Initiated on 12/29/04

Date	Description (Patch # if applic.)	Project Manager	Technical Writer
12/29/04	Updated to comply with SOP 192-352 Displaying Sensitive Data.		REDACTED
12/29/04	Pdf file checked for accessibility to readers with disabilities.		REDACTED

Introduction

Accounts Receivable (AR) Version 4.5 is designed as an enhancement to AR Version 4.0. Its purpose is to incorporate the software necessary for integration with the new Financial Management System (FMS) that is replacing CALM.

Follow the Pre-Installation and the Installation procedures closely to guarantee correct installation of AR V.4.5. Each section of instructions is an actual installation procedure, which displays the computer dialogue occurring during the installation.

Introduction

Pre-Installation Instructions

DESCRIPTION

The Pre-Installation routine examines the current AR system for a clean installation of AR V.4.5.

Among other functions, the Pre-Installation routine removes CALM Identifiers from files 430 and 433. Secondly, the Pre-Installation routine searches the option file and removes all entry and exit actions and routine entries for the PRCA namespaced options. This will insure a clean installation of the new options. Thirdly, the Pre-Installation deletes obsolete menus and options. These include:

PRCAT PAT REF NUMBER	PRCAT CREATE CALM
PRCA APPROPRIATION/GL	PRCAF BILL COMMON SERIES
PRCA GECS BATCH	PRCA GECS BATCH EDIT
PRCA GECS BATCHES STATUS	PRCA GECS BATCHES WAITING TRAN
PRCA GECS CODE EDIT	PRCA GECS CREATE
PRCA GECS DELETE	PRCA GECS KEYPUNCH
PRCA GECS MAIN MENU	PRCA GECS MAINTENANCE USER MENU
PRCA GECS PURGE	PRCA GECS READY FOR BATCHING LIST
PRCA GECS REBATCH	PRCA GECS REPORTS MENU
PRCA GECS RETRANSMIT	PRCA GECS REVIEW CODE SHEET
PRCA GECS TRANSMIT	PRCA GECS TRANSMIT USER
PRCA GECS USER MENU	PRCAD REV TOTALS BY RATE TYPE
PRCAT RX CO-PAY PROCESS	PRCAT LIST NEW TRANSACTION
PRCAT ACCRUAL AMT	RCNR NATIONAL ROOLLUP REPORT

After installation each site will need to use VA Kernel options to remove dangling pointers from the option file. See Post-Installation instructions. Finally, the Pre-Installation routine will delete the data dictionary for files 344.1, which is now the AR Deposit file and 430.4.

The following mailgroups should already be setup from previous versions of Accounts Receivable or from IFCAP installation. If they have not been, they need to be created for proper usage of version 4.5.

- PRCA Adjustment Trans
- IRS
- PRCA ERROR
- FMS

PRE-INSTALLATION PROCEDURE

The following steps should be followed for Pre-Installation of Accounts Receivable Version 4.5:

NOTE: READ INSTALLATION GUIDE IN ITS ENTIRETY BEFORE PERFORMING ANY INSTALLATION PROCEDURES.

1. Ensure that all Cashier Receipts have been approved and posted.
2. Ensure that all AR bills with the status of “NEW BILL” are processed in AR, accounting, and CALM or returned to the service.
3. Ensure that all AR transactions with the status of “PENDING CALM CODE” are processed in accounting.
4. Ensure all AR bills in “REFUND REVIEW” status are processed in AR, accounting and CALM.
5. Verify the post conversion for AR V. 4.0 has been completed. Use the VA FileManager inquiry option into file 412. If the file is missing, the conversion has been completed.
6. Ensure that the following are currently running:
 - KERNEL Version 7.1
 - VA FileMan Version 20
 - MAS Version 5.3 (PIMS)
 - IFCAP Version 5.0
 - IB Version 2.0
 - Generic Code Sheet 2.0.

Installation Instructions

This section contains run-time values for installation, a brief description of the Installation routine, and step-by-step instructions for performing the installation along with an example of these instructions.

