SURGERY

USER MANUAL

Version 3.0
July 1993

(Revised June 2007)

Revision History

Each time this manual is updated, the Title Page lists the new revised date and this page describes the changes. If the Revised Pages column lists "All," replace the existing manual with the reissued manual. If the Revised Pages column lists individual entries (e.g., 25, 32), either update the existing manual with the Change Pages Document or print the entire new manual.

Date	Revised Pages	Patch Number	Description
06/07	35, 210, 212b	SR*3*159	Updated screens to reflect change of the environmental indicator "Environmental Contaminant" to "SWAC" (e.g., Southwest Asia). <mark>REDACTED</mark>
06/07	176-180, 180a, 184c-d, 327c-d, 372, 375-376, 446, 449-450, 452-453, 455-456, 458, 461, 468, 470, 472, 479-479a, 482-484, 486a, 489, 491, 493, 495, 497, 499, 501, 502a-d, 504-506, 509-512, 519	SR*3*160	Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software. For more details, see the *Surgery NSQIP-CICSP Enhancements 2007 Release Notes*. Updated data entry screens to match software; changes are unrelated to this patch. <mark>REDACTED</mark>
11/06	10-12, 14, 21-22, 139-141, 145-150, 152, 219, 438	SR*3*157	Updated data entry options to display new fields for collecting sterility information for the Prosthesis Installed field; updated the Nurse Intraoperative Report section with these required new fields. For more details, see the *Surgery-Tracking Prosthesis Items Release Notes*. Updated data entry screens to match software; changes are unrelated to this patch. <mark>REDACTED</mark>
08/06	6-9, 14, 109-112, 122-124, 141-149, 151-152, 176, 178-180, 180a-b, 181-184, 184a-d, 185-186, 218-219, 326-327, 327a-d, 328-329, 373, 377, 449-450, 452-456, 459, 461-462, 467-468, 468b, 469-470, 470a, 473-474, 474a-474b, 475, 477, 481-486, 486a-b, 489-502, 502a-b, 503-504, 509-512	SR*3*153	Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software. Updated data entry options to incorporate renamed/new Hair Removal documentation fields. Updated the Nurse Intraoperative Report and Quarterly Report to include these fields. For more details, see the *Surgery NSQIP/CICSP Enhancements 2006 Release Notes.* <mark>REDACTED</mark>

Date	Revised Pages	Patch Number	Description
06/06	28-32, 40-50, 64-80, 101-102	SR*3*144	Updated options to reflect new required fields (Attending Surgeon and Principal Preoperative Diagnosis) for creating a surgery case. <mark>REDACTED</mark>
06/06	vi, 34-35, 125, 210, 212b, 522a-b	SR*3*152	Updated Service Classification screen example to display new PROJ 112/SHAD prompt. This patch will prevent the PRIN PRE-OP ICD DIAGNOSIS CODE field of the Surgery file from being sent to the Patient Care Encounter (PCE) package. Added the new *Alert Coder Regarding Coding Issues* option to the Surgery Risk Assessment Menu option. <mark>REDACTED</mark>
04/06	445, 464a-b, 465, 480a-b	SR*3*146	Added the new *Alert Coder Regarding Coding Issues* option to the Assessing Surgical Risk chapter. <mark>REDACTED</mark>
04/06	6-8, 29, 31-32, 37-38, 40, 43-44, 46-48, 50, 52, 65-67, 71-73, 75-77, 79, 100, 102, 109-112, 117-120, 122-123, 125-127, 189-191, 195b, 209-212, 212a-h, 219a, 224-231, 238-242, 273-277, 311-313, 315-317, 369, 379- 392, 410, 449-464, 467-468, 468a-b, 469-470, 470a, 471-474, 474a-b, 475-479, 479a-b, 480, 483-484, 489-502, 507, 519	SR*3*142	Updated the data entry screens to reflect renaming of the Planned Principal CPT Code field and the Principal Pre-op ICD Diagnosis Code field. Updated the *Update/Verify Procedure/Diagnosis Coding* option to reflect new functionality. Updated Risk Assessment options to remove CPT codes from headers of cases displayed. Updated reports related to the coding option to reflect final CPT codes. For more specific information on changes, see the *Patient Financial Services System (PFSS) – Surgery Release Notes* for this patch. <mark>REDACTED</mark>
10/05	9, 109-110, 144, 151, 218	SR*3*147	Updated data entry screens to reflect renaming of the Preop Shave By field to Preop Hair Clipping By field. <mark>REDACTED</mark>
08/05	10, 14, 99-100, 114, 119-120, 124, 153-154, 162-164, 164a-b, 190, 192, 209-212f, 238-242	SR*3*119	Updated the Anesthesia Data Entry Menu section (and other data entry options) to reflect new functionality for entering multiple start and end times for anesthesia. Updated examples for Referring Physician updates (e.g., capability to automatically look up physician by name). Updated the PCE Filing Status Report section. <mark>REDACTED</mark>

