# Enrollment Application System (EAS)

## Overview

Enrollment Application System (EAS) is currently a single module application. It facilitates the processing of a 10-10EZ Application for Health Benefits, which has been transmitted to the VHA site from the *On-Line 10-10EZ* web-based software.

This 10-10EZ module allows site staff with enrollment and registration responsibilities to review all data entered by a veteran on the electronic 10-10EZ form before committing the data to the site database. It also provides a basic tracking mechanism in order to follow the progress of the veteran's application and respond to inquiries.

## Features

Automatically receives incoming 10-10EZ data transmissions from the web-based application into a VistA holding file.

Provides a List Manager interface that allows the enrollment/registration staff to:

- Match the Applicant with an existing Patient record when appropriate.
- Review all 10-10EZ data and perform corrections as needed.
- Print the 10-10EZ form with data in order to send to the veteran for signature.
- Verify that the veteran has signed the 10-10EZ.
- Commit the 10-10EZ data to the VistA Patient database in preparation for further enrollment and/or registration activities.
- Respond to customer (e.g., veteran) inquiries as to the status of a 10-10EZ Application.

Provides an audit trail of all significant actions performed in processing a 10-10EZ Application as a basis for management reports.

Retains a copy of any original Patient database data elements overwritten by incoming 10-10EZ data elements.