OPERATING SPECIFICS

Sizing Information

AR test sites were asked to provide the number of entries made in the three main files for Accounts Receivable using VA FileMan. In addition, the sites ran %ZTBKC to obtain the block count for the associated globals. These files represent the most active and fastest growing AR files. As a result, it is estimated that AR will require the following (note that block sizes are for DSM-11):

- ^RCD(340 - 1/5 block per entry (AR Debtor)
- ^PRCA(430 - 1/2 block per entry (Accounts Receivable)
- ^PRCA(433 - 1/4 block per entry (AR Transaction)
- ^RC(341 - 1/4 block per entry (AR Event)

Please note these are an estimate of what is necessary for only a subset of the dynamic files of AR.

To get the estimate of the number of Accounts Receivable transactions, contact your Fiscal Service.

NOTE: Please be aware that Fiscal is required to have access to this information for 6 to 10 years to meet legal requirements.

Recommended Equipment

Fiscal

- 1 CRT per Accounting Technician
- 1 CRT per Accounts Receivable Clerk
- 1 CRT for Agent Cashier
- 1 CRT for Application Coordinator
- 1 132 column Dot Matrix Printer (for printing free-form bills, pre-printed UB-82 forms, reports, and patient statements)
- 1 Letter Quality Printer (reports and letters)
- 1 Letter Quality Printer (for printing collection letters)

There are three default printer locations associated with the AR package. These printers will be associated with a device number on your DHCP system. You may be able to use the same printer for multiple types of outputs. Please consult with your Application Coordinators as to what outputs may be sent to "shared" printers, and where these printers should be located within the Fiscal Service.

Translation Tables

The following is a list of globals that should be translated to allow access in a distributed operating system environment. **All** globals are accessed by **all** users and all AR data is stored in ^PRC* and RC*.

RCD - This global contains the AR Debtor file (#340).

PRCA - This global contains the Accounts Receivable files.

NOTE: The PRC AK, PRCA, and RC globals may grow very large.
(See the Sizing Information).

RC - Debtor.

RCY - Batch payment.

PRCAK - Archive Purge

RUN-TIME ESTIMATES

Platform	F il e	Entries	Run-Time Estimates	System Resource Usage	Blocks Used
VAX- DSM	4 3 0	280,083	30 min	LIGHT	10,000
MSM-PC	4 3 0	106,000	15 min	LIGHT	3,500

DESCRIPTION

The Installation routine adds the FMS accounting fields to AR files 340, 430, 433, and the new file 347.

INSTALLATION PROCEDURE

The following steps should be followed when installing Accounts Receivable Version 4.5.

1. Contact MCCR/Fiscal and make sure that all UB 92s, Patient Statements, and Follow-up Letters have printed for the day.
2. Backup system(s).
3. Discontinue all Pharmacy labeling and Accounts Receivable activity, e.g. Fiscal, Billing, and Integrated Billing.
4. **Confirm that the Agent Cashier has reconciled and posted all payments. This will ensure that the Agent Cashier Reconciliation Report queued task is completed.**
5. Dequeue all AR tasks that would conflict with the Installation routine. These would be tasks that are scheduled to run during the time of day that the Installation routine will be running. An example might be a report that would print at the same time the installation would be running.
6. Make sure all messages queued for the domain REDACTED.VA.GOV have been transmitted.
7. **Ensure IFCAP V. 5.0 and Generic Code sheet V. 2.0 have been or will be installed *before* using AR V. 4.5.**
8. Sign into UCI where package is to be loaded.
9. Delete all PRCA*, and RC* routines on all systems.
10. Load the Accounts Receivable V.4.5 (PRCA* and RC*) routines in production UCI.
11. Verify that all system variables (DTIME, U, IO, IOST, etc.) are defined and the variable DUZ(0)="@". The DUZ variable must be defined as an active user number and DUZ(0) variable must equal "@" in order to initialize. To do this, perform the following steps at the MUMPS system prompt:

12.

