---	---

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.23.0. The release software package is comprised of the following:

- VS GUI application 1.7.23.0
- VistA M patch SD*5.3*814

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.23.0 and VistA patch SD*5.3*814.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.23.0 package and VistA patch SD*5.3*814.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.23.0. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-180	Tasks Tab - Calendar Appointment Item Context Menus
VSE-2148	Recall Reminders View or Edit window in GUI
VSE-2268	VistA: Calculate Mission Act Wait Time
VSE-2432	VistA: Create wrapper RPC for adding an appointment
VSE-2433	VistA: Create wrapper RPC for viewing an appointment
VSE-2505	.NET: Display Mission Act Wait Time
VSE-2611	.NET: Update VS GUI to send a user's division, not station, when calling demographics web service
VSE-2642	VistA: Update the SDES routine to place \$G around all input params

Work Item ID	Summary of Change
VSE-2646	VS GUI prevents other apps from using CTRL+P even when GUI is not in context
VSE-2648	VistA: TMP change exposed error
VSE-2675	.NET: Update VS GUI to display institution for VistA instance user is logged into instead of default division
VSE-2691	.NET: Display VVC appointment start time in human readable format
VSE-2695	VistA: Update SDES GET USRPROFILE and SDES GET USER PROFILE BY DUZ RPCs Return Division Id
VSE-2703	.NET: Update GUI to account for new contact attempt methods when dispositioning requests
VSE-2705	VistA: Eastern European Time Zone offset is not returning valid times
VSE-2726	VistA: Support for UI change to display institution name on top banner
VSE-2754	SDES CREATE APPOINTMENTS
VSE-2748	VistA: Update SDES CREATE APPT #409.84 RPC
VSE-2794	VistA: Modify routine SDECDATE to correct offset validation
VSE-2795	VistA: Create a new RPC that accepts a list of patient DFNs and returns insurance indicators
VSE-2933	VistA: Update SDEC EDIT PAT PRE-REGISTRATION RPC

4. User Documentation

The documentation distributed with VS GUI Release 1.7.23.0 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
