Preface

This User Manual presents the major features of the Engineering system, utilizing the system screens and menus. This manual may be used by anyone having access to the system, from a novice user to a system manager, as a quick reference text and as a guide to understanding the package as a whole.

Introduction

The Engineering package, otherwise known as Automated Engineering Management System/Medical Equipment Reporting System (AEMS/MERS) was released on a national basis in 1985. It is the outgrowth of work that was begun at the ANYCITY VA Medical Center in the late 1970s.

In September of 1988, Engineering Service and the Office of Acquisition and Materiel Management (A&MM) jointly decided that the Engineering Equipment file should become a shared resource. This version of Engineering includes all data elements required for establishing and maintaining Integrated Supply Management System (ISMS) nonexpendable equipment records.

Related Manuals
This version of the Engineering package frequently invokes VA Kernel Version 6.5 or later and VA FileMan Version 18.0 or later for device selection, task queuing, data entry, and data presentation. Users who are unfamiliar with VA Kernel and/or VA FileMan are advised to consult the appropriate VA Kernel and/or VA FileMan reference manuals. Technical aspects of the Engineering package are addressed in the Engineering Technical Manual.

Functional Description
The DHCP Engineering package consists of nine (9) separate but interrelated modules.

1. Work Order and MERS
2. Project Planning
3. Project Tracking
4. Equipment Management
5. Space/Facility Management
6. Program Management
7. 2162 Accident Reporting
8. Assign (Transfer) Electronic Work Orders
9. IT Equipment Tracking

Work Order and MERS
The Work Order and MERS module generates control numbers for Engineering work requests and provides a means for assigning work requests to specific Engineering shops, assigning personnel to work orders, and charging work orders to specific pieces of equipment. It is the basis for automated repair histories on all types of equipment. Although preventive maintenance inspections are scheduled and recorded using the Equipment Management module, the actual PM work orders that constitute a PM worklist are physically stored in the Work Order file. Special
options exist for displaying incomplete work orders and for transferring electronic work orders (work requests typed into DHCP by end-users and not by Engineering) from a "receiving area" to a working shop.

**Project Planning**
The Project Planning module provides enter/edit options for information that appears on the 5-Year Plan for each project; information required for forms VAF 10-1193; VAF 10-1193a; and NRM, Minor, and Minor Misc. Prioritization Scoring Sheets.

The Approval of Project Application option controls the Chief Engineer's and VAMC Director's sign off on the project application. The security key ENPLK001 controls the Chief Engineer's approval. The security key ENPLK002 controls the VAMC Director's approval. The Chief Engineer must sign off before the VAMC Director. Both must approve before the project application can be transmitted electronically to higher approval authorities.

The Report/Print Menu options provide print-outs of the reports and forms required by project planning.

The Electronic Transmission Menu contains options for electronic transmission of the 5-Year Plan and Project Application data elements.

**Project Tracking**
The Project Tracking module is used to record significant events during construction and non-recurring maintenance projects when the management of such a project has been delegated to the facility. Selected data elements are extracted from the Construction Project file and electronically transmitted to the Regional Construction Office and VACO. In this way, up-to-date project tracking information is made available to all interested parties with a minimum of data entry.

The content of the most recent electronic project progress report is always available for reference. Printouts of progress reports will include an asterisk beside data that differs from what was previously reported. If progress reports are directed to a CRT, changes will be highlighted.

**Equipment Management**
The Equipment Management module contains the options to maintain inventory and preventive maintenance information, print bar code labels, download control programs to portable bar code readers, upload data from portable bar code readers to DHCP, and to manage CMR (Consolidated Memoranda of Receipt).

Equipment records generally exist for non-expendable personal property, building service equipment, and for equipment that is classified as expendable from the
materiel management point of view but which must be periodically inspected by Engineering. These inspections are necessary to satisfy the requirements of JCAHO (Joint Commission on the Accreditation of Healthcare Organizations) and/or other regulatory bodies. The Equipment Management module includes all options necessary for establishing and maintaining a comprehensive preventive maintenance program. Bar coding is now an integral part of the equipment management strategies.

The reports available through the Equipment Management module include:
- Repair histories,
- CMR listings,
- Aggregated repair histories (by Equipment Category),
- Warranty expiration listings,
- Equipment replacement listings,
- Equipment with high failure rates,
- Preventive maintenance workload (by shop).

The Equipment Management module is tightly coupled to the Work Order module. Equipment histories are automatically updated as work orders are closed out. Redundant data entry is avoided whenever possible. Although entries in the equipment repair histories are most commonly made by the system when work orders are closed out, users can also make entries without going through the Work Order module. Equipment records to be updated by direct posting may be selected individually or they may be contained in a VA FileMan sort template. If a sort template is used, it must begin with "ENPOST."

**Program Management**
The Program Management module contains options for site-specific population and/or maintenance of files used in the Engineering package. This option is only available to the Engineering Applications Manager or Engineering Site Manager. It is where the various lists are established and maintained. The Engineering Employee file and the Equipment Category list must be maintained on a continuing basis. Populated copies of the Equipment Category file are available from your supporting ISC upon request.

**Space/Facility Management**
The Space/Facility Management module is used to maintain data on physical locations within the host facility (usually a VA Medical Center). Data elements include square footage; wall, ceiling and floor finishes; window types and treatments; and other architectural features. This module also provides control of locks and keys throughout a facility. Bar coded location labels are printed from the Space file based on room number. Facilities that intend to take advantage of the bar code features in the Equipment Management module should insure that the Building file is completely current and that the Space file contains at least a room
number (including building and division, if applicable) for each physical location. The proper format for a room number (which must be unique and unambiguous) is Room-Building-Division. Most single division facilities will need to enter only Room-Building.

2162 Accident Reporting
The 2162 Accident Reporting module collects the data elements of VA Form 2162 so that accidents and on-the-job injuries can be aggregated and analyzed by Service/Section, cause of accident, nature of accident, etc.

Assign (Transfer) Electronic Work Orders
The Assign (Transfer) Electronic Work Orders option was developed to facilitate the process of transferring electronic work orders from the receiving area(s) to a working shop. Users may also disapprove electronic work orders when necessary. In such a case, the COMMENTS field is automatically mailed to whoever entered the work order, along with the information that their request has been disapproved.

IT Equipment Tracking
The IT Equipment Module allows IT personnel to view and update the non-expendable equipment inventory for IT equipment. It allows IT staff to assign responsibility for IT equipment to individuals and allows individuals to sign electronic hand receipts for the assigned equipment.

IT equipment is identified based on the CMR (EIL) field. If an equipment item is on a CMR with IT TRACKING equal to YES, the equipment is considered tracked IT equipment. The CMR File Enter/Edit [ENCMR] option can be used by Acquisition & Materiel Management (A&MM) to edit the IT TRACKING field.

Only tracked IT equipment can be edited using the Inventory Edit (IT) option. All tracked IT equipment is expected to be assigned to individual IT owners.

The IT Equipment Tracking module is tightly coupled with the Equipment Management module.
Orientation

An overall introduction to the Engineering system, the menu structure, and the VA FileMan conventions used are given in the beginning of the manual. After reviewing this information, the remaining sections may be examined according to user interest and need.

The Engineering package is accessed through a general menu, with an extended sub menu system for each of the general options. The documentation is written based on a system using Kernel 6.5, which is the minimum Kernel version required by the package. If installed on a system using Kernel 7.0, menu options that lead to sub menus will be followed by three leader dots. While actual menus are shown through third-level sub menus, the options appearing on lower-level menus are fully discussed.

The Engineering package does not use help frames. Information is usually available at system prompts by typing < ?>. Some prompts allow entry of < ??> for additional information.

Standard Conventions

A knowledge of general VA FileMan system protocol is all that is required to use the Engineering package. VA FileMan presents the user with line by line information, to which the user may enter responses at system prompts.

The following conventions are used:

1. Most of the prompts contain help or information texts. To view these, enter a < ?> at the given prompt.

2. Many of the prompts contain defaults. For example, "Would you like to review the item information? NO//" has a "no" response as a default. Enter a carriage return <RET> to select the default, or enter an alternative response to override the default.

3. Dates may be entered using the standard DHCP formats of 1 Jan 81, or using the month first, Jan 1 1981, 1/1/81 or 010181. If the year is not entered, the current year is automatically entered. To enter the current date, users may enter a < T> for "today", <T-1> for the previous date, < T-3W > for three weeks before the current date, <T+1> for the next day, and so on. Hours may be entered by typing a number between .5 and 9999.

4. Lists of items for viewer selection are generated at some prompts. Entering an < ^> will halt the generation of the list, and entering a < RET> will continue the listing at the "Choose N-N: //" prompt, where N-N is the range from the first to last list items.
5. For item selection, users may enter the number of the option, or the first few letters of the item name.

6. If a prompt requires line number selection, a range of items may be selected by placing a semicolon between the beginning and ending numbers, as in \(<1;3>\) for items 1 through 3.

Most of the Engineering system options contain screen displays of information. These follow the same conventions as line entry, with several additions.

1. Entry of \(<^>\) at any screen selection will terminate the editing session.

2. Entry of \(<^D>\) will take the user to the next screen (if any).

3. Entry of \(<^U>\) will take the user to the previous screen (if any).

4. Users may jump to any item on the screen by entering \(<^>\) followed by the item number, such as \(<^6>\).

5. Entering \(<?>\) or \(<??>\) at any screen item will display available help text at the bottom of the screen.

6. Entry of \(<^C>\) will display the available screen commands at the bottom of the screen.

7. Users are occasionally asked if they want to "Repaint screen". If the screen has scrolled upward for any reason, it should be repainted.

The Engineering system does not use help frames. As stated above, information is usually available at system prompts, at which \(<?>\) will access the information. Some prompts allow entry of \(<??>\) for additional information.

Package Management

At present, there are no legal requirements pertaining to the package.

Detailed information on all site parameters is available on-line. Simply enter <???> when prompted for a selection.

Special Menu Options

There are five (5) options that may be useful as Primary Menu options for users who have limited needs for access to the Engineering Package. They are:

- ENPMINS (Engineering PM Clerk Main Menu)
- ENCLERK (Engineering Accounting Clerk Main Menu)
- ENSEC (Engineering Secretary Main Menu)
- ENSECFORM (Engineering Foreman Main Menu)
- EWCLERK (Engineering Work Control Main Menu)

A&MM Nonexpendable Equipment Options

The DHCP nonexpendable equipment file is contained within the Engineering package. Acquisition and Material Management Service personnel engaged in property management activities will need access to selected menu options within the Engineering namespace. Menu option ENMM MGR, Nonexpendable Equipment (A&MM), is intended to meet the needs of these users. Users of these options should hold the ENEDNX security key. However, note that holding the ENEDNX key does not automatically give the menu options to the holder. The menus must be specifically assigned. Users of these options should refer to the documentation for the Equipment Management module. Not all PPM employees will need to hold keys to all of the sub-options contained in ENMM MGR so these options may also be assigned individually.

Generation of On-line Documentation

On-line documentation of data dictionaries and routines may be generated through VA FileMan and the Kernel %Index routines.
Package Operation

VistA Engineering Work Order Module

The Engineering Work Order Module (together with the Electronic Work Order Module) is intended as a tool for acquiring, assigning, and recording unscheduled work requests. It is tightly integrated with the Engineering Equipment Module. Note that the VistA Engineering Package is also known as AEMS/MERS.

There are two basic types of work orders, scheduled (preventive maintenance) and unscheduled (all other). Scheduled (or "PM") work order numbers always begin with the character string "PM-". They are actually generated from within the Equipment Module and are normally closed out there as well. PM work orders are essentially line items on the PM worklists that are printed regularly by shop. They are posted to the equipment repair histories at close out time. PM work orders may be edited and closed out via the Work Order Module, but the developers don't recommend it.

The equipment PM schedules (as well as the repair histories) are stored in the Equipment Inv. file. There is also an Equipment Category file that contains standard PM schedules for many different types of equipment. Maintaining the Equipment Category file will automatically maintain the PM schedules for all equipment records that point to it. Options for maintaining both the Equipment Inv. file and the Equipment Category file are found in the Equipment Module.

Unscheduled work orders may be entered either by Engineering Service (using the New Work Order option (ENWONEW)) or by the actual requester (using the Electronic Work Order option (ENWOWARD)). Entries made by the requester are called "electronic work orders" and are processed a little differently from those entered by Engineering. Requesters are not prompted for quite as much information. In particular, they are not expected to know what Engineering Section (or shop) will be assigned to do the work. Electronic work orders are routed to a receiving area (integrated sites usually have two or more such receiving areas) for processing. Someone in Engineering must use the Assign (Transfer) Electronic Work Orders option (ENETRANSFER) to examine unassigned electronic work orders on a regular basis. They should either be assigned to an Engineering Section or disapproved. In the case of disapproval, the Engineering user is asked to make relevant comments and a disapproval message is automatically sent to the requester.

Engineering Sections were originally organized as conventional trade shops (electrical, plumbing, biomedical, etc.), but some facilities have converted to multi-disciplinary teams assigned to certain areas. The package will support either approach, or a combination of the two. The only restriction on the assignment of Engineering Sections is that section numbers in the ranges of 90-99, 190-199, 290-299...990-999 must be reserved for use as electronic work order receiving areas.
Work Order & MERS

Engineering Section file tells the system how much information to request during work order close out. Work order numbers contain the abbreviation of the shop to which the work order is currently assigned and the date on which that work order number was generated. The Engineering Section file is maintained from within the Engineering Program Management Module.

The Edit Work Order Data (ENENT) and Close Out Work Order (ENWOCLOSE) options use the roll-and-scroll edit features of VA FileMan. The Display Work Order option (ENDSY) shows an entire work order in screen format. Users may edit or print the work order from within the screen. They may also request information from the Control Point Activity file. Display Work Order option is often the most frequently used option in the module.

Note that changes to the status of an electronic work order may cause an e-mail message to be sent to the requester. This will happen if the requester has asked for such notification or if the Engineering Software Option for NOTIFICATION requires it. The standard message will clearly describe the work order in question, but sites may enter additional text via the Engineering Site Parameters file if they so desire. The Engineering Software Options file also allows you to have incoming inspection work orders generated automatically whenever an entry is made to the Equipment Inv. file. Engineering Software options and Engineering Site Parameters are maintained from within the Engineering Program Management Module.

When a work order contains a pointer to the Equipment Inv. file, equipment data in the work order itself (model, serial number, etc.) is automatically acquired from the Equipment Inv. file. If your Equipment Inv. file is adequately maintained it should never be necessary to manually enter any equipment information into the work order except the equipment entry itself. When work orders containing a pointer to the Equipment Inv. file are closed out, the equipment repair history is automatically updated.

The labor cost for each work order is computed by the system based on the time charged to each Engineering employee and the wage rate of that employee in the Engineering Employee file. The Engineering Employee file should be updated whenever a wage rate changes and is maintained from within the Engineering Program Management Module.

The Incomplete Work Order Status option (ENWO-STATUS-(XQ)) allows users to list incomplete work orders for an Engineering technician, a specific room, a range of locations, a shop, or an owning service. The list is in summary format, but if you send it to a terminal you can easily get complete information on any incomplete work order that appears.

Work orders in progress may be transferred from one shop to another via the Transfer W.O. to Another Shop option (ENWO-TRANSFER). This option will automatically change the work order number to something that's appropriate for
the new shop. The system keeps a permanent record of the original work order number and has a record of the current work order number, but anything in between will be lost. For example, if an electronic work order is first assigned to the biomedical shop and then transferred to the electric shop, you can look it up by its original work order number (containing the abbreviation of a receiving area) or its current work order number (containing the abbreviation of the electric shop), but not by the work order number that it had while it was assigned to the biomedical shop.

The Print Equip. History by Entry Number option (ENEQHID) allows you to view the service history of a piece of equipment by looking directly at the Work Order file. This option is similar to the Specific Item History option (ENIN-HIST-SPECIFIC) in the Equipment Module, but displays different information. Also note that incomplete work orders will be included with Print Equip. History by Entry Number but not with Specific Item History. On the other hand, archived work orders will be included with Specific Item History but not with Print Equip. History by Entry Number.

The Disapprove Work Order option (ENWODISAP) gives Engineering employees who hold it the ability to disapprove work requests. As previously stated, an e-mail message is automatically sent to the person who entered the work order that is being disapproved.

The Reprint Work Orders (All Shops) option (ENWOREP) will reprint open work orders from all shops based on the work order number. All work orders whose number falls within a user specified date range will be printed. The intent of this option is to give sites a means of batch printing all work orders that were entered in the course of a day.

The Print PM Manhours option (ENPMHOURS) yields a list of time spent on preventive maintenance inspections. The list includes information from a user selected range of shops for a user selected range of PM dates (month and year only). The list is sorted by shop, and then by PM date and employee within each shop.

The Condition Code of Equipment Edit option (ENEQCC) allows users to edit the condition code field on individually selected pieces of equipment. Allowable values are LIKE NEW, GOOD, and POOR. If sites choose to maintain this condition code (which is stored in the Equipment Inv. file) they normally set their Engineering Section file so that it will be updated as part of work order close out, but Condition Code of Equipment Edit is an alternative mechanism.

The Multiple Work Order Entry option (ENWOMULTI) will create (and close, if you so desire) unscheduled work orders for a list of equipment items. A new work order is entered in full for one piece of equipment. After this step, a list of other equipment items is selected from the Equipment Inv. file. The system then creates new work orders for each selected equipment item by copying the original work order and extracting equipment specific information (location, serial number, etc.)
from the Equipment Inv. file. The developers' expectation is that this option may be especially useful in responding to hazard alerts and recall notices.

The Work Order module is accessed from the Engineering Main Menu. The option is selected from the menu by entering the first few unique characters, ("W" in this case) or alternately the corresponding synonym "WO".

The Work Order module should be used when performing operations on work orders. Using FileMan to enter or edit this data is not the preferred method. The following is a display of the procedure for entering the Work Order module.

**Work Order & MERS**

Select Engineering Main Menu Option: WO Work Order & MERS

**Enter New Work Order**

This option is used to enter a new work order into the computer. When the computer asks if you want to enter a new work order, enter <Y> for yes or <N> for no. A work order number will be generated for each work order entered. For example, B891106-001 is a biomedical work order initiated during 1989, the 11th month on the 6th day. The number after the dash tells us that this is the first work order generated that day in the biomedical shop.

**ENGINEERING WORK ORDER MODULE**

1. **Enter New Work Order**
2. Edit Work Order Data
3. Close Out Work Order
4. Display Work Order
5. Incomplete Work Order Status...
6. Transfer W.O. to Another Shop
7. Print Equip. History by Entry Number
8. Disapprove Work Order
9. Reprint Work Orders (All Shops)
10. Print PM Manhours
11. Condition Code of Equipment Edit
12. Multiple Work Order Entry

The following example illustrates the process of entering a new work order.
Select Work Order & MERS Option: 1 Enter New Work Order
Select ENGINEERING SECTION LIST: ??

The Engineering Section List is developed on-site using the Program Management option.

Choose from:
1 OFFICE OF THE CHIEF  2 ADMIN.+CLER.  3 SUPERVISORY OPERAT.  4 UTILITY OPERATIONS  5 AIR CONDITIONING PLT

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF

Want to enter a new work order?
Enter Yes or No: YES//<RET>
WORK ORDER#: OC970424-003 (APR 24, 1997@16:32)

Next, the date is requested. If the date is the day of entry, only <RET> has to be pressed and the date and time will be entered as shown

REQUEST DATE: APR 24,1997@16:32// ??
Examples of Valid Dates:
JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
T-1 (or YESTERDAY), T-3W (for 3 WEEKS AGO), etc.
If the year is omitted, the computer uses the CURRENT YEAR.
You may omit the precise day, as: JAN, 1957
Date (and time if desired) when work request was originally entered.

REQUEST DATE: APR 24,1997@16:32//<RET>
REQUEST MODE: COMPUTER// ??
Indicator of how the work was actually requested.
Choose from:
P PHONE
W WRITTEN
D DELIVERED
V VERBAL
C COMPUTER
REQUEST MODE: COMPUTER//<RET> COMPUTER

EQUIPMENT ID#: 21// ??
Entry in the Equipment File (#6914) to which this work order is to be charged.

Choose from:
1 2221 IN USE
2 91120526 TURNED IN
3 3290A00220 IN USE
4 3301A01107 IN USE

If an equipment entry is specified, the computer will extract available data from the Equipment Inventory file to populate the Work Order fields such as location, owner/department, etc.

EQUIPMENT ID#: 21//<RET>

LOCATION: 221-114// ??
Physical location where work is to be performed.

Choose from:
100-110-JC 110 CCU MEDICINE
101-148 148 C EXAM/TREATMENT ROOM
The PRIMARY TECH ASSIGNED must be someone in the file of Engineering employees. This file is established by the Engineering Applications Manager. If all the technicians have last names starting with different letters, only the first letter of the last name needs to be entered. The computer will pick up the rest of the name from the file. The PRIMARY TECH (if any) is automatically included by the system as an ASSIGNED TECH (multiple) on the subject work order.

Frequently, several employees may be assigned to the same work order. On occasion, they may be from different shops. The ASSIGNED TECH is used to record this information. The ASSIGNED TECH field has entry areas for the number of hours worked, and for the shop to which that employee is assigned. It is here that the number of hours and total labor cost is calculated. The PRIMARY TECH ASSIGNED is only used to show who is responsible for the work. If this person also performed work, s/he should also be entered as an ASSIGNED TECH.

The PRIORITY of the request is the next item. It must be answered with one of the possible responses listed in the display below. Once the single letter is entered, the computer will display the priority name. The default PRIORITY is "A" for average.
Work orders with a priority of "HIGH" or "EMERGENCY" will be shown in bold type on the Incomplete Work Order Status screens.

**PRIORITY:** A// ??
Relative priority of this work request.
Choose from:
- E  EMERGENCY
- H  HIGH
- A  AVERAGE
- L  LOW
- M  MODIFICATION

**PRIORITY:** A// <RET> AVERAGE

The **OWNER/DEPARTMENT** must be selected from the list of entries in the Service/Section file. You may enter the first letter of an OWNER/DEPARTMENT, and the system will display names that start with that letter.

**OWNER/DEPARTMENT:** MAS 5.0 USERS// ??
The service or section for whom work is to be performed.

Choose from:
- ACQUISITION & MATERIAL MGMT  90
- BLIND REHABILITATION
- BUILDING MANAGEMENT
- DENTAL
- ENGINEERING
- FISCAL  04

**OWNER/DEPARTMENT:** MAS 5.0 USERS// INFORMATION
- INFORMATION RESOURCES MGMT  IRM
- INFORMATION SYSTEMS CENTER

**CHOOSE 1-2:** 2

**WORK ACTION** the next field, is a list composed of tasks which may be involved when completing a Work Order. The list is established by the Engineering Applications Manager.

Select **WORK ACTION:** ??
Type of work performed or requested.

Choose from:
- BEYOND ECONOMICAL REPAIR  B1
- CONSULTATION  C1
- CONTRACTOR ASSISTANCE  C2
- COULD NOT DUPLICATE  C3
- DAMAGE/ABUSE  D1

Select **WORK ACTION:** PREVENTIVE MAINTENANCE  P2

The **WORK CENTER CODE** is a five digit number. The first three digits indicate the cost center. The code is a breakdown of work in a particular cost center. For example, biomedical is cost center 555, so its work center codes range from 55501 to 55599.

Since the list of work center codes contains 431 different codes, this is not a practical list for display. You can input the first three digits, display the ones that relate to a cost center, and then choose the correct one. When "555" was entered for this example, the computer displayed five work center codes at a time and prompted for a choice or to continue. The 40th code displayed was chosen.
Category of task to which this work order most closely corresponds.

Choose from:

- 50100/ENG.SUPERVISION
- 50101/ANNUAL LEAVE
- 50102/SICK LEAVE
- 50103/HOLIDAY LEAVE
- 50104/AWOL and LWOP
- 50105/OTHER LEAVE
- 50106/OTHER TIME
- 50107/ADMIN. & CLERICAL
- 50108/SUPERVISION
- 50109/TRAINING
- 50200/UTILITY OPERATIONS

WORK CENTER CODE: 55611 55611/WARD FURNITURE & EQUIP, REPAIR

COMMENTS:

1> <RET>

An option to close the work order is presented next. If answered <YES>, the following set of questions is asked.

Do you want to CLOSE this work order now?
Enter Yes or No: NO/<YES>

WORK PERFORMED (140 char max):
Select ASSIGNED TECH: ENTECH, FOUR/<

ASSIGNED TECH: ENTECH, FOUR/<

HOURS:
SHOP: // BIOMEDICAL
Select ASSIGNED TECH:
TOTAL MATERIAL COST:
VENDOR SERVICE COST:
DATE COMPLETE (or closed): T (JUNE 24, 1997)

If your site has selected AUTO PRINT OF NEW WORK ORDERS as a software option, the work order will automatically print on the device designated for your shop. Otherwise, you will see a dialogue similar to the following.

Print this work order?
Enter Yes or No: YES/<N>

Want to enter a new work order?
Enter Yes or No: NO/<NO>

If this response is <Y>, the entry process repeats itself; if the response is <N>, the user is returned to the Work Order & MERS option menu.
Edit Work Order Data

This option is used to edit previously entered work orders. The computer steps through this option on a line by line basis. If you want to change data, you revise the data by typing it after "//". Most fields require the same information as requested in Enter New Work Order.

ENGINEERING WORK ORDER MODULE

1 Enter New Work Order
2 Edit Work Order Data
3 Close Out Work Order
4 Display Work Order
5 Incomplete Work Order Status ...
6 Transfer W.O. to Another Shop
7 Print Equip. History by Entry Number
8 Disapprove Work Order
9 Reprint Work Orders (All Shops)
10 Print PM Manhours
11 Condition Code of Equipment Edit
12 Multiple Work Order Entry

The following information provides instructions for editing work order data. In the example, a complete list of work orders was requested but only a few are shown. A complete listing is not practical in an operating system since the list may contain several thousand work orders. The specific work order number should be entered, but if you enter the first part of it, the computer will display a list of all work orders beginning at the information entered.

As you step through the work order by pressing <RET> or changing the data, you view the data one line at a time. Sites are free to customize this data input template to meet local needs. If your site has done this then the prompts that you see may be different from what is shown here.
EQUIPMENT ID#: 21/// ??
Entry in the Equipment File (#6914) to which this work order is to be charged.

Choose from:
1  2221    IN USE
2  91120526  TURNED IN
3  3290A00220  IN USE

ENTECH, THREE
ENTECH, FOUR
ENTECH, FIVE
ENTECH, SIX

Select ASSIGNED TECH: <RET>

Select WORK ACTION: PREVENTIVE MAINTENANCE

1 PREVENTIVE MAINTENANCE

Type of work performed or requested.

Choose from:

BEYOND ECONOMICAL REPAIR B1
CONSULTATION C1
CONTRACTOR ASSISTANCE C2
COULD NOT DUPLICATE C3
DAMAGE/ABUSE D1
ELECTRICAL SAFETY E1
EVALUATION (Equipment) E2

Select WORK ACTION: PREVENTIVE MAINTENANCE

STATUS: IN PROGRESS

Added with Version 6.4. May be helpful when printing reports of M&R activity.

Choose from:

1 IN PROGRESS
2 PENDING
3 WAITING ON PARTS
4 WAITING ON VENDOR SERVICE

STATUS: IN PROGRESS

WORK CENTER CODE: 55611/WARD FURNITURE & EQUIP, REPAIR

Category of task to which this work order most closely corresponds.

Choose from:

50100 50100/ENG.SUPERVISION
50101 50101/ANNUAL LEAVE
50102 50102/SICK LEAVE
50103 50103/HOLIDAY LEAVE
50104 50104/AWOL and LWOP

WORK CENTER CODE: 55611/WARD FURNITURE & EQUIP, REPAIR

TOTAL HOURS: ??

Total man-hours by all assigned employees. Calculated by the system automatically.

TOTAL HOURS (between .1 and 9999) can be entered. The system will automatically total the hours of all ASSIGNED TECHS and present this number as the default.

TOTAL HOURS: <RET>

TOTAL MATERIAL COST: ??

Approximate cost of materials needed to complete this task.

MATERIAL SERVICE COST may not exceed $99,999,999.
TOTAL MATERIAL COST: <RET>

VENDOR SERVICE COST: ??
Approximate cost of vendor services needed to complete this task.

VENDOR SERVICE COST may not exceed $99,999,999.

VENDOR SERVICE COST: <RET> ??

Brief description of work actually performed (may be extracted from COMMENTS field). The WORK PERFORMED field will be saved in the EQUIPMENT (Inventory) File (No. 6914) where it will be a permanent part of the device history. In contrast, the COMMENTS field will be removed from disk (on-line) storage when the work order is archived.

WORK PERFORMED (140 char max): <RET>

COMMENTS:
1> <RET>

DATE COMPLETE (or closed): ??
Examples of Valid Dates:
JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
T-1 (for YESTERDAY), T-3W (for 3 WEEKS AGO), etc.
If the year is omitted, the computer uses the CURRENT YEAR.
You may omit the precise day, as: JAN, 1957
Date on which work order is closed out.

DATE COMPLETE (or closed): <RET>

Select WORK ORDER #: <RET>

At the end of the entry, the computer will prompt for another Work Order #. If you press <RET>, you will return to the Work Order & MERS option menu.
Close Out Work Order

During the close out of a work order, users will be prompted for the Work Order number, the Equipment ID#, the manufacturer, model, serial number, the assigned tech, hours, total material cost, work performed, date complete, and comments. If an Equipment ID# is entered then the manufacturer, model, and serial number will be extracted from the Equipment Inv. file.

NOTE: Whatever is entered as Work Performed will be posted to the Equipment History as the work order is being closed out. Comments are retained in the Work Order file, but are not posted to the Equipment History.

Sites are free to modify the input template for work order closeout.

ENGINEERING WORK ORDER MODULE

1 Enter New Work Order
2 Edit Work Order Data

32) WORK PERFORMED:
33) COMMENTS:

WARRANTY EXPIRATION: **06/30/97**
NOTE: Equipment must be isolated and rendered inoperative prior to service.
A complete list of work orders would not be practical to display due to the number of work orders.

The screen display for this option contains exactly the same data as option #2 but all the entries are displayed on the CRT at the same time. This is extremely useful when editing or reviewing the work order entries.

After the display "ENTER/EDIT NO. (1-33, D(DISPLAY), AC(ACCOUNT), P(PRINT)):" appears on the CRT screen, you can enter or edit the data by typing one of the display selection numbers 1-33 and pressing <RET>. By typing <D> and pressing <RET>, you are able to repeat the display. If a transaction number has been entered in the PARTS ORDER # field (23), you can see a display of that transaction (order) by entering <AC>. There has to be an entry for parts order number for there to be a TRANSACTION STATUS REPORT.

This display cannot be edited. Typing <YES> at the item information review prompt will display all items ordered.
Work Order & MERS

<table>
<thead>
<tr>
<th>STOCK NUMBER</th>
<th>ITEM DESCRIPTION</th>
<th>QUANTITY</th>
<th>U/I</th>
<th>UNIT</th>

Press <RETURN> to continue...

Pressing <RET> at the end of the display will return you to the work order request display screen. After entering <RET> at the final prompt of the work order display, the user returns to the Work Order & MERS options menu.
Incomplete Work Order Status

Under the Incomplete Work Order Status option, you may select one of the five categories listed below to generate a particular type of status report.

- Employee
- One Room
- Location Search
- Owner/Department
- Shop

**Note:** You will be asked how many days old a work order must be in order to be included in the status report, whether PM work orders should be included, and whether you want a list of work orders or just a count. You are asked for an Engineering Section at the beginning and then given an opportunity to select ALL shops after all other questions have been answered.

**ENGINEERING WORK ORDER MODULE**

1 Enter New Work Order
2 Edit Work Order Data
3 Close Out Work Order
4 Display Work Order
5 **Incomplete Work Order Status**...
6 Transfer W.O. to Another Shop
7 Print Equip. History by Entry Number
8 Disapprove Work Order
9 Reprint Work Orders (All Shops)
10 Print PM Manhours
11 Condition Code of Equipment Edit
12 Multiple Work Order Entry

The menu providing the Incomplete Work Order Status options is listed below.

Select Work Order & MERS Option:  5 Incomplete Work Order Status

1 Incomplete Work Orders by Employee
2 Incomplete Work Orders for One Room
3 Incomplete Work Orders by Location Search
4 Incomplete Work Orders by Shop
5 Incomplete Work Orders by Owner/Department

**Incomplete W.O. Status by Employee**

This option generates a list of incomplete work requests by assigned technician. The user is prompted to select the ENGINEERING EMPLOYEE of interest, from among those who belong to the chosen shop. If you simply press <RETURN>
instead of selecting a technician, the system will then allow you to enter the word “NOT” and thereby produce a list of incomplete work orders that are not assigned to anyone.

Select Incomplete Work Order Status Option:  1 Incomplete Work Orders by Employee

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF// ??

Choose from:
1 OFFICE OF THE CHIEF
2 ADMIN.+CLER.
3 SUPERVISORY OPERAT.
4 UTILITY OPERATIONS

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF// OFFICE OF THE CHIEF

Select EMPLOYEE NAME (press <ENTER> for unassigned): ??

Choose from:
ENTECH , TWO
ENTECH , THREE
ENTECH , FOUR
ENTECH , FIVE

Select EMPLOYEE NAME (press <ENTER> for unassigned): <RET>

Type 'NOT' to get unassigned work orders: EXIT// NOT

At least how many days old?: (0-999): 0// ??

This response must be a number.

At least how many days old?: (0-999): 0// <RET>

Include PM Work Orders? NO// ??

If you answer 'YES' the Incomplete Work Order list will contain PM work orders. To get a list of 'regular' work orders only, just say 'NO'.

