1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.13. The release software package is comprised of the following:

- VS GUI application 1.7.13
- VistA M patch SD*5.3*797

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.13 and VistA patch SD*5.3*797.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.13 package and VistA patch SD*5.3*797.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.13. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

| Work Item ID | Summary of Change |
|---------------------|--|
| VSE-1600 | VistA: Research on Disposition codes |
| VSE-1559 | VistA: Update SDES RPCs to follow standard naming convention |
| VSE-1509 | VistA: Create new RPC based on SDEC SEARCH VVS PROVIDERS RPC to return JSON |
| VSE-1474 | .NET: -1 in provider phone number results in provider not displaying in search |
| VSE-1464 | VistA: Add "Block and Move" cancellation reason |
| VSE-1463 | VistA: Create "Block and Move" RPC |
| VSE-1444 | 508 - .NET: Tabbing incorrect function on make PtCSch request |
| VSE-1434 | VistA: SDEC GETVVSMMAKEINFO contains -1 |

| Work Item ID | Summary of Change |
|---------------------|---|
| VSE-1431 | .NET: Cannot schedule VVC in VS GUI - Must schedule in VCM - Use new RPC returning JSON |
| VSE-1407 | .NET: Validate VistA data using JSON schema before mapping to model |

4. User Documentation

The documentation distributed with VS GUI Release 1.7.13 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
