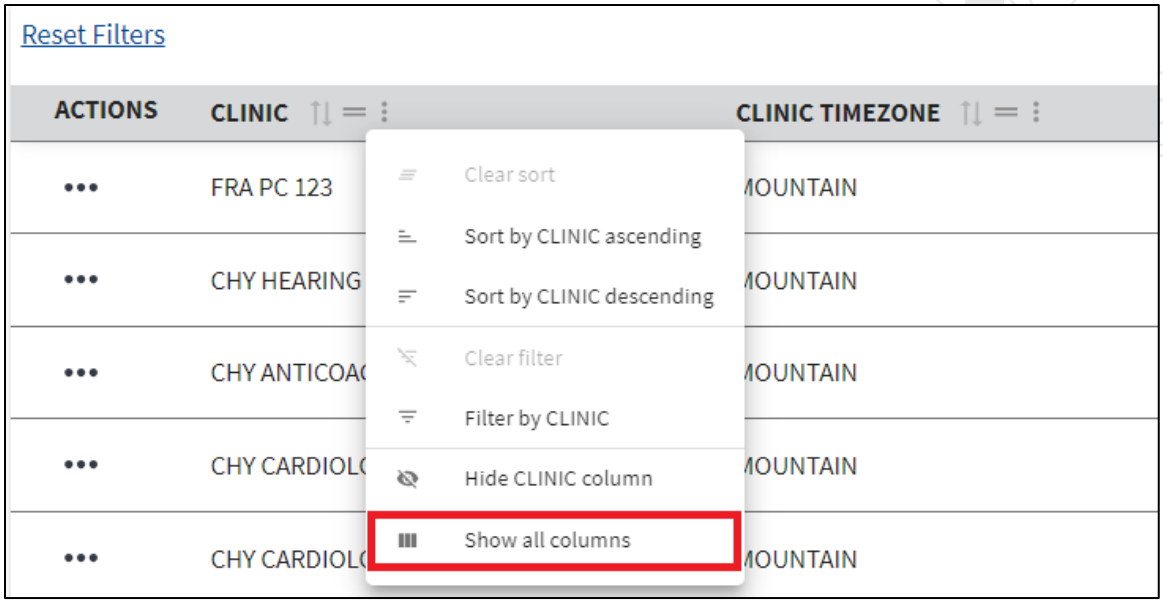

Figure 36: Show All Columns Button from Column Actions Dropdown

4. Optionally, the three vertical bars pictured in **Figure 37** titled “Show/Hide Columns” can be used to show/hide columns.

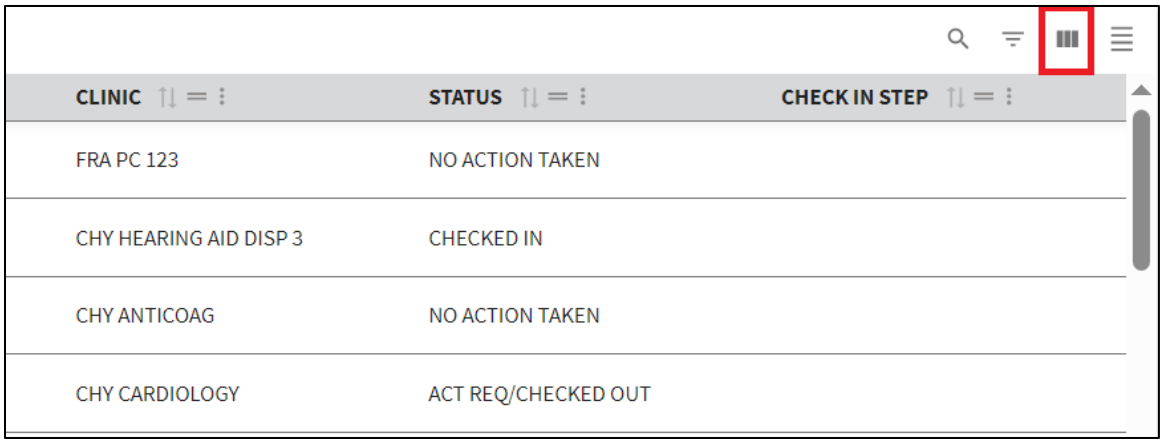

Figure 37: Show/Hide Columns Button

5. Once selected, the user will be presented with the options shown below in **Figure 38**. To begin, the user can select the “Hide All” button to hide all the columns within the table.

