09/23/2021	1.0	Sent for review/approval	Liberty ITS
09/16/2021	0.1	Baseline for VS GUI R1.7.12 and SD*5.3*796	Liberty ITS

Table of Contents

Table of Tables

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.12. The release software package is comprised of the following:

- VS GUI application 1.7.12
- VistA M patch SD*5.3*796

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.12 and VistA patch SD*5.3*796.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.12 package and VistA patch SD*5.3*796.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.12. The work item ID is the Jira issue number.

<div align="center">

Table 1: Enhancements and Defects Fixes

</div>

Work Item ID	Summary of Change
VSE-761	VistA: VVS - Cancellation of a Video Visit Service (VVS) appointment from "SDCANCEL/SDAM" VistA, VVS appointment ID field is not deleted from the SDEC APPOINTMENT file.
VSE-1006	VS GUI: Display Check-in Indicators View Model.
VSE-1018	TELERIK: Update "Print the Patient Letter." message to new format.
VSE-1203	508 - .NET: Tabbing on Make Appt Request screen skips Patient Identified Date (PID).
VSE-1267	RECALL - Editing an Appt Request that was previously a Recall you have to add Provider.
VSE-1306	VistA: Post Install Routine to correct Recalls with incorrect provider.
VSE-1353	.NET GUI: Print medication list.

Work Item ID	Summary of Change
VSE-1355	VistA: Veterans Scheduling Interoperability Platform (VSIP) - Create E-Check-in "Allowed" field in clinic setup.
VSE-1375	VistA: Create Post-install Routine Clean up Clinically Indicated Date (CID).
VSE-1395	VistA: Prevent Back-Dating PID.
VSE-1405	Test VSE report features after removal of report file.
VSE-1406	.NET sanitize user input in patient search.
VSE-1413	.NET: Display PROVIDER for "REQUESTOR" for Consults and Procedures.
VSE-1437	VistA: User Preferences - Post Install routine to clear old user preferences.
VSE-1459	The GUI is crashing when the user tries to load the inactive clinic appointment from the pending appointment list.

4.   User Documentation

The documentation distributed with VS GUI Release 1.7.12 is available for download from the VA Software Document Library (VDL).

5.   Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
