List of Tables

Table 1: Acronyms List.....	2
-----------------------------	---

1. Introduction

The SHRPE product makes enhancements to the Accounts Receivable System (PRCA) to implement functionality that would assist Accounts Receivable users with the treatment of VA patients:

- Accounts Receivable users utilizing the First Party Veteran Charge Report (VCR).
- VHA's Consolidated Patient Account Center (CPAC) users to view first party charges for patients with the High Risk for Suicide flag in order to improve efficiency and accountability in revenue operations.

1.1. Purpose

These release notes cover the description and history of updates in PRCA (RC) routines in patch PRCA*4.5*379. These updates reflect changes to the VCR.

- Implement the new report CPAC High Risk Veteran Reconciliation Report [PRCA HRFS RECONCILIATION RPT] to display charges for High Risk for Suicide (HRFS) patients.
- Enhance the VCR filtering criteria to allow the user to select whether they want to see LETTER DATES or TOTAL PAYMENTS RECEIVED ON BILL NUMBER associated with the patient's data.

1.2. Audience

This document targets users and administrators of the Accounts Receivable (RC) application and applies to the changes made between this release and any previous release of this software.

2. This Release

The following sections provide a summary of the new features and functions added, enhancements and modifications to the existing software with patch PRCA*4.5*379.

2.1. New Features and Functions Added

The PRCA*4.5*379 patch implements the new CPAC High Risk Veteran Reconciliation Report [PRCA HRFS RECONCILIATION RPT] that allows VHA's CPAC users to view first party charges for patients with the High Risk for Suicide flag in order to improve efficiency and accountability in revenue operations.

2.2. Enhancements and Modifications to Existing

The following are the enhancements and modifications made by PRCA*4.5*379:

This patch implements the report that allows VHA's CPAC users to view first party charges for patients with the High Risk for Suicide flag in order to improve efficiency and accountability in revenue operations.

Additionally, this patch makes changes to the First Party VCR. When using the option PRCA FP VETERAN CHRGRPT to display the VCR, after selecting the other filter prompts, the prompt that asked to display LETTERS has been changed. The prompt now reads:

Do you want to see:

1. Letter Dates
2. Total Payments Received on Bill Number
3. Neither

Enter Selection (1,2, or 3) 3//

The default selection is 3 for "Neither". If option 3 is selected, the report will not print the four (4) Letter Dates columns, Total Payments Received on Bill Number, nor any value they contain.

Also, the information used to populate the Medical Date of Service column has been updated. If the Veteran has an entry in the INTEGRATED BILLING ACTION File (#350) the value for the Medical Date of Service column will show the DATE BILLED FROM Field (#.14).

If the BILL/CLAIMS File (#399) is used, the Medical Date of Service column will display the STATEMENT COVERS FROM Field (#151).

2.3. Known Issues

None at this time.

2.4. Product Documentation

The following documents apply to this release:

- Deployment, Installation, Back-out, and Rollback Guide (DIBRG).

Appendix A – Acronyms

Table 1: Acronyms List

Acronym	Definition
CPAC	Consolidated Patient Account Center
DIBRG	Deployment, Installation, Back-Out, and Rollback Guide
HRFS	High Risk for Suicide
IT	Information Technology
OIT	Office of Information and Technology
PRCA	Accounts Receivable
SHRPE	Suicide High Risk Patient Enhancements