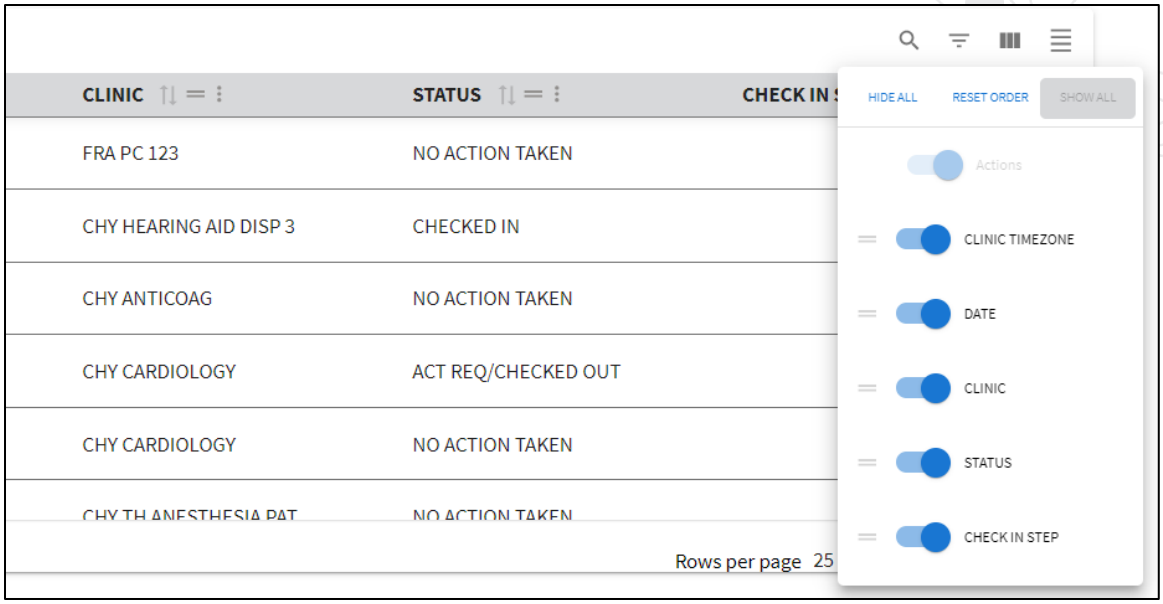

Figure 38: Show/Hide Columns Options

6. The user can also select "Show All" to make all previously hidden columns appear again.
    - ❖ *Note: The "Show All" button will not be able to be selected until at least one column has been hidden.*
7. Another option presented to the user is to manually select which columns they would like to show and hide. To hide a column, select the button next to the column's name that is currently being shown (indicated by the button's blue appearance seen in **Figure 39**). The button will become grey, and the column will be hidden in the table.

