---	---

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.16.2. The release software package is comprised of the following:

- VS GUI application 1.7.16.2
- VistA M patch SD*5.3*801

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.16.2 and VistA patch SD*5.3*801.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.16.2 package and VistA patch SD*5.3*801.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.16.2. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-197	Add Clinic Group – Remediate findings in Add Clinic Group form
VSE-1206	VistA: Rewrite SDEC APPDEL in SDES
VSE-1787	.NET: Update VS GUI to log VA Video Connect (VVC) errors
VSE-1813	VistA: Create SDES User Profile Remote Procedure Call (RPC)
VSE-1883	Entered comments on the edit request are not showing up on the request in the RM Grid until the user refreshes the GUI
VSE-1886	VistA: Update VistA to reopen appointment request when canceling
VSE-1893	VistA: Updates to Block and Move
VSE-1896	Security Token Storage (STS) – VS GUI
VSE-1901	.NET GUI: Update to display preferred gender

Work Item ID	Summary of Change
VSE-1902	VistA: Update patient info RPC to return preferred gender
VSE-2053	Block and Move Appointment in available slot is displaying as overbook appointment in Expand Entry
VSE-2070	VistA: Update Block and Move functionality to account for Patient Centered Scheduling (PtCSch)
VSE-2098	VistA: Canceling of VVS appointment should not delete VVS Appointment ID

4. User Documentation

The documentation distributed with VS GUI Release 1.7.16.2 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
