Compensation and Pension Record Interchange (CAPRI)

(CAPRI GUI v. DVBA_27_177_5)

Release Notes

Patch DVBA*2.7*177

December 2011

Department of Veterans Affairs
Office of Enterprise Development
Management & Financial Systems

Preface

Purpose of the Release Notes

The Release Notes document describes the defects addressed in Patch DVBA*2.7*177.

Reference Numbering System

This document uses a numbering system to organize its topics into sections and show the reader how these topics relate to each other. For example, section 1.3 means this is the main topic for the third section of Chapter 1. If there were two subsections to this topic, they would be numbered 1.3.1 and 1.3.2. A section numbered 2.3.5.4.7 would be the seventh subsection of the fourth subsection of the fifth subsection of the third topic of Chapter 2. This numbering system tool allows the reader to more easily follow the logic of sections that contain several subsections.

Table of Contents

1. Overview 1
2. Customer – Veteran's Health Administration (VHA) 1
   - 2.1 Defect Fixes 1
     - 2.1.1. Request Status field is cleared after trying to re-open a cancelled exam – Reported by Saginaw 1
     - 2.1.2. CAPRI should not allow user to switch patients if a template is open – Reported by Alexandria 1
3. Customer – Veterans Benefits Administration (VBA) 2
   - 3.1 Defect Fixes 2
     - 3.1.1. Edit Exam List Parameters option generates List Index Out of Bounds error 2
     - 3.1.2. C&P Final Reports containing more than 1,000 pages causes error 2
   - 3.2 Defect Fixes with Remedy Tickets 2
     - 3.2.1. [HD0000000301104] Patient information is not hidden when switching sites 2

   - 6.1 Required Builds 4
     - 6.1.1. CAPRI GUI v177 Client Software & User Documentation 4
     - 6.1.2. Installation Instructions 4

1. Overview

The main purpose of this patch is to release a new version of the Compensation & Pension Record Interchange (CAPRI) Graphical User Interface (GUI) that includes defect fixes to the user interface.

CAPRI GUI v177 provides defect fixes for the CAPRI GUI application.

The information contained in this document is not intended to replace the CAPRI User Manual. The software defects are briefly discussed so that readers are aware of high level functional changes. The CAPRI User Manual should be used to obtain detailed information regarding specific functionality.

2. Customer – Veteran's Health Administration (VHA)

2.1 Defect Fixes

The following section is an overview of the defects reported by the VHA that have been addressed and corrected in the CAPRI GUI v177 release.

2.1.1. Request Status field is cleared after trying to re-open a cancelled exam – Reported by Saginaw

Issue
The Tools/Manage Compensation and Pension (C&P) Exam Requests option displays Cancelled Exam Requests in C&P Exam Requests list in the C&P Exam Requst Report Management dialog box. Since the business rules were not developed for re-opening a cancelled exam in CAPRI, re-opening a cancelled exam request record results in the record being in an inconsistent state.

Solution
Cancelled exam requests will no longer display in the C&P Exam Requests list for selection to prevent the user from attempting to re-open them.

2.1.2. CAPRI should not allow user to switch patients if a template is open – Reported by Alexandria

Issue
CAPRI allows a user to switch patients when a template is open from the previous patient.

Solution
CAPRI now verifies that there are no open exam templates before allowing the user to switch patients.. When an open exam template exists, CAPRI displays a dialog box warning the user to "Please close the open template" and brings the open template forward after clicking "OK".

3. Customer – Veterans Benefits Administration (VBA)

3.1 Defect Fixes

The following section is an overview of the defects reported by the VBA that have been addressed and corrected in the CAPRI GUI v177 release.

3.1.1. Edit Exam List Parameters option generates List Index Out of Bounds error

Issue
When a user clicks "Go Back" after clicking either "Edit Selected" or "Delete Selected", the "Edit Selected" and "Delete Slected" buttons remain enabled even though no items are selected in the "Custom Lists Defined…" list in the "Edit Exam List Parameters" dialog box. If the user clicks either "Edit Selected" or "Delete Selected" again, CAPRI generates a "List Index Out of Bounds" error.