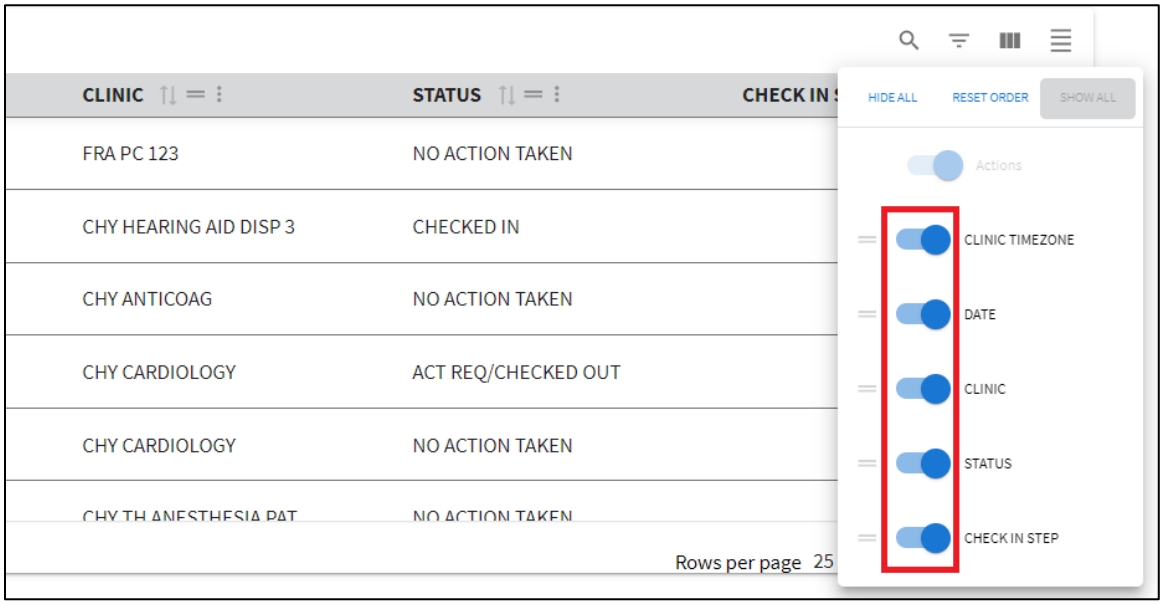

Figure 39: Example Button Appearance Indicating Column is Shown

8. The user can also choose to show any previously hidden column by selecting the button next to a hidden column (indicated by the button's grey appearance seen in **Figure 40**). The button will become blue, and the column will be shown in the table.

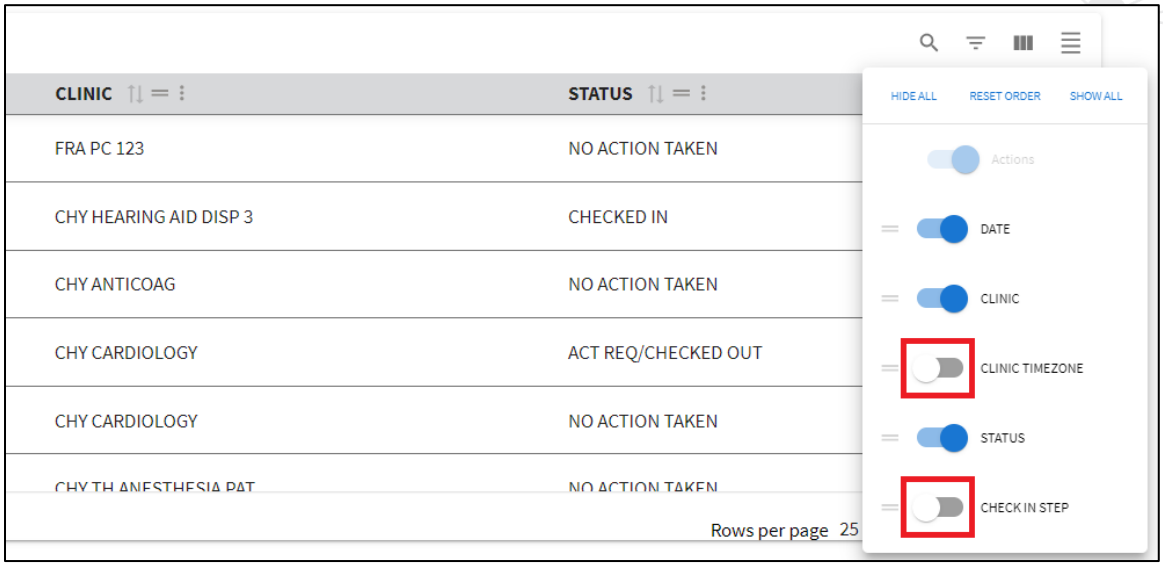

Figure 40: Example Button Appearance Indicating Column is Hidden

2.3.4 Toggle Density

1. When looking for availability within the grid, the option to adjust the toggle density is available. To begin adjusting the toggle density, select the button shown in **Figure 41**.