Set up the programmer environment:
- ```
>KILL
>D ^XUP
Setting Up Programmer Environment
Access Code: [Access Code]
Terminal Type set to: C-VT220
Select OPTION NAME: <ret>
>D Q^DI
VA FileMan 20.0
Select OPTION: <ret>
```
- 

13. Install AR V. 4.5 by running the installation routine; see Example of Installation section in this manual. In programmer mode: **^PRCAINST.**
14. Move PRCA\*, and RC\* routines to all systems.
15. Recompile all PRCA\* templates on all systems other than where the inits were run; see Recompiled Templates section, page 23.
16. Review and rebuild your routine map sets to include the new AR routines. You must recompile your routine map sets for the new AR routines to ensure that you do not enable old map sets; see the Mapped Routine section of the Technical Manual.
17. Ensure that the PRCA Nightly Process option is queued to run daily at 2:00am using the Schedule option under Task Manager. An output device is not required because the background job prints several reports and looks at the AR Site Parameter file for the printer.
18. Add users to the FMS mail group. The recipients should include any AR or accounting personnel responsible for AR data.
19. Since the installation process removed some obsolete options, you need to run the Kernel option Fix Option File Pointers under the Menu Management option. This will remove any pointers to these obsolete options that may have existed under local menus.

## EXAMPLE OF INSTALLATION

The following is an example of a successful installation of the Accounts Receivable software package, installed in an account where the AR package was implemented.

---

>D ^PRCAINST

Accounts Receivable Version 4.5 can only be installed at those sites converting to FMS.

Before installing AR 4.5 insure that IFCAP V5.0 and Generic Code Sheet V2.0

IS or WILL BE installed PRIOR to using AR 4.5.

If this process stops you can restart it by redoing the INIT process (D ^PRCAINST).

DO YOU WANT TO CONTINUE? YES  
BEGINNING INSTALLATION

This version (#4.5V6) of 'PRCAINIT' was created on 03-MAR-1995  
(at WASH-ISC @ ALTOONA, PA, by VA FileMan V.20.0)

I AM GOING TO SET UP THE FOLLOWING FILES:

340 AR DEBTOR

Note: You already have the 'AR DEBTOR' File.

341 AR EVENT

Note: You already have the 'AR EVENT' File.

341.1 AR EVENT TYPE (including data)

Note: You already have the 'AR EVENT TYPE' File.  
I will OVERWRITE your data with mine.

342 AR SITE PARAMETER

Note: You already have the 'AR SITE PARAMETER' File.

342.1 AR GROUP

Note: You already have the 'AR GROUP' File.

342.2 AR GROUP TYPE (including data)

Note: You already have the 'AR GROUP TYPE' File.  
I will OVERWRITE your data with mine.

343 AR FORM LETTER (including data)

Note: You already have the 'AR FORM LETTER' File.  
I will OVERWRITE your data with mine.

344 AR BATCH PAYMENT

Note: You already have the 'AR BATCH PAYMENT' File.

344.1 AR DEPOSIT

\*BUT YOU ALREADY HAVE 'AR NATIONAL DATA BASE CRITERIA' AS FILE #344.1!

Shall I change the NAME of the file to AR DEPOSIT? NO// YES

|       |    |             |                  |                     |
|-------|----|-------------|------------------|---------------------|
| 347   | AR | F<br>M<br>S | DOCUMENT         |                     |
| 347.1 | AR | F<br>M<br>S | DOCUMENT<br>TYPE | (including<br>data) |
| 347.2 | AR | F<br>M<br>S | NDB TOTALS       |                     |

## Post Installation Instructions

347.3 REVENUE SOURCE CODE (including data)

347.4 AR/FMS DOCUMENTS (including data)

348 AR NATIONAL DATA BASE CRITERIA (including data)

348.1 BAD DEBT ALLOWANCE

430 ACCOUNTS RECEIVABLE  
Note: You already have the 'ACCOUNTS RECEIVABLE' File.

430.2 ACCOUNTS RECEIVABLE CATEGORY (including data)  
Note: You already have the 'ACCOUNTS RECEIVABLE CATEGORY' File.  
I will OVERWRITE your data withmine.