Include PM Work Orders? NO// YES

Count(s) only? NO// ??

Enter either 'Y' or 'N'.

Count(s) only? NO// <RET>

For ALL shops (say 'NO' if you only want OFFICE OF THE CHIEF)? No// (No)

Select output device: <RET>

DEVICE: HOME// UCX/TELNET RIGHT MARGIN: 80// <RET>

The first screen of incomplete work orders is shown in the following display.

The above display can have three lines of data for each work order. If the information for the third line does not exist, no space is allowed for the line. If "2" is entered, the following expanded display for the second Work Order is obtained.
As seen from this display, you can ask for the display to be repeated by entering `<D>`. If parts have been ordered, entering `<AC>` will access the TRANSACTION STATUS REPORT. If no parts have been ordered, there will be no display. When `<P>` is entered, you will be prompted to select a printer.

**Incomplete Work Orders for One Room**

This option generates a list of incomplete work orders for a specific entry in the Space file (#6928).

```
Select Incomplete Work Order Status Option: 2  Incomplete Work Orders for One Room

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF// ??

Choose from:
1  OFFICE OF THE CHIEF
2  ADMIN.+CLER.
3  SUPERVISORY OPERAT.
4  UTILITY OPERATIONS

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF// <RET>

Select ENG SPACE ROOM NUMBER: ??

Choose from:
100-110-JC  110  CCU    MEDICINE
101-148  148  C    EXAM/TREATMENT ROOM
102-148  148  C    EXAM/TREATMENT ROOM
103-110-JC  110  CCU    MEDICINE
105-148  148  C    EXAM/TREATMENT ROOM

200-140  140  F1  MEDICAL ADMINISTRATION OFFICE, SECRETARY
200-148  148  A  LAB
201-114  114  INFORMATION SYSTEMS CENTER OFFICE

At least how many days old?: (0-999): 0// ??
```
This response must be a number.

At least how many days old?: (0-999): 0// <RET>
Include PM Work Orders? NO// YES
Count(s) only? NO// ??
Enter either 'Y' or 'N'.
Count(s) only? NO// ??
For ALL shops (say 'NO' if you only want OFFICE OF THE CHIEF)? No// <RET> (No)
Select output device:
RETURN DISPLAY
DEVICE: HOME// <RET> UCX/TELNET RIGHT MARGIN: 80// <RET>

There are no incomplete work orders that meet the search criteria in the OFFICE OF THE CHIEF Shop.

**Status of Incomplete Work Orders by Location**

This option is very similar to Status By Employee except that here you are asked to supply the location in question and an output device. The computer then prints or displays all the incomplete work orders whose location equals or contains the location entered by the user.

Select Incomplete Work Order Status Option: 3 Incomplete Work Orders by Location Search
Select ENGINEERING SECTION LIST: ??
Choose from:
1 OFFICE OF THE CHIEF
2 ADMIN.+CLER.
3 SUPERVISORY OPERAT.
4 UTILITY OPERATIONS
5 AIR CONDITIONING PLT
^ Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF
Should all LOCATIONS be included? YES// ??
Enter 'NO' if you want to screen your list by DIVISION, BUILDING, WING, and/or ROOM. If you enter 'YES' then all locations will be included and the sort order will be DIVISION, BUILDING, WING, and finally ROOM.

Should all LOCATIONS be included? YES// NO
Select one of the following:
1 DIV, BLDG, WING, ROOM
2 DIV, WING, BLDG, ROOM
3 DIV, BLDG, ROOM
4 BLDG, WING, ROOM
5 WING, BLDG, ROOM
6 BLDG, ROOM
7 WING, ROOM
8 ROOM
Choose 'SELECT BY' Parameters: 3//  1 DIV, BLDG, WING, ROOM

Would you like to specify a range of LOCATIONS? NO/</RET>

Enter 'YES' if you want only some DIVISIONS, BUILDINGS, WINGS, or ROOMS. Enter 'NO' if you want to include all LOCATIONS.

Would you like to specify a range of LOCATIONS? NO/<RET>

At least how many days old?: (0-999): 0// <RET>

At least how many days old?: (0-999): 0// <RET>

Include PM Work Orders? NO/ <RET>

Count(s) only? NO/ <RET>

Enter either 'Y' or 'N'.

Count(s) only? NO/ <RET>

As in the first status option, you can have an expanded display of any work order (illustrated in the preceeding examples) and can go from that to the TRANSACTION STATUS REPORT if parts have been ordered.

By pressing <RET>, you return to the Incomplete W.O. Status Category menu.

**Status of Incomplete Work Orders by Shop**

In this option the computer prompts you for the name of the Shop, number of days old and then prints out all incomplete work orders assigned to that section. This option also prompts for whether PM work orders should be included in the display. An expanded display of any Work Order shown is also available.

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF// <RET>

Press <RETURN> to continue

Select EQUIPMENT ENTRY #: < RET>

The headings indicate the data that can be obtained from this display. This data would be useful for replacement decisions on equipment.

Return to the Work Order & MERS option menu by pressing < RET> after the above display.

NOTE: You may also obtain a type of Equipment Repair History from within the Equipment Management module (option ENIN-HIST-SPECIFIC). There are two major differences.

a) Incomplete work orders will appear on a Work Order History, but not on the Equipment Management History.

b) PM work orders that have been deleted will appear on the Equipment Management History, but not on a Work Order History.
Disapprove Work Order

This option records disapproval of a work request. Facilities which allow entry of Work Orders by non-Engineering personnel (commonly known as Electronic Work Requests) will probably make the greatest use of this option.

ENGINEERING WORK ORDER MODULE

1 Enter New Work Order
2 Edit Work Order Data
3 Close Out Work Order
4 Display Work Order
5 Incomplete Work Order Status ...
6 Transfer W.O. to Another Shop
7 Print Equip. History by Entry Number
8 Disapprove Work Order
9 Reprint Work Orders (All Shops)
10 Print PMManhours
11 Condition Code of Equipment Edit
12 Multiple Work Order Entry

The following example illustrates the process of disapproving a work order.

Select Work Order & MERS Option: 8 Disapprove Work Order
Select WORK ORDER #: B970408-004 102-148 OPEN WORK ORDER
TASK DESCRIPTION (60 char): OPEN WORK ORDER// Open for miscellaneous preventive maintenance.
COMMENTS:
1> <RET>
DATE COMPLETE (or closed): T// ??
   Date on which work order is closed out.
DATE COMPLETE (or closed): T// <RET> (MAY 08, 1997)

Disapproval of an Electronic Work Order will automatically generate a MailMan message to the person who entered the request. This message will contain your COMMENTS. For this feature to work properly, you must enter your COMMENTS before you enter the DATE COMPLETE (or closed).
Reprint Work Orders (All Shops)

This option will reprint the work orders that were created within a specified range of dates. Reprint can be requested for all sections, or for a particular section entered after the default "ALL//" prompt. Work orders that have already been closed out will not be reprinted. Due to the length of this display, a single work order will be used to illustrate this feature. Here is an example of the process.

The following example illustrates the process of reprinting a work order for all shops.

Select Work Order & MERS Option: 9 Reprint Work Orders (All Shops)

2  50  MHZ EISA PC  8  AB34300UER  COMPUTER-PC-ADMINISTRATIVE  TURNED IN

CHOOSE 1-2:  1
CONDITION CODE:  ??

Condition code of equipment is normally determined by an Engineering technician and entered during close out of a work order. The code are:

(1) LIKE NEW - Like new condition, good performance record, low service cost.
(2) GOOD - Middle of service life, fair performance record, increasing service cost.
(3) POOR - Approaching end of service life, poor performance record, high service cost, consider budgeting for replacement.

Choose from:
1  LIKE NEW
2  GOOD
3  POOR
CONDITION CODE:  2  GOOD

Select EQUIPMENT INV. ENTRY NUMBER:  <RET>

Multiple Work Order Entry
This option allows the user to create (and optionally close) multiple work orders for equipment. First, a new work order is entered in full (see Enter New Work Order if explanations of the prompts are needed) and then additional equipment is selected.

Equipment can be selected by equipment category, manufacturer, and/or model. Alternatively, equipment can be individually specified. The computer will create new work orders for each selected equipment item by copying the original work order. Equipment-specific data on the work orders (e.g. location, serial number, etc.) will be obtained from the Equipment Inv. file.

5 Year Facility Plan and Project Applications

Note: The original Project Planning menu option contained all the options relevant to Project Applications and The 5 Year Facility Plan. It has now been split into two menu options; one for 5 Year Facility Plan and one for Project Applications. The new menu structure more clearly indicates which options are applicable to the Five Year Plan process and which options are applicable to the Project Application process. The options are selected from the Engineering main menu by entering the first few letters of the option or the synonym s "FYFP" for the 5 Year Facility Plan options or "APPL" for the Project Applications options.

Five Year Facility Plan (FYFP) Menu

Select Engineering Main Menu Option: **fyfp** Five Year Facility Plan (FYFP)

- Edit 5-Yr Plan Project
- Activations E/E
- Five Year Facility Plan Report (132 columns)
- Validate 5-Yr Plan Projects
- Transmit 5-Yr Plan Projects
- Communication Log Display for a Project

Edit 5-Yr Plan Project    Option name: ENXFM02
This option enables entry of information that appears on the 5-Yr Plan for each project.

Activations E/E    Option name: ENXFM18
This option enables enter/edit of project activations information.

Five Year Facility Plan Report (132 columns)    Option name: ENXFM11
This option prints the 5-Yr Plan, selecting items on the basis of Funding Year A/E, Funding Year Construction, FY Rent Starts, and Project Status fields. The range of plan years printed can be selected with the Start with Year: and the Go to Year: prompts. The output can be further modified with the Level of Detail: prompt. Take the default responses to these three prompts to generate a standard 5-Yr Plan report.

Validate 5-Yr Plan Projects    Option name: ENXFMFV
This option validates selected construction and lease projects. Only data which pertains to the Five Year Facility Plan (FYFP) is checked. Any validation errors or warnings are listed in a detailed report.

Transmit 5-Yr Plan Projects    Option name: ENXFMFX
This option transmits construction and lease project data to the Regional Construction Database for selected projects. Only data which is pertinent to the Five Year Facility Plan (FYFP) is sent. Selected projects are automatically validated prior to the actual transmission. The transmitter is a recipient of any created mail messages that are sent to the Regional Construction Database.

Communication Log Display for a Project    Option name: ENXFM20
This option displays the communication log for a selected project. The communication log contains information on network messages exchanged between the site and the regional construction database. "5-Yr" indicates Five Year Plan related messages and "Appl" indicates project application related messages.
**Edit 5-Yr Plan Project**

The following table shows those fields which either control or are controlled by other fields. The right hand column shows the controlling conditions. The controlling condition must be true for the field to be asked.

MEDICAL CENTER: ANYCITY/

A new DIVISION (#6910.3) file has been added. It contains a list of valid divisions for a multi-divisional facility. It can be edited using the DIVISION [ENDIV] option on the Program Management menu. There is no need to enter any divisions if it is not applicable for your site. The DIVISION (#176) field in the CONSTRUCTION PROJECT (#6925) file has been changed to point to the new Division file.

DIVISION: ??
This field is used to identify the division of a multi-divisional facility. It can be used to generate a division specific report when printing the Five Year Facility Plan.

Choose from:

- ALPHA
- BETA
- DIVISION

DIVISION:

Project titles entered with lowercase letters will automatically be converted to all uppercase letters. This change has been made to promote consistency in national databases and reports.

PROJECT TITLE: NHCU BED CONVERSION// ??
Official title of project.

PROJECT TITLE: NHCU BED CONVERSION//

FACILITY TYPE: VETERANS HEALTH ADMIN// ??
This field is important to enable restriction of Project Functional and Budget Categories and to enable reporting by Facility Type. Note: The cross reference was added to 2 reasons: a) Facilitate reporting by facility type. b) Force the filing by DIE so that the selection screens /filters work properly for Functional and Budget Categories.

Choose from:

- VHA VETERANS HEALTH ADMIN
- VBA VETERANS BENEFITS ADMIN
- NCS NATIONAL CEMETARY SERVICE

FACILITY TYPE: VETERANS HEALTH ADMIN//

PROGRAM: NRM// ??
This field is a set of codes used to classify program type.

Choose from:

- MA MAJOR
- MI MINOR
- MM MINOR MISC.
- NR NRM
A capture of the dialogue for the LEASE prompts may be seen following this capture.

PROGRAM: NRM//
STATUS: PLAN// ??

The default STATUS when entering a new project is "DRAFT". The status must be changed to "DESIGN PROGRAM", "A/E", "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", "AUTHORIZED", "INVITATION FOR BID", "BID OPEN" or "CONSTRUCTION" to be included as a current year project in the Five Year Plan. The status must be changed to "PLAN", "NEW PROJECT APPLICATION", "DESIGN PROGRAM", "A/E" "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", or "AUTHORIZED" to be included as a budget year or later project in the Five Year Plan.

DRAFT PROJECT
INVITATION FOR BID
NEW PROJECT APPLICATION
NON- VIABLE
PLAN
UNAPPROVED/VIABLE

STATUS: PLAN//
PROJECT CATEGORY: PATIENT ENVIRONMENT/PRIVACY// ??
This field is a pointer to the OFM Project Category File (#7336.8). The field designates the project functional category, and determines prioritization points for NRM, Minor, and Minor Misc. programs.

Choose from:
- ARCHITECTURAL BARRIERS
- ASBESTOS

- ...
- ...
- WASTE MANAGEMENT
- WINDOWS

PROJECT CATEGORY: PATIENT ENVIRONMENT/PRIVACY/

There is a new required field for NRM projects called BONUS CATEGORY (#158.8). This field is scope dependent and 'Not Applicable' should be entered as the Bonus Category if none of the other choices involve 50% or more of the project scope.

BONUS CATEGORY: NHCU/ ??

This field designates the bonus category which involves 50% or more of the project scope and determines prioritization points for NRM projects. 'Not Applicable' should be selected if none of the other choices meet the 50% scope requirement.

Choose from:
- AMBULATORY CARE
- EDUCATION
- ENERGY
- NHCU
- NOT APPLICABLE
- RESEARCH

BONUS CATEGORY: NHCU/ ??

There is a new field for NRM projects called AMBULATORY CARE PERCENTAGE (#158.9). It should be entered for all NRM 5-Yr Plan projects.

AMBULATORY CARE PERCENTAGE: 90/ ??

This field contains the project scope percentage for ambulatory care.

AMBULATORY CARE PERCENTAGE: 90/ ??

The BUDGET CATEGORY defaults are provided based on the PROJECT CATEGORY entered for Major, Minor, and Minor Misc projects, and should be accepted unless otherwise approved by the Regional Office. NRM budget categories should be selected based on guidance in the call letter for the NRM program.

BUDGET CATEGORY: NHCU BED CONV/ ??

This field is a pointer to the OFM Budget Category File (#7336.9). The field designates the project budget category. Choices are screened based on program type.
Choose from:
  ASBESTOS/IH
  BIOMEDICAL
  BOILERS/INCINERATORS
  ENERGY
  FIRE AND SAFETY
  HVAC
  NHCU
  NHCU BED CONV
  OTHER
  STRUCTURAL IMPROVEMENTS
  UTILITY SYSTEMS

BUDGET CATEGORY: NHCU BED CONV/
FUNDING YEAR - A/E: 1997/??
  This field contains the fiscal year for which A/E is funded or proposed.
FUNDING YEAR - A/E: 1997/

The estimated cost for construction projects (Major, Minor, Minor Misc, and NRM) will be entered into two new fields, ESTIMATED A/E COST (FYFP) and ESTIMATED CONST COST (FYFP), instead of using the single ESTIMATED COST FOR 5 YR PLAN field. Values entered into these fields will automatically be rounded up to the next thousand.

ESTIMATED A/E COST (FYFP): 11000/??
  This field contains the estimated A/E cost of the project for the Five Year Facility Plan (FYFP). It will be used on the FYFP in the project's Funding Year - A/E. The total estimated cost of the project is the sum of this field and the ESTIMATED CONST COST (FYFP) field.
ESTIMATED A/E COST (FYFP): 11000/
FUNDING YEAR - CONST: 1997/??
  Fiscal year for which construction is funded or proposed.
FUNDING YEAR - CONST: 1997/
ESTIMATED CONST COST (FYFP): 100000/??
  This field contains the estimated construction cost of the project for the Five Year Facility Plan (FYFP). It will be used on the FYFP in the project's Funding Year - Const. The total estimated cost of the project is the sum of this field and the ESTIMATED A/E COST (FYFP) field.

ESTIMATED CONST COST (FYFP): 100000/

The PROJECT DESCRIPTION (SHORT) field is for a short (approx. 3 lines) project description. A longer description may be entered in the LONG DESCRIPTION field during the Project Application Enter/Edit.

PROJECT DESCRIPTION (SHORT):
  1>Convert building to NHCU beds.

EDIT Option:
The JUSTIFICATION (SHORT) field is for a short (approx. 3 lines) project justification. A longer justification may be entered in the LONG JUSTIFICATION field during the Project Application Enter/Edit.

JUSTIFICATION (SHORT):
1>Population in nursing home is projected to increase.

EDIT Option:
Edit Activations? Y// ??
Enter 'Y' or 'N'.

Activations are funding and FTEE resources required to bring the subject area of the construction or maintenance project up to full operational capacity.

Activations data is required only for Budget Year and Budget Year +1.

Edit Activations? Y//
ACTIVATIONS
ACTIVATION RESOURCES REQ IN FY: 1998// ??
This field contains the fiscal year activation resources are required.

ACTIVATION RESOURCES REQ IN FY: 1998//
ADDITIONAL FTEE: 1// ??
This field contains the total Additional FTEE number as documented in the detailed activation documentation.

ADDITIONAL FTEE: 1//
RECURRING PS: 0// ??
This field contains the total Recurring Personnel Service (PS) funds in accordance with the Additional FTEE.

RECURRING PS: 0//
EQUIPMENT $: 13500// ??
This field contains the total activation equipment funds required to support the project with the following exception. For NRM projects, any equipment items (or systems) that cost over $250,000 should NOT be included in this figure since such high cost equipment must be applied for separately under the High Cost Equipment Program. For Leases and Minor, Minor Misc and Major projects, any equipment items (or systems) that cost $250,000 should be included in this figure since such high cost equipment cannot be applied for under the High Cost Equipment Program.

EQUIPMENT $: 13500//
RECURRING ALL OTHER $: 0// ??
This field contains the total Recurring All Other Funds required to support the project.

RECURRING ALL OTHER $: 0//
NONRECURRING ALL OTHER: 2000// ??
This field contains the total Non-Recurring All Other funds required to support the project.

NONRECURRING ALL OTHER: 2000//
TRAVEL .007: 50// ??
This field contains the total Travel .007 funds required to support the project.

TRAVEL .007: 50//
Work Order & MERS

Select PROJECT NUMBER:

**Dialogue for LEASE prompts**

If you are entering a Leased Space project, you will see the following prompts after PROGRAM:

PROGRAM: LEASE
STATUS: PLAN
PROJECT CATEGORY: DIRECT PATIENT CARE
BUDGET CATEGORY: VACO
LEASE TYPE: NEW LEASE/EXISTING PRESENCE
- This field contains the type of lease. New Lease/New Presence is a first time lease where no presence exists and there is no existing lease. New Lease/Existing Presence is a lease where there is a change in location, increase or decrease in space, or some change other than a re-negotiation of cost and all renewal options have expired. A Succeeding lease is a lease where there is no change other than cost and all lease renewal options have expired. An Expedited lease is a lease, fully funded by the facility, that meets the terms of the Expedited Lease Directive. An Enhanced Use lease is a lease where costs are shared between the VA and an outside source such as state, city, county government or private enterprise.

Choose from:
- NN NEW LEASE/NEW PRESENCE
- NE NEW LEASE/EXISTING PRESENCE
- SU SUCCEEDING
- EX EXPEDITED
- EU ENHANCED USE

LEASE TYPE: NEW LEASE/EXISTING PRESENCE
PROPOSED LEASE TERM: 5
- This field contains the term of the lease in years, including all renewal options.

PROPOSED LEASE TERM: 5
RENTABLE SQ FT: 1000// ??
This field contains the total net square feet to be used by the VA occupants. Include any waiting space or common areas. If waiting space is shared by tenants other than the VA, estimate and apportion the space. Do not include corridors, equipment rooms, telephone closets, etc. in the rentable square feet.

RENTABLE SQ FT: 1000//

NET PARKING CHANGE: ??
This field contains the change (if any) in the number of parking stalls available.

NET PARKING CHANGE:

FY AWARD LEASE: 1997// ??
This field contains the fiscal year the lease cost and/or build-out funds are obligated against the lease contract.

FY AWARD LEASE: 1997//

ESTIMATED LUMP SUM COST: 13000// ??
This field contains the estimated lump sum cost paid up-front for build-out or modifications to the property made at the request of and paid for by the VA.

ESTIMATED LUMP SUM COST: 13000//

FY RENT STARTS: 1997// ??
This field contains the fiscal year that monthly lease payments commence. This may differ from the award date due to build-out or a negotiated delay of occupancy.

FY RENT STARTS: 1997//

ESTIMATED ANNUAL RENT COST: 120000// ??
This field contains the total of the annual lease costs based on the 12 month period from the start of the lease.

ESTIMATED ANNUAL RENT COST: 120000//

EXISTING SPACE ANNUAL RENT: 1234// ??
This field contains the total annual lease costs based on the last 12 month period of the lease for the existing presence of a Succeeding or New Lease/Existing Presence type lease.

EXISTING SPACE ANNUAL RENT: 1234//

EXISTING SPACE RENTABLE SQ FT: 300// ??
This field contains the rentable square feet for the existing presence of a Succeeding or New Lease/Existing Presence type lease. Rentable square feet is the total net square footage used by VA occupants, including any waiting space or common areas. If waiting space is shared by tenants other than the VA, estimate and apportion the space. Do not include corridors, equipment rooms, telephone closets, etc. in the rentable square feet.

EXISTING SPACE RENTABLE SQ FT: 300//

ACTIVATION RESOURCES REQ IN FY: 1997// ??
This field contains the fiscal year activation resources are required.

ACTIVATION RESOURCES REQ IN FY: 1997// ??
ADDITIONAL FTEE: 2// ??
This field contains the total Additional FTEE number as documented in the detailed activation documentation.

ADDITIONAL FTEE: 2// ??
RECURRING PS: 70000// ??
This field contains the total Recurring Personnel Service (PS) funds in accordance with the Additional FTEE.

RECURRING PS: 70000// ??
RECURRING ALL OTHER $: 1// ??
This field contains the total Recurring All Other Funds required to support the project.

RECURRING ALL OTHER $: 1//
EQUIPMENT $: 1826000// ??
This field contains the total activation equipment funds required to support the project with the following exception. For NRM projects, any equipment items (or systems) that cost over $250,000 should NOT be included in this figure since such high cost equipment must be applied for separately under the High Cost Equipment Program. For Leases and Minor, Minor Misc and Major projects, any equipment items (or systems) that cost $250,000 should be included in this figure since such high cost equipment cannot be applied for under the High Cost Equipment Program.

This field contains the total Travel .007 funds required to support the project.

TRAVEL .007: 9132//
Five Year Facility Plan Report (132 columns)

5-Yr Plan Report Modifications:

a. The output order has been changed to print all the year summary pages, then the equipment pages, then the detail pages sorted by project number, and finally the plan summary page.

b. Network and VISN fields have been added to the ENG INIT PARAMETERS file. If these fields are populated using the "ENG SITE PARAMETERS Enter/Edit" option, the information will be included in the header of the Five Year Facility Plan report.

c. The Year Summary page has been modified to include Lease projects. Leases will be included in the year that corresponds to the FY RENT STARTS. The ESTIMATED ANNUAL RENT will be shown in the cost column. Expedited leases will be printed, but will not be included in the count of leases.

d. The Equipment page has been modified to include a Lease section.

e. The Detail page has been modified to use a new format. Different formats will be used for lease and construction projects.

Note: Because of the built in footers, it is advisable not to use a number higher than 60 to designate page length (i.e., DEVICE: HOME//:132;60 )

Reminder: The A/E or Construction funding year of a project must be the current year (Budget year-1) or later. Current year projects must also have one the following statuses: "DESIGN PROGRAM", "A/E", "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", "AUTHORIZED", "INVITATION FOR BID", "BID OPEN" or "CONSTRUCTION". Budget and Out-Year Projects must have one of the following statuses: "PLAN", "NEW PROJECT APPLICATION", "DESIGN PROGRAM", "A/E", "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", or "AUTHORIZED". The 3-digit Project Number prefix must agree with the Station Number of the Institution selected, and the Program must not be blank.

Edit Project Application Option name: ENXFM05
This option enables entering all information required for forms VAF 10-1193, VAF 10-1193a and prioritization methodology scoring sheets.

Activations E/E Option name: ENXFM18
This option enables enter/edit of project activations information.

Environmental Analysis E/E (VAF 10-1193a) Option name: ENXFM09
This option enables entry of information which appears on VAF 10-1193a.

Approval of Project Application Option name: ENXFM16
This option controls the Chief Engineer's and VAMC Director's sign off on the project application. The Security Key ENPLK001 controls the Chief Engineer's approval. The Security Key ENPLK002 controls the VAMC Director's approval. The Chief Engineer must sign off before the VAMC Director. Both must approve before the project application can be transmitted electronically to higher approval authorities.

Reports Option name: ENXFMAR
Report menu for project applications.

Validate Project Applications Option name: ENXFMAV
This option validates selected construction and lease projects. Only data which pertains to a project application is checked. Any validation errors or warnings are listed on a detailed report.
Transmit Project Applications  Option name: ENXFMAX
This option transmits construction and lease project data to the Regional Construction Database for selected projects. All data pertinent to a project application is sent. Selected projects are automatically validated prior to the actual transmission. The transmitter is a recipient of any created mail messages that are sent to the Regional Construction Database.

Communication Log Display for a Project  Option name: ENXFM20
This option displays the communication log for a selected project. The communication log contains information on network messages exchanged between the site and the regional construction database. "5-Yr" indicates Five Year Plan related messages and "Appl" indicates project application related messages.

MEDICAL CENTER: ANYCITY// ??
Facility where the work is being performed. May indicate a division or other functional element (National Cemetery, Regional Office, satellite clinic, etc.) if appropriate.

Choose from:
- VASITE.VA.GOV
- ISCEXAMPLE
- VA MED CTR
- ANYCITY

MEDICAL CENTER: ANYCITY//
DIVISION: ??
This field is used to identify the division of a multi-divisional facility. It can be used to generate a division specific report when printing the Five Year Facility Plan.

A new DIVISION (#6910.3) file has been added. It contains a list of valid divisions for a multi-divisional facility. It can be edited using the DIVISION [ENDIV] option on the Program Management menu. There is no need to enter any divisions if it is not applicable for your site. The DIVISION (#176) field in the CONSTRUCTION PROJECT (#6925) file has been changed to point to the new Division file.

Choose from:
- ALPHA
- BETA
- DIVISION

DIVISION:
Five Year Facility Plan
Project Applications

PROJECT TITLE: ASBESTOS PROJECT// ??
Official title of project.

Project titles entered with lowercase letters will automatically be converted to all uppercase letters. This change has been made to promote consistency in national databases and reports.

PROJECT TITLE: ASBESTOS PROJECT//
FACILITY TYPE: VETERANS HEALTH ADMIN// ??
This field is important to enable restriction of Project Functional and Budget Categories and to enable reporting by Facility Type. Note: The cross reference was added to 2 reasons: a) Facilitate reporting by facility type. b) Force the filing by DIE so that the selection screens/filters work properly for Functional and Budget Categories.
Choose from:
  VHA  VETERANS HEALTH ADMIN
  VBA  VETERANS BENEFITS ADMIN
  NCS  NATIONAL CEMETERY SERVICE

FACILITY TYPE: VETERANS HEALTH ADMIN//
PROGRAM: NRM// ??
This field is a set of codes used to classify program type.
Choose from:
  MA  MAJOR
  MI  MINOR
  MM  MINOR MISC.
  NR  NRM
  OT  OTHER
  LE  LEASE
  SL  STATION LEVEL

PROGRAM: NRM//

The default STATUS is "DRAFT PROJECT" for a new entry, or the status as shown in the last Five Year Plan. The status must be changed to "NEW PROJECT APPLICATION", "DESIGN PROGRAM", "A/E", "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", "AUTHORIZED", "INVITATION FOR BID", "BID OPEN", or "CONSTRUCTION" before the project will be eligible for approval by the Chief Engineer and Facility Director/Designee.

STATUS: NEW PROJECT APPLICATION//
PROJECT CATEGORY: ASBESTOS// ??
This field is a pointer to the OFM Project Category File (#7336.8). The field designates the project functional category, and determines prioritization points for NRM, Minor, and Minor Misc. programs. Choose from:
ARCHITECTURAL BARRIERS
ASBESTOS
...
... WASTE MANAGEMENT
WINDOWS

PROJECT CATEGORY: ASBESTOS//

There is a new required field for NRM projects called BONUS CATEGORY (#158.8). This field is scope dependent and 'Not Applicable' should be entered as the Bonus Category if none of the other choices involve 50% or more of the project scope.

BONUS CATEGORY: NOT APPLICABLE// ??
This field designates the bonus category which involves 50% or more of the project scope and determines prioritization points for NRM projects. 'Not Applicable' should be selected if none of the other choices meet the 50% scope requirement. Choose from:
AMBULATORY CARE
EDUCATION
ENERGY
NHCU
NOT APPLICABLE
RESEARCH

BONUS CATEGORY: NOT APPLICABLE//
This new field for NRM projects called AMBULATORY CARE PERCENTAGE (#158.9) should be entered for all NRM projects.

AMBULATORY CARE PERCENTAGE: 0// ??
This field contains the project scope percentage for ambulatory care.

AMBULATORY CARE PERCENTAGE: 0//

The BUDGET CATEGORY defaults are provided based on the PROJECT CATEGORY entered for Major, Minor, and Minor Misc projects, and should be accepted unless otherwise approved by the Regional Office. NRM budget categories should be selected based on guidance in the call letter for the NRM program.

BUDGET CATEGORY: ASBESTOS/IH// ??
This field is a pointer to the OFM Budget Category File (#7336.9). The field designates the project budget category. Choices are screened based on program type.

Choose from:
- ASBESTOS/IH
- BIOMEDICAL
- BOILERS/INCINERATORS
- ENERGY
- FIRE AND SAFETY
- HVAC
- NHCU
- NHCU BED CONV

This field contains the change (if any) in the number of parking stalls available.

NET PARKING CHANGE: 0 //

PROJECT DESCRIPTION (SHORT) is for a short (approx. 3 lines) project description.

PROJECT DESCRIPTION (SHORT):
1> Remove asbestos materials from piping and walls.
EDIT Option:

The LONG DESCRIPTION field may be used for a description of more than 3 lines.

LONG DESCRIPTION:
1>

PROJECT JUSTIFICATION (SHORT):
1> This project is required because of the possibility of asbestos exposure
2> during maintenance in affected areas.
EDIT Option:

The LONG JUSTIFICATION field may be used for a justification of more than 3 lines.

LONG JUSTIFICATION:
1>

The WORKLOAD JUSTIFICATION field is for a brief declaration of workload data that justifies the project (i.e., Is the Workload approved? What is the approval date? What workload model version was used?).

WORKLOAD JUSTIFICATION:
1>
PROJECT SCOPE

The next field is a multiple entry pointer to the OFM H089 Chapters file (7336.6) for entry of H089 chapter codes.

Select H089 CHAPTER NAME: CLINICAL SERVICES ADMINISTRATION //
H089 CHAPTER NAME: CLINICAL SERVICES ADMINISTRATION // ??
This field contains the name of an H08-9 chapter associated with project.

NOT APPLICABLE (999) has been added as a H089 Chapter.

Choose from:
A & MM ADMINISTRATION 284
A & MM SUPPLY, PROCESSING AND 285
...
...
VETERANS OUTREACH PROGRAM 306
VOLUNTARY SERVICE 290

H089 CHAPTER NAME: CLINICAL SERVICES ADMINISTRATION //
NEW NET SQ FT: 2873// ??
This field contains the new net square footage for the associated H08-9 chapter.
NEW NET SQ FT: 2873//
NEW GROSS SQ FT: 2890// ??
This field contains the new gross square footage for the associated H08-9 chapter.
NEW GROSS SQ FT: 2890//
RENOVATED NET SQ FT: 3783// ??
This field contains the renovated net square footage for the associated H08-9 chapter.
RENOVATED NET SQ FT: 3783//
RENOVATED GROSS SQ FT: 8387// ??
This field contains the renovated gross square footage for the associated H08-9 chapter.
RENOVATED GROSS SQ FT: 8387//

Select H089 CHAPTER NAME:
SITE ISSUES: ??
This field contains a short (1-90 character) statement on the status of the site and any effect on the project.
SITE ISSUES:
HISTORICAL ISSUES: ??
This field contains a short (1-90 character) statement on the status of "Historical" issues in and around the project and any resulting effect on the project.
HISTORICAL ISSUES:
ENVIRONMENTAL ISSUES: ??
This field contains a short (1-90 character) statement on the status of "Environmental" issues in and around the project and any resulting effect on the project. Reference form VAF 10-1193a "EMIS Construction Program Environmental Analysis".
ENVIRONMENTAL ISSUES:
SEISMIC ISSUES: ,// ??
This field contains a short (1-90 character) statement on the status of "Seismic" issues in and around the project and any resulting effect on the project.
SEISMIC ISSUES: ,//
HAZARDOUS MATERIALS ISSUES: ??
This field contains a short (1-90 character) statement on the status of
"Asbestos or other hazardous materials" issues in and around the project and any resulting effect on the project.