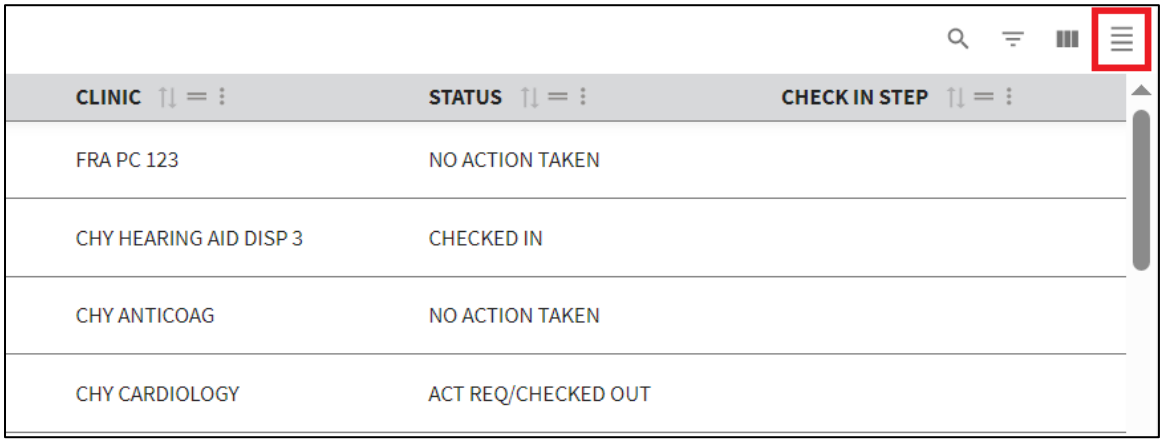

Figure 41: Toggle Density Button

2. There are three different options for the user to choose from depending on the user's preference. Simply keep selecting the "Toggle Density" button to rotate through the options until the user finds their preferred density.

2.3.5 Show, Hide, and Search Filters

1. When looking for availability within the grid, the option to show and hide filters is available. To begin the user will need to select the “Show/Hide Filters” button, or the “Filter by (Column Name)”button, both shown in **Figure 42**. Selecting either will cause the search functions to appear under each column name.

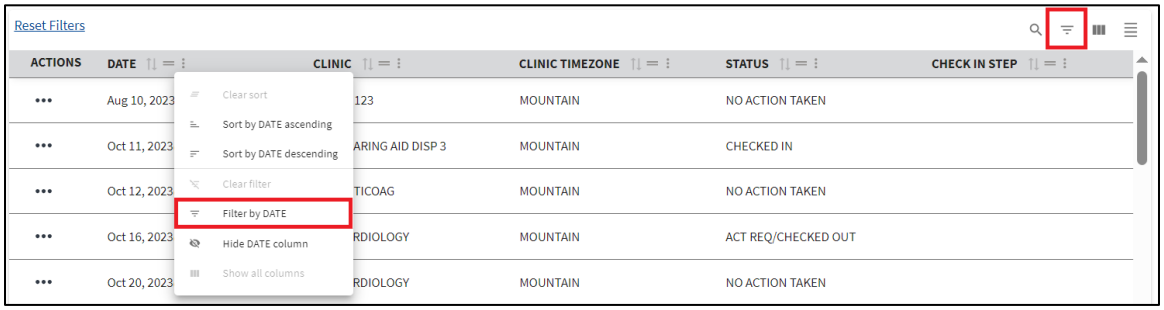

Figure 42: Show/Hide Filter Options Buttons

2. Once the search options appear as seen in **Figure 43**, the user can select the search bar or dropdown menu under the desired column to be filtered and enter or select the required information needed.

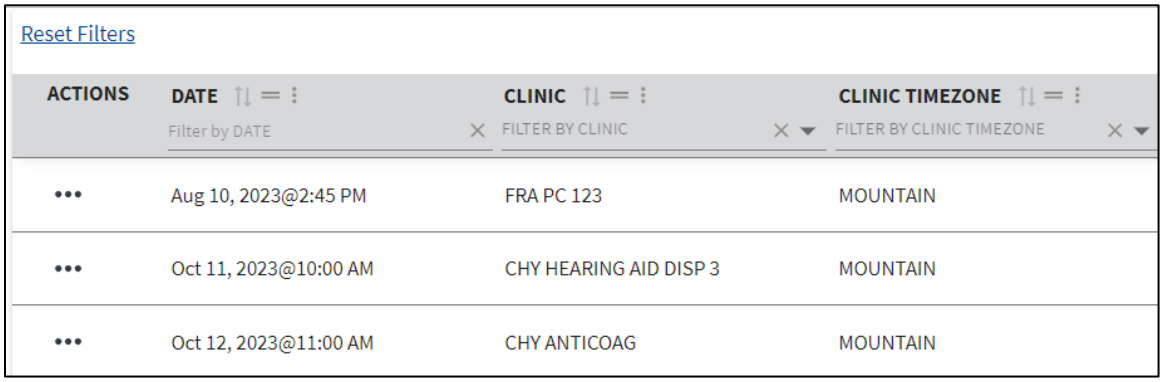

Figure 43: Example of Filter Search Menu on Grid View

3. Once the filter field has been populated, results will automatically refresh and show items based on the filtered criteria as seen below in **Figure 44**.