430.3 ACCOUNTS RECEIVABLE TRANS.TYPE (including data)  
Note: You already have the 'ACCOUNTS RECEIVABLE TRANS.TYPE' File.  
I will OVERWRITE your data withmine.

430.6 AR DEBT LIST  
Note: You already have the 'AR DEBT LIST' File.

430.8 AR ARCHIVE  
Note: You already have the 'AR ARCHIVE' File.

433 AR TRANSACTION  
Note: You already have the 'AR TRANSACTION' File.

## Post Installation Instructions

---

## Post-Installation Instructions

After AR V. 4.5 has been installed, the following will insure that AR is setup correctly and insure a smooth transition from CALM to FMS.

### POST-INSTALLATION PROCEDURE

1. Upon receipt of the FMS Conversion Accounting Fields (CAF) Report from Austin, received as a mail message to the G.FMS mailgroup, use the menu PRCA FMS-CONV MENU to establish bills in AR which are on FMS but not on local AR. Use this menu to adjust local AR records with FMS to correct discrepancies.

2. 

---

Edit the AR Site Parameter File to enter the Group Parameters for bank deposit, site deposit, and hospital site information. The bank deposit is the information for the depository used by fiscal service. Site deposit data is the information that is normally typed on the pre-printed SF 215 fiscal receives from Dept. of Treasury. From the Site Parameter Edit Menu Option:

Select Site Parameter Edit Option:    **GROUP** Parameters

Select AR GROUP NAME:    **BANK DEPOSIT**    *(May have to add as a group name.)*

TYPE: **BANK (DEPOSIT)**

NAME: BANK DEPOSIT//

STREET ADDRESS #1:    **MELLON BANK (CENTRAL)**

STREET ADDRESS #2:    **P.O. BOX 1234**

STREET ADDRESS #3:

CITY: **ANYTOWN**

STATE:    **PA**

ZIP CODE:    **15543**

PHONE NUMBER:    **814 555-1212**

Select AR GROUP NAME:    **SITE DEPOSIT**    *(May have to add as a group name.)*

TYPE: **SITE (DEPOSIT)**

STREET ADDRESS #1:    **YOUR VA MEDICAL CENTER**

STREET ADDRESS #2:    **P.O. BOX 4321**

STREET ADDRESS #3:

CITY: **ANYTOWN**

---

## Post Installation Instructions

---

STATE: **CA**  
ZIP CODE: **50134**  
PHONE NUMBER: **310-555-1212**  
Select AR GROUP NAME: **HOSPITAL** (May have to add as a group name.)  
TYPE: **SITE**  
NAME: HOSPITAL//  
STREET ADDRESS #1: **YOUR VA MEDICAL CENTER**  
STREET ADDRESS #2: **P.O. BOX 1234** (REQUIRED FOR FMS)  
STREET ADDRESS #3:  
CITY: **ANYTOWN**  
STATE: **PA**  
ZIP CODE: **15543**  
PHONE NUMBER: **814 555-1212**

---

**\*NOTE: STREET ADDRESS #2 IS REQUIRED FOR FMS DOCUMENTS...**

3. Edit the agency location code for recording deposits. Contact your Fiscal service for this code.

---

### From the Supervisors Menu:

Select Supervisor's AR Menu Option: AGENCY Location Code (Deposits)

ALC (DEPOSITS): 1090000-1

---

4. 

---

### Using the Kernel Menu Management option:

Select Menu Management Option: FIX Option File Pointers

Do you want to remove any 'Dangling Pointers' from your OPTION File? Y//

---

PLEASE WAIT while I check this out . . .

Your OPTION File is OK (no bad pointers).

5. Delete PRCAL\* routines.
6. Restore routine mapping.

# Routine List

The following is a list of the routines distributed with the Accounts Receivable software package Version 4.5.

|              |              |              |              |              |              |              |              |