Date	Revised Pages	Patch Number	Description
08/04	iv-vi, 187-189, 195, 195a-195b, 196, 207-208, 219a-b, 527-528	SR*3*132	Updated the Table of Contents and Index to reflect added options. Added the new *Non-OR Procedure Information* option and the *Tissue Examination Report* option (unrelated to this patch) to the Non-OR Procedures section.
08/04	31, 43, 46, 66, 71-72, 75-76, 311	SR*3*127	Updated screen captures to display new text for ICD-9 and CPT codes.
08/04	vi, 441, 443, 445-456, 458-459, 461 463, 465, 467-468, 468a-b, 469-470, 470a-b, 471, 473-474, 474a-b, 474-479, 479a-b, 480-486, 486a-b, 519, 531-534	SR*3*125	Updated the Table of Contents and Index. Clarified the location of the national centers for NSQIP and CICSP. Updated the data entry options for the non-cardiac and cardiac risk management sections; these options have been changed to match the software and new options have been added. For an overview of the data entry changes, see the *Surgery NSQIP/CICSP Enhancements 2004 Release Notes.* Added the *Laboratory Test Result (Enter/Edit)* option and the *Outcome Information (Enter/Edit)* option to the *Cardiac Risk Assessment Information (Enter/Edit)* menu section. Changed the name of the *Cardiac Procedures Requiring CPB (Enter/Edit)* option to *Cardiac Procedures Operative Data (Enter/Edit)* option. Removed the *Update Operations as Unrelated/Related to Death* option from the *Surgery Risk Assessment Menu*.
08/04	6-10, 14, 103, 105-107, 109-112, 114-120, 122-124, 141-152, 218-219, 284-287, 324, 370-377	SR*3*129	Updated examples to include the new levels for the Attending Code (or Resident Supervision). Also updated examples to include the new fields for ensuring Correct Surgery. For specific options affected by each of these updates, please see the *Resident Supervision/Ensuring Correct Surgery Phase II Release Notes*.
04/04	All	SR*3*100	All pages were updated to reflect the most recent Clinical Ancillary Local Documentation Standards and the changes resulting from the Surgery Electronic Signature for Operative Reports project, SR*3*100. For more information about the specific changes, see the patch description or the *Surgery Electronic Signature for Operative Reports Release Notes*.

(This page included for two-sided copying.)

The following example depicts Service Classification status change when the user updates a case.

The user can also edit diagnosis classification status individually using the *Surgeon's Verification of Diagnosis & Procedures* option or the *Update/Verify Procedure/Diagnosis Codes* option.

Example: Make an Operation Request with Service Classification Information

```
SURPATIENT,TEN  (000-12-3456)        ALLIED VETERAN

   * * * Eligibility Information and Service Connected Conditions * * *

     Primary Eligibility: SERVICE CONNECTED 50% to 100%
     Combat Vet: NO   A/O Exp.: YES    M/S Trauma: NO
     ION Rad.: YES    SWAC: YES        H/N Cancer: NO
     PROJ 112/SHAD: YES

         SC Percent: 100%
  Rated Disabilities: NONE STATED
-------------------------------------------------------------------------------------------------------

Please supply the following required information about this operation:

Treatment related to Service Connected condition (Y/N): N NO
Treatment related to Agent Orange (Y/N): N  NO
Treatment related to Ionizing Radiation Exposure (Y/N): N NO
Treatment related to SW Asia (Y/N): N  NO
Treatment related to PROJ 112/SHAD (Y/N): YES YES

Update all 'OTHER POSTOP DIAGNOSIS' Eligibility and
 Service Connected Conditions with these values? Enter YES or NO. <NO>  Y

Press RETURN to continue
```

Delete or Update Operation Requests
[SRSUPRQ]

The *Delete or Update Operation Requests* option is used to delete a request, to update information, or to change the date of a requested operation. When a user enters this option and selects a patient's name and case, he or she can choose one of the three functions. The three functions are explained below and the next few pages contain examples of how to use them.

The prompts differ for concurrent cases (operations performed by two different specialties at the same time on the same patient), as illustrated in Examples 4, 5, and 6. Whenever a user makes a change or updates information for one of the concurrent cases, the software wants to know if the other case is affected.

The three functions available in this option are also available in the *Request Operations* option when the user selects an outstanding request.

With this function:	The user can:
Delete	Permanently remove an operation request from the software files (Examples 1 and 4). Example 4 shows the deletion of one operation in a set of concurrent cases.
Update Request Information	Change the length of the operation and edit other data fields that were entered earlier (Example 2). The software can automatically update each case in a set of two concurrent cases (Example 5).
Change the Request Date	Alter the operation date of the request (Examples 3 and 6). For a set of concurrent cases to remain concurrent, the user must change the request date for both operations (Example 6).

Perioperative Occurrences Menu
[SRO COMPLICATIONS MENU]

Surgeons use options within the *Perioperative Occurrences Menu* option to enter or edit occurrences that occur before, during, and/or after a surgical procedure. It is also possible to enter occurrences for a patient who did not have a surgical procedure performed. The user can enter more than one occurrence per patient.

This option is locked with the SROCOMP key.

