Compensation and Pension Records Interchange (CAPRI)

Release Notes

DVBA*2.7*220

July 2020

Department of Veterans Affairs

Office of Information and Technology (OI&T)

Table of Contents

1.   Introduction

The main purpose of this patch is to release a new version of the Compensation & Pension Record Interchange (CAPRI) Graphical User Interface (GUI) that includes defect fixes to the user interface to support user interface modifications.

VistA patch 220 provides defect fixes for the CAPRI GUI and the Automated Medical Information Exchange (AMIE) package.

2.   Purpose

- These CAPRI Release Notes cover the application updates for CAPRI Patch DVBA*2.7*220. Patch DVBA*2.7*220 will also fix the following issues:

  - CAPRI Error #701 & Error #312 reports when attempting to submit Insufficient Exam.
  - CAPRI Screen text is very small and needs to be changed.
  - CAPRI: A&A template not recognizing presence of the DBQ Medical Opinion template
  - Modify CAPRI search error message for non-treating facilities and non-VistA sites to notify Remote CAPRI users that the selected facility for the selected patient is for a non-treating facility or a non-VistA (i.e. Cerner) site.

3.   Audience

This document targets users and administrators of CAPRI Patch DVBA*2.7*220 and the corresponding client (GUI) application and applies to the changes made between this release and any previous release for this software.

4.   This Release

Patch DVBA*2.7*220 will update the Compensation and Pension Record Interchange (CAPRI) GUI to Delphi Version XE10 to implement the new Remote Procedure Call (RPC) broker allowing compliance of Two Factor Authentication (2FA). 2FA will require the use of a Personal Identity Verification (PIV) card. Some users will need to bind their PIV cards prior to gaining access to the latest version of CAPRI. For instructions, use the following link:
https://yourit.va.gov/nav_to.do?uri=%2Fkb_view.do%3Fsysparm_article%3DKB0013359

Patch DVBA*2.7*220 also adds and/or changes the following functionality – Updates to the CAPRI GUI to add functionality to manually transmit documents and data to Veterans Benefits Management Systems (VBMS).

This patch also adds a feature to store failed Disability Benefits Questionnaires (DBQ) transmissions. The user will be prompted to transmit stored DBQ's when CAPRI opens and when CAPRI closes.

This patch also adds two new selections for the Special Consideration File 396.25 – Purple Heart Recipient and Incarcerated Veteran.

This patch also adds a Self-Referral Flag selection to allow users to indicate on the C&P Worksheet Screen if the DBQ is self-referred.

This patch also adds a feature to display Behavioral Patient Record Flags and detailed information if selected.

4.1. Enhancements

N/A

4.2. New Features and Functions Added

N/A

4.3. Modifications to Existing Functionality

The following are modifications to existing functionality:

CAPRI Transmit to Virtual VA button will be replaced on all screens it previously existed with new button "Send to VBA eFolder". Process to retransmit failed transmissions to VBA eFolder up to 5 times after its initial failure has now been automated. If the final transmission fails, the item being transmitted will be stored in CAPRI and the user will be prompted to retransmit before exiting CAPRI or when reopening. The user can also retransmit to VBA eFolder manually at any point.

4.4. Known Issues

Patch DVBA*2.7*220 will also fix the following issues:
- None at this time.

4.5. Defects

4.5.1. INC6623912 – CAPRI Error #701 & Error #312 reports when attempting to submit Insufficient Exam

Problem:

CAPRI is failing to submit Insufficient Exams where the STATION
NUMBER Field (#99) in the INSTITUTION File (#4) exceeds 3 digits. The
criteria CAPRI searches for a STATION NUMBER (#99)
is only designed to handle 3-digit long station numbers. This
prevents CAPRI from submitting the Insufficient Exam, as it is unable
to identify the correct STATION NUMBER (#99) for that exam.

Resolution:

The search criteria used to find the correct STATION NUMBER (#99)

will be modified to allow numbers greater than 3 digits to be located.
This will allow Insufficient Exams to be submitted, as the exam
will not be missing the STATION NUMBER (#99).

4.5.2. INC5666644 – CAPRI Screen text is very small and needs to be changed.

Problem:

Utilizing the CAPRI Properties to change the display settings has a
negative and adverse impact on the CAPRI GUI.

Resolution:

The CAPRI Properties functionality is being removed, in its place
all issues will be handled by the Windows DPI settings. Changing fonts
will no longer be needed on Windows 10 machines as the
Windows 10 DPI font scaling will be responsible for this change.
CAPRI software limitations prevent user preference customization of CAPRI text size using
Windows 10 DPI without degrading viewing of other desktop applications

4.5.3. INC7219443 – CAPRI: A&A template not recognizing presence of the DBQ Medical Opinion template

Problem:

CAPRI is failing to sign/complete Aid & Attendance templates when
paired with a MEDICAL OPINION template.
When the MEDICAL OPINION template name was changed, CAPRI was unable
to determine if the templates contain a medical opinion.

Resolution:

The search criteria CAPRI uses to determine if the templates contain
a medical opinion is being updated.
CAPRI will now accurately determine by name, if a MEDICAL OPINION
template was added.

4.5.4. INC9742570 – CAPRI issues

Problem:

Previously, sites identified through the "Enterprise Search" or "Other
Sites Visited" as not being connectable, were deemed non treating
facilities and a corresponding message would display on the screen.
Going forward, attempts to connect Cerner would display the same
message as CAPRI would not be able to switch to that site, however
Cerner is a medical treating facility, so the message would be

mis-leading.

Resolution:

Going forward, when CAPRI is unable to connect to an entry, it will
now display a more generic message:
"CAPRI cannot connect to the site you've chosen. CAPRI can only
connect to VHA VistA systems. Treatment records stored outside of
VistA, such as those in the Cerner electronic health record systems,
must be accessed via other means."

4.5.5. INC10013067 – CAPRI copy with CRTL+C causes error

Problem:

Attempting to copy text from the CANCEL Comments field in CAPRI using the Keyboard
shortcut CTRL+C will cause CAPRI to crash.

Resolution:

Changes have been made to the CAPRI GUI to allow the keyboard shortcut CTRL+C to function
correctly when working with the CANCEL Comments field in CAPRI.

5. Product Documentation

The following documents apply to this release:

- CAPRI Release Notes, DVBA_27_220_RN
- CAPRI Deployment, Installation, Back-Out, and Rollback Guide, DVBA_27_220_ISG
- CAPRI User Guide, DVBA_27_220_UM
- CAPRI System Administration and Technical Guide, DVBA_27_220_Sys_Adm

All CAPRI documents are available at the VA (Software) Documentation Library (VDL) web site at the
following CAPRI link: https://www.va.gov/vdl/application.asp?appid=133

This website is usually updated within 1-3 days of the patch release date.