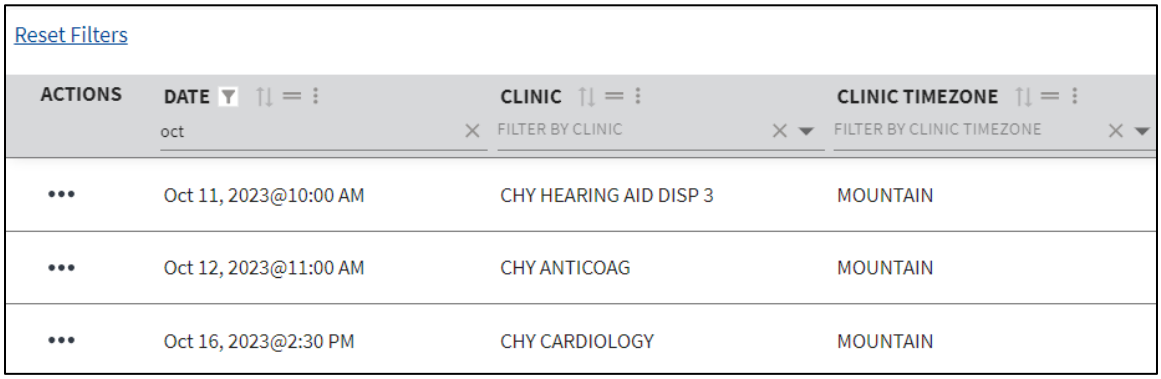

Figure 44: Example of Filtered Results in Grid View

4. To clear the search, the user will need to select the “X” next to the search bar seen in **Figure 45**. Selecting this will cause all results to appear within the table.

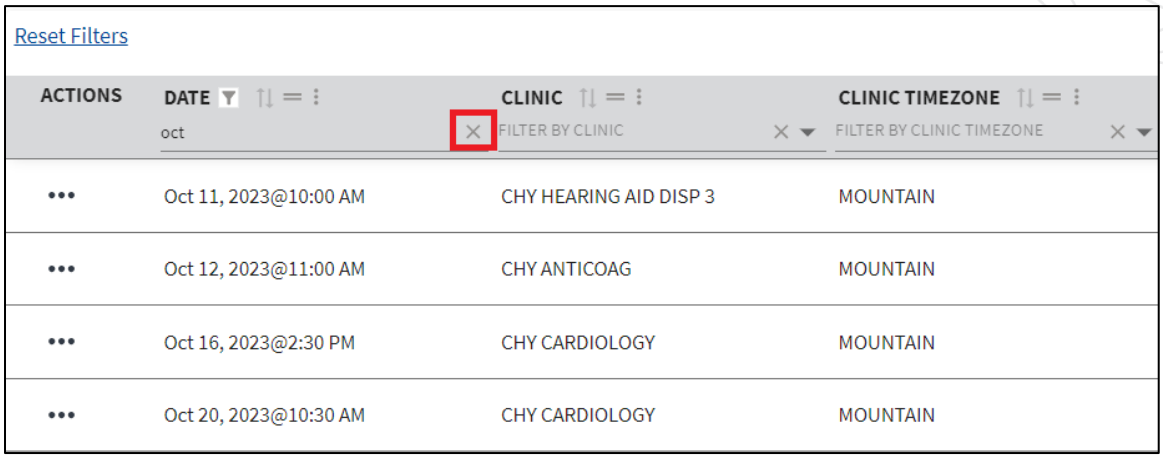

Figure 45: Clearing Filter Button

5. Once finished searching, the user can then select the “Show/Hide Search” button seen in **Figure 46** to hide the search bar.

3.4.1 Demographics Banner

The Demographics banner is located at the top of the page and is populated with the patient's information when a patient is brought into context. Users may select the expand button, as seen in **Figure 69**, to see more information regarding the selected patient and their demographics.

Figure 69: Demographics Banner Expand Button

By default, the user will be able to see the patient's name, DOB, any patient flags (if applicable), VVC status, birth sex, patient type, and SSN (Last 4). Users can select the Special Needs/Preferences dropdown to see what is currently associated with the patient. If any edits are needed, the user can select the Demographics link, underlined in **Figure 70**, to take them to the Demographics tab (see **3.4 Demographics** for more information on editing).