Occurrences will be included on the Chief of Surgery's Morbidity & Mortality Reports.

Please review specific institution policy to determine what is considered an occurrence for any category.

The options included in this menu are listed below. To the left of the option name is the shortcut synonym the user can enter to select the option.

Shortcut	Option Name
I	*Intraoperative Occurrences (Enter/Edit)*
P	*Postoperative Occurrences (Enter/Edit)*
N	*Non-Operative Occurrences (Enter/Edit)*
U	*Update Status of Returns Within 30 Days*
M	*Morbidity & Mortality Reports*

Key Vocabulary

The following terms are used in this section.

Term	Definition
Intraoperative Occurrence	Occurrence that occurs during the procedure.
Postoperative Occurrence	Occurrence that occurs after the procedure.
Non-Operative Occurrence	Occurrence that develops before a surgical procedure is performed.

Intraoperative Occurrences (Enter/Edit)
[SRO INTRAOP COMP]

The *Intraoperative Occurrences (Enter/Edit)* option is used to add information about an occurrence that occurs during the procedure. The user can also use this option to change the information. Occurrence information will be reflected in the Chief of Surgery's Morbidity & Mortality Report.

First, the user should select an operation. The software will then list any occurrences already entered for that operation. The user may edit a previously entered occurrence or can type the word **NEW** and press the **<Enter>** key to enter a new occurrence.

At the prompt "Enter a New Intraoperative Occurrence:" the user can enter two question marks **(??)** to get a list of categories. Be sure to enter a category for all occurrences to satisfy Surgery Central Office reporting needs.

Example: Entering Intraoperative Occurrences

```
Select Perioperative Occurrences Menu Option: I  Intraoperative Occurrences (Enter/Edit)

Select Patient: SURPATIENT,FIFTY          10-28-45      000459999

 SURPATIENT,FIFTY    000-45-9999

1. 06-30-06   CHOLECYSTECTOMY (COMPLETED)

2. 03-10-07   HEMORRHOIDECTOMY (COMPLETED)

Select Operation: 1

SURPATIENT,FIFTY (000-45-9999)        Case #213
JUN 30,2006   CHOLECYSTECTOMY
---------------------------------------------------------------------------------------------------

There are no Intraoperative Occurrences entered for this case.

Enter a New Intraoperative Occurrence: CARDIAC ARREST REQUIRING CPR
NSQIP Definition (2006):
  The absence of cardiac rhythm or presence of chaotic cardiac rhythm
  that results in loss of consciousness requiring the initiation of any
  component of basic and/or advanced cardiac life support. Patients with
  AICDs that fire but the patient does not lose consciousness should be
  excluded.

  CICSP Definition (2004):
  Indicate if there was any cardiac arrest requiring external or open
  cardiopulmonary resuscitation (CPR) occurring in the operating room,
  ICU, ward, or out-of-hospital after the chest had been completely
  closed and within 30 days of surgery.

There are no Postoperative Occurrences entered for this case.

Enter a New Postoperative Occurrence: ACUTE RENAL FAILURE
  NSQIP Definition (2007):
  In a patient who did not require dialysis preoperatively, worsening of
  renal dysfunction postoperatively requiring hemodialysis, peritoneal
  dialysis, hemofiltration, hemodiafiltration or ultrafiltration.

  TIP: If the patient refuses dialysis the answer is Yes to this
  variable, because he/she did require dialysis.

  CICSP Definition (2004):
  Indicate if the patient developed new renal failure requiring dialysis
  or experienced an exacerbation of preoperative renal failure requiring
  initiation of dialysis (not on dialysis preoperatively) within 30 days
  postoperatively.

Non-Operative Occurrence (Enter/Edit)
[SROCOMP]

The *Non-Operative Occurrence (Enter/Edit)* option is used to enter or edit occurrences that are not related to surgical procedures. A non-operative occurrence is an occurrence that develops before a surgical procedure is performed.

At the "Occurrence Category:" prompt, the user can enter two question marks **(??)** to get a list of categories. Be sure to enter a category for each occurrence in order to satisfy Surgery Central Office reporting needs.

Example: Entering a Non-Operative Occurrence

```
Select Perioperative Occurrences Menu Option: N Non-Operative Occurrences (Enter/Edit)

NOTE: You are about to enter an occurrence for a patient that has not had an
operation during this admission. If this patient has a surgical procedure
during the current admission, use the option to enter or edit intraoperative
and postoperative occurrences.

