---	---

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.17.2. The release software package is comprised of the following:

- VS GUI application 1.7.17.2
- VistA M patch SD*5.3*803

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.17.2 and VistA patch SD*5.3*803.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.17.2 package and VistA patch SD*5.3*803.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.17.2. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-189	Print Letter Message - Remediate 508 findings in Print Letter form
VSE-196	Clinics and Users Message - Remediate 508 findings in Clinics and Users Message form
VSE-198	Clinic Groups Message - Remediate 508 findings in Clinic Groups Message form
VSE-207	.NET: Midnight timestamp for DateTime fields in SDEC APPOINTMENT file causes error in VS GUI
VSE-1467	VA Video Connect (VVC) - Arizona time zone is not an option when creating a VVC appointment, resulting in links sent at the incorrect time
VSE-1567	VistA: Create Remote Procedure Call (RPC) to edit availability for a clinic in HOSPITAL LOCATION file (44)

Work Item ID	Summary of Change
VSE-1937	SDES Patient Centered Scheduling (PtCSch) CRUD RPCs - Create
VSE-1938	Create SDES RPC to Read a PtCSch request
VSE-1939	Create SDES RPC to Update a PtCSch request
VSE-1940	Create SDES RPC to delete (disposition) a PtCSch request
VSE-1948	VistA: User is able to cancel an appointment (from VistA) that is in "checked in" status
VSE-2011	VistA: Pending RTC Order Cleanup Tool incorrectly dispositions pending orders
VSE-2046	VistA: Create SDEC RPC to return a user's Station ID
VSE-2049	VistA: Update system to count established patients at 3 years
VSE-2185	Block and Move on Clinics Starting at Midnight freezes GUI
VSE-2280	Block and Move letters

4. User Documentation

The documentation distributed with VS GUI Release 1.7.17.2 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
