AUDIT AN ELECTRONIC BILL

This option displays a new bill for review, allows the auditor to approve it, and if approved, continues the bill through AR processing.

The option asks if you wish to "Loop" through all New Bills. This feature facilitates the clerk's job eliminating the need to determine the new bills and enter it in for auditing. The computer will then display the information it has stored for each bill. After reviewing and/or editing the bill, you will be prompted for your Electronic Signature Code. If your Electronic Signature Code is entered correctly, you will see a message informing you that an FMS document has been created and sent and you can proceed to audit other bills or return to your menu.

```

*** AUDITED AND RELEASED ***

SET UP AND AUDIT NEW ACCOUNTS RECEIVABLE

This option establishes debtor accounts for AR bills that must be loaded into the system manually. It primarily sets up accounts that have not already been established via the electronic Billing Module of Accounts Receivable. If the debtor already has an account, use the Audit an Electronic Bill option to activate any subsequent bills. The paper bill you are working from should contain all of the information you need, facilitating data entry. Bills sent to you electronically already contain their account information, and you should use the option Audit an Electronic Bill to work with them. If you enter a number that has already been used, you will see a message telling you to choose another bill number.

If the bill you are working with has been sent to you electronically, you must use the Audit an Electronic Bill option to review it. If the bill has been entered into the system but is not complete, use the Edit an Incomplete Accounts Receivable option. If you are working with a Category C type transaction (Means Test), the computer will ask you for the type of care, debtor name, resulting from, date of charges, service, approving official, and finally, for any comments.

The debtor can be a patient, a vendor, an employee or ex-employee, another federal agency, or any other party responsible for paying the bill. When you make new entries, these entries must match entries in the other appropriate files. For example, patients you enter must exist in the Patient file, and vendors you enter must exist in the Vendor file. You may add a new debtor, provided the category of the AR entered does not require a patient or Third Party type debtor. These types of debtors cannot be entered here; they can only be entered in the MAS software. However, if the category does not require a patient or Third Party type debtor (the other debtor types are means test patient, other-person, vendor, and institution), you may add a new debtor.

AMENDED BILL AUDIT

This option displays an amended bill for auditing. This action requires an electronic signature to complete.

Once a bill has been returned to the billing service for amendment and is on a subsequent pass through the audit procedure, there are other actions that may need to be taken, depending on the nature of the amendment. Once the bill has been reactivated, the system reminds you of additional actions.

EDIT AN INCOMPLETE ACCOUNTS RECEIVABLE

This option is used to edit Accounts Receivables that are in a status of Incomplete. The information displayed by this option depends on the category that has been assigned to the incomplete bill.

When you are satisfied that everything is correct, enter your signature code. It is important to emphasize the fact that you should be sure the entries are correct before you attach your electronic signature. To allow you to correct any errors discovered after using this option, the AR Supervisor must return the bill to you. Even if the bill is canceled, it must be re-entered with a new bill number since the system stores the complete bill history along with its number.

DC/DOJ ACTION MENU

This menu contains options necessary to control account activities that deal with the District Counsel or the Department of Justice.

dc/doj action
menu

Refer to DC/DOJ
Returned by DC/DOJ
Re-Refer to DC/DOJ
Debit Voucher (SF5515)
Waived by DC/DOJ
Terminated by DC/DOJ
Compromised by DC/DOJ

REFER TO DC/DOJ

Use this option if a determination has been made that an active account must be referred for collection to government authorities. The system uses the principal balance of the account to determine which type of referral has been made. The

defaults are set so that balances between \$600 and \$1200 will be recorded as having been referred to the District Counsel. Accounts over \$1200 will be recorded as having been referred to the Department of Justice. The minimum/maximum referral amounts vary depending on which District Counsel office you work with. Check these defaults; your supervisor can change the amounts as required.

This option does not automatically pass information to the District Counsel or the Department of Justice. You are just recording account activity in the AR system.

```

REPAYMENT PLAN MENU

ENTER A NEW REPAYMENT PLAN
ADD NEW BILL TO A REPAYMENT PLAN
EDIT EXISTING REPAYMENT PLAN
RPI REPAYMENT PLAN INQUIRY
STR REPAYMENT PLAN STATUS REPORT

The Repayment Plan menu contains options necessary to establish, track, and manage repayment plans. If the debt owed to VA is large enough to create a substantial financial burden, the debtor may request that they repay it in installments. It is

also likely that an installment plan is the agreed upon settlement resulting from negotiations with the District Counsel or the Department of Justice. In either case, the set of options gives the AR clerk the tools to set up and keep track of repayment plans. Payments under these plans are processed by the Agent Cashier payment entry options.