Select PATIENT NAME: SURPATIENT,SEVENTEEN          09-13-28     000455119

   SURPATIENT,SEVENTEEN

1.              ENTER A NEW NON-OPERATIVE OCCURRENCE

Select Number: 1

Select the Date of Occurrence: 063007 (JUN 30, 2007)
Name of the Surgeon Treating the Complication: SURSURGEON,ONE
Name of the Attending Surgeon: SURSURGEON,TWO
Surgical Specialty: GENERAL(OR WHEN NOT DEFINED BELOW)
Select NON-OPERATIVE OCCURRENCES: SYSTEMIC SEPSIS
  Occurrence Category: SYSTEMIC SEPSIS
  NSQIP Definition (2007):
  Sepsis is a vast clinical entity that takes a variety of forms. The
  spectrum of disorders spans from relatively mild physiologic
  abnormalities to septic shock. Please report the most significant level
  using the criteria below:

  1. Sepsis: Sepsis is the systemic response to infection. Report this
  variable if the patient has clinical signs and symptoms of SIRS. SIRS
  is a widespread inflammatory response to a variety of severe clinical
  insults. This syndrome is clinically recognized by the presence of two
  or more of the following:
     - Temp >38 degrees C or <36 degrees C
     - HR >90 bpm
     - RR >20 breaths/min or PaCO2 <32 mmHg(<4.3 kPa)
     - WBC >12,000 cell/mm3, <4000 cells/mm3, or >10% immature (band)
       forms
     - Anion gap acidosis: this is defined by either:
        [Na + K] - [Cl + HCO3 (or serum CO2)]. If this number is
        greater than 16, then an anion gap acidosis is present.
        or
        Na - [Cl + HCO3 (or serum CO2)]. If this number is greater
        than 12, then an anion gap acidosis is present.

    and one of the following:
-     positive blood culture
      - clinical documentation of purulence or positive culture from any
        site thought to be causative
```

2. Severe Sepsis/Septic Shock: Sepsis is considered severe when it is associated with organ and/or circulatory dysfunction. Report this variable if the patient has the clinical signs and symptoms of SIRS or sepsis AND documented organ and/or circulatory dysfunction. Examples of organ dysfunction include: oliguria, acute alteration in mental status, acute respiratory distress. Examples of circulatory dysfunction include: hypotension, requirement of inotropic or vasopressor agents.

* For the patient that had sepsis preoperatively, worsening of any of the above signs postoperatively would be reported as a postoperative sepsis.

Examples:

A patient comes into the emergency room with signs of sepsis - WBC 31, Temperature 104. CT shows an abdominal abscess. He is given antibiotics and is then taken emergently to the OR to drain the abscess. He receives antibiotics intraoperatively. Postoperatively his WBC and Temperature are trending down.
   POD#1 WBC 24, Temp 102
   POD#2 WBC 14, Temp 100
   POD#3 WBC 10, Temp 99
This patient does not have postoperative sepsis as his WBC and Temperature are improving each postoperative day.

Patient comes into the ER with s/s of sepsis - WBC 31, Temp 104. CT shows an abdominal abscess. He is given antibiotics and is taken emergently to the OR to drain the abscess. He receives antibiotics intraoperatively. Postoperatively his WBC and Temp are as follows:
   POD#1 WBC 28, Temp 103
   POD#2 WBC 24, Temp 102.6
   POD#3 WBC 22, Temp 102
   POD#4 WBC 21, Temp 101.6
   POD#5 WBC 30, Temp 104
This patient does have postoperative sepsis because on postoperative day #5, his WBC and Temperature increase. The patient is having worsening of the defined signs of sepsis.

Update/Verify Procedure/Diagnosis Codes
[SRCODING EDIT]

The *Update/Verify Procedure/Diagnosis Codes* option allows the user to enter the final codes and associated information required for PCE upon completion of a Surgery case.

> The procedure and diagnoses codes entered/edited through this option will be the coded information that is sent to the Patient Care Encounter (PCE) package. After the case is coded, the user will select to send the information to PCE.

When the user first edits a case through this option, the values will be pre-populated, using the values for planned codes entered by the nurse or surgeon. If there is no Planned Principal Procedure Code or no Principal Pre-op Diagnosis Code, then the Surgery software will prompt for the final CPT and ICD codes.

Because a case can have more than one procedure and/or diagnosis, the user can associate one or more diagnosis with each procedure. The Surgery software displays the diagnoses in the order in which the user entered them in the case. The user can then associate and reorder the relevant diagnoses to each procedure.

The user can also edit the service classifications for the Postoperative Diagnoses.

The following examples depict using the *Update/Verify Procedure/Diagnosis Codes* option to edit a Bronchoscopy, with no planned CPT or ICD-9 codes entered by a clinician.

Example: Entering Required Information

```
Select CPT/ICD9 Update/Verify Menu Option: UV Update/Verify Procedure/Diagnosis
 Codes
```

```
SURPATIENT,TWELVE (000-41-8719)                              Case #10062
JUN 08, 2005   BRONCHOSCOPY
------------------------------------------------------------------------------------------------------------

Surgery Procedure PCE/Billing Information:

1. Principal Postop Diagnosis Code: NOT ENTERED
2. Other Postop Diagnosis Code:     NOT ENTERED
3. Principal CPT Code: NOT ENTERED
     Assoc. DX:
     NO Assoc. DX ENTERED
4. Other CPT Code:     NOT ENTERED
---------------------------------------------------------------------------------------
 The following information is required before continuing.

