# 1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

## 1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.14.1. The release software package is comprised of the following:

- VS GUI application 1.7.14.1
- VistA M patch SD\*5.3\*799

## 1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

# 2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.14.1 and VistA patch SD\*5.3\*799.

# 3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.14.1 package and VistA patch SD\*5.3\*799.

## 3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.14.1. The work item ID is the Jira issue number.

**Table 1: Enhancements and Defects Fixes**

<b>Work Item ID</b>	<b>Summary of Change</b>
VSE-1877	Undefined error occurs when SDCANCEL is run to cancel a clinic's availability
VSE-1755	.NET GUI: Gather and include clinic name and Internal Entry Number (IEN) on Video Visit Service (VVS) create/edit requests
VSE-1717	Must push Enter twice to log in after entering access/verify
VSE-1714	.NET: Request Management (RM) Grid display is missing data for initial RM Grid load
VSE-1592	.NET GUI: Update Certificate Selection on VS GUI Login
VSE-1581	VistA: Adjust current SDES Remote Procedure Call (RPCs) to accept Enterprise Appointment Scheduling (EAS) transaction ID
VSE-1580	VistA: Create EAS Tracking Number field
VSE-1565	VistA: Create RPC to remove a clinic from HOSPITAL LOCATION file (44)

<b>Work Item ID</b>	<b>Summary of Change</b>
VSE-1564	VistA: Create RPC to get clinic information from HOSPITAL LOCATION file (44)
VSE-1563	VistA: Create RPC to modify existing clinic in HOSPITAL LOCATION file (44)
VSE-1562	VistA: Create RPC to add new clinic to HOSPITAL LOCATION file (44)
VSE-1540	.NET: Simplify and standardize usage of VSEMessageWindow
VSE-1539	.NET: Use AssemblyInfo version string for everything
VSE-1606	VistA: Create new RPC based on SDEC GETREGA
VSE-1411	.NET GUI: Demographics indicator on Check-in screen
VSE-1340	.NET: No-Showing Child Multiple Return to Clinic (MRTC) results in lost parent link
VSE-1282	.NET: Update editing an appointment request to not reference the type specific wait list tables in Keys

## 4. User Documentation

The documentation distributed with VS GUI Release 1.7.14.1 is available for download from the VA Software Document Library (VDL).

## 5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