ENTER A NEW REPAYMENT PLAN

This option will allow the user to create a new Repayment Plan. The option prompts for a Debtor name. Once the user confirms the entry, the system will check to see if a plan already exists. If so, the system directs the user to utilize the Edit an Existing Repayment Plan option to make any changes. If no plan exists, the system will display the list of Active bills for the user to select. After selecting the bills to include, the system will list the bills chosen and prompt the user for confirmation (unless ALL is chosen). After selecting bills to include, the system will prompt for the payment amount – the amount the Debtor will pay each month. The minimum is usually \$25 – if a lesser amount is entered, the user will be asked if their Supervisor has approved this monthly payment. If the user answers Yes, the system will save the user ID and enter an Audit Log entry (see Payment Plan Inquiry for the display) to document the approval. The system will then calculate and display the number of payments along with the Due Date of First Payment. If the number of payments exceeds 36, the user will be asked if their Supervisor has approved the number of monthly payments. If the user answers Yes, the system will then save the user ID and enter an Audit Log entry. A summary of the created Repayment Plan is then displayed.

If the number of calculated payments exceeds 60 (the maximum limit), a warning message is displayed, and the user is prompted to reenter the payment amount. Otherwise, the Repayment Plan is established.

An example where the system prompts the user to affirm Supervisor approvals:

Enter a New Repayment Plan
Add New Bill to a Repayment Plan
Edit Existing Repayment Plan
RPI Repayment Plan Inquiry
STR Repayment Plan Status Report

Select Repayment Plan Menu <TEST ACCOUNT> Option:

ADD NEW BILL TO A REPAYMENT PLAN

This option allows the user to add new bills to an existing Repayment Plan. The user may enter the RPP ID number or the Debtor name at the Select Repayment Plan: prompt. The system will ask the user to confirm their choice if a Debtor name is entered. Next, the system will display Debtor demographics and Repayment Plan payment and balance information. The display continues (after the user chooses the Enter key) with a list of bills which are currently included in the Repayment Plan. The next screen (which displays after the user chooses the Enter key) lists the Bills Available for Selection; the user may choose one, many or All of these bills to add to the Debtor's Repayment Plan. The user will be asked to confirm their choice of bills and total amount chosen if 'ALL' is not selected. Once confirmed, the system will display the statement "Bills successfully added to the Plan." The Debtor demographics and the updated plan information screen is then displayed, including the updated balance and number of payments. The display continues (after

the user chooses the Enter key) with the updated list of bills which are included in the Repayment Plan.

REPAYMENT PLAN INQUIRY

The Repayment Plan Inquiry option will provide the user with a succinct report on a particular Repayment Plan. The user may enter the RPP Number or the Debtor name. The system will ask the user to confirm the number or name, and will then provide the output, which can be printed or displayed on-screen. The output includes the Debtor's demographics, Plan ID number, Status and Status date. Plan information such as the Current balance, Original and Total amounts owed, Repayment amount, the Number of payments remaining, and the Original and Total number of payments are also included. The report also includes the list of bills associated with the Plan, the schedule of payments, a list of Forbearances (future functionality) and a record of payments made. In addition, an Audit Log of adjustments to the Plan are listed. Information includes dates, user names, types and standard comments related to plan adjustments made and supervisor approvals.

Select Repayment Plan Menu <TEST ACCOUNT> Option:

REPAYMENT PLAN STATUS REPORT

This option allows users to generate the Repayment Plan Status Report . The report provides a list of Repayment Plans which can be sorted and filtered by the user. The user is first asked to sort by Debtor (N)ame, (S)tatus or (A)ccount Balance. The user may then filter by Debtor (N)ame, (S)tatus or produce the output (U)nfiltered. For the example below, the user sorts by Debtor Name, and then filters for those Repayment plans that are New. Statuses available for user choice include (A)ll, (N)ew, (C)urrent, (L)ate, (D)elinquent, (P)aid in Full, and Clo(S)ed. The user may select one, many or all. Next, the user chooses the minimum number of days the Plan is in that status; entering a zero would provide a list of those added “today.” The next prompt asks whether the output is to be exported to Excel. The Device prompt is then displayed; note that the report output is 132 columns.