HAZARDOUS MATERIALS ISSUES:

TRANSPORT ISSUES: ??
This field contains a short (1-90 character) statement on the status of "vertical or horizontal transportation systems" issues in and around the project and any resulting effect on the project.

TRANSPORT ISSUES:

PARKING ISSUES: ??
This field contains a short (1-90 character) statement on the status of "Parking and/or Roads" issues in and around the project and any resulting effect on the project.

PARKING ISSUES:

PLANNED CONSTRUCTION METHOD: CONTRACT// ??
Set of codes for the planned construction method of the project.
Choose from:
1  CONTRACT
2  P&H
3  STATION LABOR
4  SBA 8(a)
5  DESIGN/BUILD
6  LEASE

PLANNED CONSTRUCTION METHOD: CONTRACT//
Is this project reportable to the EPA per the NRM Call Letter criteria?

EPA REPORTABLE: YES// ??
Indicates if a NRM project meets the criteria of an environmental project which should be reported to the Environmental Protection Agency on the A-106 report. The criteria can be found in the NRM Call Letter for project applications. If this field is YES, an EPA Reporting Category must also be specified.
Choose from:
Y  YES
N  NO

EPA REPORTABLE: YES//

The VA is required to generate the A-106 report for the Environmental Protection Agency. To support the A-106 report, the new EPA REPORTING CATEGORY (#158.7) field will need to be specified on project applications for NRM projects which meet the criteria of an EPA reportable project per the NRM Project Application Call Letter.

EPA REPORTING CATEGORY: ASBESTOS// ??
This field is required for environmental NRM projects. It is used to generate the A-106 report required by the Environmental Protection Agency.

Choose from:
ASBESTOS

EPA REPORTING CATEGORY: ASBESTOS//
TOTAL FACTORED SQUARE FOOTAGE may be obtained from the approved Region #4 database. TOTAL FACTORED SQUARE FOOTAGE, TOTAL M&R COSTS, TOTAL BSEA, TOTAL BSER, TOTAL MI COSTS, and NRM CONTINGENCY PCT are only asked for NRM programs.

TOTAL FACTORED SQUARE FOOTAGE: 22876
  This field contains the total factored square footage derived from the National Survey of Building Square Footage for NRM funding distribution. The field is used to determine the factored square footage prioritization points for NRM project applications.

TOTAL FACTORED SQUARE FOOTAGE: 22876
TOTAL M AND R COSTS: ??
  This field contains the total Maintenance & Repair costs as listed on VAF 10-6238.

TOTAL M AND R COSTS:
TOTAL BSEA COSTS: ??
  This field contains the total Building Service Equipment Additional (BSEA) costs as listed on VAF 10-6238. BSEA labor costs should be included in MI.

TOTAL BSEA COSTS:
TOTAL BSER COSTS: ??
  This field contains the total Building Service Equipment Replacement (BSER) costs as listed on VAF 10-6238.

TOTAL BSER COSTS:
TOTAL MI COSTS: ??
  This field contains the total Minor Improvement (MI) costs as listed on VAF 10-6238.

TOTAL MI COSTS:
NRM CONTINGENCY PCT: ??
  This field contains the NRM program Construction Contingency's Percentage.

NRM CONTINGENCY PCT:
IMPACT COST: ??
  This field contains the total Impact costs as listed on the VAF 10-6238.

IMPACT COST:

If an IMPACT COST greater than 0 has been entered, a required word processing field called IMPACT JUSTIFICATION will follow. It is printed on the last page of the 1193 and replaces the IMPACT ISSUES field.

TECHNICAL SERVICES $: ??
  This field contains the total Technical Services dollars as listed on VAF 10-6238.

TECHNICAL SERVICES $:
Edit Activations? Y// ??
Enter 'Y' or 'N'.
Activations are funding and FTEE resources required to bring the subject area of the construction or maintenance project up to full operational capacity.

Approval of Project Application

The Approval of Project Application option controls the Chief Engineer's and VAMC Director's sign off on the project application. Project Status must be set to "NEW PROJECT APPLICATION", "DESIGN PROGRAM", "A/E", "SCHEMATICS", "DESIGN DEVELOPMENT", "CONSTRUCTION DOCUMENTS", "AUTHORIZED", "INVITATION FOR BID", "BID OPEN", or "CONSTRUCTION" before the project can be approved. The security key ENPLK001 controls the Chief Engineer's approval. The security key ENPLK002 controls the VAMC Director's approval. The Chief Engineer must sign off before the VAMC Director. Both must approve before the project application can be transmitted electronically to higher approval authorities.

Chief Engineer and VAMC Director approvals of a project application will be considered current for six months. Any approvals performed over six months ago will need to be redone prior to transmission of the project application. The Approval of Project Application [ENPLM16] option has been modified to update the signed name and date whenever an application is re-approved. Previously, just pressing return at the approval prompt did not update the approval name or date of re-approved applications.

SECTION II - ENVIRONMENTAL DATA

A. FACILITY REVIEW B. VACO/REGION REVIEW
4. ENVIRONMENTAL ASSESSMENT REQUIRED 5. ENVIRONMENTAL IMPACT STATEMENT REQUIRED
6. ADDITIONAL DOCUMENTATION REQUIRED
7. FURTHER ACTION REQUIRED Y
8. EVALUATED BY DATE BY DATE

SECTION III - ENVIRONMENTAL ANALYSIS

Environmental Elements: A 'Yes' will require an Assessment of the Specific Element. Specify standards used and project elements analyzed, or provide additional documentation.

9. LAND USE
 DOES PROPOSED PROJECT:
A1. Acquire or dispose of land? YES
A2. Involve land located in a wetland or flood plain? YES

October 1995 Engineering V.7.0 User Manual Patch EN*7*23 Revision 5-63
A3. Involve storm-water run-off and retainage? YES
A4. Conflict with local zoning and planning regulations? YES
A5. Dislocate persons, residences, or cause major population shift? YES
A6. Affect protected wildlife or vegetation? YES

10. CONSTRUCTION/BUILDINGS
DOES PROPOSED PROJECT:
B1. Involve ‘outside construction of more than 10,000 sq. ft.? YES
B2. Increase off-site traffic flow by more than 10%? YES
B3. Significantly alter off-site traffic flow? YES
B4. Involve a historically designated building or area? YES

11. EMISSION, WATER, AND TOXIC SUBSTANCES
DOES PROPOSED PROJECT:
C1. Conflict with local, state, or federal standards? YES

12. CULTURAL, COMMUNITY, LEGISLATIVE
DOES PROPOSED PROJECT:
D1. Have known potential for public controversy? YES
D2. Conflict with local or state regulations? YES
D3. Overload available utility system capacity? YES

Select PROJECT NUMBER:
Minor/Minor Misc Prioritization

Scores are computed as follows:

1. Cited JCAHO/AALAC/CAP Accreditation Deficiency Based on CITING AUTHORITY, DATE, CORRECTION >50% PROJECT SCOPE

   Citation must have been issued within the last 6 years and more than 50% of the project scope must be for correction of the deficiency.

   10 Pts-Repeat Citation, 5 Pts-1st Citation, 0 Pts-No Citation

2. Safety: Handicapped (UFAS), EPA/NRC, Fire/Safety (RSFPE), OSHA Based on CITING AUTHORITY, DATE, CORRECTION >50% PROJECT SCOPE

   Citation must have been issued within the last 6 years and more than 50% of the project scope must be for correction of the deficiency.

   10 Pts-Repeat Citation, 5 Pts-1st Citation, 0 Pts-No Citation

3. Space Based on SPACE USE FOR PRIORITIZATION

   14 AMBULATORY CARE
   14 DIRECT PATIENT CARE (WARDS)
   14 DOMICILLIARY
   14 FEMALE PRIVACY
   14 NHCU

Validate Project Applications

Projects are longer be automatically deleted after editing when problems are found with the required fields. Instead, projects are validated after editing and when selected for transmission. Invalid projects can not be transmitted to the Regional Construction Database. A detailed report of any validation problems is available. New options, Validate Five Year Plan Projects [ENPLFV] and Validate Project Applications [ENPLAV], have been added to allow validation to be performed whenever desired.

Select PROJECT NUMBER: <RET>
Approved Dates Screen Edit
Enter/edit approved dates on delegated projects. Approved dates indicate when certain project milestones were originally scheduled. Adherence to these dates is usually important in terms of keeping obligations consistent with an established spending plan.

Revised Dates Screen Edit
Enter/edit revised dates (if any) of project milestones. These dates must be exact (month-day-year) and should reflect any discrepancies between original schedule and current best estimates.

Actual Dates Screen Edit
Enter/edit actual milestone dates on Construction Project(s).

A/E Data Screen Edit
Enter/edit basic information on architectural firms retained by facility for specific projects.

Contractor Data Screen Edit
Enter/edit basic information on prime construction contractor for a delegated project.

Changes & Remarks Screen Edit
Enter/edit summary of change orders and narrative remarks.

Print Project Status Report
Generate hardcopy 10-0051 for a specific construction project.

Print All Project Status Reports
Print hardcopy 10-0051 of all construction projects for which the MONTHLY PRINT-OUT field is set to "YES".

Transmit 10-0051 Electronically
Packs 10-0051s into Network MailMan messages and routes them to the Office of Facilities in VACO.
Enter Project Data

---> 1  Enter Project Data
  2  Screen Review All Data

In this option, you can enter project data as a new project is opened. You can also edit an existing project from this option.

Select Project Tracking Option: 1 Enter Project Data

To use this option, enter the construction project number. Typing < ??><RET> after Select CONSTRUCTION PROJECT PROJECT NUMBER will list all current construction project numbers.

Select CONSTRUCTION PROJECT PROJECT NUMBER: ??

CHOOSE FROM: 
999-011  BUILD HOSPITAL ANNEX
999-012  RENOVATE CLINICAL LABORATORY
999-014  EXPAND CLINICAL WARDS

Must begin with station number. Enter '??' for more help.

The principal identifier of entries in the CONSTRUCTION PROJECT file.
Format should be either 'SSS-NNN' or 'SSS-YY-NNN'; where SSS is the facility number and NNN is a sequential project number.
YY is usually the fiscal year for which an NRM request is being submitted, but may also be used for a two-character alphabetic project category designation.
Note that the facility number need not always be the number of the VAMC. For example, if you are reporting on a National Cemetery project the first 3 digits will generally be the facility number of the National Cemetery itself.
If you have questions about official project numbers, please consult your Project Manager in the Region.

Select CONSTRUCTION PROJECT PROJECT NUMBER: 999-011  BUILD HOSPITAL ANNEX

If you enter a new Construction Project number, the CONSTRUCTION PROJECT PROJECT TITLE is requested. After entering the title, the PROJECT NUMBER will be displayed.

PROJECT NUMBER: 999-011//
REPORT PERIOD END is the date for the end of the period covered by the report. If a date is already on the project, it is displayed with the "/". A < ? > entered here will show the different formats for entering dates.

REPORTING PERIOD (Month/Year): ??
Current reporting period. Used by Regional Offices for tracking project milestones over time.

Enter MONTH and YEAR only.
Examples of Valid Dates:
- JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
- T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
- T-1 (for YESTERDAY), T-3W (for 3 WEEKS AGO), etc.
If the year is omitted, the computer assumes a date in the PAST.
You may omit the precise day, as: JAN, 1957

REPORTING PERIOD (Month/Year):

PROJECT TITLE will be asked next and can be changed by typing a new title.

PROJECT TITLE: BUILD HOSPITAL ANNEX Replace ??
Official title of project.

MONTHLY UPDATES: NO// ??
This field determines whether or not a project will be included when Progress Reports of 'all projects' are requested. This field is examined when 10-0051's are transmitted electronically as well as when paper records are produced.

CHOOSE FROM:
Y YES
N NO

MONTHLY UPDATES: NO//

MEDICAL CENTER: ANYCITY, DC, VAMC// ??
Facility where the work is being performed. May indicate a division or other functional element (National Cemetery, Regional Office, satellite clinic, etc.) if appropriate.

</table>
CONSTRUCTION AWARD (REVISED): ??
   Current (revised) estimate of the target date for award of the
   construction contract(s).

CONSTRUCTION AWARD (REVISED):

CONSTRUCTION START (REVISED): ??
   Current (revised) estimate of the target date for the start of
   construction.

CONSTRUCTION START (REVISED):

CONST. COMPLETE (REVISED): ??
   Current (revised) target date by which it is expected that construction
   will be substantially complete.

ACTIVATION (REVISED): ??
   Revised date for project activation.

ACTIVATION (REVISED):

DESIGN PROGRAM START (ACTUAL): ??
   Actual date of design program start.

DESIGN PROGRAM START (ACTUAL):

DESIGN PROGRAM COMPL. (ACTUAL): ??
   Actual date of design program completion.

DESIGN PROGRAM COMPL. (ACTUAL):

AUTHOR. LTR. REC'D. (ACTUAL): ??
   Actual date of Issue Letter. This is the transmittal used by Regions
   to formally approve a project.

AUTHOR. LTR. REC'D. (ACTUAL):

ADVERTISE FOR A/E (ACTUAL): ??
   Date of advertisement for Architect/Engineer.

ADVERTISE FOR A/E (ACTUAL):

SELECT A/E (ACTUAL): ??
   Actual date of selection of Architect/Engineer.

SELECT A/E (ACTUAL):

A/E AWARD (ACTUAL): ??
   Date of contract award to Architect/Engineer.

A/E AWARD (ACTUAL):

START SCHEMATICS (ACTUAL): ??
   Actual date on which schematic plans were begun.

START SCHEMATICS (ACTUAL):

COMPL. SCHEMATICS (ACTUAL): ??
   Date on which schematic plans were actually completed.

COMPL. SCHEMATICS (ACTUAL):

START DESIGN DRWGS. (ACTUAL): ??
   Actual start of design drawings.

START DESIGN DRWGS. (ACTUAL):

COMPL. DESIGN DRWGS. (ACTUAL): ??
   Actual completion date for design drawings.

COMPL. DESIGN DRWGS. (ACTUAL):

START CONST. DRWGS. (ACTUAL): ??
   Date on which construction drawings were begun.

START CONST. DRWGS. (ACTUAL):

COMPL. CONST. DRWGS. (ACTUAL): ??
   Actual date on which construction drawings were completed.

COMPL. CONST. DRWGS. (ACTUAL):

ISSUE IFB (ACTUAL): ??
   Actual date of issuance of Invitation For Bids.

ISSUE IFB (ACTUAL):

BID OPEN (ACTUAL): ??
   Actual date of bid opening.

   If the date is omitted, the current date is assumed.

   You may enter a time, such as JAN 20@10, T@10AM, 10:30, etc.

   You may enter a time, such as NOON, MIDNIGHT or NOW.

BID OPEN (ACTUAL):

CONSTRUCTION AWARD (ACTUAL): ??
   Actual date of award of construction contract.

CONSTRUCTION AWARD (ACTUAL):

CONSTRUCTION START (ACTUAL): ??
   Date on which construction actually began.

CONSTRUCTION START (ACTUAL):

CONST. COMPLETE (ACTUAL): ??
   Actual date on which construction was judged to be substantially
   complete.

CONST. COMPLETE (ACTUAL):

ACTIVATION (ACTUAL): ??
   Actual date of project activation.

ACTIVATION (ACTUAL):

A/E CONTRACT #: ??
Official identifier of contract with Architect/Engineer for project design and related services.

A/E CONTRACT #: ??

Name of Architect/Engineer firm retained for this project.

A/E NAME: ??

First line of Architect/Engineer address. May be up to 35 characters long and should generally contain the street address or post office box (or equivalent).

A/E ADDR1: ??

Second (and final) line of Architect/Engineer address. May be up to 35 characters long and should generally contain the city, state, and zip code.

A/E ADDR2: ??

Fund control point (IFCAP) for design obligations.

A/E FUND CONTROL POINT: ??

Original A/E award obligation.

A/E AWARD AMOUNT: ??

Amount obligated to A/E for performance of a formal study.

A/E STUDY: ??

Amount obligated for Architect/Engineer services in development of schematics. Round to nearest whole dollar.

A/E SCHEMATICS: ??

Amount obligated for design development. Round to nearest whole dollar.

A/E DESIGN DEVELOPMENT: ??

Amount obligated for Architect/Engineer services in development of working drawings and specifications. Round to nearest whole dollar.

A/E CONST DOCUMENTS: ??

Amount obligated to Architect/Engineer for services in making site surveys and related activities. Round to nearest whole dollar.

A/E SITE SURVEY: ??

Amount obligated to Architect/Engineer for services to the medical center during the course of the actual construction period. Round to nearest whole dollar.

A/E CONST PER SERVCS: ??

Amount obligated to A/E for services not otherwise classified.

A/E OTHER SERVICES: ??

SA stands for supplemental agreement. Number of A/E supplemental agreements that add to the cost of design.

A/E SA ADDITION (#): ??

SA stands for supplemental agreement. Total cost of A/E supplemental agreements that increase design costs.

A/E SA ADDITIONS ($) : ??

SA stands for supplemental agreements. Number of A/E supplemental agreements that reduce design cost.

A/E SA DEDUCTIONS (#): ??

SA stands for supplemental agreements. Total dollar value of all A/E supplemental agreements that decrease design costs.

A/E SA DEDUCTIONS ($) : ??

Unique identifier (contract number) of contract with a construction firm for the actual construction portion of this project.

CONST. CONTRACT #: ??

Name of the firm chosen as the prime (or sole) contractor for the construction portion of this project.
CONTR. NAME: ??
First line of the construction contractor's two-line mailing address. Should generally contain the street address or post office box (or equivalent).

CONTR. ADDR1: ??
Second (and last) line of the construction contractor's mailing address. Should generally contain the city, state, and zip code.

CONSTRUCTION AWARD: ??
Amount of original construction award. Should not include P&H (purchase and hire) or supplemental agreements (if any).

P&H LABOR TO DATE: ??
Total expenditure on purchase and hire labor to date.

P&H MATERIALS TO DATE: ??
Total expenditure on purchase and hire materials to date.

CONST SA ADDITIONS (#): ??
SA stands for supplemental agreement. Total number of supplemental agreements that added to the construction cost.

CONST SA ADDITIONS ($)?:
SA stands for supplemental agreements. The sum of the dollar value (rounded to the nearest dollar) of all supplemental agreements that increase the cost of the project.

CONST SA DEDUCTIONS (#): ??
SA stands for supplemental agreements. Total number of supplemental agreements that decreased the construction cost.

CONST SA DEDUCTIONS ($)?:
SA stands for supplemental agreements. The sum (to the nearest whole dollar) of all supplemental agreements that decreased the cost of construction on an approved project.

CONST FUND CONTROL PT: ??
Fund control point (IFCAP) for construction obligations.

TIME EXTENSION (DAYS): ??
Time extension granted contractor, usually as a result of supplemental agreements.

REMARKS:
You are ready to enter a line of text.
If you have no text to enter, just press the return key.
Type 'CONTROL-I' (or TAB key) to insert tabs.
When text is output, these formatting rules will apply:
A) Lines containing only punctuation characters, or lines containing tabs will stand by themselves, i.e., no wrap-around.
B) Lines beginning with spaces will start on a new line.
C) Expressions between '|' characters will be evaluated as 'computed-field expressions and then be printed as evaluated thus '|NAME|' would cause the current name to be inserted in the text.

• Want to see a list of allowable formatting 'WINDOWS'? NO// (NO)

PROGRESS NOTE: ??
ANSWER MUST BE 1-235 CHARACTERS IN LENGTH

Select CONSTRUCTION PROJECT PROJECT NUMBER:
The system will then prompt for a new project number. If you do not wish to go to another project number, you can press <RET>, which will return you to the Project Tracking Options menu.
Screen Review All Data

This option provides a screen review of all the project data. Enter the project number and the screen will display page one as shown on the printout below.

CHANGE NUMBERS? (SEPARATE WITH ;) (USE : FOR RANGES) (+P -P TO PAGE) (^" QUIT)
("^^" RAPID OUT)

The eight screens present the information in the order that it was entered. The ability to make changes in any line entry is provided at the bottom of the screen. Select more than one line number at a time by putting a semicolon between the numbers. If they are consecutively numbered lines, the beginning and ending numbers can be entered with a colon between them. You can go to the next page by pressing <RET> or go backwards by entering a minus sign. You have the option of terminating the screen option by using the <^> for "QUIT" or a <^^> for rapid out. Both actions accomplish the same thing.

The fourth entry on page 8 of the printout is a word processing field which will allow several lines of comments. When the 10-0051 reports are transmitted electronically, the PROGRESS NOTE is automatically saved in the REMARKS field for future reference. When the printout indicates (DATA) on this line, there are remarks. The remarks can be viewed by entering "4".
Preliminary Data Screen

The Preliminary Data Screen gives the first fifteen entries of the project information.

**NOTE:** First electronic progress note on this project.

Select CONSTRUCTION PROJECT PROJECT NUMBER:
Print All Project Status Reports

The option Print All Project Status Reports provides the same information as the previous option. In this case you will get a printout for each active project. This would normally be done on the printer and provide for all the project reports at one time that have to be submitted to Central Office.

1 Enter Project Data
2 Screen Review All Data
3 Preliminary Data Screen
4 Approved Dates Screen Edit
5 Revised Dates Screen Edit
6 Actual Dates Screen Edit
7 A/E Data Screen Edit
8 Contractor Data Screen Edit
9 Changes & Remarks Screen Edit
10 Print Project Status Report
   --->11 Print All Project Status Reports
12 Transmit 10-0051 Electronically

Every project for which the MONTHLY UPDATES field is set to "YES" will be represented in the output from this option.
Transmit 10-0051 Electronically

This option places 10-0051 reports into MailMan messages, and routes them to the Office of Facilities at VACO.

If the site AEEMS/MERS system is not physically connected to the site DHCP computers, or linked to IDCU in some way, this option should be disabled by entering something in the OUT OF ORDER MESSAGE field.

The last page of the transmission contains a text field called "Progress Notes". This free-text field has a maximum of 235 characters, and is transmitted as part of the 10-0051 in place of the Remarks field used in the screen display. After transmission, the current Progress Note is automatically filed in the Remarks field with a notation of the date it was sent to the Regional Office and VACO. The Progress Note is then cleared.
out to make ready for the next update. In this manner, each station maintains a perpetual record of every Progress Note that was ever transmitted.

This field may also be edited from any Screen Edit option.

Upon exit, the user is returned to the Project Tracking Options menu.
Equipment Management

The Equipment Management module has been modified to act as a front-end to the Fixed Assets Package (FAP). Fixed Assets is a subsystem of the Financial Management System (FMS) and it will become the corporate database for capitalized non-expendable (NX) equipment.

The Equipment Management module is entered from the Engineering Main Menu. The option is selected from the menu by entering the first few unique characters of the name (EQ). This option is primarily used for equipment inventory tracking and maintenance purposes. FileMan may be used to enter the data, but screen entry of data is the desired method. For illustration purposes, the first menu item, New Inventory Entry, will be displayed using both FileMan and regular screen entry.

This module has an extensive sub menu system, as shown in the Orientation section of the manual.

AUTOMATED ENGINEERING MANAGEMENT SYSTEM
VERSION 7

Select Engineering Main Menu Option: ?

WO Work Order & MERS ...
FYFP Five Year Facility Plan (FYFP)...
APPL Project Applications ...
TRK Project Tracking ...
**EQ** Equipment Management ...
ENM Program Management ...
SP Space/Facility Management ...
FSA 2162 Report of Accident ...
XFER Assign (Transfer) Electronic Work Orders

Select Engineering Main Menu Option: **EQ** Equipment Management

ENGINEERING EQUIPMENT MANAGEMENT MODULE Version 7

1 New Inventory Entry
2 Multiple Inventory Entry
3 Inventory Edit
4 Display Equipment Record
5 Equipment Reports ...
6 PM Parameters ...
7 Generate PM Schedule ...
8 Record Equipment PMI ...
New Inventory Entry
Add a new item to the EQUIPMENT INV. file (#6914).

Multiple Inventory Entry
Enter several like items (e.g.; 50 new electric beds) into the EQUIPMENT INV. file (#6914) without having to enter common information each time.

Inventory Edit
Edit the record of an existing piece of equipment. The .01 field (ENTRY NUMBER) is assigned by the system when an item is first added to the EQUIPMENT INV. file and may not be edited.

This option gives access to both Supply and Engineering fields.

Display Equipment Record
Display selected fields from the EQUIPMENT INV. file. Repair history is not displayed via this option.

Equipment Reports
Contains options to print data from the EQUIPMENT INV. file (#6914).

PM Parameters
Contains options for enrolling devices and device types in the PMI program.

Generate PM Schedule
Contains options for printing PMI work sheets and for deletion of PM work orders.

Record Equipment PMI
Contains options to record PM inspections. This process essentially closes a PM work order and posts the activity to the equipment history.

Print Bar Code Labels for Equipment Management
Generates bar code labels (location labels and equipment labels) for equipment management applications. Designed for use with a dedicated bar code printer.

Bar Coded Equipment Inventory Management
Driver for NX inventory functions.
**Purchase Order Group Edit**

Edit a group of existing items in the inventory file without having to enter common data for each item. Equipment is initially selected by purchase order #. Therefore, the purchase order # field must already be populated before this option can be used to edit equipment. Equipment with the same purchase order # is selected for editing based on the equipment category, manufacturer, and model fields.

**Lockout/Tagout Enter/Edit**

Allows users to specify that equipment records (File #6914) and/or equipment categories (File #6911) are subject to lockout/tagout requirements. Lockout/tagout stipulates that the affected equipment must be rendered inoperative (usually by opening and tagging a circuit breaker) before the equipment is serviced.

The intent is to protect maintenance personnel.

**Turn-In/Disposition Equipment**

This option can be used to quickly update equipment records for the turn-in or final disposition of equipment not reported to Fixed Assets. If you attempt to apply this option to an item that has been reported to Fixed Assets, the system will tell you that it can't proceed and will instruct you to initiate an FD document from within the FAP system.

If security key ENFACS is held, then an FA Document can be generated for capitalized NX equipment as follows:

You have just entered an Equipment Record that is both NONEXPENDABLE and CAPITALIZED.
Do you wish to send an FA document to Austin? YES// <RET>
Enter a new equipment inventory item? No// <RET> (No)

FileMan Entry

The following dialogue shows the FileMan entry with explanations of each field.

`Select Equipment Management Option: 1 New Inventory Entry
Screen entry? YES// NO

Enter a new equipment inventory item? NO// YES
Please enter SERIAL # if available. Otherwise press <return>.
SERIAL #: ??
Serial number. Assigned by manufacturer. Should be unique within model
and manufacturer. Use numbers, upper case letters, punctuation, and spaces
as needed.
SERIAL #: <RET>
...Setting up new equipment record

MANUFACTURER: ??
Firm that actually manufactured this equipment, not necessarily the
company from which it was purchased.

Answer with MANUFACTURER LIST FILE MFGID, or MFG/DIV, or
PSEUDONYM
MANUFACTURER: <RET>

MODEL: ??
Model number or designation, normally assigned by manufacturer. Spaces and
punctuation may be included.
MODEL: <RET>

SERIAL #: ??
Serial number. Assigned by manufacturer. Should be unique within model
and manufacturer. Use numbers, upper case letters, punctuation, and spaces
as needed.
SERIAL #: <RET>

CATEGORY STOCK NUMBER: ??

If a category stock number was entered, then the life expectancy will be extracted
from the Category Stock number file.

Pointer to Category Stock Number File. This file was introduced to DHCP
with Version 6.5 of the Engineering Package, and is maintained by
Acquisition and Materiel Management (Cataloging).

Answer with CATEGORY STOCK NUMBER NAME, or BRIEF DESCRIPTION
CATEGORY STOCK NUMBER: <RET>
Equipment Management

LIFE EXPECTANCY:  ??
Number of years for which this device is expected to provide useful and economical service. Generally determined by Supply Service on the basis of cumulative experience.

LIFE EXPECTANCY:  <RET>

MFGR. EQUIPMENT NAME:  ??
Brief narrative description of item. For NX (non-expendable) equipment, this data element can be triggered in from the Category Stock Number file if your site chooses to do so.

MFGR. EQUIPMENT NAME:  <RET>

CMR:  ?
Consolidated Memorandum of Receipt. The basic instrument by which accountability for capital equipment is established.

Answer with CMR NAME, or SERVICE, or RESPONSIBLE OFFICIAL

CMR:  <RET>

EQUIPMENT CATEGORY:  ?
Category of device (ex: DEFIBRILLATOR, AIR CONDITIONER, etc.) to which this piece of equipment belongs. Useful in establishing and maintaining preventive maintenance schedules.

Answer with EQUIPMENT CATEGORY NAME, or SYNONYM

EQUIPMENT CATEGORY:  <RET>

PURCHASE ORDER #:  ??

If this Purchase Order can be found in IFCAP, the system will automatically attempt to extract SERVICE, FUND CONTROL POINT, VENDOR, SOURCE, BUDGET OBJECT CODE, STANDARD GENERAL LEDGER, FUND, ADMINISTRATIVE/OFFICE, and EQUITY ACCOUNT from IFCAP. This IFCAP data is then stuffed into the equipment record, but only if the equipment record does not already contain this information. Data from IFCAP does not overwrite data already stored in the Equipment Inv. file.

VA Purchase Order number. May be assigned by the facility or perhaps by a centralized purchasing unit of the Office of Acquisitions and Material Management.

PURCHASE ORDER #:  <RET>

VENDOR POINTER:  ?
Vendor from whom unit was actually purchased.
VENDOR POINTER:  <RET>

ACQUISITION METHOD:  ??
Set of codes which establishes whether or not the facility legally owns the equipment.

Choose from:
'C' FOR CONSTRUCTED
'G' FOR GIFT/BEQUEST/DONATION
'L' FOR LEASED
'M' FOR LEASED/PURCHASED
'O' FOR OTHER
'P' FOR PURCHASED
'R' FOR TRANSFERRED
'T' FOR TRADED
'X' FOR EXCESS
'1' FOR ON LOAN TO VAMC

ACQUISITION METHOD:  

TOTAL ASSET VALUE:  ??  
Cost of this equipment at the time of purchase. This field is likely to become the basis for estimating depreciated value and replacement cost.

TOTAL ASSET VALUE:  

ACQUISITION DATE:  ?  
Date of acceptance of this equipment by the agency. Month and year are generally sufficient.

ACQUISITION DATE:  

WARRANTY EXP. DATE:  ??  
Date on which repairs to this item become the sole responsibility of the government. Generally stipulated in the contract or sales agreement.

WARRANTY EXP. DATE:  

REPLACEMENT DATE:  ??  
Date on which this equipment is scheduled for replacement. Month and year are sufficient. When equipment is entered, this field should be the ACQUISITION DATE plus the LIFE EXPECTANCY. As scheduled REPLACEMENT DATE is approached, however, it may be necessary to revise it. Such revisions do not always alter the official LIFE EXPECTANCY.

REPLACEMENT DATE:  

ACQUISITION SOURCE:  ??  
Source of acquisition for this piece of equipment.

Choose from:
0  Defense Supply Agency
1  VA Servicing Supply Depot
2  Open Market
3  GSA Supply Depot
4  VA Decentralized Schedule
5  Federal Prison Industries
6  Fed.Supply Sched.or OGA Contracts
7  Consolidated Procurement
9  Marketing Center
B  Combination of 2,4,6

Answer with SOURCE CODE, or ABBREVIATION

ACQUISITION SOURCE:  

TYPE OF ENTRY:  ??  
Discriminates between entries for which a CMR Official is legally responsible and those that are accounted for in other ways.

Choose from:
NX  NON-EXPENDABLE EQPT
BSE  BUILDING SERVICE EQPT
EXP  EXPENDABLE EQPT

TYPE OF ENTRY:  

REPLACING (ENTRY NUMBER):  ??  
If this item was acquired as REPLACEMENT EQUIPMENT, then the old ENTRY NUMBER of the item which it replaced should appear in this field.

REPLACING (ENTRY NUMBER):  

Equipment Management

USE STATUS: ??
Tells the user whether or not the equipment is currently in active use.
Choose from:
1 IN USE
2 OUT OF SERVICE
3 LOANED OUT
4 TURNED IN
5 LOST OR STOLEN

USE STATUS: <RET>

PARENT SYSTEM: ??
If Item A is a component of Item B, then the PARENT field of Item A should contain the CONTROL NUMBER of Item B. If Item B is, in turn, a component of an even larger Item C; then the PARENT field of Item B should contain the CONTROL NUMBER of Item C, and so on.
Inventory items with no entry in the PARENT field are either free standing devices or major systems with one or more levels of components beneath them.
An item must already be in the EQUIPMENT file before it can be named as the PARENT of another item.

SERVICE POINTER: ??
The functional entity (generally a service) within the facility that uses the device.

SERVICE POINTER: <RET>

LOCATION: ??
Physical location of this item at the facility.

Enter as ROOM-BUILDING or select a SYNONYM.

LOCATION: <RET>

VA PM NUMBER: ??
Property management number. Assigned by Supply Service upon receipt of new equipment. Should be unique within the facility. First four digits correspond to the Federal Supply Classification number.

VA PM NUMBER: <RET>

LOCAL IDENTIFIER: ??
An optional identifier that has meaning to the facility. Most sites prefer to make these identifiers unique.

LOCAL IDENTIFIER: <RET>

SERVICE CONTRACT: ??
YES indicates that device in question is under a service contract with an entity outside the medical center. A more comprehensive module for service contracts is being developed jointly by AEMS/MERS and IFCAP and will appear in a future release.
Choose from:
Y YES
N NO

SERVICE CONTRACT: <RET>

JCAHO: ??
New Joint Commission standards for accreditation of health care facilities require (in part) that a "separable inventory" of equipment be maintained. This flag should be set to 'YES' for items subject to review by Joint Commission surveyors.
Choose from:
Y YES
N NO
JCAHO: <RET>

REPLACEMENT UPDATE CODE: ??
Replacement information needed by A&MM.
Choose from:
4 NOT TO BE REPLACED
5 TO BE REPLACED UNDER ACTIVATION PROJECT
6 ON ORDER

REPLACEMENT UPDATE CODE: <RET>

STATION NUMBER: ??
Station number of the facility that owns this equipment. If this equipment is owned by a national cemetery that is serviced by a VAMC, then the station number of the cemetery should appear in this field.