Principal Postop Diagnosis Code (ICD9):934.0 934.0 FOREIGN BODY IN TRACHEA
        ...OK? Yes//   (Yes) <Enter>
```

Because the patient has a service-connected status, the Surgery software displays a service-connected prompt:

```

Do you want to print this report for all occurrence categories? YES// NO

Print the report for which Occurrence Category ? ACUTE RENAL FAILURE
  NSQIP Definition (2007):
  In a patient who did not require dialysis preoperatively, worsening of
  renal dysfunction postoperatively requiring hemodialysis, peritoneal
  dialysis, hemofiltration, hemodiafiltration or ultrafiltration.

  TIP: If the patient refuses dialysis the answer is Yes to this
  variable, because he/she did require dialysis.

  CICSP Definition (2004):
  Indicate if the patient developed new renal failure requiring dialysis
  or experienced an exacerbation of preoperative renal failure requiring
  initiation of dialysis (not on dialysis preoperatively) within 30 days
  postoperatively.

Select an Additional Occurrence Category:  <Enter>

Non-Cardiac Risk Assessment Information (Enter/Edit)

[SROA ENTER/EDIT]

The nurse reviewer uses the *Non-Cardiac Risk Assessment Information (Enter/Edit)* option to enter a new risk assessment for a non-cardiac patient. This option is also used to make changes to an assessment that has already been entered. Cardiac cases are evaluated differently from non-cardiac cases and are entered into the software from different options. See the section, "Cardiac Risk Assessment Information (Enter/Edit)" for more information about risk assessments for cardiac cases.

The following options are available from this option, and let the user add in-depth data for a case. To the left is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
PRE	*Preoperative Information (Enter/Edit)*
LAB	*Laboratory Test Results (Enter/Edit)*
O	*Operation Information (Enter/Edit)*
D	*Patient Demographics (Enter/Edit)*
IO	*Intraoperative Occurrences (Enter/Edit)*
PO	*Postoperative Occurrences (Enter/Edit)*
RET	*Update Status of Returns Within 30 Days*
U	*Update Assessment Status to 'COMPLETE'*
CODE	*Alert Coder Regarding Coding Issues*

The following example demonstrates how to create a new risk assessment for non-cardiac patients and how to get to the sub-option menu below.

Creating a New Risk Assessment

1. The user is prompted to select either a patient name or a case. Selecting by case lets the user enter a specific surgery case number. Selecting by patient will display any previously entered assessments for a patient. An asterisk (*) indicates cardiac cases. The user can then choose to create a new assessment or edit one of the previously entered assessments.

2. After choosing an operation on which to report, the user should respond **YES** to the prompt, "Are you sure that you want to create a Risk Assessment for this surgical case ? " The user must answer **YES** (or press the **<Enter>** key to accept the **YES** default) to get to any of the sub-options. If the answer is **NO**, the case created in step 1 will not be considered an assessment, although it can appear on some lists, and the software will return the user to the "Select Patient:" prompt.

3. Preoperative, operative, postoperative, and lab information is entered and edited using the sub-option(s).

If assistance is needed while interacting with the software, the user should enter one or two question marks (**??**) to access the on-line help.

Example: Creating a New Risk Assessment (Non-Cardiac)

```
Select Surgery Risk Assessment Menu Option: N Non-Cardiac Assessment Information (Enter/Edit)

Select Patient: ?

     To lookup by patient, enter patient name or patient ID. To lookup by
     surgical case/assessment number, enter the number preceded by "#",
     e.g., for case 12345 enter "#12345" (no spaces).

Select Patient:    SURPATIENT,THREE 01-01-45  000212453      NSC VETERAN
```

```
 SURPATIENT,THREE  000-21-2453

1. 02-01-95   INTRAOCCULAR LENS (INCOMPLETE)

2. 02-01-95   HIP REPLACEMENT (INCOMPLETE)

3. 09-18-91   FEMORAL POPLITEAL BYPASS GRAFT (INCOMPLETE)

4.  ----      CREATE NEW ASSESSMENT

Select Surgical Case: 4
```

```
 SURPATIENT,THREE  000-21-2453

1. 10-03-91   ABDOMINAL AORTIC ANEURYSM RESECTION (NOT COMPLETE)

Select Operation: 1
```

When selecting a case to be assessed, if coding is completed for the case, and only excluded CPT codes are assigned, the software warns the Nurse Reviewer with the message:
"Based on the CPT Codes assigned for this case, this case should be excluded."
This is only a warning. The Nurse Reviewer may still create the assessment.

When selecting a case to be assessed, if no CPT codes have been assigned to the case, the software warns the Nurse Reviewer with the message:
"No CPT Codes have been assigned for this case."
This is only a warning. The Nurse Reviewer may still create the assessment.

```
Are you sure that you want to create a Risk Assessment for this surgical
case ? YES// <Enter>
```

To enter information for the risk assessment, use the sub-options from this menu option. These options are described in the following sections. For example, to enter operation information, select the *Operation Information Enter/Edit* option.