The report displays the following data fields:

- Debtor Name
- Last 4 digits of the Social Security Number
- Repayment Plan ID Number
- Original Plan Date (date Plan was created)
- Status and Status Date, and the number of days in that Status
- Last payment
- Current Plan length
- Remaining balance
- Cross Servicing Indicator - whether or not the Debtor associated with this Plan has any bills currently at Treasury for Cross Servicing Debt Referral.
- Number of forbearances granted

ADD AN ADMINISTRATIVE COST

This option allows you to add to the outstanding balance of an account any administrative charges incurred during the debt collection process. The charges include:

- Internal Revenue Service locator charge
- Department of Motor Vehicles locator charge
- Marshal fees or Court Costs
- Credit report costs
- Consumer reporting agency costs

```

3RD PARTY INFORMATION DATA EDIT

This option is provided for editing the Third Party information that is stored along with the bill.

At the time that a bill is entered into the system, either directly by a Billing Clerk or indirectly by another module such as MAS, information about the bill is copied from other files and stored in the Accounts Receivable file. This copied information is used for billing purposes only and can be changed as circumstances require. The files of origin are never changed. Quite often, the AR Clerk will receive the most current information about insurance coverage and debtor's address during the debt collection process.

NOTE: Updating information here with the Edit Debtor's Address option does not alter the Patient file. You should notify MAS of important changes as they occur.

UPDATE 'BILL RESULTING FROM' DATA

This option allows you to edit the "Bill Resulting From" data that appears on all bills.

The "Bill Resulting From" Data is a short phrase used on the follow-up letters to indicate the cause of the bill. If the bill was initially set up with erroneous information, this option gives you a chance to make a correction before the letters are mailed. If you learn, during the course of collecting the debt, that a change needs to be made you can use this option to make the correction and the Reprint The Follow-up Letters option to print new letters.

Select Update Accounts Receivable Option: UPDATE 'Bill Resulting From'
Data

ADJUSTMENTS TO ACCOUNTS RECEIVABLE

This menu contains options necessary for applying adjustments to an account. These options affect the principal balance of a bill due to administrative actions. Adjustment to an AR regular adjustment to a bill can decrease or increase the principal balance. Use other appropriate options to process payments and include administrative charges and interest.

Decrease Adjustment
Increase Adjustment

DECREASE ADJUSTMENT

This option applies a credit transaction to an active bill causing the balance of the bill (and account) to decrease.

Use this option to manually apply decrease transactions to an active bill. A good example of an administrative action that requires an adjustment is a case where MAS has found it necessary to cancel a bill generated by the AR Package. It will be necessary to make a decrease adjustment to the bill, reducing the balance due to zero. The status of the bill will then automatically change to either cancellation or collected/closed.

Situations sometimes arise where a small amount reflecting interest or administrative charges is all that remains of the debt. This occurs because interest and administrative charges are liquidated first, before the payment is applied to the principal balance. A payment of \$100 toward a debt of \$100 plus \$5 interest leaves a principal balance of \$5. Administrative action may be taken to decrease this small balance to zero.

When the balance of a bill is decreased to zero, the status will be automatically changed to either Cancellation or Collected/Closed. The following criteria determine the new status:

Status	Criteria
Collected/Closed	if the bill contains at least one payment transaction
Canceled	if the bill contains no payment transactions

NOTE: If the bill category is Reimbursable Health Insurance, you will be prompted to answer, "Contractual Adjustment?: YES//". This decrease transaction will be flagged as Contractual Adjustment.

If the bill has at least one EEOB pending auto-post, you will be prompted to answer "Marked for Auto-Post. Are you sure?"

```

INCREASE ADJUSTMENT

Use this option to apply a debit transaction to an active bill causing the balance of the bill (and account) to increase.

Use this option to manually apply increase transactions to an active bill. An example of this type of adjustment is a case where an increase in the cost of materials to perform a laboratory test needs to be passed on to the debtor. This is not adjusted automatically, so apply an increase adjustment.

WAIVE AN ACCOUNTS RECEIVABLE

This menu contains options necessary for recording a debt waiver. All waivers are at the discretion of the Fiscal Officer. The waived bills will still be kept on file for six years with a status of Write-Off. These options refer to actions taken by the Fiscal Officer. To handle actions taken by District Counsel or Department of Justice, see the DC/DOJ Action menu.

PARTIAL WAIVER

This option applies a credit transaction to an active bill decreasing the balance by a partial amount. Waivers are logged and tracked within the AR system for the management. This type of transaction can occur at any time during the debt collection cycle. After the amount being waived is entered, the system gives you the opportunity to verify it before proceeding.

```
Select Waive an Accounts Receivable Option: PARTIAL Waiver

FULL WAIVER

This option applies a credit transaction to an account decreasing the balance by the full amount. Waivers are logged and tracked within the AR system for the management.

A Full Waiver makes the bill inactive with a status of Write-off. In the unlikely event that a bill is waived in error, the supervisor will have to take action to re-establish it. You are asked if you are sure that this is the action you want to take, then you are asked for an optional comment.