STATION NUMBER: <RET>

CONTROLLED ITEM?: ??
Prior approval of VACO is required.
Choose from:
0 NO
1 YES

Enter a new equipment inventory item? NO // 

If security key ENFACS is held, then an FA Document can be generated for capitalized NX equipment. Once an entry in the Equipment Inv. file has been established in the Fixed Assets system, data fields which are of interest to Fixed Assets can not be edited using the standard equipment edit options. Instead an FAP Document must be used to update these fields. The FAP Document will update both the Equipment Inv. file and the Fixed Assets system. The dialogue for generating the FA Document follows.

You have just entered an Equipment Record that is both NONEXPENDABLE and CAPITALIZED. Do you wish to send an FA document to Austin? YES // <RET>

Enter a new equipment inventory item? No // <RET>

FAP Documents are discussed in the Nonexpendable Equipment Module section of this chapter.
Multiple Inventory Entry

This option is used to enter multiple inventory entries of a particular item type.

ENGINEERING EQUIPMENT MANAGEMENT MODULE
Version 7

1  New Inventory Entry
2  Multiple Inventory Entry
3  Inventory Edit
4  Display Equipment Record
5  Equipment Reports ...
6  PM Parameters ...
7  Generate PM Schedule ...
8  Record Equipment PMI ...
9  Print Bar Code Labels for Equipment Management ...
10  Bar Coded Equipment Inventory Management ...
11  Purchase Order Group Edit
12  Lockout/Tagout Enter/Edit
13  Turn-In/Disposition Equipment

Select Equipment Management Option:  2  Multiple Inventory Entry

Enter multiple equipment inventory items? NO//  ??

This option allows a rapid entry of multiple items which are alike; e.g. 25 new electric beds.

Enter YES or NO

Enter multiple equipment inventory items? NO//  YES

Screen entry? YES//  ??

Enter 'Y' for screen handler, 'N' for standard FileMan.

Proceed by entering the first item in full

Enter Return to continue or "^" to quit.

Next, the opportunity is given to enter information about the remaining items.

For each additional equipment entry, enter:
SERIAL #, LOCATION, VA PM NUMBER, and LOCAL IDENTIFIER (if any).

Enter another item? YES//  ??

Enter YES to add another similar equipment item.

Enter another item? YES//  <RET>
...Setting up new equipment record

NOTE: If your original entry had a PARENT SYSTEM, you will be prompted for PARENT SYSTEM here. Likewise, if your original entry was replacement equipment, you will also be prompted for REPLACING (ENTRY NUMBER). If an
incoming inspection work order was created for the first entry then the system will automatically create incoming inspection work orders for the subsequent entries.

Equipment ID: 97
SERIAL #: <RET>
LOCATION: ??
   Physical location of this item at the facility.

Choose from:
  100-110-JC  110  CCU  MEDICINE
  101-148  148  C  EXAM/TREATMENT ROOM
  102-148  148  C  EXAM/TREATMENT ROOM
  103-110-JC  110  CCU  MEDICINE

LOCATION: <RET>
VA PM NUMBER: ??
   Property management number. Assigned by Supply Service upon receipt of new equipment. Should be unique within the facility. First four digits correspond to the Federal Supply Classification number.
VA PM NUMBER: <RET>
LOCAL IDENTIFIER: ??
   An optional identifier that has meaning to the facility. Most sites prefer to make these identifiers unique.
LOCAL IDENTIFIER: <RET>

Enter another item? YES// N (NO)
Inventory Edit

This option is used to edit previously entered equipment data. When selected, the system presents an editable screen display of the data.

'^' TO STOP: ^

Equipment is cross-referenced by the various fields referred to above, which are used in selecting the desired Equipment Inventory.

Select EQUIPMENT ENTRY #: 83

Inventory Edit uses the same screen presentation and fields as seen in the New Inventory Entry. The editing of PM parameters is still controlled by the ENEDPM security key.

The symbol "R" after a field indicates that the user may not change its value.
Equipment Management

The following message is displayed if you attempt to make an inappropriate change to the CMR field while there are active IT assignments for the equipment item you selected.

Equipment has an active IT assignment.
New CMR must be excess (99x) or have IT TRACKING = YES.
Press <RETURN> to continue...

NOTE: Users who do not hold the ENEDNX security key will not be allowed to edit the CATEGORY STOCK NUMBER, COST, ACQUISITION METHOD, or CMR data for equipment records whose TYPE is "NX". These users will not have access to the third screen.
Display Equipment Record

This option allows the display and entry/edit of previously entered records. It is not possible to edit equipment records using this option. Records are displayed using the same screens as New Inventory Entry.

ENGINEERING EQUIPMENT MANAGEMENT MODULE

This option allows the display and entry/edit of previously entered records. It is not possible to edit equipment records using this option. Records are displayed using the same screens as New Inventory Entry.

Equipment Reports

Equipment Reports contains options to print data from the Equipment Inv. file. As the reports can be quite lengthy, it is recommended that the options be run during off-peak hours.

1. New Inventory Entry
2. Multiple Inventory Entry
3. Inventory Edit
4. Display Equipment Record
5. Equipment Reports ...
6. PM Parameters ...
7. Generate PM Schedule ...
8. Record Equipment PMI ...
9. Print Bar Code Labels for Equipment Management ...
10. Bar Coded Equipment Inventory Management ...
11. Purchase Order Group Edit
Select Equipment Management Option: 5 Equipment Reports

The following reports are available:

1. **Specific Equipment History**
   - Print-out of repair history of a specific entry in Equipment Inv. file.

2. **Equipment Category History**
   - A synopsis of the maintenance costs for a given Equipment Category.

3. **Inventory Listing**
   - Contains options to print data from the Equipment Inv. file.

4. **Warranty List**
   - Prints all devices whose warranties are scheduled to expire within a user specified time interval.

5. **Replacement Listing**
   - Prints all entries in the Equipment Inv. file scheduled for replacement within a user specified time interval.

6. **Failure Rate Report**
   - Prints a synopsis of the repair history of user specified Equipment Categories.

7. **PM Workload Analysis**
   - Prints a breakdown of scheduled PMI hours by month for a given shop. Intended as a tool in balancing PM workload.

8. **Direct Posting to Equipment Histories**
   - A utility for posting activities to Equipment Histories without going through the Work Order module.

9. **Parent System/Component Hierarchy Report**
   - Prints a hierarchical list of a parent system and all of its components. Components are indented and listed beneath their parent system. Items that are components of a component in the specified system are included.

10. **Lockout/Tagout Flag Reports**
    - Reports of Lockout/Tagout flags set by Equipment Record (file #6914) and/or Equipment Category file (#6911).

Inventory Listing

The Inventory Listing option has a separate sub menu containing seven options for the generation of a report by CMR, Equipment Category, device location, using service, responsible shop, or use status. The CMR Inventory option uses sort template ENCMR and print template ENCMR to produce an official CMR (Consolidated Memorandum of Receipt) document. This document is to be signed by the official responsible for the CMR each time a physical inventory is taken.

CMR (Consolidated Memorandum of Receipt) reports are normally sorted by CMR and then by category stock number within CMR.

Patch EN*7*19 modified the CMR Report and introduced a new report called NonExpendable Expensed Inventory. The CMR report only includes equipment that is capitalized or whose category stock number (CSN) begins with 10 (Firearms), 23 (Motor Vehicles), or 70 (ADP). The NonExpendable Expensed Inventory report includes equipment that is not included on the CMR report.

Inventory Listing Version 7.0

1 CMR Inventory
2 Equipment Category Inventory
3 Location Inventory
4 Using Service Inventory
5 Responsible Shop Inventory
6 Use Status Inventory
7 NonExpendable Expensed Inventory

CMR Inventory (EIL)
This option generates the Equipment Inventory Listing (EIL) report. Equipment that is belongs to the user-specified CMR and is either capitalized or whose category stock number beings with 10 (firearms), 23 (motor vehicles) or 70 (ADP) is printed on this report. A page suitable for the signature of the Responsible Official is printed when the output is directed to a printer.

See the Nonexpendable Expensed Inventory report to print equipment that belongs to a CMR but does not meet the other criteria for inclusion on the Equipment Inventory Listing report.

Equipment Category Inventory
Inventory listing by device type (cf: File 6911).

Location Inventory
Inventory listing by device location.
Using Service Inventory

Inventory listing by using service. Note that the using service is not necessarily the owning service (ex: a VCR may be used in Dental but owned by Medical Media Production). Owning service is established via the CMR.

Responsible Shop Inventory

Inventory listing by responsible shop.

Use Status Inventory

Inventory listing by use status.

NonExpendable Expensed Inventory

This option generates the Nonexpendable Expensed Inventory report. Equipment that is belongs to the user-specified CMR and is not capitalized and whose category stock number does not being with 10 (firearms), 23 (motor vehicles) or 70 (ADP) is printed on this report.

See the CMR Inventory (EIL) report to print accountable equipment that belongs to a CMR.

EIL: 160  LABORATORY SERVICE

I UNDERSTAND MY RESPONSIBILITIES LISTED IN VA MANUAL MP-2, SUBCHAPTER E, SUBPART 108-25.50 AND THAT I MAY BE HELD LIABLE UNDER CONDITIONS THEREIN. I ASSUME RESPONSIBILITY FOR ITEMS LISTED ABOVE WHICH WERE ON HAND ON THE DATE SIGNED.

I PERSONALLY REVIEWED AND EVALUATED THE NEED FOR THE EQUIPMENT ASSIGNED TO MY ACTIVITY AND FIND THAT:

|   | (1) ALL EQUIPMENT IS ESSENTIAL FOR THE PROPER FUNCTIONING OF THIS ACTIVITY OR, |
|___|__________________________________________________________________________|

|   | (2) THE ATTACHED VA FORM(S) 90-2237-ADP HAS (HAVE) BEEN PREPARED TO TURN IN THE EQUIPMENT DETERMINED TO BE EXCESS TO THE NEEDS OF THIS ACTIVITY OR, |
|___|__________________________________________________________________________|

|   | (3) THE ATTACHED VA FORM(S) 10-1274, RESEARCH EQUIPMENT AVAILABLE TO VA REGIONAL RESEARCH EQUIPMENT PROGRAM HAS (HAVE) BEEN PREPARED FOR DISPOSITION AS APPROPRIATE IN ACCORDANCE WITH MP-2, SUBCHAPTER H, 108-43 OR, |
|___|__________________________________________________________________________|

|   | (4) THE ITEM(S) LISTED ON ATTACHED REPORT OF SURVEY FORM(S), VA 90-1217, IS (ARE) MISSING OR DAMAGED. IT IS UNDERSTOOD THAT ACCOUNTABILITY WILL BE DROPPED FROM THE EIL BUT MY RESPONSIBILITY FOR SUCH ITEMS WILL BE TERMINATED ONLY WHEN FINAL SURVEY ACTION HAS BEEN COMPLETED. |
|___|__________________________________________________________________________|

I ALSO CERTIFY THAT ANY PERSONALLY OWNED PROPERTY WHICH HAS BEEN PLACED INTO OFFICIAL USE HAS BEEN LISTED ON VA FORM 90-2235 (LIST OF PERSONALLY OWNED PROPERTY PLACED IN OFFICIAL USE), AND HAS BEEN SUBMITTED THROUGH THE PROPER CHANNELS FOR APPROVAL.

### Equipment Management

| CATEGORY STOCK NUMBER: 5820-439321 (RECE RADIO PAGING SYS) |
| CATEGORY STOCK NUMBER: 6515-438301 (MONITOR CARDIAC) |

**Receiver, Radio (Paging System).** An item designed to be worn by key personnel of an organization for the purpose of notifying them to contact the caller who will relay a message that has been received for them. It is designed for one way page calls and usually has a spring type pocket clip, and is battery operated.

---

**Receiver, Radio (Paging System).** An electronic item designed to provide a continuous audible and/or visual indication of heart rate and rhythm and may also be designed to display electrocardiogram and pulse waveforms. It is used for detection of cardiac arrest, arrhythmias, or substantial drop in blood pressure during surgery, and is complete with alarm. May consist of a needle indicator or built-in cardioscope. May be the rack mounting (plug-in) or self-contained, cabinet type.

## Warranty List

The fourth Equipment Reports option allows the display of a warranty expiration list, with entry number, equipment category, owning service, PM number, acquisition date, acquisition value, and location being displayed.

Select Equipment Reports Option: 4 Warranty List
START WITH WARRANTY EXP. DATE: FIRST// ??

Examples of Valid Dates:
- JAN 20 1957 or 20 JAN 57 or 1/20/57 or 012057
- T (for TODAY), T+1 (for TOMORROW), T+2, T+7, etc.
- T-1 (for YESTERDAY), T-3W (for 3 WEEKS AGO), etc.

If the year is omitted, the computer uses the CURRENT YEAR.

You may omit the precise day, as: JAN, 1957

Date on which repairs to this item become the sole responsibility of the government. Generally stipulated in the contract or sales agreement.

* Count of items to be inspected in month indicated.
** Count of all items for which this technician has PM responsibility.

Note that the item count may add in the same piece of equipment more than once, as the piece may very well be subject to more than one PM in the course of a year.
Direct Posting to Equipment Histories

This option is really not a report, but rather a utility that allows posting of activities to Equipment Histories without going through the Work Order module.

Select Equipment Reports Option: 8 Direct Posting to Equipment Histories

This is a utility for posting information directly to the AEMS-MERS Equipment History sub-file.

Are you sure you want to proceed? NO// y YES

One way of specifying the equipment records to be impacted is to perform a search of the Equipment Inv. file (#6914) using VA FileMan and store the results in a Sort template. At this point, the system will ask if such a template is to be used:

Are the Equipment Records to be found in a SORT template? NO// <RET>

Select EQUIPMENT INV.: ?
Answer with EQUIPMENT INV. ENTRY NUMBER, or MANUFACTURER, or MFR., EQUIPMENT NAME, or MODEL, or MODEL(C), or SERIAL #, or SERIAL #,(C), or EQUIPMENT CATEGORY, or PURCHASE ORDER #, or CATEGORY STOCK NUMBER, or LOCATION, or VA PM NUMBER, or LOCAL IDENTIFIER
Do you want the entire 95-Entry EQUIPMENT INV. List? N (No)

Select EQUIPMENT INV.: defibrillator
1  1  8978899 DEFIBRILLATOR IN USE  7530-4565
2  64  32781 DEFIBRILLATOR IN USE  6515-6328
3 151  00002 DEFIBRILLATOR IN USE  6515-0001
4 199  00002 DEFIBRILLATOR IN USE
5 199  00002 DEFIBRILLATOR IN USE

Press <RETURN> to see more, '^^' to exit this list, OR
CHOOSE 1-5: 1 1

Select EQUIPMENT INV.: 32781 64 32781 DEFIBRILLATOR IN USE 65
15-6328
Select EQUIPMENT INV.: 78 89445A70 BED-ELECTRIC IN USE  6530-7187
Select EQUIPMENT INV.: 80 89445A04 BED-ELECTRIC IN USE  6530-6590

Shall we save these ENTRY NUMBERS in a SORT template for future use? NO// y YES

Name of SORT template. Must begin with 'ENPOST': ENPOSTTST
OK to create new SORT template? YES// y YES
Enter as much information as may apply.

Select NEW WORK ACTION: ?
Answer with NEW WORK ACTION NAME, or HISTORY CODE, or SYNONYM
Do you want the entire 31-Entry NEW WORK ACTION List? y (Yes)

Choose from: BEYOND ECONOMICAL REPAIR B1
CONSULTATION C1
CONTRACTOR ASSISTANCE C2
COULD NOT DUPLICATE C3

Select NEW WORK ACTION: P2 PREVENTIVE MAINTENANCE P2

WORK ORDER REFERENCE: ??
Enter 3 to 12 characters. Optional.
Once the posting has been accomplished, the system will list all the equipment records that were affected.
**Parent System/Component Hierarchy Report**

This option prints a hierarchical list of a parent system and all of its components. Components are indented and listed beneath their parent system. Items that are components of a component in the specified system are included.

Select Equipment Reports Option: 9 Parent System/Component Hierarchy Report
Do you want a report for ALL systems? NO// ??

Enter YES to generate a report for all systems. The computer will identify all the topmost parent systems by looping through the entire Equipment file. A complete system hierarchy will be printed for each of the topmost parent systems which includes all of their components. It may take awhile to search the entire Equipment file.

Enter NO to generate a report for just one system.

Enter YES or NO

Do you want a report for ALL systems? NO// YES
Select the 1st field (required) to print for each equipment item.
Select FIELD: EQUIPMENT CATEGORY// ??
Choose from:

<table>
<thead>

Frequency (multiple):

Press <RETURN> to continue..<RET>.

Select RESPONSIBLE SHOP: ELECTRIC//<RET>

RESPONSIBLE SHOP: ELECTRIC//<RET>

TECHNICIAN: ?
The Engineering Service employee who normally does the PM work on this piece of equipment for this shop.

TECHNICIAN: ENUSER.ONE
STARTING MONTH: MAR
SKIP MONTHS: ??

A range of months (inclusive) during which PMI's are to be suspended. For example, an entry of 'NOV-MAR' for an air-conditioner would suppress the scheduling of any PMI's in NOV, DEC, JAN, FEB, and MAR. Some care needs to be taken when using this field. If you want an ANNUAL inspection, for instance, be sure that the STARTING MONTH is not within the range specified by the SKIP MONTHS; otherwise the ANNUAL PMI will never be scheduled.

Entries must take the form 'MMM-NNN', where MMM is a three character abbreviation of the first month for which PMI's are to be suspended and NNN is a three character abbreviation for the last month for which PMI's are to be suspended. Valid abbreviations are: JAN, FEB, MAR, APR, MAY, JUN, JUL, AUG, SEP, OCT, NOV, and DEC.

SKIP MONTHS:<RET>

CRITICALITY: ??

An index of the importance of performing PMI's on this device. Enter an
Equipment Management

integer between 1 and some upper limit not greater than 99 (most sites use 10 or 20). The closer the values are to the upper limit the more critical the PMI's become. A value of 1 would indicate that PMI's are desireable but far from essential (least critical).

When PM worklists are generated, the system will ask if all devices should be included or just those whose CRITICALITY is within a certain user selectable range (say, 7 to 10). This is intended as a means of adjusting workload to match available resources.

Use of this feature is left entirely to the discretion of each site. If a CRITICALITY range is selected, the system will ask the user whether devices having no CRITICALITY should be included or excluded. CRITICALITY: 10

This is intended as a means of adjusting workload to match available resources. Use of this feature is left entirely to the discretion of each site. If a range of 1 through 10 seems like overkill, you may wish to restrict yourself to 5 through 10 instead. If all PMIs are deemed to be a high priority and adequate resources are available, there is probably no need to use this feature at all.

Select FREQUENCY: ??

Make a separate entry for each category (MONTHLY, QUARTERLY, etc.) of PMI that is to be scheduled for this device. The PM module looks at this field in conjunction with the STARTING MONTH when PM lists are generated.

Let's consider a fairly complex example: a device with SEMI-ANNUAL, QUARTERLY, and MONTHLY PMI's and a STARTING MONTH of MAR. Assuming no entry for SKIP MONTHS, the following PMI's will be scheduled:

- SEMI-ANNUAL in MAR and SEP;
- QUARTERLY in JUN and DEC;
- MONTHLY in APR, MAY, JUL, AUG, OCT, NOV, JAN and FEB.

Choose from:

A ANNUAL
S SEMI-ANNUAL
Q QUARTERLY
M MONTHLY
BM BI-MONTHLY
W WEEKLY
BW BI-WEEKLY
N NONE
BA BI-ANNUAL
TA TRI-ANNUAL

Select FREQUENCY: A (ANNUAL)

Are you adding 'ANNUAL' as a new FREQUENCY (the 1ST for this RESPONSIBLE SHOP)? No// y (Yes)

HOURS (Estimated): 40
MATERIAL COST (Estimated): 500
LEVEL: ??

Each scheduled PMI may be composed of some combination of one or more of the following discrete levels of activity:

Level 1 - Visual inspection only;
Level 2 - Check and adjust operator controls;
Level 3 - Electrical safety analysis;
Level 4 - Minor parts replacement;
Level 5 - Major parts replacement;
Level 6 - Complete overhaul.

LEVEL is an optional field and is intended to accommodate the needs of certain facilities with highly developed PM programs. Entries for LEVEL (if any) will be printed on the PM worklist as a reminder to the responsible technician.

If more than one number applies, separate numbers a comma.

LEVEL: 6

PROCEDURE: ??

Enter the abbreviation (4 to 10 characters) of the PROCEDURE to be followed in performing this category of PMI on this device. The title
(as well as the abbreviation) of the PM PROCEDURE will appear on PM worksheets for reference.

If disk space permits, the actual procedure itself may be entered in the TEXT field of the PM PROCEDURES file (Number 6914.2) and printed on demand. In any event, the procedure should be on file and readily accessible to the technician performing the work.

You may enter a new PM PROCEDURES, if you wish
ANSWER MUST BE 2-20 CHARACTERS IN LENGTH
PROCEDURE: DEFIB4 ASHE-DEFIBRILLATOR
Select FREQUENCY: S (SEMI-ANNUAL)

JCAHO: ??
Joint Commission on the Accreditation of Healthcare Organizations (JCAHO) standards require that a "separable inventory" be maintained of devices that are of interest to the JCAHO. If this flag in the Equipment Category File is set to 'YES' then all equipment added under that category will have its individual JCAHO field set to 'YES'.

Choose from:
- Y YES
- N NO

JCAHO: <RET>

Are you finished with this Equipment Category? Yes// <RET> (Yes)
Do you wish to assign this PM schedule to ALL existing equipment records in the category of DEFIBRILLATOR? No// ??
'YES' will cause the system to immediately find every equipment record of type BED-ELECTRIC and assign each of them the PM schedule just entered. The ENTRY NUMBER of each affected equipment record will be displayed at your terminal, but you will not be asked to confirm the transaction unless you say that you want to.

The ID# of each affected device will be displayed at your terminal, but you will not be asked to confirm the transaction unless you have said that you want to.

Once this process has begun, it should not be interrupted.
Do you wish to assign this PM schedule to ALL existing equipment records in the category of DEFIBRILLATOR? No//y (Yes)
Do you wish to confirm each transaction? No// ??

You should enter 'YES' if you want to apply the revised schedule to some BED-ELECTRIC's but not others. Enter 'NO' if you want the revised schedule applied to all equipment of type BED-ELECTRIC.

Do you wish to confirm each transaction? No// <RET> (No)

Press <RETURN> to continue...

Select EQUIPMENT CATEGORY NAME:

If a new PM schedule is applied to existing devices, the STARTING MONTH will be handled differently from the other fields. If the EQUIPMENT CATEGORY contains a STARTING MONTH, that STARTING MONTH will be applied to existing devices. If, however, the EQUIPMENT CATEGORY does not include a STARTING MONTH, the STARTING MONTH of existing devices will remain unchanged. That is, STARTING MONTHS will never be deleted from the Equipment Inv. file via this option.

If preventive maintenance work on items in an equipment category is scheduled to occur over a period of months (ten items for May, six items for June, etc.) two approaches may be taken. The first is to set up equipment categories such as Analyzer-Glucose, Analyzer-Gas, and so on, and enter a month for each category. The second approach is to edit the EQUIPMENT INV. file, entering a month for each item in a selected equipment category.

10 Bar Coded Equipment Inventory Management ...
11 Purchase Order Group Edit
12 Lockout/Tagout Enter/Edit
13 Turn-In/Disposition Equipment

The following options are available:

1. Monthly PM List
   Print PMI worksheet(s) for monthly PMIs. These worksheets will include scheduled ANNUAL, SEMI-ANNUAL, QUARTERLY, BI-MONTHLY, and MONTHLY PMIs.

2. Weekly PM List
   Print PMI worksheet(s) to include WEEKLY and BI-WEEKLY PMIs. You will be prompted for a week number (1 through 5). BI-WEEKLY PMIs will appear on worksheets for weeks 1 and 3.

3. Delete PM Work Orders
   Intended to enable you to delete PM work orders in order to conserve disk space. Deletion of PM work orders via this option will not remove an existing record of the PMI from the Equipment History. Deletion of any work order via the EDIT WORK ORDER option WILL remove the corresponding entry from the Equipment History. If you intend to record PMIs in the Equipment History, you should not delete PM work orders until after they have been recorded.

Monthly PM List

Select Generate PM Schedule Option: 1 Monthly PM List

GENERATE MONTHLY PM LIST(S)  VERSION 7

Select Month: JUL 1997/RET (JUL 1997)
Sort by: (E,P,I,L,C,S or ? for Help) L/RET

If you have previously set PM Sort using Software Options Enter/Edit on the Program Management menu, you will not be asked this prompt.

All PM lists are sorted by shop, and within shop they may be sorted again by RESPONSIBLE TECHNICIAN. You must now choose how this list should be sorted further. You have the following choices:

'E' for Equipment Entry #
'P' for PM #
'I' for Local Identifier
'L' for Location
'C' for Equipment Category
'S' for Owning Service

Sort by: (E,P,I,L,C,S or ? for Help) L/RET
For all EQUIPMENT CATEGORIES? Yes//RET (Yes)

Within CATEGORY, shall worklist be sorted by LOCATION?
Enter Yes or No: YES//
If you want this list to be ordered by LOCATION within CATEGORY, please enter 'YES', otherwise enter 'NO' and items will be ordered by EQUIPMENT ENTRY NUMBER.

Enter Yes or No: YES/RET
Shall all LOCATIONS be included? YES//
Enter 'NO' if you want to screen your worklist by DIVISION, BUILDING, WING, and/or ROOM. If you enter 'YES' then all LOCATIONS will be included. The sort order will be DIVISION, BUILDING, WING, and finally ROOM.

Shall all LOCATIONS be included? YES/RET
Shall worklist be sorted by RESPONSIBLE TECHNICIAN? YES//
Enter 'YES' if you want your worklist sorted by RESPONSIBLE TECHNICIAN, with page breaks between each TECH. If you enter 'NO' then equipment items will be selected without regard to RESPONSIBLE TECH.

Shall worklist be sorted by RESPONSIBLE TECHNICIAN? YES/RET
For all TECH's: ? Yes//
You may select all TECH's or one specific TECH. Enter 'Y'es for a worklist which includes all equipment, regardless of RESPONSIBLE TECHNICIAN.
For all TECH's: ? Yes/RET (Yes)

Shall 'OUT OF SERVICE' equipment be included in worklist? YES//
Enter 'YES' if you want equipment entries with a USE STATUS of 'OUT OF SERVICE' to appear on this PM worklist. Otherwise enter 'NO'.

Shall 'OUT OF SERVICE' equipment be included in worklist? YES/RET
For what levels of CRITICALITY: ALL//
This feature enables you to print a 'partial' PMI list, containing only those devices whose 'CRITICALITY' falls within a certain range.
For example, if your site ranks devices from 1 to 10 (10 being most critical) and circumstances are such that you only have resources for a limited number of PMI's in a given month, you may wish to enter something like '6-10'. This will mean that PMI's which would normally be scheduled for devices in the criticality range 1-5 will be suppressed, as will entries with 'CRITICALITY' greater than 10, but since your site only uses 1 thru 10 there shouldn't be any.

The system will not attempt to re-schedule these PMI's for the next month, because that would tend to defeat any efforts to balance the PM work load.

In short, this feature is not intended for routine use but rather as a systematic approach to dealing with an exceptional situation.

Entries must be in the form 'M-N' where M and N are integers in the range of 1 to 99 and M is less than or equal to N.

For what levels of CRITICALITY: ALL// < RET>
For all shops? Yes// ??
You may generate worklists for ALL shops or for ONE PARTICULAR shop.
For all shops? Yes// < RET> (Yes)

Record Equipment PMI

ENGINEERING EQUIPMENT MANAGEMENT MODULE
Version 7

1 New Inventory Entry
2 Multiple Inventory Entry
3 Inventory Edit
4 Display Equipment Record
5 Equipment Reports ...
6 PM Parameters ...
7 Generate PM Schedule ...
8 Record Equipment PMI ...
9 Print Bar Code Labels for Equipment Management ...
10 Bar Coded Equipment Inventory Management ...
11 Purchase Order Group Edit
12 Lockout/Tagout Enter/Edit
13 Turn-In/Disposition Equipment

This option is used to close out PM worklists, by specific entry or by worklist. It is also used to record a PMI on a given device. The option has a seven item sub menu. Due to the complexity of the bar code process, the fourth and fifth options are explained in detail in the Attachments section of this manual. The remaining options are presented with actual examples.

1. Close Out PM Work Orders
   Close out a PM work list entry by entry. User is asked for a complete specification of the first PM work order; after that the system assumes the shop, month, and type (MONTHLY or WEEKLY) of work list.

2. Rapid Closeout of PM Work Orders
   Closes out an entire PM worklist. User is prompted for any PM work orders that are to be closed out individually. All work orders on the specified list which are not closed out individually will be assigned a PM status of PASSED and default values (if any) for time and materials. This option may take a while to run, so the user is given the opportunity to free his terminal. Freeing the terminal causes this option
to begin to run immediately as a background job. This option may slow the system noticeably and it may be desirable to assign this task a lower priority than interactive jobs.

3. **Record Single Device PMI**
   May be used to record a PMI on any specified device, regardless of whether or not it is on an active PMI list. One use envisioned for this is recording the results of area sweeps. If the specified device is in the scheduled PMI program and it appears that a PMI recorded via this option may make it desirable to change the scheduled FREQUENCY or the STARTING MONTH, the user will be afforded an opportunity to do so.

4. **Bar Coded PMI Functions**
   Driver for bar coded Preventive Maintenance functions. Will prompt you to either (1) download a data acquisition program to a bar code reader, (2) upload collected data from a bar code reader, or (3) restart processing of a previously uploaded data set.

5. **Upload Data from MedTester**
   Reads data from MedTester (Electrical Safety Analyzer manufactured by Dynatech Nevada, Inc.) and posts electrical safety inspections to Equipment Histories.

6. **Rapid Deferral of PM Worklist**
   Defers all entries on a user specified PM worklist. All work orders on subject worklist are given a PM Status of DEFERRED and a close out date of TODAY. Time and Materials are not posted. This option is intended to be run only if you want to post DEFERRALS of all open line items (PM work orders) on subject worklist to Equipment Histories.

   This option is not intended for use in cases where there is some expectation that you may wish to otherwise close-out the PM worklist in question at some later date. That is to say, once a scheduled preventive maintenance inspection task has been recorded as DEFERRED it will be difficult to change it to PASSED.

7. **Print PM Manhours**
   Prints total manhours expended on preventive maintenance by shop and by month for each technician. These manhours are automatically recorded when PM work orders are closed out.
Close Out PM Work Orders

Select Record Equipment PMI Option: 1 Close Out PM Work Orders

The following prompt only appears if the site parameter option field "DELETE PM WORK ORDERS?" is null. If the site parameter option field has been set to No or Yes, this prompt is bypassed.

Should PM work orders be deleted after close out? YES// ??

Deletion of PM work orders after they have been closed out is recommended for sites that are short on disk space. The results of the PMI will be posted to the equipment history file before the PM work order is deleted. If disk space is not a problem, then you may wish to retain PM work orders in accordance with your established archive criteria. In this way, the Work Order # File will reflect scheduled as well as unscheduled work load.

For estimating purposes, each PM work order will consume about 300 bytes of disk space (or about 3 such work orders per block).

Should PM work orders be deleted after close out? YES// N

Please enter first PM work order to be closed: PM-B9611M-009 201-114

Approximate cost of materials needed to complete this task.
TOTAL MATERIAL COST: <RET>
VENDOR SERVICE COST: ??
Approximate cost of vendor services needed to complete this task.
VENDOR SERVICE COST: <RET>
WORK PERFORMED (140 char max): QUARTERLY PMI HOSPITAL BEDS
Replace <RET>
CONDITION CODE: ??
Condition code of equipment is normally determined by an Engineering technician and entered during close out of a work order. The code are:

(1) LIKE NEW - Like new condition, good performance record, low service cost.
(2) GOOD - Middle of service life, fair performance record, increasing service cost.
(3) POOR - Approaching end of service life, poor performance record, high service cost, consider budgeting for replacement.

Choose from:
  1    LIKE NEW
  2    GOOD
  3    POOR
CONDITION CODE: <RET>
DATE COMPLETE (or closed): APR 9, 1997// ??

Next work order: PM-B9611M-010// ^

Work orders are automatically generated for failed preventive maintenance inspections if the preventive maintenance is recorded via bar code reader or electrical safety analyzer. If being done manually, the user will be prompted for the creation of a regular work order.

At this point, the user is returned to the Record Equipment PMI menu.
Rapid Closeout of PM Work Orders

Select Record Equipment PMI Option: 2
Select Worklist Month: JUL 1997// <RET> (JUL 1997)
Select ENGINEERING SECTION LIST: 22 AIR CONDITIONING
MONTHLY or WEEKLY PM List: MONTHLY// <RET>

COMPLETION DATE (future dates will not be accepted). MONTH and YEAR are required, DAY is optional: JUL 1997// <RET> (JUL 1997)

Do you wish to substitute one technician for another? NO// ??

If all of the work assigned to TECHNICIAN A has actually been done by TECHNICIAN B then you should enter 'YES' at this point and then 'Replace' TECHNICIAN A 'With' TECHNICIAN B.