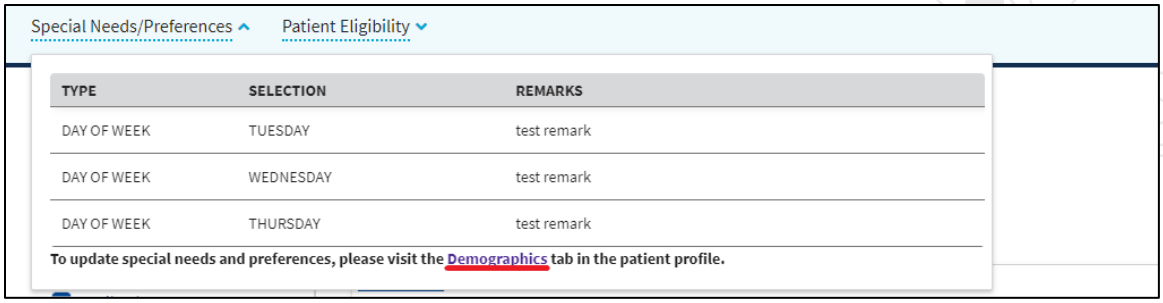

Figure 70: Demographics Link in the Special Needs/Preferences Dropdown

The user can also select the Patient Eligibility dropdown seen in **Figure 71** to view more specific information about the patient's eligibility and health conditions.

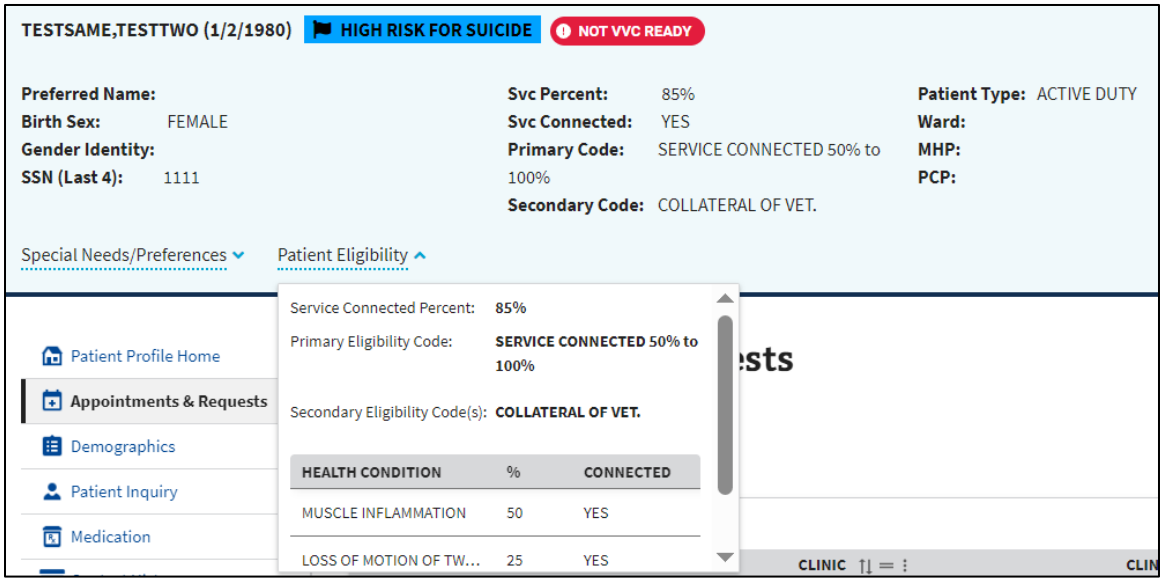

Figure 71: Patient Eligibility Dropdown

- *Note: The patient's VVC status by default will state "NOT VVC READY" and be red, as seen in **Figure 71**. However, if the patient has joined at least 3 video visit appointments within the past 120 days, the VVC status will state "VVC READY" and be green, shown in **Figure 72**. For more information on video visits please see **4.5 Video Visits**.*

4.3.7 Overbooking an Appointment

When creating appointments, users have the ability to overbook an appointment slot. To do so, the user will need to follow the steps outlined **i**n **4.3 Creating a Pending Appointment** until asked to select a timeslot on the clinic calendar.