```
Select Waive an Accounts Receivable Option: FULL Waiver
```

TERMINATE AN ACCOUNTS RECEIVABLE

This menu contains options necessary to stop the debt collection regardless of whether the debt has been paid.

terminate an
accounts receivable
menu

Fiscal Officer Terminated
Compromise Termination

NOTE: A bill that has been waived in full may still require a termination action.

FISCAL OFFICER TERMINATED

This option terminates an entire bill for no further collection. Choosing this option to terminate a bill changes the bill's status to Write-Off.

This decision is made by the Fiscal Officer. If an entire account is being terminated, each bill must be processed individually. Double question marks will give you a list of the reasons for termination. A comment can be included to make the record more meaningful.

Select Terminate an Accounts Receivable Option: fiscal Officer Terminated
Select ACCOUNTS RECEIVABLE BILL NO.: AA0008 000-AA0008 RX CO-
PAYMENT/NSC VET 08-18-92 ARpatient,one ACTIVE \$87.99

1>Please enter a comment on the Fiscal officer termination.

2><ret>

EDIT Option:<ret>

COMPROMISE TERMINATION

This option terminates a portion of an active bill for no further collection. Choosing this option to terminate an active bill changes the bill's status to Write-Off.

This decision is made by the Fiscal Officer. If an entire account is being terminated, each bill must be processed individually. A comment can be included to make the record more meaningful.

RE-ESTABLISH A BILL

This option re-establishes an inactive bill changing its status back to Active. Valid bills to re-establish include bills with the following status:

- Suspended
- Cancellation
- Collected/Closed
- Write-Off

Options to apply this transaction to an account will prompt for a bill, an amount, and a comment. The amount prompt will only appear if the bill has no balance (\$0.00); however, if the bill had a previous balance, the system will automatically re-establish the bill for that amount. Finally, the comment will appear in the description column of the patient statement for the veteran to see.

For example, this supports documenting bankruptcy actions for veterans who have attempted to file bankruptcy. A "transaction" to re-establish an amount should be created, and a prompt for a comment about why this amount is being suspended. A comment like "Patient did not qualify for Bankruptcy" could be entered and would appear on the patient statement to describe why that amount was added to the statement balance.

REFUNDS TO BE APPROVED BY CERTIFYING OFFICIAL

This option allows the user to print all refunds which are pending approval by a certifying official. (See 'Refund Review and Approve for more information.)

DELINQUENT AR REPORTS

This menu contains report options which display accounts that have been in debt for the number of days specified. Since the date range is built into the print specifications, these reports can be set up by the IRM/Site Management Office to run on a recurring basis.

Delinquent AR Reports menu
31-90 Delinquent Accounts
91-180 Days Delinquent Accounts
181-365 Days Delinquent Accounts
Over 365 Days Delinquent Accounts
Print All Delinquent Accounts
Report of AR by Last Activity Date

The reports show bills on an individual basis. An account can have multiple bills that are delinquent. Each one will show as a separate line entry. The column heading ICD refers to the Interest Computation Date for that bill. That is the date of the first follow-up letter.

31-90 DELINQUENT ACCOUNTS

This option displays all delinquent bills that have been in debt anywhere between 31 and 90 days. Use this option to obtain debtors to follow-up for collection of these debts.

91-180 DAYS DELINQUENT ACCOUNTS

This option displays all delinquent bills that have been in debt anywhere between 91 and 180 days. Use this option to obtain debtors to follow-up for collection of these debts.

181-365 DAYS DELINQUENT ACCOUNTS

This option displays all delinquent bills that have been in debt anywhere between 181 and 365 days. Use this option to obtain debtors to follow-up for collection of these debts.

OVER 365 DAYS DELINQUENT ACCOUNTS

This option displays all delinquent bills that have been in debt over 365 days. Use this option to obtain debtors to follow-up for collection of these debts.

PRINT ALL DELINQUENT ACCOUNTS

This option displays all bills that are more than 30 days delinquent. Use this option to obtain debtors to follow-up for collection of these debts.

REPORT OF AR BY LAST ACTIVITY DATE

This option displays a report of all bills that have had no activity before a given date. Typically, these are bills that have been unresolved. The "last activity date" is defined as the following:

- Last time a letter printed (LETTER1, LETTER2, LETTER3)
- Date bill was prepared
- Date status was last updated
- Date the last transaction was entered into the system or Transaction date

BILL NO. CATEGORY	STATUS DATE	DEBTOR BILL PREPARED	BALANCE	ACTIVITY