Do you wish to substitute one technician for another? NO// <RET>

This option will scan the MONTHLY PM Worklist of the AIR CONDITIONING Shop for JULY, 1997. It will automatically assign a PM Status of 'PASSED' and a completion date of JUL 1997 to each work order on the list, except for those that you close out individually.

Default values for labor and material costs (if any) from the Equipment File will be posted to the Equipment History during Rapid Close Out.

Are you sure you want to proceed? No// y (Yes)

Please enter any PM work orders (or the sequential portion thereof) that you wish to close out individually. Press <RETURN> to terminate the process.

Work order (ex: 'PM-A9707M-001' or just '1'): ??

Choose from:
PM-A9707M-001 A208-01-JC
PM-A9707M-002 A212-01-JC

Please enter an existing PM work order, or the sequential portion thereof. If there are no work orders to be closed out individually, enter <cr>.

Would you like a list of existing work orders? Yes// <RET> (Yes)
PM-A9707M-002

Work order (ex: 'PM-A9707M-001' or just '1'): PM-A9707M-002

Record Single Device PMI

Select Record Equipment PMI Option: 3 Record Single Device PMI
Select ENGINEERING SECTION LIST: ??

Choose from:
1  OFFICE OF THE CHIEF
2  ADMIN.+CLER.
3  SUPERVISORY OPERAT.
4  UTILITY OPERATIONS

Select ENGINEERING SECTION LIST: OFFICE OF THE CHIEF
Select Month: APR 1997 // <RET> (APR 1997)
Are you recording a WEEKLY PMI? No// <RET> (No)

Do you want to retain PM work orders in your Work Order File after they have been posted to the Equipment History? No// ??

This prompt only appears if the site parameter option field "DELETE PM WORK ORDERS?" is null. If the site parameter option field has been set to No or Yes, this prompt is bypassed.

Deletion of PM work orders after they have been closed out is recommended for sites that are short on disk space. The results of the PMI will be posted to the equipment history file before the PM work order is deleted.

If disk space is not a problem, then you may wish to retain PM work orders in accordance with your established archive criteria. In this way, the Work Order # File will reflect scheduled as well as unscheduled work load.

For estimating purposes, each PM work order will consume about 300 bytes of disk space (or about 3 such work orders per block).

Do you want to retain PM work orders in your Work Order File after they have been posted to the Equipment History? No// Y (Yes)

Are you recording a MONTHLY (as opposed to a WEEKLY) worklist? YES/   (YES)
Select ENGINEERING SECTION LIST: BIOMEDICAL

Should existing PM work orders be deleted after close out? YES/

The system is now ready to update the Equipment File on the basis of
data acquired from the portable bar code reader.

Data that cannot be processed normally will be reported as Exception Messages. These messages will provide notification of such things as missing bar code labels and database inconsistencies.

Exception Messages will also be printed for devices that FAIL their PM inspection. Regular work orders will be automatically generated. The PM work order will be closed with a reference to the regular work order.

You must now select a hard copy device (printer) to receive PMI Exception Messages.

You may enter the letter 'Q' and then select a device if you wish to schedule this data processing task for some later time.

Select Device for PMI Exception Messages: HOME/   LAN

Further information on Bar Code PMIs can be found in the Attachments section of this manual.
**Upload Data from MedTester**

Select Record Equipment PMI Option: 5  Upload Data from MedTester

Enter the device to which the MedTester is connected.

DEVICE:  MED  MEDTESTER  RM 221

...OK, use the MedTester 'PALL' function to send the data. Please be sure that you are connected to a MedTester COMM port and that the MedTester PRINTER port is OFF. ................

MedTester UPLOAD MODULE:

Should data from the MedTester be used to close out work orders on a PM worklist? YES/ ?

If MedTester is being used in conjunction with a specific Preventive Maintenance worklist, you should answer 'YES' to this question. You will then be asked to identify the worklist.

If you say 'NO' at this point, safety tests stored in the MedTester will be posted to the Equipment Histories without affecting a PM worklist in any way.

Press <RETURN> to continue...

MedTester UPLOAD MODULE:

Should data from the MedTester be used to close out work orders on a PM worklist? YES/ (YES)

For which month do you wish to record PMI's: APR 1993/ (APR 1993)

Are you recording a MONTHLY (as opposed to a WEEKLY) worklist? YES/ (YES)

Select ENGINEERING SECTION LIST:  BIOMEDICAL

Should existing PM work orders be deleted after close out? YES/ 

The system is now ready to update the Equipment File on the basis of data acquired from the MedTester.

If the system encounters data that cannot be processed in the normal fashion it will give you written notice in the form of a MedTester Exception Message. These messages will provide notification of such things as test failures and database inconsistencies.

If a device fails a MedTester test sequence, the site is expected to evaluate the failure and issue a regular work order for corrective action. If a PM work order exists for such a device and if you have elected to use MedTester data to close out that worklist, then the PM status will be set to 'CORRECTIVE ACTION TAKEN/REQUESTED' but the PM work order will remain open and nothing will be posted to the Equipment History. Once corrective action has been taken, then the PM work order should be closed out manually. The WORK PERFORMED field should contain a reference to the regular work order.

You will soon select a hard copy device (printer) to receive MedTester Exception Messages, but first we need to know whether or not you want paper copies of the actual test results.

Do you want a paper copy of test results (will print on same device as Exception Messages)? NO/ Y (YES)

Select Device for EXCEPTION MESSAGES:  HOME/ ^&  WORK BENCH  RIGHT MARGIN: 80/ 

DO YOU WANT YOUR OUTPUT QUEUED? NO/ (NO)

Select Equipment Management Option: 9 Print Bar Code Labels for Equipment Management

Select Equipment Labels Option:

1. Equipment Labels
2. Location Labels

The Print Bar Code Labels for Equipment Management option allows users to print bar code equipment or location labels for different sort categories. The labels may be printed with a companion listing which lists the sort category, description, manufacturer, model, and related information.

Equipment Labels

1. Equipment Category Bar Code Labels
2. CMR Bar Code Labels (EQUIPMENT)
3. Bar Code Labels by PM Number
4. Bar Code Labels by General Location (WING)
5. Bar Code Labels by Specific Location (ROOM)
7. Equipment Labels by Equipment ID#
8. Bar Code Labels in Conjunction with PM Worklist
9. Bar Code Labels for a Purchase Order
10. Bar Code Labels by LOCAL ID
11. Bar Code Labels by Using Service
Equipment Category Bar Code Labels
  Prints bar coded equipment labels for all pieces of equipment in specified category.

CMR Bar Code Labels (EQUIPMENT)
  Prints bar code labels for all equipment on a specified CMR.

Bar Code Labels by PM Number
  Prints bar coded equipment labels for a specified range of Property Management numbers.

Bar Code Labels by General Location (WING)
  Prints bar code labels for each piece of equipment located on a specified wing, where wing is taken from the Space file (#6928).

Bar Code Labels by Specific Location (ROOM)
  Prints bar code labels for each piece of equipment in a specified room. Sites must be using the Space file (#6928) in order to profit from using this option.

Single Device Bar Code Label
  Print bar code label for one specific piece of equipment.

Equipment Labels by Equipment ID#
  Prints bar coded equipment labels for each and every entry in the Equipment Inv. file.

Bar Code Labels in Conjunction with PM Worklist
  Prints bar coded equipment labels for each piece of equipment on a monthly PM worklist. User specifies the worklist by responding to prompts for date (month and year only) and shop.

Bar Code Labels for a Purchase Order
  Prints a bar coded equipment label for each item on a specific purchase order.

Bar Code Labels by LOCAL ID
  Prints equipment labels for a range of local identifiers.

Bar Code Labels by Using Service
  Prints bar coded equipment labels for all devices that are identified in the Equipment Inv. file as belonging to a particular service.
1 Equipment Category Bar Code Labels

The first sub option of the Equipment Labels option, Equipment Category Bar Code Labels, is used to illustrate the option.

Select Equipment Labels Option: 1 Equipment Category Bar Code Labels

New labels only? YES// ??

The system records the printing of equipment bar code labels. If you do not wish to have labels printed again if they have already been printed at least once, please enter 'YES' at this time.

Select Equipment Labels Option: 1 Equipment Category Bar Code Labels

New labels only? YES// Y

Would you like a companion listing for this set of labels? YES// < RET> (YES)

Select PRINTER for Companion Listing: ??

13  Turn-In/Disposition Equipment

Two types of bar code labels are necessary for equipment management. They are commonly referred to as location labels and equipment labels. The Engineering package contains software to generate both types. To conduct a CMR (Consolidated Memorandum of Receipt) inventory, users will scan a location label (affixed to a door frame) and then scan the equipment labels on every piece of equipment in that physical location. When all the equipment in a given room has been scanned, the user will scan the location label again to "close out" that location. The user will then move to the next room and repeat the process. At some point, the user will upload data from the portable bar code reader into DHCP. The Engineering package will automatically use the data to update individual records in the Equipment Inv. file.

The package expects that a Trakker Model 9440 (or equivalent) portable bar code reader will be used for bar code based equipment inventory and for bar code based preventive maintenance inspections.

Two programs are included which may be downloaded from DHCP to the Trakkers. One is for equipment inventory; the other is for preventive maintenance. These programs are written in a language called IRL (Interactive Reader Language), which is the native instruction set for this brand of portable bar code reader.

The IRL programs (to be downloaded to the Trakkers) and actual data sets (once they have been uploaded from the Trakkers) are both stored in the same file. The file is called Barcode Program (File #446.4). This file, together with all software necessary for uploading and downloading, is included in the Engineering package.
The Bar Coded Equipment Inventory Management options include:

1. Download NX Program to Portable Bar Code Reader
   Downloads an IRL (Interactive Reader Language) program to a portable bar code reader.

2. Upload Data From Portable Bar Code Reader
   Calls a routine that causes a portable bar code reader to upload its data to DHCP.

3. Inventory Exception Listing
   Produces a list of those items on a specified CMR that have not been located in the course of a physical inventory.

4. Manual Update of Equipment Inventory
   Uses FileMan to update physical inventory data on individual entries in the Equipment Inv. file.

5. Restart Processing of Uploaded NX Inventory Data
   Used to resume processing of NX inventory that has been uploaded from a portable bar code reader. User will need PROCESS ID and TIME STAMP from failed process. If this information is unavailable, data upload must be re-started from the beginning.
**Download NX Program to Portable Bar Code Reader**

**Note:** This option uses an automated process to download bar code data.

To use this option, enter the name of the bar code program for downloading, and the device to which the bar code reader is connected, at the screen prompts.

Select Bar Coded Equipment Inventory Management Option: 1 Download NX Program to Portable Bar Code Reader

OK, enter the device to which the bar code reader is connected.

DEVICE: HOME// <RET> UCX/TELNET RIGHT MARGIN: 80// <RET>

### WARNING: When a program is sent to the barcode reader, ALL DATA stored on the barcode reader will be LOST! Make sure that previous users of this barcode reader have no need for data, if any, that might exist on the reader.

Please follow the following steps:

1) If you have not already done so, you may now connect up the barcode reader to the output device.

2) After you have connected the barcode reader to the device, clear the barcode reader by turning the reader off and back on.

3) After you have completed the above steps, press the return key to start sending the program to the barcode reader. If you want to abort this option, enter a '^' and return.

OK, you must now enter either a return ...

... or an '^' return:

Download time: 11 sec.

At this point, the program is loaded directly into the device. When downloading is completed, the message "OK, you may now disconnect the bar code reader" is displayed.
**Upload Data From Portable Bar Code Reader**

This option calls a routine that causes a portable bar code reader to upload its data to DHCP.

Enter the device to which the bar code reader is connected.

DEVICE: 64 RM 221 RIGHT MARGIN: 80/

...OK, use the Transmit option on the bar code reader to start sending the data...

OK, you are logging data on JUN18,1111@09:46...
...using the BAR CODE program NON-EXPENDABLE

Reading bar code reader....
...............................
...............................
...............................

Number of records read: 986

The system is now ready to update the EQUIPMENT INV. file on the basis of data acquired from the portable bar code reader. If the system encounters data that cannot be processed in the normal fashion, it will give written notice in the form of an Exception Message. These messages will provide notification of such things as missing bar code labels and database inconsistencies.

You must now select a hard copy device (printer) to receive Exception Messages. You may enter the letter Q and then select a device if you wish to schedule this data processing task for some later time.

You can abort this process by uparrowing out at the Exception Messages prompt. The system then gives you a process ID, so that the user can restart the session at a later time, using the fifth option, Restart Processing of Uploaded NX Inventory Data.

Select Device for Exception Messages: HOME//^
Inventory Exception Listing

This option produces a list of those items on a specified CMR that have not been located in the course of a physical inventory.

Select Bar Coded Equipment Inventory Management Option: 3 Inventory Exception Listing

This option allows users to specify that equipment records (file #6914) and/or equipment categories (file #6911) are subject to lockout/tagout requirements. Lockout/tagout stipulates that the affected equipment must be rendered inoperative (usually by opening and tagging a circuit breaker) before the equipment is serviced.

Nonexpendable Equipment Module (A&MM)

The Nonexpendable Equipment (ENMM MGR) menu is a specially assigned menu option not available to all users. It is generally used by the PPM Chief and designee in A&MM.

Select OPTION NAME: ENMM MGR Nonexpendable Equipment Module (A&MM)

1 Equipment Enter/Edit (NX) ...
2 Equipment Management Reports (NX) ...
3 Bar Code Features (NX Equipment) ...
4 NX (Nonexpendable Equipment) Utilities ...
5 FAP Documents (Code Sheets) ...
6 Fixed Assets Reports ...

Equipment Enter/Edit (NX)
Collection of options for entering data into the AEMS/MERS Equipment Inv. file.

Equipment Management Reports (NX)
Collection of AEMS/MERS outputs that are thought to be of interest to the Property Management Section of A&MM.

Bar Code Features (NX Equipment)
Collection of options designed for use in bar coding nonexpendable equipment and in using bar code to maintain CMR inventories.

NX (Nonexpendable Equipment) Utilities
Includes options used to maintain ancillary files that are necessary for Personal Property Management under AEMS/MERS.

FAP Documents (Code Sheets)
This menu contains options to validate or transmit FAP code sheets.

Fixed Assets Reports
This menu option contains reports on FAP documents.
Equipment Enter/Edit (NX)

The options on this menu have been described in previous sections of this chapter.

Select Nonexpendable Equipment Module (A&MM) Option: 1 Equipment Enter/Edit (NX)

1. New Inventory Entry (See page 7-4)
2. Inventory Edit (See page 7-15)
3. Display Equipment Record (See page 7-18)
4. Multiple Inventory Entry (See page 7-13)
5. Manual Update of Equipment Inventory (See page 7-87)
6. Purchase Order Group Edit (See page 7-89)
7. Turn-In/Disposition Equipment (See page 7-93)

Display Equipment Record
Display selected fields from the EQUIPMENT INV. file. Repair history is not displayed via this option.

Inventory Edit
Edit the record of an existing piece of equipment. The .01 field (ENTRY NUMBER) is assigned by the system when an item is first added to the EQUIPMENT INV. file and may not be edited. This option gives access to both Supply and Engineering fields.

Manual Update of Equipment Inventory
Uses FileMan to update physical inventory data on individual entries in the Equipment Inv. file.

Multiple Inventory Entry
Enter several like items (e.g.; 50 new electric beds) into the EQUIPMENT INV. file (#6914) without having to enter common information each time.

New Inventory Entry
Add a new item to the EQUIPMENT INV. file (#6914).

Purchase Order Group Edit
Edit a group of existing items in the inventory file without having to enter common data for each item. Equipment is initially selected by purchase order #. Therefore, the purchase order # field must already be populated before this option can be used to edit equipment. Equipment with the same purchase order # is selected for editing by line item.

Turn-In/Disposition Equipment
This option can be used to quickly update equipment records for the turn-in or final disposition of equipment not reported to Fixed Assets.
Equipment Management Reports (NX)

Most of the options on this menu have been described in previous sections of this chapter. Accountable NX for Station and Check of Equipment Capitalization are shown in this section.

1. Specific Equipment History (See page 7-20)
2. CMR Inventory (EIL) (See page 7-23)
3. Warranty List (See page 7-31)
4. Replacement Listing (See page 7-31)
5. Location Inventory (See page 7-27)
6. Using Service Inventory (See page 7-27)
7. Use Status Inventory (See page 7-28)
8. NonExpendable Expensed Inventory (See page 7-28)
9. Accountable NX for Station
10. Parent System/Component Hierarchy Report (See page 7-38)
11. Check of Equipment Capitalization

Specific Equipment History
Print-out of repair history of a specific entry in EQUIPMENT INV. file.

CMR Inventory (EIL)
This option generates the Equipment Inventory Listing (EIL) report. Equipment that is belongs to the user-specified CMR and is either capitalized or whose category stock number begins with 10 (firearms), 23 (motor vehicles) or 70 (ADP) is printed on this report. A page suitable for the signature of the Responsible Official is printed when the output is directed to a printer.

Warranty List
Prints all devices whose warranties are scheduled to expire within a user specified time interval.

Replacement Listing
Prints all entries in the EQUIPMENT INV. file scheduled for replacement within a user specified time interval.

Location Inventory
Inventory listing by device location.
Using Service Inventory
Inventory listing by using service. Note that the using service is not necessarily the owning service (ex: a VCR may be used in Dental but owned by Medical Media Production). Owning service is established via the CMR.

Use Status Inventory
Inventory listing by use status.

NonExpendable Expensed Inventory
This option generates the Nonexpendable Expensed Inventory report. Equipment that is belongs to the user-specified CMR and is not capitalized and whose category stock number does not being with 10 (firearms), 23 (motor vehicles) or 70 (ADP) is printed on this report.

See the CMR Inventory (EIL) report to print accountable equipment that belongs to a CMR.

Accountable NX for Station
This option generates a list of capitalized equipment sorted by category stock number and CMR for a specified station. Equipment must be on a CMR in order to be included in this report. Non-expendable expensed equipment which is accountable (firearms, motor vehicles, and ADP) can optionally be included in the output.

Parent System/Component Hierarchy Report
Prints a hierarchical list of a parent system and all of its components. Components are indented and listed beneath their parent system. Items that are components of a component in the specified system are included.

Check of Equipment Capitalization
This option generates a report of equipment items which appear to have unusual combinations in the TOTAL ASSET VALUE and CAPITALIZED? fields. Capitalized equipment is reported when it's Type Entry is blank. Capitalized NX equipment is reported when it's CMR does not begin with one of the standard two digit values, or it's Standard General Ledger is blank. Equipment items with a disposition date are excluded from the report. This report searches the entire Equipment Inv. file and may take some time to run.

These equipment items should be checked to ensure that the data in the Equipment Inv. file is accurate.

See the Nonexpendable Expensed Inventory report to print equipment that belongs to a CMR but does not meet the other criteria for inclusion on the Equipment Inventory Listing report.
Accountable NX for Station

One report, Accountable NX for Station has been added to menu option 2. The other reports appear on the ENEQ REPORTS menu and have been described under that heading.

This option generates a list of capitalized equipment sorted by category stock number and CMR for a specified station. Equipment must be on a CMR in order to be included in this report. Non-expendable expensed equipment which is accountable (firearms, motor vehicles, and ADP) can optionally be included in the output.

Select Equipment Management Reports (NX) Option: 9 Accountable NX for Station
STATION NUMBER: 999/<RET>

**Check of Equipment Capitalization**

This report prints a list of equipment items which appear to have unusual combinations in the TOTAL ASSET VALUE and CAPITALIZED? fields. Capitalized NX equipment whose CMR does not begin with one of the standard two digit values is also listed.

The report should be used to assist with identification of equipment which may not have been appropriately marked as capitalized. The capitalized field is important for identification of equipment which is of interest to FAP.

Select Comparison Reports (AEMS/MERS vs LOG1) Option: cap Check of Equipment Capitalization

This report searches the entire equipment file and may take some time to complete. Consider queuing this report to run after-hours.

6 questionable equipment items found
Bar Code Features (NX Equipment)

1. Equipment Labels ... (See page 7-76)
2. Location Labels ... (See page 7-79)
3. Download NX Program to Portable Bar Code Reader (See page 7-84)
4. Upload Data From Portable Bar Code Reader (See page 7-85)
5. Restart Processing of Uploaded NX Inventory Data (See page 7-87)
6. Inventory Exception Listing (See page 7-86)

Equipment Labels
Prints bar coded equipment labels. Cohorts of labels (ex: labels by CMR, labels by Equipment Category, etc.) will be sorted by LOCATION unless the user specifies otherwise.

Location Labels
Driver option to print bar coded location labels.

Download NX Program to Portable Bar Code Reader
Downloads an IRL (Interactive Reader Language) program to a portable bar code reader.

Upload Data From Portable Bar Code Reader
Calls a routine that causes a portable bar code reader to upload its data to DHCP.

Restart Processing of Uploaded NX Inventory Data
Used to resume processing of NX inventory that has been uploaded from a portable bar code reader. User will need PROCESS ID and TIME STAMP from failed process. If this information is unavailable, data upload must be re-started from the beginning.

Inventory Exception Listing
Produces a list of those items on a specified CMR that have not been located in the course of a physical inventory.
NX (Nonexpendable Equipment) Utilities

Select Nonexpendable Equipment module (A&MM) Option: 4 NX (Nonexpendable Equipment) Utilities

1. CMR File Enter/Edit
2. Category Stock Number Enter/Edit
3. National EIL Enter/Edit

CMR File Enter/Edit
For maintaining the list of CMR (Consolidated Memoranda of Receipt) in use at your facility. This option is usually held by your PPM Chief and/or his designee.

Category Stock Number Enter/Edit
Intended for maintenance of Category Stock Number file. This option should be held by no more than one or two persons at each site, at the discretion of A&MM.

National EIL Enter/Edit
This option is used to edit the National EIL file. This file contains the list of valid Equipment Inventory Listing (EIL) codes as determined by VACO. This file is used to associate EIL codes with cost centers.
**CMR File Enter/Edit**

Select NX (Nonexpendable Equipment) Utilities Option: CMR File Enter/Edit

Select CMR NAME: ??

Choose from:
- 100 DENTAL
- 110 DIETETIC
- 130 ENGINEERING
- 42B ACQUISITION & MATERIEL MGMNT

Name of CMR.
Select CMR NAME: 160 LABORATORY
NAME: 160/ <RET>
SERVICE: LABORATORY/ ??
Service to which this CMR is assigned.

SERVICE: LABORATORY/ <RET>
BRIEF DESCRIPTION (Optional): ??
A means for sites to briefly describe the purpose of this CMR, if they
find it useful to do so.
BRIEF DESCRIPTION (Optional): <RET>
RESPONSIBLE OFFICIAL: ??
Employee currently responsible for items on this CMR.

RESPONSIBLE OFFICIAL: <RET>
PHONE (RESP OFFICIAL): ??
PHONE (RESP OFFICIAL): <RET>
LAST RECONCILED: ??
Date on which this CMR was last reconciled with centralized non-
expendable equipment records (Log 1 or ISMS).
LAST RECONCILED: <RET>
RESEARCH?: ??
Intent of this field is to provide a means of flagging equipment
purchased and maintainable with research funds. Please enter 'YES'
if and only if this is a research CMR.
Choose from:
- Y YES
- N NO
RESEARCH?: <RET>
STATION NUMBER: ??
Station number of the facility that owns the assets in this CMR. For
example, if this CMR is for a national cemetery which is seviced by
a VAMC then the entry in this field should be the station number of the
national cemetery.

Entries must match an entry in the ALTERNATE STATION NUMBER field
(multiple) of the Eng Init Parameters File (#6910).
STATION NUMBER: <RET>
If a CMR has IT TRACKING set to YES, the equipment on that Equipment Inventory List (EIL) can be edited using options on the IT Equipment Module menu. Additionally, all equipment on such EILs will be expected to be assigned to individual IT owners.

Choose from:

1 YES
0 NO

IT TRACKING: YES// <RET>

ALTERNATE RESPONSIBLE OFFICIAL: ??
A person authorized to act for the RESPONSIBLE OFFICIAL. This is an optional data element to be used at the discretion of each facility. ALTERNATE RESPONSIBLE OFFICIAL: <RET>

DAYS BETWEEN RETURNS: ??
This is the maximum number of days before an equipment item must be returned to be serviced and physically inventoried.

DAYS BETWEEN RETURNS: <RET>

LOAN FORM PHONE: ??
This is the telephone number to be called concerning loan forms for equipment on this CMR.

LOAN FORM PHONE: (555) 555-5555// <RET>

NOTE: If CMR data is changed, the system will automatically update equipment records belonging to that CMR with the new information. In cases where affected equipment has been reported to FAP, the system will note that and instruct you to enter the appropriate FAP document.
Category Stock Number Enter/Edit

Select NX (Nonexpendable Equipment) Utilities Option: 2 Category Stock Number Enter/Edit

Select CATEGORY STOCK NUMBER NAME: ??

CHOOSE FROM:
1005-000667  GUN PELLET CROSMAN
2340-438835  SCOOTER MOTOR
2340-629016  MOTO 2WHTRU10HP150CC

YOU MAY ENTER A NEW CATEGORY STOCK NUMBER, IF YOU WISH
Answer must be 4 numerics, a dash (-), and then 6 numerics.

Format entries as 4 numbers followed by dash (-) followed by 6 numbers.

Select CATEGORY STOCK NUMBER NAME: 2340-438835 ENMFGR1,EIGHT
NAME: 2340-438835// <RET>
LIFE EXPECTANCY: 8// <RET>
BRIEF DESCRIPTION: ENMFGR1,EIGHT Replace
<RET>
SPECIAL HANDLING CODE: .

Indicates that the Category Stock Number in question is subject to special reporting requirements. This data element was explicitly added to DHCP in the summer of 1111. '0' indicates COMPUTERS (ADP/WP); '1' indicates CCTV (CLOSED CIRCUIT TV); '2' indicates AUDIOVISUAL (OTHER THAN CCTV); and '3' indicates PRINTING AND REPRODUCTION. Numbers '4' thru '9' are reserved.

'1' indicates CCTV (CLOSED CIRCUIT TV)
'2' indicates AUDIOVISUAL (OTHER THAN CCTV)
'3' indicates PRINTING & REPRODUCTION.

CHOOSE FROM:
0 Auto Data Process Equip
1 Closed Circuit TV (CCTV)
2 Audio Visual Equip
3 Print & Repro Equip

EDIT Option: <RET>

Select CATEGORY STOCK NUMBER NAME: <RET>
National EIL Enter/Edit

Select NX (Nonexpendable Equipment) Utilities Option: National EIL Enter/Edit

The National EIL file should only be changed at the direction of VACO. If the cost center associated with an EIL code is changed then FR Documents will automatically be generated in order to update the cost center value in Fixed Assets. A FR Document will be sent for each equipment item that belongs to a CMR that starts with the EIL code and is currently established in Fixed Assets.

Select NATIONAL EIL CODE: ??

Choose from:

10 DENTAL
11 DIETETICS
12 MEDICAL EDUCATION

You may enter a new NATIONAL EIL, if you wish
Answer must be 2 characters in length.

Select NATIONAL EIL CODE: 17 LIBRARY

...OK? Yes/< RET> (Yes)
DESCRIPTION: LIBRARY/?
Description of the EIL code.
DESCRIPTION: LIBRARY/< RET>
COST CENTER: 822600/?
Cost Center (if any) that is linked to the EIL code. This will be used as the cost center of any equipment entries whose CMR begins with the national EIL code.
COST CENTER: 822600/ < RET>

Select NATIONAL EIL CODE:< RET>
FAP Documents (Code Sheets)

This menu is used to transmit the Fixed Asset Documents from AEMS/MERS to FAP. An equipment entry is considered to be established in Fixed Assets if there is an FA Document (Acquisition) on file for that entry which has not been followed by a later FD Document (Disposition). There are five different FAP Documents. The FA Document cannot be sent for equipment which is already established in Fixed Assets. The FB, FC, FD, and FR Documents can only be sent for equipment entries which are already established in the Fixed Assets system.

FA1  Send a Single FA Document
FA2  Batch Send FA Documents (by CMR)
FA3  Batch Send FA Documents (by Station)
FB  Better An Equipment Record (FB Document)
FC  Acquisition Data Edit (FC Document)
FD  Disposition an Asset (FD Document)
FR  Financial Data Edit (FR Document)
V1  FAP Validity Check For A Single Item (FA Document)
V2  FAP Validity Check By CMR (FA Documents)
V3  FAP Validity Check by Station (FA Documents)
AV  Adjustment Voucher Entry
Recalculate FAP Balances

Send a Single FA Document
This option will send a FA Document (code sheet) to the Fixed Assets package (FAP) in Austin for a selected equipment entry. Appropriate data is extracted from the Equipment Inv. file and used to populate the code sheet.

FA Documents will not be created for equipment entries already established in FAP.

Batch Send FA Documents (by CMR)
This option will send FA Documents (code sheets) to the Fixed Assets package (FAP) in Austin for equipment belonging to a specified CMR. Appropriate data will be extracted from the Equipment Inv. file and used to populate the code sheets. Only equipment which is capitalized (CAPITALIZED field = YES) will be considered. FA Documents will not be created for equipment entries already established in FAP.

Batch Send FA Documents (by Station)
This option will send FA Documents (code sheets) to the Fixed Assets package (FAP) in Austin for equipment belonging to a specified Station. Appropriate data will be extracted from the Equipment Inv. file and used to
populate the code sheets. Only equipment which is capitalized (CAPITALIZED field = YES) and on a CMR (CMR field not blank) will be considered. FA Documents will not be created for equipment entries already established in FAP.

**Better An Equipment Record (FB Document)**
This option is used to record an equipment record or upgrade to a recorded fixed asset. The information is transmitted to FAP.

**Acquisition Data Edit (FC Document)**
This option is used to record changes or adjustments to a recorded fixed asset. The information is transmitted to FAP.

**Disposition an Asset (FD Document)**
This option records the disposition of a fixed asset due to sale, destruction, trade-in, etc. The information is transmitted to FAP.

**Financial Data Edit (FR Document)**
This document is used to edit documents that cannot be changed with an FC document.

**FAP Validity Check For A Single Item (FA Document)**
This option will perform a validity check on an entry in the Equipment file to determine if a FA Document (code sheet) can be created for that entry.

**FAP Validity Check By CMR (FA Documents)**
This option will perform validity checks on equipment belonging to a specified CMR to determine if FA Documents (code sheets) can be created for those equipment entries. Only capitalized (CAPITALIZED field = YES) equipment will be considered. Equipment which is already established in Fixed Assets will not be checked.

**FAP Validity Check by Station (FA Documents)**
This option will perform validity checks on equipment belonging to a station to determine if FA Documents (code sheets) can be created for those equipment entries. Only capitalized (CAPITALIZED field = YES) equipment which is on a CMR (CMR field not blank) will be considered. Equipment which is already established in Fixed Assets will not be checked.

**Adjustment Voucher Entry**
This option is used to create an adjustment voucher for an existing FAP Document.
Recalculate FAP Balances

Dollar balances (by Station, Fund, SGL, and month) are maintained in the FAP BALANCES file and printed on the Voucher Summary report. This option can be used to recalculate the balances if they appear incorrect.

The net $ activity for a specified month will be computed from the individual FAP code sheets. The results are then compared to the values maintained in the FAP BALANCES file. If there are any discrepancies, the recalculated values can be used to update the FAP BALANCES file.

Better An Equipment Record (FB Document)

This document records a betterment or upgrade to a recorded fixed asset and transmits the information to FAP.

Select EQUIPMENT ENTRY #: 8978899 1 8978899 DEFIBRILLATOR IN USE 7530-4565

Current Asset Value is $7200.00

DESCRIPTION: Description of the betterment
ACQUISITION DATE: t (JUL 16, 1997)
ACQUISITION METHOD: ??
   This is the method by which the betterment was acquired; purchased, leased, etc.
   Choose from:
   C    CONSTRUCTED
   G    GIFT/BEQUEST/DONATION
   L    LEASED
   M    LEASED/PURCHASED
   O    OTHER
   P    PURCHASED
   R    TRANSFERRED
   T    TRADED
   X    EXCESS
ACQUISITION METHOD: p PURCHASED
BETTERMENT VALUE: ??
   This is the total value of the betterment.
   BETTERMENT VALUE: 1000.00

Should an Adjustment Voucher be created? YES// y YES

A.V. REASON: ??

Choose from:
   ASSET VALUE VARIANCE/ADJUSTMENT
   OTHER

A.V. REASON: ASSET VALUE VARIANCE/ADJUSTMENT
A.V. COMMENTS:
   1> explain the adjustment voucher
   2>

Adjustment Voucher was created.
Disposition an Asset (FD Document)

This document records the disposition of a fixed asset due to sale, destruction, trade-in, etc. The information is transmitted to FAP. The dialogue is different depending on whether TURN-IN or DISPOSITION is chosen.

Select FAP Documents (Code Sheets) Option:  fd  Disposition an Asset (FD Document)
Select EQUIPMENT ENTRY #: 1  8978899  DEFIBRILLATOR  IN USE  75
30-4565

TURN-IN OR DISPOSITION?: ??
Since FD documents may be used in moving an asset to EXCESS as well as in processing final disposition, we must ask the user which he wants to do. This response tells us whether to update the TURN-IN DATE or the DISPOSITION DATE. Choose from:
T TURN-IN
D FINAL DISPOSITION

TURN-IN OR DISPOSITION?: t  TURN-IN

TURN-IN DATE: t  (JUL 16, 1997)
DISPOSITION AUTHORITY: 00000// ??
This is the authority under which the item was disposed of.