1. To overbook an appointment slot, the user will right-click on the preferred timeslot on the calendar and select "Create Appointment (Overbooked)," as seen below in **Figure 167**.

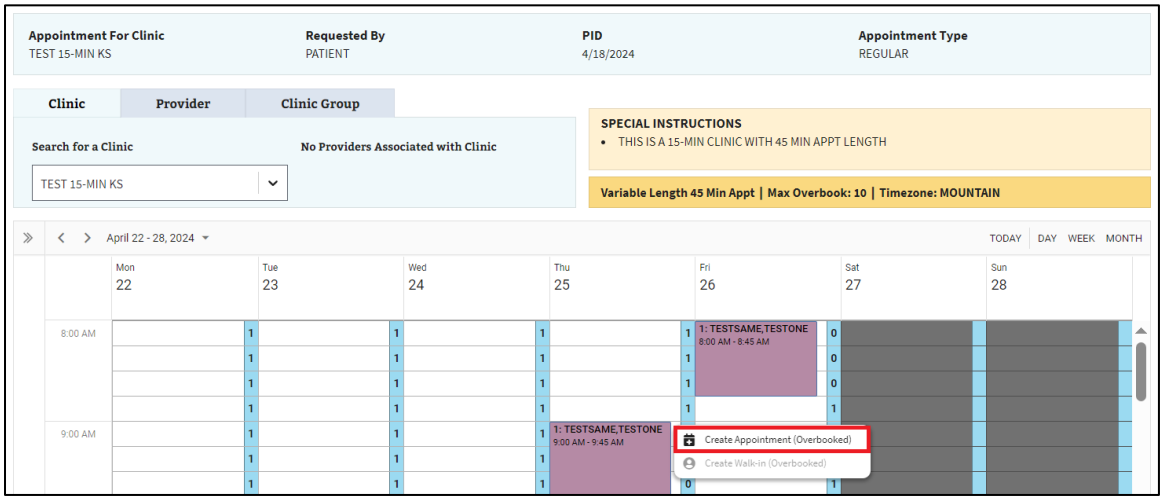

Figure 167: Create Appointment (Overbooked) Button

2. The Overbook Slot window will appear, as shown in **Figure 168**, and the user will be asked to confirm before proceeding with appointment creation as normal.

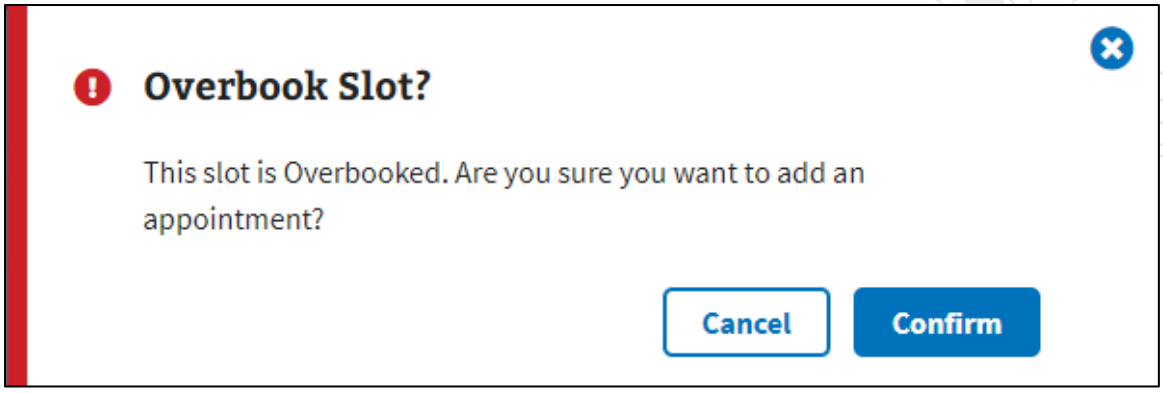

Figure 168: Overbook Slot Window

- *Note: Users with an SDOB key will only be able to overbook within clinic hours and up to the maximum number of overbooks allowed per day for a clinic. Users with an SDMOB key will be able to overbook outside of clinic hours and can exceed the maximum allotted overbooks slots per day for a clinic.*

4.3.8 MISSION Act

The user may receive an alert when creating an appointment if an appointment is MISSION Act eligible. For more information regarding MISSION Act, please visit this link.

