

# **Scheduling Package Enhancement**

**Patch SD\*5.3\*863**

## **Deployment, Installation, Back-Out, and Rollback Guide**

**February 2024**

**Department of Veterans Affairs**

**Office of Information and Technology (OI&T)**

## Revision History

Date	Version	Description	Author
1/25/2024	1.0.0	Initial Document Draft	
2/27/2024	1.0.1	Changes for TV2	

## **Artifact Rationale**

This document describes the Deployment, Installation, Back-Out, and Rollback Guide for new products going into the VA Enterprise. The plan includes information about system support, issue tracking, escalation processes, and roles and responsibilities involved in all those activities. Its purpose is to provide clients, stakeholders, and support personnel with a smooth transition to the new product or software, and should be structured appropriately, to reflect particulars of these procedures at a single or at multiple locations.

# 1. Introduction

The Deployment, Installation, Back-Out and Rollback Guide defines the ordered, technical steps required to install the product, back out the installation (if necessary), and roll back to the previously installed version of the product. It provides installation instructions for the SD\*5.3\*863 patch

## 1.1 Purpose

The purpose of this Guide is to provide installation steps for the SD\*5.3\*863 patch. The intended audience for this document is the Information Resource Management Systems (IRMS) staff. Some of the main features of this patch are the following:

1. Adds additional Institution and Station Number information to the Clinic Inquiry of the TeleHealth Inquiries.
2. Displays the date the default provider was last updated in the Clinic Inquiry of the TeleHealth Inquiries.
3. Adds the new Missing Institution Report to the Telehealth Management Toolbox.
4. Fixes a hard error generated due to a missing variable when parsing the incoming HL7 messages and sends back the acknowledge message to TMP.
5. Prevents VistA from sending No Appointment Availability transactions for days that should have availability.
6. Corrects code that generated a null subscript error when referencing a Parent IEN in the SDEC APPT REQUEST file (#409.85).

## 1.2 Dependencies

Patch SD\*5.3\*859 must be installed prior to installing SD\*5.3\*863.

## 1.3 Constraints

N/A

# 2. Pre-installation and System Requirements

## 2.1 System Requirements

Package	Minimum Version Needed
VA FileMan	22.0

<b>Package</b>	<b>Minimum Version Needed</b>
Kernel	8.0
MailMan	8.0
Health Level 7	1.6
Order Entry/Results Reporting	3.0
CMOP	2.0
NDF	4.0
Outpatient Pharmacy	7.0
Pharmacy Data Management	1.0
Controlled Substances	3.0
Toolkit	7.3
Drug Accountability	3.0

## **2.2 Platform Installation and Preparation**

N/A

## **2.3 Download and Extract Files**

N/A

## **2.4 Database Creation**

N/A

## **2.5 Installation Scripts**

N/A

## **2.6 Cron Scripts**

N/A

## **2.7 Access Requirements and Skills Needed for the Installation**

N/A

## 3. Installation Procedure

### 3.1 Installation from the Patch Description

1. Choose the PackMan message containing this build. Then select the INSTALL/CHECK MESSAGE PackMan option to load the build.
2. From the Kernel Installation and Distribution System Menu, select the Installation Menu. From this menu,
  - A. Select the Verify Checksums in Transport Global option to confirm the integrity of the routines that are in the transport global. When prompted for the INSTALL NAME enter the patch or build name (ex. SD\*5.3\*863).
  - B. Select the Backup a Transport Global option to create a backup message. You must use this option and specify what to backup, the entire Build or just Routines. The backup message can be used to restore the routines and components of the build to the pre-patch condition.
    - i. At the Installation option menu, select Backup a Transport Global.
    - ii. At the Select INSTALL NAME prompt, enter your build SD\*5.3\*863.
    - iii. When prompted for the following, enter “R” for Routines or “B” for Build.  
  