DISPOSITION AUTHORITY: 00000// < RET>

When equipment is turned-in, its TOTAL ASSET VALUE must be changed to the fair market value per VA Accounting Standards.
NOTE: The current TOTAL ASSET VALUE will automatically be saved in the ORIGINAL ASSET VALUE field.

Current TOTAL ASSET VALUE: 8,200.00
Acquisition Date: Jun 04, 1986  Life Expectancy: 8
Replacement Date: Jun 04, 1998  Condition:
Repair Costs (excluding preventive maintenance)
Labor$: 3,000  Material$: 1,500  Vendor$: 0  Total$: 4,500

FAIR MARKET VALUE: ??
The estimated, realistic dollar value of an asset when categorized as "VA Excess" personal property. This value will replace the current TOTAL ASSET VALUE in the Equipment Inv. file. Note that the current TOTAL ASSET VALUE will automatically be saved as the ORIGINAL ASSET VALUE.

VA Accounting Standards require capitalized nonexpendable property to be recorded in the "Excess" Standard General Ledger (SGL) 1561 at its "Expected Net Realizable Value".

FAIR MARKET VALUE: 5000.00

Updating the AEMS/MERS Equipment File.

Sending FR document to FAP.

Adjustment Voucher was created.
FAP Validity Check For A Single Item  (FA Document)

This option will perform a validity check on an entry in the Equipment Inv. file to determine if a FA Document (code sheet) can be created for that entry.

Select FAP Documents (Code Sheets) Option:  v1  FAP Validity Check For A Single Item (FA Document)
Select EQUIPMENT INV. ENTRY NUMBER:  1071  DEFIBRILLATOR IN USE  7800-8978

Looks OK!

If information is missing, you will receive a message similar to the following.

This record would not have been sent to FAP!
Reasons:
  Missing Type of Entry
  Asset not capitalized
**FAP Validity Check By CMR (FA Documents)**

This option will perform validity checks on equipment belonging to a specified CMR to determine if FA Documents (code sheets) can be created for those equipment entries. Only capitalized (CAPITALIZED field = YES) equipment will be considered. Equipment which is already established in Fixed Assets will not be checked.

Select FAP Documents (Code Sheets) Option:  

This option VALIDATES FA Documents (code sheets) for all equipment that belongs to a specified CMR.

Select CMR NAME: ??

Choose from:

- 100 DENTAL
- 110 DIETETIC
- 381 MEDICAL ADMINISTRATION

Select CMR NAME: 381 MEDICAL ADMINISTRATION

Now select the device to print results on.

DEVICE: HOME// <RET> LAN

FA DOCUMENT VALIDITY CHECK FOR CMR: 381 APR 04, 1996 10:29:05 page 1

5 records have been processed from CMR: 381.

0 records would have been sent to FAP.
2 would not have been sent due to already being established in FAP.
3 would not have been sent due to validation problems.

Equipment Records not sent because of validation problems:

Adjustment Voucher was created.

Select Type of FAP Document: (FA/FB/FC/FD/FR):
Recalculate FAP Balances

Dollar balances (by Station, Fund, SGL, and month) are maintained in the FAP BALANCES file and printed on the Voucher Summary report. This option can be used to recalculate the balances if they appear incorrect.

The net $ activity for a specified month will be computed from the individual FAP code sheets. The results are then compared to the values maintained in the FAP BALANCES file. If there are any discrepancies, the recalculated values can be used to update the FAP BALANCES file.

Select FAP Documents (Code Sheets) Option: recalculate FAP Balances
Enter month to recalculate: Mar 1996// <RET> (MAR 1996)

You have chosen to recalculate the $ from FAP transactions during the month of Mar 1996.

OK to proceed? y YES

Calculating net activity from transactions...
Comparing FAP BALANCES file with transactions...
Comparing transactions with FAP BALANCES file...

No problems were found.
Fixed Assets Reports

The Fixed Assets reports are intended for use during monthly reconciliation and can be compared with the Inventory Report (Report ID: RGLLIAV) which is produced by the FMS system.

Select Nonexpendable Equipment Module (A&MM) Option: 6 Fixed Assets Reports

Voucher Summary for Station
Adjustment Voucher Report
Document History (FAP) for Equipment
Equipment Not Reported to FAP
Excessed Equipment Report
Summary of SGL Balances
Transaction Register (FAP Documents)

Voucher Summary for Station
This option generates a voucher summary report for a specified station and accounting period. The data is obtained from FAP documents which have an impact on dollars for a Fund and Standard General Ledger. The output can be used to reconcile FAP transactions with FMS transactions. The Inventory Report (Report ID: RGLLIAV) from FMS is the anticipated source of information on FMS transactions.

Adjustment Voucher Report
This option generates a report of adjustment vouchers for a selected date range. Adjustment vouchers are used to communicate information to Fiscal concerning selected FAP Documents. Each adjustment voucher is associated with one FAP Document. Not all FAP Documents have an adjustment voucher.

It is recommended that this option be scheduled to automatically print on a daily basis (via TaskManager). If automatically queued, the report will include all adjustment vouchers created on the previous day.

Document History (FAP) for Equipment
This option lists Fixed Assets (FAP) documents (code sheets) which have been sent for a specified equipment item.

Equipment Not Reported to FAP
This option generates a report of capitalized non-expendable (NX) equipment which is not currently established in Fixed Assets (FAP). Equipment which has a disposition date will not be included in the output.
This report is intended to identify equipment items which should be established in Fixed Assets by transmission of a FA Document (code sheet).

It is recommended that this option be scheduled to automatically print on a weekly basis (via TaskManager).

**Excessed Equipment Report**
This option generates a report of FA Documents (code sheets) which were transmitted to FAP for standard general ledger 1561 (excess). This list is intended to identify equipment assets which should have been picked up in the FMS excess account by Fiscal Service.

It is recommended that this option be scheduled to automatically print on a monthly basis (via TaskManager). If automatically queued, the report will include FA Documents transmitted within the last 30 days or so.

**Summary of SGL Balances**
This option generates a report of closing dollar balances by Standard General Ledger for a specified month. This data is obtained from FAP Documents (FA, FB, FC, FD, and FR) that have been sent by the site. The output is sorted by Station and optionally by Fund.

**Transaction Register (FAP Documents)**
This option generates a list of FAP Documents for a specified date range.
Voucher Summary for Station

Only FAP documents which impact the dollars for a fund or SGL are included in the output. (e.g. an FC document which only changed the CMR value will not be listed on this voucher summary). The output is sorted by Fund, SGL, and transaction date/time.

The Voucher Summary asks for a station, start date, and end date. The start date defaults to the first day of the previous month. The end date defaults to the last day of the month which was selected for the start date.

Select EQUIPMENT ENTRY #: 
Equipment Not Reported to FAP

This option generates a report of capitalized non expendable (NX) equipment which is not currently established in Fixed Assets (FAP). Equipment which has a disposition date will not be included in the output. This report is intended to identify equipment items which should be established in Fixed Assets by transmission of a FA Document (code sheet).

Is recommended that this option be scheduled to automatically print on a weekly basis (via TaskManager).

Select Fixed Assets Reports Option:  Equipment Not Reported to FAP

This report searches the entire equipment file and may take some time to complete. Consider queuing this report to run after-hours.

**Excessed Equipment Report**

This option generates a report of FA Documents (code sheets) which were transmitted to FAP for standard general ledger 1561 (excess). This list is intended to identify equipment assets which should have been picked up in the FMS excess account by Fiscal Service.

It is recommended that this option be scheduled to automatically print on a monthly basis (via TaskManager). If automatically queued, the report will include FA Documents transmitted within the last 30 days or so.

Select Fixed Assets Reports Option:  **Excessed Equipment Report**

Program Management

The Program Management option is entered from the Engineering Main Menu. The option is selected from the menu by entering the first few unique characters or the synonym "ENM".

This option is only available to the Engineering Applications Manager or Engineering Site Manager. It is where the various lists are established and maintained. The Engineering Employee file and the Equipment Device Type list must be maintained on a continuing basis for the system to be up-to-date.

YOU MAY ENTER A NEW ENGINEERING SECTION LIST, IF YOU WISH
ANSWER MUST BE 3-21 CHARACTERS IN LENGTH
Select ENGINEERING SECTION LIST:

If an existing section number is entered, you can step through and edit ENGINEERING SECTION, ABBREVIATION, and DEVICE assigned to that section as shown below:

Select ENGINEERING SECTION LIST: 35 BIOMEDICAL
ENGINEERING SECTION: BIOMEDICAL//
ABBREVIATION: B//

The device chosen will be used for automatic printing of new work orders, if automatic printing has been selected through the Software Options Enter/Edit.

DEVICE: 65//
Select ENGINEERING SECTION LIST: 21 ELECTRIC
ENGINEERING SECTION: ELECTRIC//
ABBREVIATION: E//
DEVICE: 64//
A new Engineering section could be added here or one of the existing sections could be deleted.

When no Engineering section needs to be added or edited, pressing <RET> at the "Select ENGINEERING SECTION LIST" prompt will return you to the Program Management option menu.

**Important Note:**

Engineering Section numbers 90 through 99 should be used ONLY for a receiving area for electronic work orders and other administrative requests.
Work Center Code

This option allows the editing, addition, and deletion of work center codes.

1  Engineering Computer Port
2  Section List
  -->3  Work Center Code

Select Program Management Option: 3 Work Center Code

Select WORK CENTER CODE NAME: ?
Answer with WORK CENTER CODE NAME
Do you want the entire 431-ENTRY WORK CENTER CODE LIST? YES
51105 ........................................... 51105/OTHER LEAVE
51106 ........................................... 51106/OTHER TIME
51108 ........................................... 51108/SUPERVISION
51109 ........................................... 51109/TRAINING
51200 ........................................... 51200/INCINERATOR PLANT
'^' TO STOP: ^
You may enter a new work center code, if you wish
Enter the work center number (5 digits), a slash, and the work center name (e.g., 50102/SICK LEAVE).
Answer must be 3-40 characters

This example contains only a sampling of the work center codes.

When a work center code is entered, the following display, which may be edited, is shown:

Select WORK CENTER CODE NAME: 55555  55555/NEUROLOGY EQUIP, PREV MAINT
NAME: 55555/NEUROLOGY EQUIP, PREV MAINT Replace

A work center code can be added or deleted as shown in the following examples:

Select WORK CENTER CODE NAME: 55655/ETC OTHER
Are you adding a new work center code (the 432ND)? Y (YES)
NAME: 55655/ETC OTHER
WORK CENTER CODE CODE: 55655/
NAME: 55655/ETC OTHER/

Select WORK CENTER CODE NAME: 55655  55655/ETC OTHER
NAME: 55655/ETC OTHER/
SURE YOU WANT TO DELETE THE ENTIRE '55655/ETC OTHER' WORK CENTER........... CODE? Y (YES)
Select WORK CENTER CODE NAME:

Pressing <RET> instead of entering a work center code will return you to the Program Management option Menu.

Engineering Employee File

August 1993  Engineering V. 7.0 User Manual  8-5
The Engineering Employee file will have to be generated locally by the Engineering Applications Manager. Many of the programs require the entering of an employee's name which will not be accepted unless it is in this file and is spelled in exactly the same manner. This file should contain a list of all employees who may be wholly or partially responsible for completing work requests. This option can be used to review and edit employee data as well as to add new employees.

On entering this option, < ? > can be entered to get a list of all employees.

ENUSER2 .EIGHT
ENUSER2 .NINE
ENUSER3 .TEN
ENUSER3 .ONE
ENUSER3 .TWO
ENUSER3 .THREE
ENUSER3 .FOUR

YOU MAY ENTER A NEW ENG EMPLOYEE, IF YOU WISH
ANSWER MUST BE 3-30 CHARACTERS IN LENGTH AND CONTAIN A COMMA IE- . LAST NAME, FIRST NAME

It is very important that all employees to whom work may be assigned be entered in this file, not just those who use the computer directly. If you are not certain how an employee's name was entered, you can enter the first letter of the last name and then choose from the computer generated listing. Great care should be taken to avoid duplicate entries in this file.

The following example shows the information on file for a specific employee.

Select ENG EMPLOYEE NAME: ENUSER2 .SEVEN
NAME: ENUSER2 .SEVEN/
ORGANIZATIONAL TITLE: LABORER/
SHOP: OFFICE OF THE CHIEF/
HOME STREET ADDRESS: NO #/
HOME CITY, STATE, ZIP: NO WHERESVILLE, PA/
HOME PHONE:
GRADE/STEP:  9/5/
WAGE:  10/
A new employee can be entered by entering the last name first, a comma, and then the first name.

Select ENG EMPLOYEE NAME: ENUSER3, FIVE

ARE YOU ADDING 'ENUSER3, FIVE' AS A NEW ENG EMPLOYEE (THE 9TH)? Y (YES)

NAME: ENUSER3, FIVE

ORGANIZATIONAL TITLE: ASST. CHIEF

SHOP comes from the ENGINEERING SECTION LIST.

SHOP: ?

DO YOU WANT THE ENTIRE 31-ENTRY ENGINEERING SECTION LIST LIST? N (NO)

The STATUS of an employee can be chosen from the following three codes.

STATUS: ?

CHOOSE FROM:

T. .......................................................... TEMP
P. .......................................................... PERM
V. .......................................................... VACATED

STATUS: P PERM

CLASSIFICATION SERIES: ?

ANSWER MUST BE 1-15 CHARACTERS IN LENGTH
When <RET> is entered instead of employee name, the computer will return to the Program Management option menu.
Enter/Edit Equipment Category PM Schedule

This option is used to enter or change the PM schedule for a specified device type (such as defibrillators, generators-electrical, etc.). A device type is formally defined as a discrete entry in the Equipment Category file. When a device type PM schedule is entered or changed, the user will be given the opportunity to apply the new schedule to all existing devices of the specified type.

ENGINEERING PROGRAM MANAGEMENT ROUTINE

1  Engineering Computer Port
2  Section List
3  Work Center Code
4  Engineering Employee File
-->5  Enter/Edit Equipment Category PM Schedule
6  Manufacturer
7  ENG SITE PARAMETERS Enter/Edit
8  SOFTWARE OPTIONS Enter/Edit
9  Engineering Archive Module
10 Biomedical Engineering Resource Survey
11 Work Action

Select Program Management Option: 5 Enter/Edit Equipment Category PM Schedule

This option is used to enter or change the PM schedule for a specified device type. A "device type" is formally defined as a discrete entry in the Equipment Category file, such as defibrillator, bar code reader, generator, etc.

Select EQUIPMENT CATEGORY NAME: ?
ANSWER WITH EQUIPMENT CATEGORY NAME
CHOOSE FROM:
DEFIBRILLATOR
DISPLAY CENTRAL STATION
ELECTROCARDIOGRAPH
PUMP PERFUSION
STAMP TIME-DATE
YOU MAY ENTER A NEW EQUIPMENT CATEGORY, IF YOU WISH
ANSWER MUST BE 1-50 CHARACTERS IN LENGTH AND CONTAIN NO COMMAS(,)
Select EQUIPMENT CATEGORY NAME: DEFIBRILLATOR

A screen display of information concerning responsible technician, schedule, and cost is then displayed. All information may be edited at the prompts following the display.

Equipment Category: DEFIBRILLATOR

BIOMEDICAL SHOP

Tech: ENUSER, TWO
................. Starting Month: JAN
Skip Mo ...........................................Critical
Frequency (multiple):
ANNUAL 1.0 hrs $300 (est) Level: 2 Proc: REPLACE BATTERIES
MONTHLY 0.5 hrs $0 (est) Level: 1 Proc: PERFORMANCE
Press <RETURN> to continue...
NAME: DEFIBRILLATOR/
Select SYNONYM: DEFIB/??
A multiple-valued field intended to allow for selection of Equipment Category in more than one way. For example: the category named ELECTROCARDIOGRAPH should have ECG and EKG as synonyms.
Select RESPONSIBLE SHOP: BIOMEDICAL/
RESPONSIBLE SHOP: BIOMEDICAL//
The Engineering Service employee who normally does the PM work on this piece of equipment for this shop.

STARTING MONTH: JAN

STARTING MONTH is used by the PM module as a criterion in determining when a PM is due. Let's consider the following example: an item subject to MONTHLY, QUARTERLY, and ANNUAL PM inspections. If STARTING MONTH were set to FEB; an ANNUAL inspection would be scheduled in FEB; QUARTERLY inspections in MAY, AUG, and NOV; and MONTHLY inspections in MAR, APR, JUN, JUL, SEP, OCT, DEC, and JAN.

If STARTING MONTH is left blank, JAN will be assumed.

CHOOSE FROM:
1. JAN
2. FEB
3. MAR
4. APR
5. MAY
6. JUN
7. JUL
8. AUG
9. SEP
10. OCT
11. NOV
12. DEC

STARTING MONTH: JAN

SKIP MONTHS: ??

A range of months (inclusive) during which PMI's are to be suspended. For example, an entry of 'NOV-MAR' for an air-conditioner would suppress the scheduling of any PMI's in NOV, DEC, JAN, FEB, and MAR.

Some care needs to be taken when using this field. If you want an annual inspection, for instance, be sure that the STARTING MONTH is not within the range specified by the SKIP MONTHS; otherwise the ANNUAL PMI will never be scheduled.

Entries must take the form 'MMM-NNN', where MMM is a three character abbreviation of the first month for which PMI's should be suspended and NNN is a three character abbreviation of the last month for which PMI's should be suspended. Valid abbreviations are: JAN, FEB, MAR, APR, MAY, JUN, JUL, AUG, SEP, OCT, NOV, and DEC.

SKIP MONTHS: ??

CRITICALITY: 10

An index of the importance of performing PMI's on this device. Enter an integer from 1 to 10, where 10 indicates that PMI's are extremely critical and 1 indicates that PMI's are desirable but far from essential.

When PM worklists are generated, the system will ask if all devices should be included or just those whose CRITICALITY is within a certain user specified range (say, 7 to 10). This is intended as a means of adjusting workload to match available resources.

Use of this feature is left entirely to the discretion of each site. If a range of 1 through 10 seems like overkill, you may wish to restrict yourself to 5 through 10 instead. If all PMI's are deemed to be a high priority and adequate resources are available, there is probably no need to use this feature at all.

Devices with no entry for CRITICALITY will never be excluded from a PM worklist on the basis of a user specified CRITICALITY range which includes devices of CRITICALITY 10.

CRITICALITY: 10

Select FREQUENCY: ANNUAL

Make a separate entry for each category (MONTHLY, QUARTERLY, etc.) of PMI that is to be scheduled for this device. The PM module looks at this field in conjunction with the STARTING MONTH when PM lists are generated.

Let's consider a fairly complex example: a device with SEMI-ANNUAL, QUARTERLY, and MONTHLY PMI's and a STARTING MONTH of MAR. Assuming no entry for SKIP MONTHS, the following PMI's will be scheduled:

SEMI-ANNUAL in MAR and SEP;
QUARTERLY in JUN and DEC;
MONTHLY in APR, MAY, JUL, AUG, OCT, NOV, JAN, and FEB.

CHOOSE FROM:
A. ANNUAL
S. SEMI-ANNUAL
Q. QUARTERLY

Engineering V. 7.0 User Manual  August 1993
FREQUENCY: ANNUAL// HOURS (Estimated): 1// ??
Approximate amount of time required for this PMI (standard hours), to the nearest tenth of an hour. This value will be recorded in the EQUIPMENT HISTORY field when a PM is closed out unless another (more precise) value is explicitly entered.

MATERIAL COST (Estimated): 300// ??
Estimated material cost for this PMI (standard cost). This cost will be charged to the piece of equipment whenever a PMI of this type is closed out unless another (more precise) value is entered at close-out time.

LEVEL: 2// ??
Each scheduled PMI may be composed of some combination of the following discrete levels of activity:
- Level 1 - Visual inspection only;
- Level 2 - Check and adjust operator controls;
- Level 3 - Electrical safety analysis;
- Level 4 - Minor parts replacement;
- Level 5 - Major parts replacement;
- Level 6 - Complete overhaul.

LEVEL is an optional field, and is intended to accommodate the needs of certain facilities with highly developed PM programs. Entries for LEVEL (if any) will appear on the PM worklist as a reminder to the responsible technician.

PROCEDURE: REPLACE BATTERIES// ??
Enter the abbreviation (4 to 10 characters) of the PROCEDURE to be followed when performing this Preventive Maintenance Inspection. The full title (as well as the abbreviation) of the PM PROCEDURE will appear on the computer generated worklist for reference.

If disk space permits, the actual step-by-step procedure may be entered in the TEXT field of the PM PROCEDURES file (Number 6914.2) and printed out on demand. In any event, the PMI procedure should be on file in some form and readily accessible to the technician performing the work.

CHOOSE FROM:
BUFF FLOORS
CALIBRATE
CHANGE OIL
CLEAN
VACUUM POOL

PROCEDURE:

Select FREQUENCY:

When a device type PM schedule is entered or changed, the user will be given the opportunity to apply the new schedule to all existing devices of the specified type.

Are you finished with this Equipment Category? YES// (YES)
Do you wish to assign this PM schedule to ALL existing devices in the category of DEFIBRILLATOR? NO// ?

'YES' will cause the system to immediately find every device of type DEFIBRILLATOR and assign each of them the PM schedule just entered. The ID# of each affected device will be displayed at your terminal, but you will not be asked to confirm the transaction unless you have said that you want to.
Once this process has begun, it should not be interrupted.

Are you finished with this Equipment Category? YES// (YES)
Do you wish to assign this PM schedule to ALL existing devices in the category of DEFIBRILLATOR? NO// (NO)
Manufacturer

This option maintains the Manufacturer List file.

This file is maintained by the Engineering Service Center in cooperation with the ANYCITY ISC. Sites may add entries as necessary, using a ZZ namespace convention. Application managers should check carefully to insure that any local entries are not duplications.

On entering this option, the computer will ask for a manufacturer which can be entered by name or common pseudonym. In the following example, HP has been entered for Hewlett-Packard.

ANSWER WITH ENG INIT PARAMETERS STATION NAME:
ANYCITY, DC
Select ENG INIT PARAMETERS STATION NAME: ANYCITY, DC
STATION NUMBER: 999/
TYPE OF 2237 FORM:
PM HOURLY LABOR COST: ??
Default value. If a device has an entry for estimated PM hours AND an entry for responsible tech, the labor cost will be taken from the Engineering Employee File (No. 6929). If there is an entry for estimated hours but NO entry for responsible tech, then this hourly figure will be used to compute total labor cost.
PM HOURLY LABOR COST:
DELETE PM WORK ORDERS?: ??
Setting this field to 'YES' will cause PM work orders to be deleted from the system at close out time. Deletion of PM work orders is strongly recommended for sites that are short on disk space. The PMI will be posted to the equipment history (File 6914) before the actual work order is deleted.
CHOOSE FROM:
Y YES
N NO
DELETE PM WORK ORDERS?:
TEMPORARY WORK ORDER SECTION: RECEIVING// ??
Intended for use at sites that allow direct entry of Engineering work orders by end-users. Since assignment of work requests to specific shops is an Engineering responsibility; 'electronic work orders' are initially directed to a 'fictitious shop' (or receiving area). Engineering should clean out a receiving area at least once a day. Electronic work orders may be transferred to working shops or disapproved. The system will keep a permanent record of the number originally assigned to each work order. This number may always be used to look up the request, no matter how many times it's transferred. Initial requesters may edit their requests; but not after Engineering has transferred them. 'Fictitious' shops should have numbers in the range of 90 to 99, inclusive. Multi-division sites may have more than one receiving area. If there is more than one receiving area AND if this field (TEMPORARY WORK ORDER SECTION) is left blank, end-users will be asked to specify the appropriate receiving area when they enter a work order.
REGION: 2/
EQPT CAT ON BAR CODE LABEL?: ??
Should be set to 'YES' if you want to print the EQUIPMENT CATEGORY at the top of your bar coded EQUIPMENT LABELs (instead of the words 'EQUIPMENT LABEL'). Due to space limitations on label stock, only the first twenty (20) characters of the EQUIPMENT CATEGORY will be printable.

CHOOSE FROM:
1 YES
0 NO

EQPT CAT ON BAR CODE LABEL?:

Select EQPT LABEL PRINT FIELD: ??
Enter the FIELD NUMBER (from the Equipment File) of a field that you want to have printed (in human readable format) on your bar coded EQUIPMENT LABELs. Please do not enter more than two (2) such fields. If more than two fields are specified, the system will accept the first two and ignore all others.

MULTIPLE fields, WORD PROCESSING fields, and COMPUTED fields should not be selected for inclusion on bar coded EQUIPMENT LABELs.

ANSWER WITH EQPT LABEL PRINT FIELD
YOU MAY ENTER A NEW EQPT LABEL PRINT FIELD, IF YOU WISH
Type a Number between 1 and 9999999999, 4 Decimal Digits

Select EQPT LABEL PRINT FIELD:

Select COMP LIST PRINT FIELD: ??
Enter the FIELD NUMBER (from the Equipment File) of a field that you want to have printed on the 'Companion Listings' that are produced along with bar coded EQUIPMENT LABELs. Please do not enter more than two such fields.

Fields selected for inclusion (in human readable format) on bar code labels are NOT automatically printed on Companion Listings.

MULTIPLE fields, WORD PROCESSING fields, and COMPUTED fields cannot be printed on Companion Lists.

SPACE FUNCT ON LOCATION LABEL?: ??
If set to 'YES' and if a SPACE FUNCTION exists for the subject location, then the first 20 characters of the SPACE FUNCTION will be printed at the top of your bar coded LOCATION LABELs.

CHOOSE FROM:
0 NO
1 YES

SPACE FUNCT ON LOCATION LABEL?:

Select ENG INIT PARAMETERS STATION NAME:

Pressing <RET> will return to the Program Management option menu.

The Software Options Enter/Edit allows site-specific control of the following AEMS/MERS features:

Auto Print New W.O.
Equipment Replacement Template
Expanded PM Work Orders
Inventory Template
PM Device Type Identifier
PM Sort
Print Bar Codes On W.O.
Safety Printout
Space Survey Printout
Warranty Expiration Template

Each feature has an explanation of its function, and the special settings for implementing the feature. The lines of the explanatory text may be edited at the site. All of the features are optional.

Each feature will be presented in this section.

Select ENG SOFTWARE OPTIONS FEATURE NAME: ?
ANSWER WITH ENG SOFTWARE OPTIONS FEATURE NAME
CHOOSE FROM:
AUTO PRINT NEW W.O.
EQUIPMENT REPLACEMENT TEMPLATE
EXPANDED PM WORK FORDER
INVENTORY TEMPLATE
PM DEVICE TYPE IDENTIFIER
PM SORT
PRINT BAR CODES ON W.O.
SAFETY PRINTOUT
SPACE SURVEY PRINTOUT
WARRANTY EXPIRATION TEMPLATE
Select ENG SOFTWARE OPTIONS FEATURE NAME: **AUTO PRINT NEW W.O.**

**CHOICES:**
'S' WILL PRINT A SHORT SUMMARY WORK ORDER EACH TIME A NEW ONE IS ENTERED
'L' WILL PRINT A LONG W.O. EACH TIME ONE IS ENTERED
'N' WILL SUSPEND THE PRINTING OF NEWLY ENTERED WORK ORDERS.

**SELECTION:**

Select ENG SOFTWARE OPTIONS FEATURE NAME: **EXPANDED PM WORK ORDERS**

'Y' will cause all the equipment related fields in PM work orders to be filled in using data from the Equipment File.

If this option is not set to 'Y', the system will produce skeleton PM work orders in order to conserve disk space. Note that information from the Equipment File is always printed on the PM worklists.

**SELECTION:**

Select ENG SOFTWARE OPTIONS FEATURE NAME: **EQUIPMENT REPLACEMENT TEMPLATE**

**CHOICES:**
One standard output of the AEMS/MERS Equipment Management Module is a listing of all non-expendable equipment due for replacement within a user specified date range. The fields to be printed on this list are defined by output template 'ENEQ REPLACEMENT'.

If you so desire, you can specify that a different set of fields be printed at your facility. To do this, simply set this software option to 'L' and create print template 'ENZEQ REPLACEMENT'.

Choices are 'L' for local, or 'S' for standard (default).

**SELECTION:** S//

Select ENG SOFTWARE OPTIONS FEATURE NAME: **INVENTORY TEMPLATE**

**CHOICES:**
One standard output of the DHCP Equipment Management Module is a listing of all non-expendable equipment sorted by CMR, EQUIPMENT CATEGORY, LOCATION, OWNING SERVICE, RESPONSIBLE SHOP, or USE STATUS. The standard print for these reports is defined by output template 'ENEQ EQUIP. LIST'. If you so desire, you can use a different output template at your facility. To do this, just enter an 'L' for this software option and be sure to call your local template 'ENZEQ EQUIP. LIST'.

Choices are 'L' for local, or 'S' for standard (default).

**SELECTION:** S//

Select ENG SOFTWARE OPTIONS FEATURE NAME: **PM DEVICE TYPE IDENTIFIER**

**CHOICES:**
'E' will stand for EQUIPMENT CATEGORY
'M' will stand for MFG. EQUIPMENT NAME
This option determines what is printed on PMI worklists under the heading of 'Equip Category'. EQUIPMENT CATEGORY will be printed unless 'M' is explicitly entered as the option of choice.

**SELECTION:** E//
Select ENG SOFTWARE OPTIONS FEATURE NAME: **PM SORT**
PM worklists are automatically sorted by responsible shop, and by technician within shop. Within tech, a site may choose to have worklists sorted by PM #; Local Identifier; Location; Equipment Category, or Owning Service. Choices are, therefore:

- 'P' for PM #
- 'I' for Local Identifier
- 'L' for Location
- 'C' for Equipment Category
- 'S' for Owning Service.

If no choice is made via this file, the user will be asked for a 'Sort By' parameter each time a worklist is requested. Note that all data for the worklists come from the Equipment File.

**SELECTION:**

Select ENG SOFTWARE OPTIONS FEATURE NAME: **PRINT BAR CODES ON W.O.**
**CHOICES:**

- 'Y' will cause bar code to be printed at the bottom of hard-copy work orders, provided the printer is capable of printing bar code.
- 'N' will cause work orders to be printed without bar code.

**SELECTION:** N/

Select ENG SOFTWARE OPTIONS FEATURE NAME: **SAFETY PRINTOUT**
**CHOICES:**

- 'L' FOR LOCAL TEMPLATE (TEMPLATE NAME MUST BE 'ENZFSAL')
- 'S' FOR STANDARD TEMPLATE

**SELECTION:** S/

Select ENG SOFTWARE OPTIONS FEATURE NAME: **SPACE SURVEY PRINTOUT**
**CHOICES:**

- 'L' for local template (template name must be 'ENZSPRM').
- 'S' for standard template ('ENSPRM').

**SELECTION:** S/

Select ENG SOFTWARE OPTIONS FEATURE NAME: **WARRANTY EXPIRATION TEMPLATE**
**CHOICES:**

One standard output of the AEMS/MERS Equipment Management Module is a list of equipment whose warranty expires within a user specified date range. The standard output for this report is defined by print template 'ENEQ WARRANTY'.

If you so desire, you may create a different template for use at your facility. To make this work, you should enter an 'L' for this option and create a print template named 'ENZEQ WARRANTY'.

Choices are 'L' for local template, or 'S' for standard template (default).
Engineering Archive Module

The Engineering Archive module presently services the Work Order and 2162 Accident Report files. It allows individual records to be stored on tape and then purged from the disk.

Pointers to external files are replaced by the equivalent text before records are saved to tape.

Data definitions are stored on the same tapes as the records themselves. The recall option uses these data definitions to automatically construct a temporary file for the storage and display of archived records. VA FileMan may be used to print information from these temporary files. There is no provision for restoring archived records back into the production file from which they were extracted.

--->9 Engineering Archive Module
10 Biomedical Engineering Resource Survey
11 Work Action

Select Program Management Option: 9 Engineering Archive Module

1. Find & Assemble Records
   Searches the database and finds the individual records to be archived, after which it moves them to an archive global and simultaneously purges them from the production file. The user is asked for record type, station number, and sort parameters. Records may be archived for an entire fiscal year, or a specific quarter. Completed work orders may be archived by shop (all shops, one shop, or all shops but one).

   Since this function actually purges data from disk, you may wish to backup your system before executing "Find and Assemble Records".

2. Archive & Verify Records
   Moves a collection of records (archive set) from the archive global to tape.
   This function should be executed immediately after "Find and Assemble Records".
3. Delete Archive Global
Kills the archive global, which may be thought of as a temporary storage area. The archive global holds records in the process of being archived, as well as records which have been recalled from an archive tape for inspection via VA FileMan. "Delete Archive Global" should be executed after "Archive and Verify" and after "Recall Archive Global" (once the recalled records have been inspected and/or printed).

4. Recall Archive Global
Restores records from an archive tape into the archive global, where they may be examined via FileMan. The user may recall an entire tape or search a tape for a specific record.

5. Review Activity Log
Displays a chronological listing of everything that has been done with a given archive set.
Find & Assemble Records

Select Engineering Archive Module Option: 1  Find & Assemble Records

ARCHIVAL FILE TYPES:
7.0T3

AVAILABLE FILES:

1. WORK ORDERS
2. 2162 ACCIDENT REPORTS

Select AVAILABLE FILE: 1  WORK ORDERS
Station Number: 590
Is this correct? YES// (YES)
Do you wish to archive by fiscal YEAR or QUARTER (Y or Q) Y//
SELECT FISCAL YEAR: 93 //88
Include all shops ? YES// (YES)

•You have requested to locate all completed work orders
for all shops, in Fiscal Year 88

•IS IT O.K. TO PROCEED? NO// Y (YES)

Now searching data base
Hold on, this could take awhile
Elapsed time:  0.15 minutes.
3 Records were found meeting the archive criteria

Is it O.K. to accept these data ? YES// (YES)
The identification reference, 590.2930426.1253
has been entered into the Engineering Archive File.
Would you care to add your own local description and location
for this archival episode? YES// (YES)

Select NEW WORK ACTION NAME: P1 PERFORMANCE VERIFICATION P1
Select SYNONYM: TEST, PERFORMANCE// ??

