1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.18.1. The release software package is comprised of the following:

- VS GUI application 1.7.18.1
- VistA M patch SD*5.3*804

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.18.1 and VistA patch SD*5.3*804.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.18.1 package and VistA patch SD*5.3*804.

3.1. Enhancements Implemented and Defects Fixes

Work Item ID	Summary of Change
VSE-2106	.NET GUI: Video Visit Service (VVS) Appointment cancellation during Block and Move/Drag and Drop
VSE-2038	NET GUI: Wire up the demographics endpoint to demographics indicator
VSE-2095	VistA: Update Remote Procedure Call (RPC) SDES GET PATIENT REGISTRATION
VSE-2096	VistA: Assign SDES RPCs to appropriate menu options
VSE-2108	VistA: Create SDES RPC wrapper to send null SDIEN
VSE-2109	Vista: Update SDES CANCEL RPC to not remove VVS link
VSE-2121	.NET GUI: VVS crashing if Web Service to cancel VVS fails
VSE-2123	Swap methods in CancelApptPresentationModel lines 200/201 so that VVS ID is removed from VistA after the VVS appointment is cancelled
VSE-2124	Log VVS Web Service call when cancelling an appointment

Work Item ID	Summary of Change
VSE-2126	VistA: Update roll and scroll to move injected code for deleting VVS ID to after the SDCAN comes back with success and not error
VSE-2143	VistA: Provider does not show up in lookup
VSE-2200	.NET GUI: Update Personal Identity Verification (PIV) login help link
VSE-2208	VistA: RPCs need to return station number
VSE-2231	VistA: Update the Insurance Verification Logic in the SDES GET INSURANCE VERIFY REQ RPC
VSE-2264	VistA: Block and Move requires cancel reason

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.18.1. The work item ID is the Jira issue number.

4. User Documentation

The documentation distributed with VS GUI Release 1.7.18.1 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