Pack/Year Cigarette History: ??
        NSQIP Definition (2004):
        If the patient has ever been a smoker, enter the total number of
        pack/years of smoking for this patient. Pack-years are defined as the
        number of packs of cigarettes smoked per day times the number of years
        the patient has smoked. If the patient has never been a smoker, enter
        "0". If pack-years are >200, just enter 200. If smoking history cannot
        be determined, enter "NS". The possible range for number of pack-years
        is 0 to 200. If the chart documents differing values for pack year
        cigarette history, or ranges for either packs/day or number of years
        patient has smoked, select the highest value documented, unless you are
        confident in a particular documenter's assessment (e.g., preoperative
        anesthesia evaluation often includes a more accurate assessment of this
        value because of the impact it may have on the patient's response to
        anesthesia).

Laboratory Test Results (Enter/Edit)
[SROA LAB]

Use the *Laboratory Test Results (Enter/Edit)* option to enter or edit preoperative and postoperative lab information for an individual risk assessment. The option is divided into the three features listed below. The first two features allow the user to merge (also called "capture" or "load") lab information into the risk assessment from the VistA software. The third feature provides a two-page summary of the lab profile and allows direct editing of the information.

1. Capture Preoperative Laboratory Information
2. Capture Postoperative Laboratory Information
3. Enter, Edit, or Review Laboratory Test Results

To "capture" preoperative lab data, the user must provide both the date and time the operation began. Likewise, to capture postoperative lab data, the user must provide both the date and time the operation was completed. If this information has already been entered, the system will not prompt for it again.

If assistance is needed while interacting with the software, entering one or two question marks (**??**) will access the on-line help.

Example 1: Capture Preoperative Laboratory Information

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: LAB Laboratory Test Results
(Enter/Edit)

SURPATIENT,FORTY (000-77-7777)        Case #68112

-------------------------------------------------------------------------------------------------------

Enter/Edit Laboratory Test Results

1. Capture Preoperative Laboratory Information
2. Capture Postoperative Laboratory Information
3. Enter, Edit, or Review Laboratory Test Results

Select Number: 1

This selection loads the most recent lab data for tests performed within 90 days before the
operation.

Do you want to automatically load preoperative lab data ? YES// <Enter>

The 'Time Operation Began' must be entered before continuing.

Do you want to enter 'Time Operation Began' at this time ? YES//  <Enter>

Time the Operation Began: 8:00 (SEP 25, 2003@08:00)

..Searching lab record for latest preoperative test data….

..Moving preoperative lab test data to Surgery Risk Assessment file….

Press <RET> to continue  <Enter>
```

Example 2: Capture Postoperative Laboratory Information

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: LAB Laboratory Test Results
(Enter/Edit)
```

```
1. Capture Preoperative Laboratory Information
2. Capture Postoperative Laboratory Information
3. Enter, Edit, or Review Laboratory Test Results

Select Number: 2

This selection loads highest or lowest lab data for tests performed within 30 days after the
operation.
```

```
Do you want to automatically load postoperative lab data ? YES// <Enter>

'Time the Operation Ends' must be entered before continuing.

Do you want to enter the time that the operation was completed at
this time ?  YES//    <Enter>

Time the Operation Ends: 12:00 (SEP 25, 2003@12:00)

..Searching lab record for postoperative lab test data….

..Moving postoperative lab data to Surgery Risk Assessment file….

Press <RET> to continue
```

Example 3: Enter, Edit, or Review Laboratory Test Results

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: LAB Laboratory Test Results
(Enter/Edit)
```

```
Enter/Edit Laboratory Test Results

1. Capture Preoperative Laboratory Information
2. Capture Postoperative Laboratory Information
3. Enter, Edit, or Review Laboratory Test Results

Select Number: 3

Operation Information (Enter/Edit)
[SROA OPERATION DATA]

The *Operation Information (Enter/Edit)* option is used to enter or edit information related to the operation. At the bottom of each page is a prompt to select one or more operative items to edit. If the user does not want to edit any items on the page, pressing the **<Enter>** key will exit the option. If they are not already there, it is important that the operation's beginning and ending times be entered so that the user can later enter postoperative information.
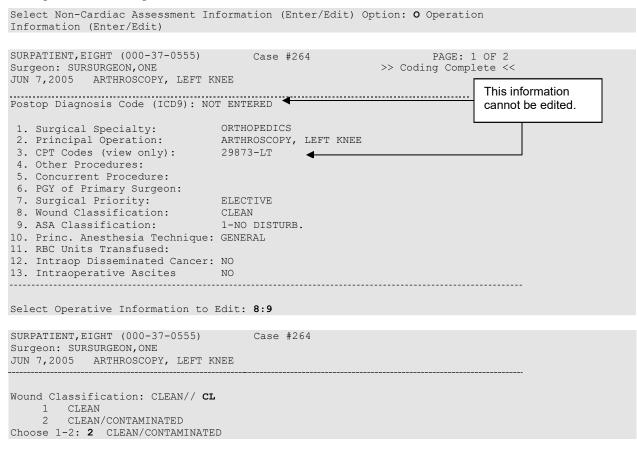

About the "Select Operative Information to Edit:" Prompt

The user should first enter the item number to edit at the "Select Operative Information to Edit:" prompt. To respond to every item on the page, the user should enter **A** for **ALL** or enter a range of numbers separated by a colon (:) to respond to a range of items.