4.3.9 Clinic Stop Code

The user will receive a clinic stop code notification if an appointment is being created in a clinic that is not within the service/specialty of the appointment request.

4.3.10 Patient Conflicts

When creating an appointment, the user will see a Patient Conflict notification at the bottom of the New Appointment page. If no conflict exists, the notification will display "No Potential Appointment Conflicts" in green, as shown in **Figure 169**, and the user can move forward with creating the appointment as usual.

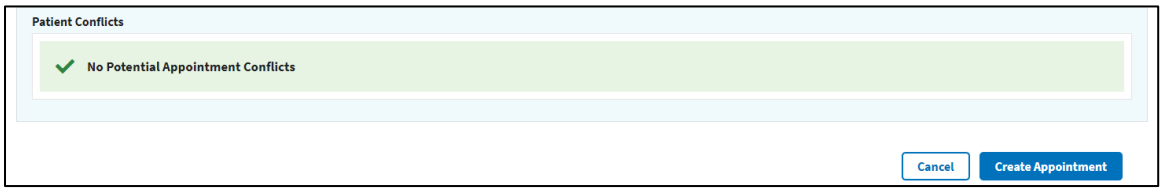

Figure 169: No Potential Appointment Conflicts Notification

If the user attempts to make more than one appointment for a patient on the same day at any clinic, the notification will display "Potential Patient Conflict for [DAY]" in yellow and show the potential conflicting appointment(s) in a grid, as seen below in **Figure 170**. The user can then choose to continue making the appointment for the patient or go back and choose a different day and time.

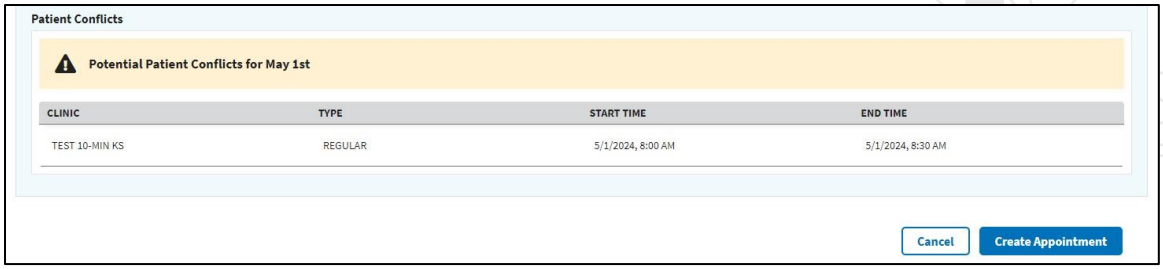

Figure 170: Potential Appointment Conflicts Notification

From the clinic calendar, the calendar will display the "Create Appointment" button as greyed out and unavailable when attempting to create an appointment with a known conflict (See **Figure 171** below).

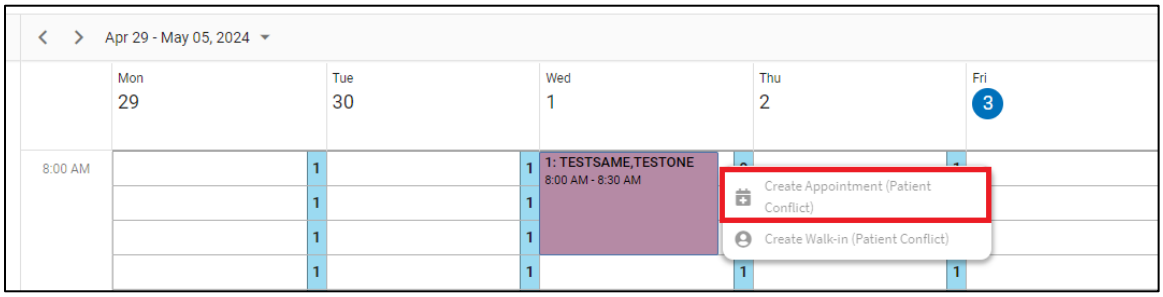

Figure 171: Patient Conflict on Calendar

If the user changes the time to one with a patient conflict on the New Appointment page, the notification will display "This Time Has the Conflict Highlighted Below:" in red and show the conflicting appointment in a grid, as seen below in **Figure 172**.

Figure 172: Patient Conflict on New Appointment Page

- *Note: The user will be unable to create an appointment with a Patient Conflict displayed in red.*
