1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.6.1. The release software package is comprised of the following:

- VS GUI application 1.7.6.1
- VistA M patch SD*5.3*784

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see <u>Features and Functionality</u> for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.6.1 and VistA patch SD*5.3*784.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.6.1 package and VistA patch SD*5.3*784.

3.1. Enhancements Implemented

Table 1 lists the enhancements included in VS GUI Release 1.7.6.1. The work item ID is the Jira issue number.

Table 1: Enhancements Implemented

Work Item ID	Summary of Enhancements	
VSE-448	The Request Management (RM) Grid Resize Cursor	
VSE-452	Configure the behavior for RM Grid to load on start setting	
VSE-552	Modify the RPC SDECRMG RMG code to allow for more than 200 records	
VSE-554	Create a new version of SDEC ARGET	
VSE-555	Create a new version of SDEC REQGET	
VSE-556	Create a new version of SDEC RECGET	
VSE-835	Use first 3 fields of the GUI version for checking against version in VistA	

3.2. Defects Corrected

Table 2 lists the defect correction(s) included in this release. All correction(s) are complete and do not require workarounds to be effective.

Table 2: Defects Corrected

Work Item ID	Summary of Functional Defects	
VSE-587	Patient Search hot keys do not work	

4. User Documentation

The documentation distributed with VS GUI Release 1.7.6.1 is available for download from the <u>VistA Documentation Library</u> (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