After the information has been entered or edited, the display will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data. If information has been entered for the OTHER PROCEDURES field or the CONCURRENT PROCEDURES field, the summary will display ***INFORMATION ENTERED*** to the right of the items.

If assistance is needed while interacting with the software, the user should enter one or two question marks (**??**) to receive on-line help.

Postoperative Occurrences (Enter/Edit)
[SRO POSTOP COMP]

The nurse reviewer uses the *Postoperative Occurrences (Enter/Edit)* option to enter or change information related to postoperative occurrences (called complications in earlier versions). Every occurrence entered must have a corresponding occurrence category. For a list of occurrence categories, the user should enter a question mark (**?**) at the "Enter a New Postoperative Occurrence:" prompt.

After an occurrence category has been entered or edited, the screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data.

Example: Enter a Postoperative Occurrence

```
Select Non-Cardiac Assessment Information (Enter/Edit) Option: PO Postoperative Occurrences
(Enter/Edit)
```

```
SURPATIENT,EIGHT (000-37-0555)        Case #264

-----------------------------------------------------------------------------------------------

There are no Postoperative Occurrences entered for this case.

Enter a New Postoperative Occurrence: ACUTE RENAL FAILURE
  NSQIP Definition (2007):
  In a patient who did not require dialysis preoperatively, worsening of
  renal dysfunction postoperatively requiring hemodialysis, peritoneal
  dialysis, hemofiltration, hemodiafiltration or ultrafiltration.

  TIP: If the patient refuses dialysis the answer is Yes to this
  variable, because he/she did require dialysis.

  CICSP Definition (2004):
  Indicate if the patient developed new renal failure requiring dialysis
  or experienced an exacerbation of preoperative renal failure requiring
  initiation of dialysis (not on dialysis preoperatively) within 30 days
  postoperatively.

Clinical Information (Enter/Edit)
[SROA CLINICAL INFORMATION]

The *Clinical Information (Enter/Edit)* option is used to enter the clinical information required for a cardiac risk assessment. The software will present one page; at the bottom of the page is a prompt to select one or more items to edit. If the user does not want to edit any items on the page, pressing the **<Enter>** key will advance the user to another option.

About the "Select Clinical Information to Edit:" Prompt

At the "Select Clinical Information to Edit:" prompt, the user should enter the item number to edit. The user can then enter an **A** for **ALL** to respond to every item on the page, or enter a range of numbers separated by a colon (:) to respond to a range of items.

After the information has been entered or edited, the terminal display screen will clear and present a summary. The summary organizes the information entered and provides another chance to enter or edit data. If assistance is needed while interacting with the software, the user can enter one or two question marks (**??**) to receive on-line help.

Example: Enter Clinical Information

```
Select Cardiac Risk Assessment Information (Enter/Edit) Option: CLIN Clinical

Operative Risk Summary Data (Enter/Edit)
[SROA CARDIAC OPERATIVE RISK]

The *Operative Risk Summary Data (Enter/Edit)* option is used to enter or edit operative risk summary data for a cardiac risk assessment. This option records the physician's subjective estimate of operative mortality. To avoid bias, this should be completed preoperatively. The software will present one page. At the bottom of the page is a prompt to select one or more items to edit. If the user does not want to edit any of the items, the **<Enter>**key can be pressed to proceed to another option.

About the "Select Operative Risk Summary Information to Edit:" prompt

At this prompt the user enters the item number to edit. Entering **A** for **ALL** allows the user to respond to every item on the page, or a range of numbers separated by a colon (:) can be entered to respond to a range of items.

Example: Operative Risk Summary Data

LV Aneurysmectomy:           NO       Endovascular Repair:               NO
                                      Other Cardiac procedure(s):     YES
* Other Cardiac procedures (Specify): OTHER CT PROCEDURE #1, OTHER CT PROCEDURE #2,
OTHER CT PROC

Indicate other cardiac procedures only if done with cardiopulmonary bypass
Foreign body removal:          YES
Pericardiectomy:               YES

Other Operative Data details
Total CPB Time:     85 min             Total Ischemic Time: 60 min
Incision Type:          FULL STERNOTOMY
Conversion Off Pump to CPB: N/A (began on-pump/ stayed on-pump)

VII. OUTCOMES
Operative Death:  NO                    Date of Death:

Perioperative (30 day) Occurrences:
  Perioperative MI:                 NO    Repeat cardiac Surg procedure:  YES
  Endocarditis:                     NO    Tracheostomy:                   YES
  Renal Failure Requiring Dialysis: NO    Ventilator supp within 30 days: YES
  Mediastinitis:                    YES   Stroke/CVA:                     NO
  Cardiac Arrest Requiring CPR:     YES   Coma > or = 24 Hours:           NO
  Reoperation for Bleeding:         NO    New Mech Circulatory Support:   YES
  On ventilator > or = 48 hr:       NO

