## Introduction

The Telehealth Management Program (TMP) integrates with Veterans Health Information Systems and Technology Architecture (VistA) to schedule, cancel or update appointments in support of Telehealth services provided by the VHA. When an appointment is made or canceled on TMP, a message is sent to VistA to update the VistA files with the appointment information. This information is then viewable in VistA Scheduling Options, Computerized Patient Record System (CPRS), Vista Scheduling Enhancements (VSE) Virtual Care Manager (VCM), VA Online Scheduling (VAOS) and other scheduling applications across the VHA. The integration with VistA is bi-directional and so Telehealth related appointments scheduled directly on VistA are also transmitted to TMP.

## VistA Telehealth User Options - Management Toolbox

The Telehealth Management Toolbox menu is a utility that pulls together several different tasks in VistA into one location for the Telehealth user to execute the following menu options. The Telehealth Management Toolbox menu can be found under the *Scheduling Manager's Menu* [SDMGR]:

### Example: Scheduling Manager's Menu and Telehealth Management Toolbox menu

ACR	Ambulatory Care Reporting Menu ...
AM	Appointment Management
CONS	Consult/Request Tracking User Menu ...
SDRR	Recall Reminder Main Menu ...
	Appointment Menu ...
	Automated Service Connected Designation Menu ...
	Outputs ...
	Supervisor Menu ...
	Telehealth Management Toolbox ...
	VistA Scheduling GUI Resource Mgmt Report Data

## Option Overview

The main options included in this menu are listed below. To the left of the option name is the shortcut synonym that the user can enter to select the option.

Shortcut	Option Name
INQ	<i>Telehealth Inquiries</i>
ST	<i>Telehealth Stop Code Add/Edit</i>
CLN	<i>VistA-Telehealth Clinic Update</i>
PR	<i>Provider Add/Edit</i>
DEF	<i>Default Provider Bulk Update</i>
MSN	<i>Clinics Missing Station Number Report</i>
DISP	<i>Display Clinic Availability Report</i>

## Telehealth Inquires [SD TELE INQ]

This option allows the user to inquire using the Clinic, Medical Center Division, Institution, Patient, List Telehealth Stop Codes, and Telehealth Stop Code Lookup.

### Example 1: Inquire by Clinic

The Clinic Query allows you to view information from several different files into a single query.

```
Select Supervisor Menu <TEST ACCOUNT> Option: TELEhealth Management Toolbox

  INQ  Telehealth Inquiries
  ST   Telehealth Stop Code Add/Edit
  CLN  VistA-Telehealth Clinic Update
  PR   Provider Add/Edit
  DEF  Default Provider Bulk Update
  MSN  Clinics Missing Station Number Report
  DISP Display Clinic Availability Report

Select Telehealth Management Toolbox <TEST ACCOUNT> Option: INQ Telehealth Inquiries

                Telehealth Inquiries

Select one of the following:

  C      Clinic
  M      Medical Center Division
  I      Institution
  P      Patient Information
  N      Patient ICN
  L      List Telehealth Stop Codes
  S      Telehealth Stop Code Lookup
  SN     Station Number (Time Sensitive)
  R      Clinic Schedule Queuing Report

Search Option or (Q)uit: C Clinic

Select CLINIC:  `
=====
Clinic          :

**Example 8: Clinic Schedule Queuing Report**

When editing VistA clinic schedules, two transactions typically occur. The old schedule is deleted, which results in a BLOCK CLINIC DAY transaction being sent to TMP. When the new schedule is written to the clinic, an UNBLOCK CLINIC DAY transaction is sent. This results in the clinic being blocked momentarily until the second transaction arrives. This method has created a good deal of network traffic and occasionally causes problems if the transactions arrive out-of-order causing an inadvertent blocked day.

To resolve these problems, a queue is being created to hold all of the clinic schedule edit transactions briefly so that they can be evaluated. All of the BLOCK CLINIC DAY and UNBLOCK CLINIC DAY transaction pairs will be canceled, as they have no net effect on the system, but potentially cause a great deal of network congestion. Those that need to be sent on to TMP will be sent in the correct order.

The Clinic Schedule Queuing Report lists all of the transactions that were queued and the action resulting from the queuing. Actions can be *sent* (transaction was sent to VistA) or *offset* (transactions were cancelled and not sent to VistA).

## Telehealth Stop Code Add/Edit [SD TELE STOP CODE]

This option allows the Holder of the SDTOOL key to Add or Edit the Stop Codes in the SD TELE HEALTH STOP CODE FILE (#40.6), which is responsible for two Real-Time Updates sent to the Telehealth Management Platform (TMP):

### Example 1: Adding new stop code