TEST, PERFORMANCE
Informal name for physical location. Example: 'KITCHEN', 'SICU', etc. It's permissible for more than one location to have the same synonym.

Select SYNONYM: TEST, PERFORMANCE//
Package Operation - Program Management

Select NEW WORK ACTION NAME:

This option allows users to add SYNONYMS to existing Work Actions in order to facilitate look-ups. Additions or deletions of WORK ACTIONS themselves should not be made without first consulting with IRM Service.

When no other entries are required under this option, <RET> is pressed to access the Program Management option menu.
Space/Facility Management

The Space/Facility Management module is entered from the Engineering Main Menu.

AUTOMATED ENGINEERING MANAGEMENT SYSTEM
VERSION 7.0

WO     Work Order & MERS
PLAN   Project Planning
TRK    Project Tracking
EQ     Equipment Management
ENM    Program Management
SP     Space/Facility Management
FSA    2162 Report of Accident
XFER   Assign (Transfer) Electronic Work Orders

Select Engineering Main Menu Option: SP Space/Facility Management

The following menu will then be displayed:

ENGINEERING SPACE/FACILITY MANAGEMENT

1  Space Management
2  Key/Lock Management
3  Export Facility Management Data
4  Facility Management Utilities
5  Leased Space Options
6  Planning Space Program Menu

Space Management
This is the main driver option for Engineering Space package.

Key/Lock Management
This is the main driver option for Engineering lock/key management.

Export Facility Management Data
These options output reports in an ASCII format suitable for capturing to use in several popular MS-DOS PC spreadsheets for better analysis and graphic capability.

Facility Management Utilities
These options are used to edit files associated with facility management and other utilities for the package.

Leased Space Options
Driver for leased space data entry and printing.
Planning Space Program Menu
Menu for options to be used for entering space planning data for construction projects.

Each of these options can be selected by entering the appropriate number and then pressing <RET>. Each of these options will be explained in the following sections.
Space Management

--->1 Space Management
2 Key/Lock Management
3 Export Facility Management Data
4 Facility Management Utilities
5 Leased Space Options
6 Planning Space Program Menu

The Space Management option has the following options:

Enter New Room Space Data
Enter/edit of space data for any selected room using standard FileMan functionality.

Display/Edit Room Data
Enter/edit space data using a screen server.

Finish Replacement Schedules Report Menu
Driver option for printing scheduled replacement dates for room finishes.

Space Survey Report Menu
Driver option for Engineering Space Reports.

Non-Space File Location Report
This report generates a list of equipment that has an entry in the NON-SPACE FILE LOCATION field. (See page 12-5 for complete documentation).
Enter New Room Space Data

This option uses the edit option of FileMan to add new and edit existing entries in the Space Management file. Choose a room number and edit each field as necessary. The fields will be presented one at a time in standard FileMan format.

More functionality has been added to aid handling of multi-division facilities, space planning criteria and leased space.

The following is an example of all the fields the user is prompted with after selecting Option 1. A question mark (?) was entered at each prompt to display the help information available. It is important to note that for multi-building facilities, the room number should include the building number in the format ROOM NO. - BLDG. NO.

Select Space Management Option: 1 Enter New Room Space Data
Select ENG SPACE ROOM NUMBER: ??
CHOOSE FROM:
25-7A 7A EAST CLINICAL LABORATORY LAB
DINNG DINING ROOM
Enter as 'ROOM-BUILDING'; or 'ROOM-BUILDING-DIVISION' at two-division facilities and other sites where building numbers may be duplicated. The Building File (6928.3) is used for data validation.
Identifier of a physical location (room). With the advent of bar coding, it is essential that this field uniquely and unambiguously specify a particular location. Entries may consist of one, two, or three pieces. Hyphens (if present) are treated as delimiters between pieces. First piece (always present) is room designation, second piece (optional) is building designation, and third piece (optional) is division designation (may be used for outpatient clinics, regional offices, etc. as well as for formal divisions).

It is anticipated that most sites will use two piece entries. True single-building facilities may use one-piece entries. Multi-division facilities and sites supporting remote offices where duplicate building numbers may be a problem should use three-piece entries.

Entry of a two-piece ROOM NUMBER will automatically populate the BUILDING field.
Entry of a three-piece ROOM NUMBER will automatically populate the BUILDING and DIVISION fields.

Hyphens must not be used as anything other than delimiters between ROOM, BUILDING, and DIVISION.
Select ENG SPACE ROOM NUMBER: 25-7A 7A EAST CLINICAL LABORATORY LAB
ROOM NUMBER: 25-7A/ BUILDING NUMBER: 7A/ ??
Assigned number of the BUILDING. This field is populated automatically when ROOM NUMBERS are entered as 'ROOM-BUILDING'.
BUILDING NUMBER: 7A/ DIVISION:
WING: EAST/ ??
Intended as a means of defining functional groupings of physical locations. WINGs may or may not equate to an extension or annex of a building, and/or a clinical specialty area (ex: surgical wing) of a hospital. Used in the Equipment Management Module. In sorting a Preventive Maintenance Worklist by LOCATION, the system will attempt to sort by WING rather than ROOM NUMBER.
WING: EAST/

Select ENG SPACE ROOM NUMBER:

You may enter another room number at the above prompt or press < RET> to return to
the Space Management option main menu.

Display/Edit Room Data

This option shows a room entry with all its associated data on the screen at one time.
All fields will be displayed and can be viewed, edited, or printed on another device.
This is an easy method of printing data on individual rooms, for use in the Space committee, or for whenever a quick picture of a room is needed.

The following is an example of the screen display for room 25-7A. Each of the fields on the screen can be edited by selecting the field number.

```
Select ENG SPACE ROOM NUMBER:  25-7A     7A     EAST  CLINICAL LABORATORY
                               SINGLE ROOM DATA DISPLAY

1) ROOM NO. : 25-7A
2) BUILDING #: 7A
3) WING : EAST

NOTE: Users who do not hold the ENROOM security key will not be allowed to edit data via this option.
Finish Replacement Schedules Report Menu

Fields have been added to record the estimated replacement dates for ceilings, walls, and floors. These dates can be sorted and a replacement schedule printed through the use of this option. The menu includes the four options shown below.

Finish Replacement Schedules Report Menu

1. Replacement Schedule for All Finishes
2. Ceiling Replacement Schedule
3. Wall Replacement Schedule
4. Floor Replacement Schedule

Select Finish Replacement Schedules Report Option:

An example of each report is included at the end of this section.

Replacement Schedule for All Finishes
This option prints out a range of user selected rooms with dates for all finishes on a 132-column printout sorted by room number.

Ceiling Replacement Schedule
This option prints a range of dates for ceiling replacement only, sorted by date.

Wall Replacement Schedule
This option prints a range of dates for wall finish replacement only, sorted by date.

Floor Replacement Schedule
This option prints a range of dates for floor finish replacement only, sorted by date.
1. Replacement Schedule for All Finishes

Space Survey Report Menu

The Space Survey Report Menu has the following options:

1. Room/Keying/Function Report
   Room listing with keys that open room.

2. Space Survey by Room
   Generates print-out of space data sorted by room number.

3. Service Space Survey
   Generates listing of space data sorted by owning service. Allows full
   listing or a summary of square foot figures only.

4. Function Space Survey
   Generates list of rooms sorted by designated function.

5. Building Space Survey
   Prints principal fields from Engineering Space file. Sorts first by
   building, then by room.

6. RCS 10-0141 Report
   Report to aid in preparing CDR data for Fiscal Service.

7. Building Management RCS 10-203, VAF 10-6007a
   Generates a square footage report in the AMIS format needed by Building
   Management.

These reports are now sorted by DIVISION as well as BUILDING.
1. Room/Keying/Function Report

The Room/Keying/Function Report is an 80-column report that ties the Lock and Space files together. It prints the Room Number and Function from the Space file and the different levels of keying information from the Lock file. This presents a report of all of the keying information about a single room or group or rooms.

This option will also allow sorting by Service with a secondary sort on the key name and a tertiary sort in room order under each key. The report sections are segregated for clarity and therefore make an excellent keying plan document for each service.

2. Space Survey by Room

This option prints a 132-column report sorted by room number that has most of the pertinent data fields associated with the Space file. The report loses clarity when printed on the 80-column screen since it is designed for 132-column paper. Most terminals can be switched to 132-column for displaying this report on the screen.

• Select Space Survey Report Menu Option: 2 Space Survey by Room

Key/Lock Management

ENGINEERING SPACE/FACILITY MANAGEMENT

1  Space Management
   --->2  Key/Lock Management
3  Export Facility Management Data
4  Facility Management Utilities
5  Leased Space Options
6  Planning Space Program Menu

The options for Key/Lock Management are:

Key Distribution by Employee Enter/Edit
   Enter/edit list of door keys assigned to individual employees.

Lock Number File Enter/Edit
   Enter/edit information on door locks, by control number.

Print Key Distribution By Employee
   Generates list of employees to whom door keys have been individually
   assigned. Information on keys assigned is provided.

Print Employee List sorted by Key
   Prints list of all employees (if any) who have been issued door keys
   within a user-specified range of keys.

Print Employee List by Service
   Lists employees and keys in order by service, page break on each service.
   For review, by Service, of key holders
Key Distribution by Employee Enter/Edit

This option serves the same purpose as the earlier releases. Keys are assigned to employees for accountability. NOTE: Employees must be entered under this option in order to run the print options of the Key/Lock Management option.

The following is an example of all the fields the user is prompted with after selecting option 3. Two question marks were entered at each prompt to display the help information available.

Select EMPLOYEE (KEYS): ?

Select EMPLOYEE (KEYS): ENUSER2, SEVEN

ARE YOU ADDING 'ENUSER2, SEVEN' AS A NEW EMPLOYEE (KEYS) (THE 7TH)? Y (YES)

EMPLOYEE: ENUSER2, SEVEN

SERVICE: ENG//??

CHOOSE FROM:

IRM

SERVICE: ENG•//CLINICAL LABORATORY

ID NUMBER: ??

Select KEYS ISSUED: ??

1111

Select KEYS ISSUED: 1111

ARE YOU ADDING '1111' AS A NEW KEYS ISSUED (THE 1ST FOR THIS EMPLOYEE (KEYS))? Y (YES)

DATE ISSUED: T-10 MAR 21, 1993

ARE YOU ADDING 'MAR 21, 1993' AS A NEW DATE ISSUED (THE 1ST FOR THIS KEYS ISSUED)? Y (YES)

QUANTITY ISSUED: ??

Enter the quantity of this key number that was issued to the employee on this particular date only. The total quantity from all dates will be calculated by the system.

QUANTITY ISSUED: 1

TOTAL QUANTITY ISSUED: ??

Enter the total of this key issued on all recorded dates.

TOTAL QUANTITY ISSUED: 1

Select KEYS ISSUED:

Select EMPLOYEE (KEYS):

You may enter another name at the above prompt or press <RET> to return to the Space/Facility Management option main menu.
**Lock Number File Enter/Edit**

This option serves the same purpose as before in that information can be entered or edited on the facility's locks.

In the following example, a question mark has been entered after each field to display the help information available.

```plaintext
Select LOCKS KEY: GA-1
KEY: GA-1//? 
ANSWER MUST BE 1-10 CHARACTERS IN LENGTH
KEY: GA-1// 
CTRL KEY: 
GGM: YES//? 
CHOOSE FROM:
   Y KEYED TO GGM
   N NOT KEYED TO GGM
GGM: YES// 
Select MASTER: ENG//?
MASTER KEYS FOR THIS LOCK
ENTER MASTER KEYS FOR THIS LOCK
Select MASTER: ENG// 
Select SUB-MASTER: FLR//? 
ANSWER WITH SUB-MASTER: 1 FLR
YOU MAY ENTER A NEW SUB-MASTER, IF YOU WISH
ANSWER MUST BE 1-4 CHARACTERS IN LENGTH
ENTER SUB-MASTER KEYS FOR THIS LOCK
Select SUB-MASTER: FLA// 
Select LOCKS KEY: 
```

You may enter another key at the above prompt or press <RET> to return to the Space/Facility Management Option main menu.
Print Key Distribution by Employee

This option prints a list, sorted by employee, of employees and the keys that they are accountable for. After selecting this option you are asked which employee you wish to start with and go to, and then prompted for an output device.

START WITH EMPLOYEE: FIRST// ENUSER3,EIGHT
GO TO EMPLOYEE: LAST//
DEVICE: HOME// RIGHT MARGIN: 79//

Return to the Space Management option main menu by pressing < RET>.

The following page is an example of a printout of the Key Distribution by Employee Report.

Export Facility Management Data

1. Space Management
2. Key/Lock Management
3. Export Facility Management Data
4. Facility Management Utilities
5. Leased Space Options
6. Planning Space Program Menu

The Export Facility Management Data options are:

Output Service/NSF Spreadsheet
   Output an ASCII file that can be captured via a smart terminal for loading into a commercial spreadsheet product.

Output Function/NSF Spreadsheet
   Output an ASCII file that can be captured via a smart terminal for use in a commercial spreadsheet.

Output RCS 10-0141 Spreadsheet
   Output an ASCII file that can be captured via a smart terminal for use in a commercial spreadsheet.
Output Service/NSF Spreadsheet

This option outputs an ASCII file that can be captured via a smart terminal for loading into a commercial spreadsheet product. The following prompts are generated.

Report sorted by Service is Requested

I must do a FileMan sort to organize the data you want to export. The data will print in FileMan format on your screen. At the end of the print you will be instructed on how to capture the data you have requested.

No Device Selection will be asked. This option cannot be queued.

Press <RETURN> when ready, or '^' to escape.
START WITH SERVICE: FIRST/

ENG SPACE STATISTICS  JAN 8,1992  09:20   PAGE 1
NET SQ.FT.---------------------------------------------------------------------------------------------------------------------------------------------------------------
TOTAL       0.0
COUNT       0

Press <RETURN> to continue

Ready to list Spreadsheet data in Comma Separated Value (CSV) format.

Turn on your ASCII file capture feature and save an MS-DOS file with an extension of CSV, i.e. ASCII file name = ........ CSV

At the end of the data listing, Turn off your ASCII file capture feature and then open the CSV file in your spreadsheet program to produce graphs.

NOTE: The last cell of your spreadsheet will contain extraneous text. You'll probably want to delete it.

Press <RETURN> when ready, or '^' to escape.
Facility Management Data
Service Report
Net Square Foot and Room Count Report
SERVICE,COUNT,NET SQUARE FT.

Turn off data capture, Press <RETURN> when ready.

I still have this data stored and can list it for capture again without re-running the FileMan sort in case you missed it the first time.

Want to list the data again ? NO//     (NO)

Upon exit, the user returns to the Export Facility Management Data menu.
Output Function/NSF Spreadsheet

This option outputs an ASCII file that can be captured via a smart terminal for use in a commercial spreadsheet.

Report sorted by Function is requested
I must do a FileMan sort to organize the data you want to export. The data will print in FileMan format on your screen. At the end of the print you will be instructed on how to capture the data you have requested.

No Device Selection will be asked. This option cannot be queued.

Press <RETURN> when ready, or `'' to escape.

Facility Management Utilities

1  Space Management
2  Key/Lock Management
3  Export Facility Management Data
--->4  Facility Management Utilities
5  Leased Space Options
6  Planning Space Program Menu

The Space Management Utilities provide a quick and efficient means of entering and editing building sites, building space, and space utilities.

1  Edit Space Functions file
2  Edit Space Utilities file
3  Remove Dangling Pointers in LOCK File
4  Building File Enter/Edit
5  Print All Building Data

Select Space Management Utilities Option:

The four sub options share the same entry and editing format. An example of each is presented below.

Edit Space Functions File

Use this option to enter or edit space functions into the space file.

Select ENG SPACE FUNCTIONS NAME: ?
ANSWER WITH ENG SPACE FUNCTIONS NAME
DO YOU WANT THE ENTIRE 108-ENTRY ENG SPACE FUNCTIONS LIST? Y (YES)

CHOOSE FROM:
  ADMINISTRATIVE ASSISTANT
  AGENT CASHIER
  ANIMAL QUARTERS
  ASSISTANT DIRECTOR
  ASSOCIATE DIRECTOR
  BATH, RESIDENT ON-CALL
  BATH/SHOWER ROOM
  BED ROOM - 1 BED
  BED ROOM - ISOLATION
  '^' TO STOP: ^

YOU MAY ENTER A NEW ENG SPACE FUNCTIONS, IF YOU WISH
ANSWER MUST BE 3-30 CHARACTERS IN LENGTH. LOCAL NAMES MUST START WITH 'ZZ'.
YOU CANNOT EDIT THE NATIONAL PORTION OF THE FUNCTION FILE.
Select ENG SPACE FUNCTIONS NAME: BOILER PLANT
NAME: BOILER PLANT/
CRITERIA SPACE (NSF): ??
    Amount of space (net square feet) authorized by H-08 Program Guides for
this particular function.
CRITERIA SPACE (NSF):

Upon exit, the user is returned to the Facility Management Utilities menu.
**Edit Space Utilities File**

This option is used to enter a new utility into the Space Management file.

```
Select ENG SPACE UTILITIES UTILITY: ?
ANSWER WITH ENG SPACE UTILITIES UTILITY
DO YOU WANT THE ENTIRE 31-ENTRY ENG SPACE UTILITIES LIST? Y (YES)
CHOOSE FROM:
  A/C - CENTRAL

  COMPUTER MODEM
  COMPUTER PRINTER
  COMPUTER TERMINAL
  DUMBWAITER
  ELEC-208V +
  ELEC-EMERGENCY
'?' TO STOP: ^
YOU MAY ENTER A NEW ENG SPACE UTILITIES, IF YOU WISH
ANSWER MUST BE 3-30 CHARACTERS IN LENGTH
Select ENG SPACE UTILITIES UTILITY: CCTV
UTILITY: CCTV/
```

Upon exit, the user is returned to the Facility Management Utilities menu.

**Remove Dangling Pointers in LOCK File**

This function will remove dangling pointers, if they exist, in the lock file. There is no screen display.

Upon exit, the user is returned to the Facility Management Utilities menu.

**Building File Enter/Edit**

```
Select Facility Management Utilities Option: 4  Building File Enter/Edit

Select ENG BUILDING NAME: ??
```

Building identifier. Used for data validation when entries are made in the Space File. Building NAME should consist of either one or two pieces, separated by the hyphen ("-"). The rule is this:
1. Sites where building designations are unique in and of themselves should have one-piece entries in this file. Building NAME's should not contain any hyphens.
2. Sites where building designations are not necessarily unique (multi-division sites and perhaps sites that support remote clinics and/or other quasi-independent offices) should use a two-piece format. The second piece should designate the division, outpatient clinic, Regional Office,
etc. Building NAME's should contain only one hyphen, which will be treated as the delimiter between 'building' and 'division'. Building NAME's should be kept as short as possible since they will be printed on each bar coded LOCATION LABEL. It will be difficult to fit lengthy building NAME's onto bar code labels of standard size. Assuming three inch width and Code 39 symbology, bar coded LOCATION LABEL's can accommodate about thirteen (13) characters total. In particular, it is suggested that 'division' designations be no more than two or three characters long.

Select ENG BUILDING NAME: 24
NAME: 24/
OWNERSHIP: VAMC// ??
Denotes whether or not space is being leased, owned by a VA department, or entered for project planning purposes.

OWNERSHIP: VAMC// ??
The name of the individual, corporation, or government agency that owns the building. Especially important in the case of leased space.

Enter/Edit Room Planning Data

This option is used to edit only those fields related to space planning criteria.

Select Planning Space Program Menu Option: 2 Enter/Edit Room Planning Data

Enter Planning Data for this Room Number
Select ENG SPACE ROOM NUMBER: ??

CHOOSE FROM:
25-7A  7A  EAST  CLINICAL LABORATORY  LAB
DNG  DINING ROOM

Enter as 'ROOM-BUILDING'; or 'ROOM-BUILDING-DIVISION' at two-division facilities and other sites where building numbers may be duplicated. The Building File (6928.3) is used for data validation.

Identifier of a physical location (room). With the advent of bar coding, it is essential that this field uniquely and unambiguously specify a particular location. Entries may consist of one, two, or three pieces. Hyphens (if present) are treated as delimiters between pieces. First piece (always present) is room designation, second piece (optional) is building designation, and third piece (optional) is division designation (may be used for outpatient clinics, regional offices, etc. as well as for formal divisions).

It is anticipated that most sites will use two piece entries. True single-building facilities may use one-piece entries. Multi-division facilities and sites supporting remote offices where duplicate building numbers may be a problem should use three-piece entries.

Entry of a two-piece ROOM NUMBER will automatically populate the BUILDING field. Entry of a three-piece ROOM NUMBER will automatically populate the BUILDING and DIVISION fields.

Hyphens must not be used as anything other than delimiters between ROOM, BUILDING, and DIVISION.

2162 Report Of Accident

The 2162 Report of Accident option employs a package called the Screen Handler, which allows screen formatting of file records. The entry is "painted" on the screen, allowing many fields to be viewed simultaneously.

AUTOMATED ENGINEERING MANAGEMENT SYSTEM
VERSION 7.0

WO  Work Order & MERS
PLAN Project Planning
TRK  Project Tracking
EQ   Equipment Management
ENM  Program Management
SP   Space/Facility Management
FSA  2162 Report of Accident
XFER Assign (Transfer) Electronic Work Orders

Select Engineering Main Menu Option: FSA  2162 Report of Accident

The options for 2162 Accident Reporting are:

ENGINEERING ACCIDENT REPORTING MODULE

1  Enter 2162 Report
2  Display 2162 Report
3  Edit 2162 Report
4  Service/Division Summary Report
5  Injury Cause Summary Report
6  Accident Nature Summary Report
7  Specific Location Summary Report

Any one of the options can be selected by typing the appropriate number or by typing the first few alpha characters of the menu name and then pressing < RET> or <ENTER>. The main menu may be returned to by pressing < ENTER > or <RET>.

The Enter, Edit, and Display options use the Engineering Screen Handler. Please refer to the Introduction section of this manual for some helpful tips on using the Engineering Screen Handler.
**Enter 2162 Report**

Using this option, you can enter 2162 accident data, in nearly an identical sequence to the paper form VA 2162 (Nov 1983). There are three additions which are not part of the standard form. Two questions are, "Did the injury involve a needle stick?" and, "Is the report complete?" The third difference is that the computer automatically generates a local Engineering number as the first data entry for each record. The first two digits are the fiscal year while the last four digits are sequentially incremented throughout the year.

It is strongly recommended that this number not be edited. While the traditional 2162 CASE NUMBER could have been used as the first data entry for each record, experience has shown that reports of accidents are sometimes filed for events that are officially non-reportable, hence the need for a local numbering field.

Display 2162 Report

The Display 2162 Report uses the Screen Handler in a display only mode to allow data review of a specific report. Each report is cross-referenced by CASE NUMBER, LAST NAME OF INVOLVED, and SSN. They may be looked up by any of those values.

The screen display is the same as the Enter 2162 Report screen. However, data in word processing fields does not display.
Package Operation - 2162 Report of Accident

Edit 2162 Report

Nearly identical in function to the Enter 2162 Report, the Edit option first requests the local Engineering Report #. The report file is cross-referenced by CASE NUMBER, LAST NAME OF INVOLVED, and SSN. The report may be looked-up by any of these values.

Previous entries for the report will be shown and can be edited. You can access each field in turn using the <RET> key or a specific field by entering <^> and the field number. The text in a word processing field will be displayed at the bottom of the screen.

Screens 1 and 5 are shown below as examples.

REPORT OF ACCIDENT (SCREEN 1 OF 5)

EDIT OPTION: .................................................................
Summary Reports (options 5-8)

Currently there are four summary reports. Each of these reports is identical in format, differing only in record selection criteria. In each case, one or all of the criteria elements may be selected (e.g., a single service or all services). Within that selection the time frames MONTHLY, QUARTERLY, or YEARLY may be specified, as well as the option of selecting every record on file.

The following is an example of a summary report generated for a particular service, #0018, for a given quarter. The report heading is slightly modified, in order to fit on the page.

ENGINEERING ACCIDENT REPORTING MODULE

1 Enter 2162 Report
2 Display 2162 Report
3 Edit 2162 Report
4 Service/Division Summary Report
5 Injury Cause Summary Report
6 Accident Nature Summary Report
7 Specific Location Summary Report

Select 2162 Report of Accident Option: Service/Division Summary Report

ACCIDENT REPORT INTERVAL

MONTHLY ................................................................. 1.
QUARTERLY ............................................................. 2.
YEARLY ................................................................. 3.
ALL REPORTS ........................................................... 4.

SELECT ACCIDENT REPORT INTERVAL: EXIT//

If Select ACCIDENT REPORT INTERVAL is answered with a < RET>, the following message appears after which the user is returned to the above menu.

USER ABORT

Supplementary Notes:

The coding criteria used has been taken from the leaflet, "CODING INSTRUCTIONS (VA FORM 2162, REPORT OF ACCIDENT)", and therefore should be directly applicable. The pointer file, DIVISION/SERVICE number, is extracted from MP-3, Part III, Appendix 3C. This file contains the list of acceptable codes and should not be altered.
Assign (Transfer) Electronic Work Orders

The Assign Electronic Work Orders menu option (ENETRANSFER) is used for transferring requests from a receiving area to a working shop. This option displays summary information (including TASK DESCRIPTION, PRIORITY, REQUEST DATE, and REQUESTER) for each work order that is awaiting transfer. If the work request involves a piece of equipment, the EQUIPMENT ID# and EQUIPMENT CATEGORY are also displayed. There is a notation as to whether or not the Electronic Work Order contains COMMENTS from the requester. The header of this summary display tells how many requests are pending. You can assign one particular Electronic Work Order, or a group of them. You can also disapprove electronic work orders when necessary.

If only one receiving area is needed at your facility, it should be entered into the Engineering Section file and then into the TEMPORARY WORK ORDER SECTION field of the Eng Init Parameters file. If two or more receiving areas are needed, they should all be entered into the Engineering Section file but the TEMPORARY WORK ORDER SECTION should be left blank. The SECTION NUMBER of all receiving areas should be in the range of 90 to 99 (inclusive).

IT Equipment Module

Most of the options in the IT Equipment Module have been documented in previous sections of this manual. In those cases, the page references are noted and a brief description of the features is provided below. All other options are documented in this chapter.

1. Inventory Edit (IT)
2. Display Equipment Record (See page 7-19)
3. Bar Code Features (NX Equipment) ... (See page 7-102)
4. Specific Equipment History (See page 7-21)
5. Display/Edit Room Data (See page 9-6)
6. Non-Space File Location Report
7. IT Equipment Responsibility ...

Inventory Edit (IT)
This option allows you to edit the record for an existing piece of equipment. Only equipment that has a CMR with IT TRACKING set to YES may be selected.

Display Equipment Record
Display selected fields from the EQUIPMENT INV. file. Repair history is not displayed via this option.

Bar Code Features (NX Equipment)
Collection of options designed for use in bar coding nonexpendable equipment and in using bar code to maintain CMR inventories.

   Equipment Labels
   Prints bar coded equipment labels. Cohorts of labels (ex: labels by CMR, labels by Equipment Category, etc.) will be sorted by LOCATION unless the user specifies otherwise.

   Location Labels
   Driver option to print bar coded location labels.

Download NX Program to Portable Bar Code Reader
Downloads an IRL (Interactive Reader Language) program to a portable bar code reader.

Upload Data From Portable Bar Code Reader
Calls a routine that causes a portable bar code reader to upload its data to DHCP.
**Restart Processing of Uploaded NX Inventory Data**
Used to resume processing of NX inventory that has been uploaded from a portable bar code reader. User will need PROCESS ID and TIME STAMP from failed process. If this information is unavailable, data upload must be restarted from the beginning.

**Inventory Exception Listing**
Produces a list of those items on a specified CMR that have not been located in the course of a physical inventory.

**Specific Equipment History**
Print-out of repair history of a specific entry in Equipment Inv. file.

**Display/Edit Room Data**
This option shows a room entry with all its associated data on the screen at one time. All fields will be displayed and can be viewed, edited, or printed on another device.

**Non-Space File Location Report**
This report generates a list of equipment that has an entry in the NON-SPACE FILE LOCATION field. Equipment should only have a value in this field when the LOCATION field cannot be updated because an appropriate location is not available in the ENG SPACE file. Ideally, equipment will not remain on this report for an extended period of time.

**IT Equipment Responsibility ...**
This is the menu for the equipment responsibility options.
Inventory Edit (IT)

This option allows you to edit the record for an existing piece of equipment. Only equipment that has a CMR with IT TRACKING set to YES may be selected.

This option is locked with the EN IT INVENTORY security key.

Following is a list of the fields displayed on the Inventory Edit (IT) screen with a brief description.

LOCATION - The physical location of the equipment. Only entries from the ENG SPACE file (#6928) may be entered. You may enter a ?? for a list. If you don’t find an appropriate location, you may enter a free-text location in the NON-SPACE FILE LOCATION field. See that field’s description for more information.

NON-SPACE FILE LOCATION - The purpose of this field is to allow you to enter a free-text value when there is not a suitable location in the ENG SPACE (#6928) file to select. The entry of a free-text location will result in Engineering staff automatically being notified via e-mail of the need for a new location. Once the new location is added to the ENG SPACE file, the engineering user can respond on the mail message that the location has been added and then IT staff can use this option to update the equipment location. The NON-SPACE FILE LOCATION entry is automatically deleted when the LOCATION field is changed.

IT REMOTE LOCATION - This field is used to store information such as the address and phone number for IT equipment that is taken off site.

CMR- The Consolidated Memorandum of Receipt (CMR) for this piece of equipment. This field cannot be deleted, and can only be changed to a CMR that also has IT TRACKING = YES.

USING SERVICE - The service within the facility that uses the equipment. Enter a question mark for a list of available choices.

UPDATE INVENTORY DATE? – Enter a Yes to update the LAST INVENTORIED field to the current date.

LAST INVENTORIED - This field may only be changed to the current date. You must enter YES at the previous field (UPDATE INVENTORY DATE?) to automatically update this field to the current date.

IT COMMENTS - This is a word processing field. A <RET> in this field will drop you into the editor. Once the comments are entered or edited, the screen will redisplay with the new information.

Non-Space File Location Report

This report generates a list of equipment that has an entry in the NON-SPACE FILE LOCATION field. Equipment should only have a value in this field when the LOCATION field cannot be updated because an appropriate location is not available in the ENG SPACE file. Ideally, equipment will not remain on this report for an extended period of time.

Print Hand Receipt for an Individual

This option allows IT personnel to print a hard copy hand receipt for a selected individual who currently has assigned responsibility for IT equipment.

The printout of an individual's signed, active assignments also serves as the loan form for Government Furnished IT Equipment.

The Equipment Return Date on the loan form is determined by adding the DAYS BETWEEN RETURNS value from the CMR file to the PHYSICAL INVENTORY DATE (i.e. Last Inventoried) of the equipment item. A default of 90 days is used if a value is not specified for the applicable CMR. If the equipment does not have an inventory date, the current date is reported as the equipment return date.

The DAYS BETWEEN RETURNS value is entered/edited using the CMR File Enter/Edit option.

You will have the option of choosing one of the following print options.

DATE OF SIGNATURE - allows you to select assignments signed electronically or via wet signature on a given date, regardless of current status.

SIGNED - allows you to select active assignments signed electronically or via wet signature.

UNSIGNED - allows you to select active assignments not signed, either electronically or via wet signature or signed documents where the signature date is more than 359 days ago. (You must re-sign by the one year anniversary of the previous signature.)

If an unsigned hard copy hand receipt is printed and signed, it must then be certified electronically, using the Certify Hard Copy Signature option.

Assignment Inquiry
Accept IT Responsibility

This option is used to accept responsibility for assigned IT equipment. It allows you to enter the initial acceptance with your electronic signature code, or reaffirm the acceptance (re-sign) before it expires. You must re-sign by the one year anniversary (359 days) of the previous signature.

Government Furnished Equipment (GFE) Usage Guidelines and User Responsibilities are displayed on the screen. Your electronic signature certifies that you understand and will comply with these guidelines and responsibilities.

Select IT Owner Menu Option: Accept IT Responsibility

Government Furnished Equipment (GFE) USAGE GUIDELINES
* Do not loan GFE to anyone.
* Do not install personal software.
* Save data only to secure locations, such as FIPS 140-2 compliant storage devices.
* Do not attach non-approved portable storage devices to this equipment.
* Secure and store GFE under lock and key when not in use.
* Do not check GFE as checked luggage when traveling.
* Do not modify the configuration of the GFE.

USER RESPONSIBILITIES
* I understand this equipment is provided for official use only.
* I understand the transit of VA Information off-site is strictly prohibited unless accompanied by express written authorization.
* I am required by my supervisor to utilize this equipment to perform the duties of my job.
* I accept responsibility for the equipment identified above issued to me by the Department of Veterans Affairs.
* I fully understand that I could be billed for the replacement cost for any damage or loss occurring as a result of negligence.
* I have read and understand current VA Security Directive 6500 and any subsequent revisions or recensions.

Print My Hand Receipt

This option allows you to print a hard copy hand receipt for IT items assigned to you. The printout of an individual's signed, active assignments also serves as the loan form for Government Furnished IT Equipment.

The Equipment Return Date on the loan form is determined by adding the DAYS BETWEEN RETURNS value from the CMR file to the PHYSICAL INVENTORY DATE (i.e. Last Inventoried) of the equipment item. A default of 90 days is used if a value is not specified for the applicable CMR. If the equipment does not have an inventory date, the current date is reported as the equipment return date.

You will have the option of choosing one of the following print options.

DATE OF SIGNATURE - allows you to select assignments signed electronically or via wet signature on a given date, regardless of current status.

SIGNED - allows you to select active assignments signed electronically or via wet signature.

UNSIGNED - allows you to select active assignments not signed, either electronically or via wet signature or signed documents where the signature date is more than 359 days ago. (You must re-sign by the one year anniversary of the previous signature.)
Print My Hand Receipt

Glossary

ALD - Abbreviation for appropriation, limitation, department.

CMR - Consolidated Memorandum of Receipt. The basic instrument by which accountability for capital equipment is recorded.

Configuration - A particular selection of hardware and software resources that are tailored to provide optimum usage of ADP systems. This includes the type of CPU, type and number of disk drives, type and number of terminals, amount of main storage and so on.

Criticality - An index used by the package to rank the importance of performing preventive maintenance inspections on a particular device.

DHCP - Decentralized Hospital Computer Program - The name of the effort to install computer systems in the Veterans Administration Department of Medicine and Surgery's hospitals.

FileManager - Also known as VA FileMan. A set of MUMPS routines used to enter, maintain, access and manipulate related data in a file. It is the basic system used by all VA applications in creating files.

Information Systems Center (ISC) - One of the VA's seven regional offices for the management and development of application software. The ISCs are also responsible for providing support to field sites and for training personnel.

IRL - Interactive Reader Language. Proprietary language used by the Intermec line of portable bar code readers.

IT – Information Technology.

MailMan - An electronic mail, teleconferencing, and networking system which is an integral part of the Kernel.

MUMPS - Massachusetts General Hospital Utility Multi-Programming System. This is the computer language used by all VA DHCP applications.

NXRN# - A sequential number assigned by centralized CMR Management System in Austin.

Service Pointer - The functional entity (generally a service) within the facility that uses the device.
Glossary

Site Configurable - A term used to refer to features in the system which can be tailored according to the needs of particular sites.

Electronic Work Orders

Electronic work orders are simply work requests that are entered into DHCP by the person who actually wants the work done. The objective of the Electronic Work Order module is to relieve Engineering Services of a major data entry task so that they will be better able to concentrate on the technical aspects of work control, especially in areas that are scrutinized by the JCAHO.

Users of the electronic work order module are usually given the menu option ENWOWARD (Electronic Work Requests), most commonly as a secondary menu option.

1  Request Electronic Work Order (ENWONEW-WARD)
This option was developed for non-Engineering personnel to use when entering Electronic Work Orders. This option uses input template ENWOWARD in prompting for information. Sites are free to customize this template or to create one of their own. If an input template named ENZWOWARD exists, the Engineering package will use it in preference to ENWOWARD. The system will automatically generate a permanent identifier, called the ORIGINAL WORK ORDER NUMBER, for each work request.

2  Edit Electronic Work Order (ENWOEDIT-WARD)
The DHCP user who physically enters an Electronic Work Order is allowed to edit it, but only until such time as Engineering Service assigns it to a working shop. This edit feature uses the same input template as the Request option.

3  Electronic Work Order Status Check (ENWOSTATUS-WARD)
This option allows users to check the status of any Engineering Work Order. Workorder information is displayed on a CRT screen, and may be printed if necessary. It is not possible to edit a work order from within this option. Data elements from which potentially sensitive information can be deduced (such as LABOR COST) are omitted from this display.

4  Incomplete Work Orders (ENWOST-WARD)
This option provides a list of incomplete work orders that were either associated with a given location, requested by a specific service or section, physically entered by a particular DHCP user.

If you select (1), you will be prompted for a WING or BUILDING. All incomplete work orders for that location will be listed. Option (2) prompts you for a selection
Attachments

from File 49 (Service/Section). Option (3) will ask for the name of a DHCP user and then list all incomplete work orders that were entered by this individual.

The list includes CURRENT WORK ORDER #, REQUEST DATE, STATUS, LOCATION, PRIORITY, EQUIPMENT ID# (if applicable), and TASK DESCRIPTION. If CRT display is chosen, the user can request an expanded display. EMERGENCY and HIGH PRIORITY work orders are highlighted on CRT screens.

When an Electronic Work Order is entered, it immediately receives what is known as its ORIGINAL WORK ORDER NUMBER. This is a permanent identifier of each work request and will never change, no matter how many times a work order is transferred between shops. When checking the status of a work request, users can always use the ORIGINAL WORK ORDER NUMBER to call it up. Work orders can also be called up quickly by LOCATION or by TASK DESCRIPTION.

The system automatically records the DHCP user who physically enters each Electronic Work Order. This individual may be the actual requester but could also be someone who simply entered the work order on behalf of the requester. If questions arise concerning an Electronic Work Order, Engineering Service will first attempt to contact the REQUESTER (also known as CONTACT PERSON) rather than the person by whom the work order was physically entered.

Engineering Service has the prerogative of disapproving Electronic Work Requests. When this happens, a MailMan message is automatically sent to the person who entered the work order. The message will contain the COMMENTS field from the Electronic Work Order itself. It should be standard procedure for anyone who disapproves a work order to enter the reasons for doing so in the COMMENTS field before closing the work order.
Using Portable Bar Code Readers and Electrical Safety Analyzers with DHCP

Connecting to DHCP

Downloading and uploading require that the Trakker Bar Code Reader or the MedTester Electrical Safety Analyzer be physically connected to DHCP. This can be accomplished in several ways.

Dedicated port: Define the port as though the Trakker or MedTester were a VT-100 data terminal. Be sure that the baud rate and other basic data communication parameters of the dedicated port match those of the Trakker or MedTester. The principal disadvantage to the use of dedicated ports is inconvenience. All uploading and downloading would have to be done at a very limited number of locations.

Wedge: Special wedges can be purchased that will allow Trakers or MedTesters to share a data line with a CRT. Different types of wedges are available, and specific installation instructions should be provided by the manufacturer. Not all wedges are designed for both downloading and uploading, and users must therefore be very careful when purchasing hardware of this type.

Auxiliary CRT port: The DEC VT-320 is strongly recommended since it supports full bidirectional data communication through its aux port allowing both downloading and uploading capabilities. The overwhelming majority of CRTs on today's market are NOT capable of this.

Trakker 9440 Bar Code Reader Connection

A special RS-232 cable with a Trakker connector on one end and a standard DB-25 female connector on the other should be procured for each Trakker unit. You will need a cable with a six-pin modular plug on one end and a male DB-25 connector on the other. The recommended configuration is:

<table>
<thead>
<tr>
<th>SIX-PIN MODULAR PLUG</th>
<th>DB-25 MALE CONNECTOR</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td>2</td>
</tr>
<tr>
<td>3</td>
<td>7</td>
</tr>
<tr>
<td>5</td>
<td>3</td>
</tr>
<tr>
<td>6</td>
<td>6</td>
</tr>
</tbody>
</table>
This configuration allows the Trakker 9440 to supply the DATA SET READY signal (pin 6) which must be present in order for a VT-320 aux port to be enabled.

The PRINTERSE-TUP SCREEN of the VT-320 will allow you to configure the CRT for use with a Trakker 9440. Use the following steps to get to this screen.

1. hold the SHIFT key and press SET-UP
2. use the right arrow key to move the cursor to the box labeled "Printer"
3. press the ENTER key

From this point, you can set the software selectable features of the aux port. Many of the settings for the Aux port must match the settings of the Trakker.

1. Speed: 1200 (must match)
2. Printer to Host Communication: This MUST be set to Printer to Host.
3. Print Mode: Normal Print Mode
4. XOFF: XOFF
5. Bits and Parity: 8 bits, no parity (must match)
6. Stop Bit: 1 stop bit (must match)
7. Print Region: Print Full Page
8. Printed Data Type: National Only
9. Print Terminator: **No Terminator**

If you elect to interface your Trakker to DHCP via a DECSERVER, the following setup should work:

```
Character Size: 8     Input Speed: 1200
Flow Control: XON     Output Speed: 1200
Parity: NONE          Modem Control: Disabled
Stop Bits: 1
Access: Remote        Local Switch: None
Backward Switch: None  Name: LC-6-16
Break: Disabled       Session Limit: 4
Forward Switch: None   Type: ANSI
Preferred Service: None

Authorized Groups: 0
(Current) Groups: 0
```

---

**Engineering V. 7.0 User Manual**  
August 1993
Trakker Configuration

To configure the Trakker 9440 for operation with DHCP

1. Turn the Trakker on by pressing the <on-off> key. The unit should perform a brief self-test and then display a "Ready" prompt.
2. Hold down the <CTRL> key and press <E>. The words "CONFIGURATION MENU:" should appear.

You are now in the configuration mode. Use the <enter> key to step through the basic operating parameters. Unless otherwise instructed, use the <space> key to make your selections.

1. Press the <enter> key until you are prompted to "Select or modify operating parameters?". The word "NO" will appear on the fourth Trakker display line. Change "NO" to "YES" using the <space> key. The following parameters are recommended:
   a. BEEP VOLUME: Set this according to your preference.
   b. DISPLAY MODE: BUFFERED
   c. CHARACTER SET: US-ASCII
   d. CPU RESPREQD MODE: DISABLED
   e. PREAMBLE A REQUIRED: NO
   f. LASER SCANNER MODE: ONE-SHOT TRIGGER
   g. APPEND TIME TO DATA: NO
   h. TIME IN SECONDS: NO
   i. RESUME IRL PROGRAM: NO
   j. AUTOMATIC SHUT-OFF: 10 (designates amount of time in minutes)
   k. BACKLIGHT TIMEOUT: 10 (designates amount of time in minutes)

2. The next configuration heading is "Select or modify comm protocol?". Use the <space> key to select "POINT TO POINT". Selections must match the configuration of the DHCP port. Recommended settings are:
   a. CHECK CTS: NO
   b. XON: <CTRL> <Q>. "DC1" should appear on the last Trakker display line. Press <enter> to continue.
   c. XOFF: <CTRL> <S>. Observe "DC3" and press <enter> to continue.
   d. BAUD RATE: 9600 (match DHCP port)
   e. PARITY: DISABLED
   f. DATA BITS: 8 (match DHCP port)
   g. STOP BITS: 1 (match DHCP port)
   h. TIMEOUT DELAY: 10 (seconds)
   i. INTERCHAR DELAY: 50 MS (milliseconds)
   j. TURNAROUND DELAY: 0 (zero)

3. The Trakker is now configured for use with DHCP. Press the <ALT><E> (for escape) to save any changes. These settings will remain in a non-volatile
section of Trakker memory until the Trakker is re-configured. If you want to exit the configuration mode without saving any changes, hold down the <CTRL><Z> instead.

**MedTester Electrical Safety Analyzer Connection**

The aux port of the VT-320 is a six-pin modular jack, so you will need a cable with a six-pin modular plug on one end and a female DB-25 connector on the other. The proper configuration is:

```
SIX-PIN MODULAR PLUG         DB-25 FEMALE CONNECTOR
-----------------------------
5 ------------------------------- 2
2 ------------------------------- 3
3 ------------------------------- 7
1
6
```

With this configuration, the VT-320 supplies the DATA SET READY signal to itself (by virtue of the connection between pin 1 and pin 6). This signal must be present in order for a VT-320 aux port to be enabled.

The PRINTER SET-UP SCREEN of the VT-320 will allow you to configure the CRT for use with a MedTester. To get to this screen:

1. hold the <SHIFT> key and press <SET-UP>
2. use the right arrow to move the cursor to the box labeled "Printer",
3. press the <ENTER> key.

From this point, you can set the software selectable features of the aux port. Many of the settings for the MedTester must match the settings of the AUX port. The following settings are recommended.

1. Speed: 9600 or less (must match)
2. Printer to Host Communication: MUST be set to Printer to Host
3. Print Mode: Normal Print Mode
4. XOFF: not used
5. Bits and Parity: 8 bits, no parity (must match)
6. Stop Bit: 1 stop bit (must match)
7. Print Region: Print Full Page
8. Printed Data Type: National Only
Terminal Type and Device File

You will also need appropriate entries in the Terminal Type and Device files. The following examples are known to work with either the Trakker or the MedTester.

In the Terminal Type file:

```
NAME: C-BCAUX(VT320)
OPEN PRINTER PORT: W *27,'5i'
CLOSE PRINTER PORT: W *27,'4i'
```

In the Device file:

```
NAME: BCAUX(VT320)
$I: 0
LOCATION OF TERMINAL: HOME (AUX PORT)
SUBTYPE: C-BCAUX(VT320)
```

When prompted for the "device to which the Trakker (or MedTester) is connected" you should select "BCAUX(VT320)".

Downloading and Uploading

Data acquired and stored on the Trakker or the MedTester is uploaded to DHCP to update the facility database. Uploading may be done at the end of each work day, or at other convenient intervals. Both of the Trakker downloading programs will warn the user if the Trakker is about to run out of storage space. If you see this warning, you should plan to upload your data as soon as possible.

Trakker 9440 Bar Code Reader

The Trakker 9440 portable bar code reader can be programmed using a language called IRL. Only one IRL program can reside on a Trakker at any given time. Trakkers that are used for more than one application will need to be downloaded with the correct IRL program whenever the application changes.

Engineering includes two (2) IRL programs. The programs are:

1. ENNX for bar code based equipment inventory
2. ENPM for bar code based Preventive Maintenance Inspection.
The Engineering Menu Options for downloading and uploading between Trakkers and DHCP are:

1. Download NX Program to Portable Bar code Reader (ENBCNXDNLD)
2. Download PM Program to Portable Bar code Reader (ENBCPMDNLD)
3. Upload Date From Portable Bar code Reader (ENBCUPLD)

Note that the same option (ENBCUPLD) is used for uploading either equipment inventory data or PMI data. The content of the uploaded data set allows DHCP to automatically determine what the data represents and how it is to be processed.

MedTester Electrical Safety Analyzer

The Engineering Menu Option for uploading data from a MedTester to DHCP is "Upload Data From MedTester" (ENSA1).

SPECIAL NOTES

Although the PRINTER port of a MedTester has a DB-25 connector, it is a parallel (and not a serial) interface. Connection of MedTesters with DHCP must be accomplished via a MedTester COMM port.

It is believed that the MedTester 5000 does not support the XON/XOFF data communication protocol. This should not be a serious problem, but it does have the following implications:

1. If you are connecting a MedTester to the aux port of a CRT, the baud rate of the aux port must not be faster than the baud rate of the CRTs main communication port.
2. If it appears that you are losing characters in the data upload process, you may be able to solve the problem by reducing the baud rate.
Bar Code Based Equipment Inventory of Nonexpendable (NX) Equipment and Preventive Maintenance Inspections

A data acquisition program must be downloaded to your portable bar code reader. For Equipment Inventory use menu option "Download NX Program to Portable Bar Code Reader" (ENBCNXDNL); for Preventive Maintenance Inspections use menu option "Download PM Program to Portable Bar Code Reader" (ENBCPMDNL). If you need a detailed explanation of this process, please refer to the section entitled *Using Portable Bar Code Readers and Electrical Safety Analyzers with DHCP*.

Whenever you turn on a Trakker, it should execute a self-test and then display a "Ready" prompt. To begin, you should:

1. Simultaneously hold down the <CTRL> key and press <Enter>
2. Press <B> (for "begin").

If you find this start-up sequence cumbersome, you may wish to print the sequence in bar code and affix the label to the Trakker. Then you will be able to perform the startup sequence simply by scanning this label.

If data is already stored on your Trakker you will see a message that looks something like the following.

```
*** WARNING ***
Data exists on this bar code reader.
The first record in this file is: ID SAW9.21.90
Do you want to purge this file... ...(Y/N) ?
```

The first record in a Trakker file is called the File ID. If a Trakker file exists, the File ID will appear on the sixth line of the Trakker start-up message, immediately to the right of the character string "ID" (as shown above). Users of Trakkers will key in this File ID before beginning to collect data. File IDs should normally consist of the user's initials and the date. This way, if you happen to start up a Trakker that someone else has been using you can immediately tell who was using it and when. You will need to respond to the "Do you want to purge this file?" prompt. Say <N> if you want to add to the data already stored; <Y> if you want to delete what's there and start fresh.
If there is no stored data, or if there is data and you purge it, the Trakker will prompt you for a File ID. Please enter your initials and the current date. No special format is required, and the Trakker will accept and store virtually anything that does not exceed 37 characters.

There may be times when you cannot successfully scan a bar code label. Perhaps it is torn, smudged, or otherwise damaged. When this happens you can use the Trakker keyboard to enter data. Both location labels and equipment labels have the bar coded data printed in human readable form directly below the bar code. Be sure to key in all the characters (including spaces and hyphens) exactly as they appear on the label. To enter a hyphen, first press the <ALT> key and then the <Space> key. Location labels should look something like "SP201-110A". Equipment labels should be of the form "999EE12409".

In these two examples, "SP" and "EE" are what is known as "application codes"; "201" is a room number; "110A" is a building number; "999" is a station number; and "12409" is the ENTRY NUMBER of a particular piece of equipment in the Equipment file.

If a piece of equipment does not have a bar code label but does have a PM (Property Management) label; you may use the Trakker keypad to enter the PM Number. Be sure to include the hyphen. All entries of the form "nnnn-nnnn" or "nnnn-nnnna" (where "n" can be any digit and "a" can be any alphabetic character) will be interpreted by the Trakker as a PM Number. Examples might include "7025-0908" and/or "70250908A".

NOTE: The quotation marks in the examples given above are used purely to enhance the readability of this document. You should not include quotation marks when keying data into the Trakker.

If a piece of equipment does not have either a bar code label or a PM label, you can still capture it in your inventory. Press the key labeled <F4>. It is at the upper right corner of the keypad. The Trakker will automatically prompt you for MODEL, SERIAL NUMBER, and DESCRIPTION. The description may not exceed forty characters in length. If there is a DHCP equipment record whose MODEL and SERIAL NUMBER match your entries, the Engineering package will update that record.

To exit an option and get back to the Trakker's main menu, enter a period (<.>).

**Equipment Inventory**

The DHCP Equipment Management module has been designed for use with Building Service Equipment as well as Non-Expendable (or CMR) Equipment. It is also used with personal property that is not classified as Non-Expendable by
Acquisition and Materiel Management Service but requires routine tracking and inspection by Engineering Service to meet quality assurance requirements (i.e., JCAHO, NFPA). It is quite permissible for expendable equipment to be included in the Equipment file.

The Trakker will display the station number that was downloaded as part of the data acquisition program. If what you see displayed does not match your station number, contact your Application Coordinator and/or your Information Resources Management Service before proceeding.

At some point in the inventory process, you will probably want to perform an "Inventory Exception Listing" (menu option ENBCNXCMR). This option will look at the equipment record of every item on the subject CMR and list all those that were NOT located during the current inventory. This listing is called an Exception List.

NOTE: Items whose USE STATUS is "TURNED IN" or "LOST OR STOLEN" will NOT appear on CMR Exception Lists.

The starting date of the current inventory is specified by the user at the time the option is run. The default will be the first day of the current month, but any date may be selected. The ending date is always the date on which the option is run.

**Preventive Maintenance Inspections**

The intent of bar coded PMI functionality is to provide a tool that can be used to improve the accuracy and timeliness with which PM worklists are closed out. Whenever bar code readers are used in posting completed PMIs to Equipment Histories, the LOCATION and PHYSICAL INVENTORY DATE fields in the equipment record will be updated automatically.

Note that when downloading the PMI data acquisition program to a portable bar code reader, you will be required to select a PM Inspector from the Engineering Employee file. This is the individual whose name will be recorded in the WORKER field of the Equipment History. The wage rate of this individual (as stored in the Engineering Employee file) will be used to compute chargeable labor costs. If two or more technicians are to share the same bar code reader, then a download of the PMI data acquisition program must be performed each time the bar code reader changes hands. It is always necessary to upload any existing data BEFORE downloading a data acquisition program. Uploading and downloading operations should not take more than a few minutes.

The Trakker will display your station number, followed by the PM Inspector of Record. Both of these data elements are downloaded as part of the data acquisition
program. If the station number that you see displayed does not match your station number or if the PM Inspector shown is not what you intended to download, you should repeat the download procedure and/or contact your Engineering Application Coordinator or Information Resources Management Service before proceeding.

Once basic inventory information has been updated, the Engineering package will post the PM inspection. A check is first made of the existing Equipment History. If a PMI of the type specified in the selection of a PM worklist has already been posted, no action will be taken. In other words, if you're using a Trakker to close out a MONTHLY worklist for a specific shop and a MONTHLY PM inspection by that shop has already been posted for the piece of equipment in question; then the data uploaded from the Trakker will have no effect except to update LOCATION, PREVIOUS LOCATION, and PHYSICAL INVENTORY DATE.

If the PMI has not already been posted, the system checks to see if there is an open PM work order. If so (and if the equipment PASSED its PMI), the PM work order is closed and posted. If time and material costs were entered into the Trakker, these uploaded data elements will be used in closing the PM work order. If time and materials were not recorded, the default values (if present) will be used.

If the piece of equipment FAILED its PMI, notification will be provided in the form of a PMI Exception Message. The PM work order will be referenced in the Exception Message, but it will not be closed and nothing will be posted to the Equipment History.

If a PMI has not already been posted and there is no open PM work order, the system will attempt to post the PMI directly to the Equipment History. It is possible to use a Trakker to close out a PM worklist that hasn't been generated. If you were to do this and then generate the worklist, equipment for which PMIs had already been posted via the Trakker would not appear on your worklist. Perhaps one could view this as a crude step in the direction of "area maintenance".

A piece of equipment should never simply FAIL a Preventive Maintenance Inspection. When equipment does not PASS a PMI, a regular work order should be issued to correct the problem (unless a decision is made to TURN-IN the equipment instead). When the PM work order is finally closed, its status should be "CORRECTIVE ACTION TAKEN/REQUESTED" and its WORK PERFORMED field should contain a reference to the regular work order.
Using the Bar Code Functions

The Trakker will now give you the appropriate options. Option 1 is different for each task while options 2 and 3 operate similarly.

**Equipment Inventory**

**Preventive Maintenance Inspection**

1. Take Inventory
2. Transmit Data
3. Review/Delete

Option 1

**Take Inventory** is used to acquire and store equipment inventory data. The process is begun by scanning the location label found on the doorjamb of the main entrance to the room that you wish to inventory. This "opens" that particular location. You should then scan the bar coded equipment label on each piece of equipment found in that room. When all equipment labels in the open location have been scanned, you should scan the location label again as you leave the room. This tells the Trakker to "close" that location.

**Record PMI** is used to acquire and store preventive maintenance data. The process is begun by scanning the location label found on the doorjamb of the main entrance to the room where the equipment to be inspected is located. This "opens" that particular location.

Scan the bar coded equipment label on the first piece of equipment to be inspected. The Trakker prompts you as follows:

```
Enter P for PASS or
F for FAIL:
```

If you enter <P>, you will see the following:

```
Press F1 for detail
or ENTER to cont...
```

If you press the <F1> key (located at the upper left corner of the keypad), the Trakker will prompt you for time and materials. Please enter time in hours (use no more than two decimal places) and material costs in dollars. It is recommended that you round off to the nearest whole dollar, but decimal numbers are accepted.
If you press <Enter> instead of <F1>, the Trakker will prompt you for the next equipment label.

Reader ready...

If you enter <F> in response to the following prompt,

Enter P for PASS or F for FAIL:

you will be asked to describe the problem that caused the piece of equipment to fail its PMI. The exact prompts will look like the following.

Describe problem
(40 char max):
Time (hours):

When you reach the point where there is no more equipment to be inspected in the open location, you should scan the location label again as you leave the room. This tells the Trakker to "close" that location.

Option 2

Transmit Data is used to transfer data collected and stored on a Trakker up to DHCP. The process is called "uploading" and is fully described in the section entitled Using Portable Bar Code Readers and Electrical Safety Analyzers with DHCP.

Option 3

Review/Delete is used to examine (and perhaps delete) data stored on a Trakker. If you select this option, the Trakker will immediately display the last data element that was entered. You will be prompted to enter <D> to delete the data element, <Q> to go back to the main menu, or <C> to display the next previous data element. If you choose to delete a data element, the Trakker will replace it with the character string "*****". When data is uploaded from the Trakker to DHCP, the Engineering package will ignore any such data elements.

This feature can be especially useful if you are interrupted while using the Trakker. Trakers are normally programmed to turn themselves off after a period of inactivity in order to conserve battery power. If this happens and you forget exactly where you were in the data acquisition process, use the Review/Delete option to look at the last few data elements.

When you transfer data from a Trakker up to DHCP it is stored in the "DATE/TIME OF DATA UPLOAD" (multiple) field of the Bar code file. The file used for Equipment Inventory is called "NON-EXPENDABLE" and its IDENTIFIER field is "ENNX". The file used for Preventive maintenance Inspections is called
"PREVENTIVE MAINTENANCE" and its IDENTIFIER field is "ENPM". The Engineering package will automatically recognize the type of data that has been uploaded and will give you a choice of either processing the data set immediately or queuing this task. More specifically, the system will echo the number of records read and then prompt you either for the identity of the PM worklist you wish to close out or for a device on which to print "Exception Messages" (by entering the letter <Q> and then a device, you can schedule the data processing task to run during non-peak hours).

NOTE: If the bar code reader contains completed PMIs for equipment that is not on the subject worklist, the PMIs will be posted directly to the Equipment Histories. A PM work order will not be created in these cases. If the subject worklist is subsequently generated (or re-generated), this equipment will not appear.

Exception Messages are a means of notifying you of situations that may require special attention. These situations will include missing bar code labels, data base inconsistencies, "foreign" (belonging to another VA facility) equipment or instances where a piece of equipment did not pass the PMI..

If a piece of equipment was recorded by means of its PM number or physical description, the bar code label is presumed to be missing. If the system attempts to process what appears to be an equipment label and no corresponding equipment record can be found, notice of a possible data base inconsistency will be given. If the station number of an equipment label does not match the station number of the host facility, that piece of equipment is recognized as belonging to another VA site.

In processing an equipment inventory data set, the following updates are made:

1. The existing content of the LOCATION field is moved to a field called PREVIOUS LOCATION,
2. The current location (from the Trakker) is placed in the LOCATION field, and
3. The current date (the date on which inventory data is processed by the Engineering package) is recorded as the PHYSICAL INVENTORY DATE.

If another user is editing an equipment record at precisely the time when this automatic update is attempting to run, you will receive a PMI Exception Message to that effect. You should perform a manual update of any such records to insure that they are complete and correct. Menu options "Manual Update of Equipment Inventory" (ENBCNXMAN) and "Record Single Device PMI" (ENPMR3) may be used for this purpose.
Electrical Safety Analyzer Interface

The Engineering package contains the software necessary for acquiring and processing data from an automated electrical safety analyzer (ESA). These data may be used to:

1. close out individual PM work orders on a PM worklist
2. post electrical safety inspections directly to Equipment Histories

This module is designed to work with the MedTester 5000 (or equivalent), manufactured by Dynatech Nevada. This device happened to be the only automated electrical safety analyzer that was commercially available when the Engineering package was developed. The ANYCITY Information Systems Center is committed to the development of similar interfaces for any and all commercially available automated electrical safety analyzers. An interface for the TurboTester, manufactured by Biotech Incorporated, is currently in progress.

The overall sequence of events is as follows:
1. upload all data
2. examine and process each individual test

Before the data processing task is begun, users of this module will be asked:
1. whether or not ESA data is to be used in conjunction with a PM worklist (if so, the user is also asked to specify the worklist)
2. which device is to be used for printing "Exception Messages"
3. whether or not paper copies of test results are desired

The following information is needed to specify a particular PM worklist.
1. the Engineering shop
2. the month and year
3. the type of worklist (MONTHLY or WEEKLY)
4. in the case of a WEEKLY worklist, the week number (1 through 5)

Exception Messages are intended to inform the user of situations that may require special attention. They will be generated when:
1. the equipment under test (EUT) does not seem to exist in the Equipment file
2. the equipment record of the EUT is being edited by another user
3. the EUT has failed to pass its inspection

An Exception Message is also generated if an ESA test has already been used to close out a PM work order from the specified worklist for the EUT. In such a case, the Equipment History will remain unchanged.

If you have opted to get a paper copy of all test results, the copies will be printed as the uploaded data is being processed. Specific test results will not be stored within
the Engineering package. The fact that the EUT passed an electrical safety inspection will be posted to the Equipment History. These postings should be sufficient for Equipment Management purposes. Sites are encouraged NOT to keep paper records of specific electrical safety tests.

The physical connection of the MedTester ESA to your DHCP system is explained in the section entitled Using Portable Bar Code Readers and Electrical Safety Analyzers with DHCP. Users of the MedTester can program the instrument (via the CONFIG sub-option of the CASO option) to prompt for any or all of the following data elements:

1. OPERATOR CODE
2. DEVICE TYPE
3. MANUFACTURER CODE
4. LOCATION
5. MODEL NUMBER
6. SERIAL NUMBER
7. CONTROL NUMBER
8. PHYSICAL INSPECTION

The OPERATOR CODE may not exceed six (6) characters in length. If this data element is present, the Engineering package will interpret it as the internal entry number of the electrical safety inspector in the Eng Employee file. Sites may obtain this information by using the FileMan print option. Specify NAME and NUMBER when prompted for print fields.

Other data elements that have particular meaning to the Engineering package are LOCATION, MODEL NUMBER, SERIAL NUMBER, and CONTROL NUMBER. The maximum length for each of these MedTester data elements is sixteen (16) characters.

LOCATION should conform to conventions established for the Eng Space file. The proper format is ROOM-BUILDING-DIVISION (where DIVISION is optional).

It is possible to enter LOCATION into the MedTester by scanning bar coded location labels produced with the package. This may not be as convenient as it sounds, because the electrical safety inspector would need to reach the location label with a scanning wand while the MedTester was plugged in and close to the EUT. If LOCATION is entered by scanning location labels, the Engineering package will automatically strip off the two-character application code (“SP” in this case) before updating the equipment record.
EXAMPLE: Room 234 of Building 114 would be scanned in as "SP234-114" but would be posted to the equipment record as "234-114".

Once ESA data have been physically uploaded from the MedTester and the user has specified how these data are to be processed, the system will begin to look at individual test records. At this point, all uploaded data will reside on DHCP in a temporary storage area.

The first order of business is to identify the EUT. This is normally done on the basis of the Control Number that's entered into the MedTester by the electrical safety inspector immediately before the actual test sequence begins. The easiest way of entering control Numbers is by scanning a bar coded equipment label. Bar code wands are available (as a hardware option) for MedTesters. You may also enter either the PM Number (ex: "7025-9802") or the exact content of the bar coded equipment label (ex: "680 EE1209") via the MedTester keyboard.

NOTE: The quotation marks that appear above are intended solely to enhance the readability of this document. You should not enter these quotation marks into the MedTester.

Instead of (or in addition to) the Control Number, users of the MedTester may enter Model Number and Serial Number.

If the Control Number exists and looks like a bar coded equipment label, the system will attempt a direct look-up within the Equipment file. If the Control Number looks like a VA PM Number, the system will try a look-up using the appropriate cross-reference of the Equipment file. If the Control Number does not exist, or does not look like a bar coded equipment label or VA PM Number, the system will attempt to look-up the EUT using Model Number and Serial Number. If this attempt is unsuccessful (either because these data elements were not entered into the ESA or because they can't be found in the Equipment file) the system will generate an Exception Message and move on to the next test record.

If look-up by Control Number is successful (either directly or by PM Number) and if Model Number and Serial Number were uploaded from the ESA, the system will compare the Model Number and Serial Number from the ESA with what is on file in the equipment record. Discrepancies will be reported in the form of Exception Messages. The content of the Control Number will be presumed correct.

If the EUT can be identified in the equipment file, its equipment record is updated as follows:
1. The current LOCATION in the equipment record is moved to the field called PREVIOUS LOCATION.
2. The LOCATION data element from the MedTester is stored in the LOCATION field of the equipment record.
3. The date on which the electrical safety test was actually performed is stored in the PHYSICAL INVENTORY DATE field of the equipment record (this date is automatically captured by the MedTester and included as part of the uploaded test results).

If the uploaded test results are to be processed in conjunction with a PM worklist, the system will check the Equipment History to see if the specified PMI has already been recorded. If so, an Exception Message is generated (more for information than for action) and the Equipment History is left unchanged. If not, the system checks the Work Order file for an open PM work order of the specified type. If there is one (and assuming that the EUT did not fail its test), the system will now close it out. If a PM work order of the specified type does not exist, the system will post the performance of an electrical safety inspection directly to the Equipment History.

If an OPERATOR CODE equal to the internal entry number of a record in the Eng Employee file was uploaded from the MedTester, then the NAME of this Eng Employee will be posted as the WORKER and his salary (from the Eng Employee file) will be used to compute the LABOR COST. OPERATOR CODE will override any default value (in the form of RESPONSIBLE TECHNICIAN) that is established when a PM work order is originally generated.

If the EUT failed its test sequence, an Exception Message is generated and the relevant PM work order (if one exists) will not be closed out. Nothing will be posted to the Equipment History. Comments entered by the electrical safety inspector into the ESA will be included in the Exception Message.

Test limits for resistance, case leakage, lead leakage, and isolation leakage are programmed into the MedTester. If these values (which can be modified on site) are exceeded by the EUT, test failure is automatic.

The electric safety inspector can cause any test to be interpreted as a failure by beginning his MedTester COMMENTS with the pound sign (#).

EXAMPLE: If a piece of equipment has a worn or frayed power cord but does not yet exceed the maximum allowable leakage currents, the PMI inspector may wish to enter the following comment:

#POWER CORD MUST BE REPLACED

MedTester COMMENTS may not exceed forty (40) characters.