VIII. RESOURCE DATA
Hospital Admission Date:                    06/30/06 06:05
Hospital Discharge Date:                    07/10/06 08:50
Time Patient In  OR:                        07/10/06 10:00
Time Patient Out OR:                        07/10/06 12:30
Date and Time Patient Extubated:            07/10/06 13:13
Date  and  Time  Patient Discharged from ICU: 07/10/06 08:00
Patient is Homeless:                        NS
Cardiac Surg Performed at Non-VA Facility:     UNKNOWN
Resource Data Comments: Indicate other cardiac procedures only if done
    with cardiopulmonary bypass

List of Surgery Risk Assessments

[SROA ASSESSMENT LIST]

The *List of Surgery Risk Assessments* option is used to print lists of assessments within a date range. Lists of assessments in different phases of completion (for example, incomplete, completed, or transmitted) or a list of all surgical cases entered in the Surgery Risk Assessment software can be printed. The user can also request that the list be sorted by surgical service. The software will prompt for a beginning date and an ending date. Examples 1-9 illustrate printing assessments in each of the following formats.

1. List of Incomplete Assessments
2. List of Completed Assessments
3. List of Transmitted Assessments
4. List of Non-Assessed Major Surgical Cases
5. List of All Major Surgical Cases
6. List of All Surgical Cases
7. List of Completed/Transmitted Assessments Missing Information
8. List of 1-Liner Cases Missing Information
9. List of Eligible Cases

Example 1: List of Incomplete Assessments

Print 30 Day Follow-up Letters

[SROA REPRINT LETTERS]

The Surgical Clinical Nurse Reviewer uses the *Print 30 Day Follow-up Letters* option to automatically print a letter, or a batch of letters, addressed to a specific patient or patients.

About the "Do you want to print the letter for a specific assessment?" Prompt

The user responds **YES** to this prompt in order to print a follow-up letter for a single assessment. The software will ask the user to select the patient and case for which the letter will be printed. See Example 1 below.

The user responds **NO** to this prompt if he or she wants to print a batch of follow-up letters for surgical cases within a data range. The software will ask for the beginning and ending dates of the date range for which the letters will be printed. See Example 2 on the following pages.

> If the patient has died, the software notifies the user of the death, and will not print the letter. Also, if a patient has not been discharged, the follow up letter will not print.

Example 1: Print a Single Follow-up Letter

```
Select Surgery Risk Assessment Menu Option: F Print 30 Day Follow-up Letters

Do you want to edit the text of the letter? NO// <Enter>

Do you want to print the letter for a specific assessment ? YES// <Enter>

NINETEEN SURPATIENT                              JUL 18, 2006
                                         Operation Date: 06/18/06
                                         Specialty: GENERAL SURGERY

Dear Mr. Surpatient,

One month ago, you had an operation at the VA Medical Center. We are
interested in how you feel. Have you had any health problems since your
operation ? We would like to hear from you. Please take a few minutes
to answer these questions and return this letter in the self-addressed
stamped envelope.

Have you been to a hospital or seen a doctor for any reason since your
operation ?   _Yes  No

If you answered NO, you do not need to answer any more questions. Please
return this sheet in the self-addressed stamped envelope.

If you have answered YES, please answer the following questions.

    1) Have you been seen in an outpatient clinic or doctor's office ?
       ___ Yes  No

       Why did you go to the clinic or doctor's office ? _____

       Where ? (name and location)_____Date ? _____

       Who was your doctor ? _____

    2) Were you admitted to a hospital ? Yes  No

       Why did you go to the hospital ? _____

       Where ? (name and location)_____Date ? _____

       Who was your doctor ? _____

Please return this letter whether or not you have had any medical problems.
Your health and opinion are important to us. Thank you.

Sincerely,

Surgical Clinical Nurse Reviewer

Monthly Surgical Case Workload Report

[SROA MONTHLY WORKLOAD REPORT]

The *Monthly Surgical Case Workload Report* option generates the Monthly Surgical Case Workload Report that may be printed and/or transmitted to the NSQIP national database. The report can be printed for a specific month, or for a range of months.

Example: Monthly Surgical Case Workload Report – Single Month

```
Select Surgery Risk Assessment Menu Option: M  Monthly Surgical Case Workload Report
```

```
Report of Monthly Case Workload Totals

Print which report?

1. Report for Single Month
2. Report for Range of Months

Select Number (1 or 2): 1//  <Enter>
```

```
This option provides a report of the monthly risk assessment surgical case
workload totals which include the following categories:
     1. All cases performed
     2. Eligible cases
     3. Eligible cases meeting exclusion criteria
     4. Assessed cases
     5. Not logged eligible cases
     6. Cardiac cases
     7. Non-cardiac cases
     8. Assessed cases per day (based on 20 days/month)

The second part of this report provides the total number of incomplete
assessments remaining for the month selected and the prior 12 months.

Compile workload totals for which month and year? MAY 2007//  <Enter>

Do you want to print all divisions? YES//  <Enter>

This report may be printed and/or transmitted to the national database.

Do you want this report to be transmitted to the central database? NO// <Enter>

Print report on which Device: [Select Print Device]
```
·· *printout follows* ··

```