```

INQ  Telehealth Inquiries
ST   Telehealth Stop Code Add/Edit
CLN  VistA-Telehealth Clinic Update
PR   Provider Add/Edit
DEF  Default Provider Bulk Update
MSN  Clinics Missing Station Number Report
DISP Display Clinic Availability Report

Select Telehealth Management Toolbox <TEST ACCOUNT> Option: ST Telehealth Stop Code Add/Edit

Enter Stop Code: 311
This stop code is NOT in the file, do you want to add it? NO// Y YES
STOP Code: 311 has been Added!

Do you want to edit another stop code? NO//

```

### Example 2: Delete existing stop code

```

INQ  Telehealth Inquiries
ST   Telehealth Stop Code Add/Edit
CLN  VistA-Telehealth Clinic Update
PR   Provider Add/Edit
DEF  Default Provider Bulk Update
MSN  Clinics Missing Station Number Report
DISP Display Clinic Availability Report
R    ClinicSchedule Queuing Report

Select Telehealth Management Toolbox <TEST ACCOUNT> Option: ST Telehealth Stop Code Add/Edit

Enter Stop Code: 311

```

```
This stop code is already in the file, do you want to delete it? NO// Y YES
STOP Code: 311 has been Deleted!
```

```
Do you want to edit another stop code? NO//
```

## VistA-Telehealth Clinic Update [SD TELE CLN UPDATE]

This option allows the Holder of the SDTOOL key to send clinic update message(s) from VistA to TMP without a need to edit the Clinic Profile. The option allows to send clinic update for specific clinic or a list of clinics that meet selected options.

### Example 1: Send update for selected clinic

```
INQ   Telehealth Inquiries
ST    Telehealth Stop Code Add/Edit
CLN   VistA-Telehealth Clinic Update
PR    Provider Add/Edit
DEF   Default Provider Bulk Update
MSN   Clinics Missing Station Number Report
DISP  Display Clinic Availability Report
```

```
Select Telehealth Management Toolbox <TEST ACCOUNT> Option: CLN VistA-Telehealth Clinic Update
```

```
VistA Real-Time Clinic Updates
```

```
Select (C)linic, (S)top Code or (Q)uit: C// linic
```

```
Select Clinic: XXXX/XXX/XX
```

```
Another one:
```

```
=====  
Clinic: XXXX/XXX/XX  
=====
```

```
Sending HL7 message for Clinic: XXXX/XXX/XX
```

```
Press <Enter> to continue
```

### Example 2: Send update for all clinics that meet specific criteria

```
INQ   Telehealth Inquiries
ST    Telehealth Stop Code Add/Edit
CLN   VistA-Telehealth Clinic Update
PR    Provider Add/Edit
DEF   Default Provider Bulk Update
MSN   Clinics Missing Station Number Report
DISP  Display Clinic Availability Report
```

```
Select Telehealth Management Toolbox <TEST ACCOUNT> Option: CLN VistA-Telehealth Clinic Update
```

```
VistA Real-Time Clinic Updates
```

```
Select (C)linic, (S)top Code or (Q)uit: C// S Stop Code
```

```
(A)ctive Clinics, (I)nactive Clinics, (B)oth: A// ctive
```

```
Select division: ALL// ?
```

```
ENTER:
```

- Return for all divisions, or
  - A division and return when all divisions have been selected--limit 20
- Imprecise selections will yield an additional prompt.  
(e.g. When a user enters 'A', all items beginning with 'A' are displayed.)

```

Answer with MEDICAL CENTER DIVISION NUM, or NAME, or FACILITY NUMBER, or
TREATING SPECIALTY
Do you want the entire 16-Entry MEDICAL CENTER DIVISION List?
Select division: ALL//

Press <Enter> to continue:

```

## Default Provider Bulk Update [SD DEFAULT PROVIDER UPDATE]

This option provides users with the ability to bulk update Default Provider for dedicated clinics. A dedicated clinic is one in which only one provider is found with a Default Provider flag. The bulk update operation should be allowed on dedicated clinics only. If a clinic is shared clinic with multiple providers, no updates will take place. Telehealth patient clinics are restricted.

**Example #1:** Search the option using Clinic option to select multiple clinics to update the default provider field for them. (Selected clinics with no Default provider entered and one entry in the PROVIDER multiple found and marked as default will be updated).

```