Select one of the following:  
B     Build  
R     Routines  
  
Enter response: Build
    - iv. When prompted “Do you wish to secure your build? NO//”, press <enter> and take the default response of “NO”.
    - v. When prompted with, “Send mail to: Last Name, First Name”, press <enter> to take the default recipient. Add any additional recipients.
    - vi. When prompted with “Select basket to send to: IN//”, press <enter> and take the default IN mailbox or select a different mailbox.
  - C. You may also elect to use the following options:
    - i. Print Transport Global - This option will allow you to view the components of the KIDS build.
    - ii. Compare Transport Global to Current System - This option will allow you to view all changes that will be made when this patch is installed. It compares all of the components of this patch, such as routines, DDs, templates, etc.
  - D. Select the Install Package(s) option and choose the patch to install.
    - i. When Prompted "Want KIDS to Rebuild Menu Trees Upon Completion of Install? NO//" respond NO.
    - ii. When Prompted "Want KIDS to INHIBIT LOGONs during the install? NO//" respond NO.

- iii. When Prompted "Want to DISABLE Scheduled Options, Menu Options, and Protocols? NO/" respond NO.
- iv. If prompted 'Delay Install (Minutes): (0-60): 0/' respond 0.

## **4. Implementation Procedure**

### **4.1 Post-Install Routine (No Action Required)**

No Post-Install for this patch.

## **5. Back-Out Procedure**

### **5.1 Back-Out Strategy**

See Section 5.6.

### **5.2 Back-Out Considerations**

For item 2, auditing of the DEFAULT PROVIDER field (#16) of the HOSPITAL LOCATION file (#44) is implemented. This must be manually reversed in FileMan.

For items 1, 3, 4 and 5 the Back-out Procedure can be verified by printing the first 2 lines of the routine contained in this patch using the option First Line Routine Print [XU FIRST LINE PRINT].

#### **5.2.1 Load Testing**

N/A

#### **5.2.2 User Acceptance Testing**

User Acceptance Testing will be completed by the time patch SD\*5.3\*863 is released.

### **5.3 Back-Out Criteria**

Back-Out criteria will follow VA guidelines and best practices as referenced in the EO National Data Center Hosting Services document.

## 5.4 Back-Out Risks

N/A

## 5.5 Authority for Back-Out

Back-out will be done only with the concurrence and participation of the development team and appropriate VA site/region personnel. The decision to back-out or rollback software will be a joint decision between the development team, VA site/region personnel and other appropriate VA personnel.

## 5.6 Back-Out Procedure

Prior to installing an updated KIDS package, the site/region should have saved a backup of the routines in a mail message using the Backup a Transport Global [XPD BACKUP] menu option (this is done at time of install). The message containing the backed-up routines can be loaded with the "Xtract PackMan" function at the Message Action prompt. The Packman function "INSTALL/CHECK MESSAGE" is then used to install the backed up routines onto the Vista System.

If the patch was backed up for the build, from the Kernel Installation and Distribution System Menu, select the Installation Menu. Select the Install Package(s) option and choose the patch (xxx\*x.x\*xxx) to install.

The back-out plan is to restore the routines from the backup created.

The Back-out Procedure can be verified by printing the first 2 lines of the routine contained in this patch using the option First Line Routine Print [XU FIRST LINE PRINT]. Once the routine contained in the SD\*5.3\*863 patch has been backed out, the first two lines of the routine will no longer contain the designation of this patch in the patch.

To back out item 2, auditing of the DEFAULT PROVIDER field (#16) of the HOSPITAL LOCATION file (#44) must be manually reversed in FileMan.

# 6. Rollback Procedure

## 6.1 Rollback Considerations

This is not a routine-only patch. Auditing of the DEFAULT PROVIDER field (#16) of the HOSPITAL LOCATION file (#44) is implemented. This must be manually reversed in FileMan.

## 6.2 Rollback Criteria

Rollback criteria will follow VA guidelines and best practices as referenced in the EO National Data Center Hosting Services document.

### **6.3 Rollback Risks**

N/A

### **6.4 Authority for Rollback**

The authority for rollback would come from the project IPT, the VA project manager, and other relevant stakeholders, where applicable.

### **6.5 Rollback Procedure**

There is one item to address to roll back this patch.

For item 2, auditing of the DEFAULT PROVIDER field (#16) of the HOSPITAL LOCATION file (#44) is implemented. This must be manually reversed in FileMan.

There are no other data changes in this patch.

## **7. Additional Information**

If you have any questions concerning the implementation of this application, contact the VA Service Desk at 1-855-673-4357 directly or log a ticket via VA yourIT Service Portal application (<https://yourit.va.gov/va>).

### **7.1 Documentation**

No documentation describing the new functionality introduced by this patch is available.