Solution
The "Edit Selected" and "Delete Selected" buttons will only be enabled when an item is selected in the "Custom Lists Defined…" list.

3.1.2. C&P Final Reports containing more than 1,000 pages causes error

Issue
The Print menu option in the CAPRI Reports dialog box generates an Access Violation error when attempting to print a C&P Final report with more than 1,000 pages. The Access Violation occurs because the existing method used to generate reports depletes the user workstation resources.

Solution
The method used to generate reports has been converted to a system that allows an unlimited number of pages to be generated without depleting the user workstation resources.

3.2 Defect Fixes with Remedy Tickets

The following Patch DVBA*2.7*177 VBA reported defects have been documented in the BMC Software Inc.® Remedy Action Request (AR) System® Change Management tool.

3.2.1. [HD0000000301104] Patient information is not hidden when switching sites

Issue
CAPRI distplays the patient's name, Social Security Number (SSN), Date of Birth (DOB), and Integration Control Number (ICN) at the top of the main CAPRI form after selecting a patient. When the user switches sites, the patient's name and SSN clear, but the DOB and ICN from the previous patient continues to display until after a patient is selected at the new site.

Solution
The DOB and ICN fields will clear at the same time the patient's name and SSN clears when switching sites.

3.2.2. [HD0000000486950] Admission Report for SC Veterans returns error at Pittsburgh

Issue
The Print One Item Per Page menu option in the CAPRI Reports dialog box gnerates an Access Violation error when attempting to print a report with more than l6,000 records. The Access Violation occurs because the existing method used to generate reports depletes the user's workstation resources.

Solution
The data retrieval method has been modified to provide a more robust determination of the end of received Progress Note records.

4. Technical Components

There are no technical components being exported with this patch.

5. Software and Documentation Retrieval

5.1 VistA Patch DVBA*2.7*177

5.1.1. CAPRI GUI v177 Client Software & User Documentation

The CAPRI GUI v177 client software is being distributed as executable CAPRI.exe contained in the zip file [**DVBA_27_P177_05.ZIP**]. The installed executable for this patch is client version 177.05 with a size of 13.8 MB.

The CAPRI GUI v177 client software and documentation for this patch may be retrieved directly using FTP. The preferred method is to FTP the files from:

REDACTED

This transmits the files from the first available FTP server. Sites may also elect to retrieve software directly from a specific server as follows:

OI&T Field Office	FTP Address	Directory
Albany	REDACTD	[anonymous.software]
Hines	REDACTD	[anonymous.software]
Salt Lake City	REDACTED	[anonymous.software]

The following files will be available:

File Name	Retrieval Format	Contents
DVBA_27_P177_05.zip	Binary	File(s) indented below: • CAPRI.exe - CAPRI v177 executable • CAPRI.map - CAPRI error map • CAPRISession.r2w - Reflections session configuration • ssh_config - Secure Shell configuration • DVBA_27_P168_ISG.doc - CAPRI GUI Installation Supplemental Guide
DVBA_27_P177_RN.PDF	Binary	Release Notes (This document)

5.2 Related Documents

The VistA Documentation Library (VDL) web site will also contain the DVBA*2.7*177 Release Notes and updated "CAPRI User Manual." This web site is usually updated within 1-3 days of the patch release date.

The VDL web address for CAPRI documentation is: http://www.va.gov/vdl/application.asp?appid=133

6. Installation Requirements/Notes

6.1 Required Builds

The following is a list of required builds for this distribution (DVBA*2.7*177).

Required Builds:

- DVBA*2.7*168

6.1.1. CAPRI GUI v177 Client Software & User Documentation

The CAPRI GUI v177 client software is being distributed as executable CAPRI.exe contained in the zip file [**DVBA_27_P177_05.ZIP**]). The installed executable for this patch is client version 177.05 with a size of 13.8 MB.

6.1.2. Installation Instructions

Please refer to the CAPRI v168 Installation Supplemental Guide for instructions on the placement of files distributed to support the Attachmate Reflection Secure Shell and the CAPRI error map file that supports the CAPRI error log.
