Introduction

The Access Received Closer to Home (ARCH) Automated Eligibility Determination project is an interface between Veterans Health Information Systems and Technology Architecture (VistA)/Computerized Patient Record System (CPRS), and a data set containing geo-spatial information on eligible Veterans. The VistA software patches that support this initiative (PXR*2.0*20 and FB*3.5*119) are being released in a Kernel Installation and Distribution System (KIDS) multi-package build, ARCH PILOT PROJECT 1.0.

The Veterans' Mental Health And Other Care Improvements Act Of 2008, Section 403, Public Law 110-387 mandates that the Department of Veterans Affairs (VA) conduct a pilot program over three years for contract care of eligible Veterans in selected Veterans Integrated Service Networks (VISNs). The Office of Policy Analysis within the Office of the Assistant Deputy Under Secretary for Health for Policy and Planning (ADUSH/PP) requested the capability to automatically identify all Veterans who are eligible for a high visibility Congressionally mandated contract care pilot program (named Project ARCH, Access to Care Received Closer to Home) in five VISNs (1, 6, 15, 18, and 19).

Automated notification of ARCH eligibility is accomplished using a nationally developed clinical reminder that uses a computed finding to determine patient eligibility. The patient eligibility information originally comes from an ADUSH/PP database, which is imported into the VistA FEE BASIS PATIENT file (#161) during the post installation process of the ARCH BUNDLE 1.0 multi-build distribution. The clinical reminder computed finding uses a Fee Basis API to determine Project ARCH eligibility. If the Veteran is determined to be Project ARCH eligible, a reminder dialog is available so that the provider can offer the Veteran various clinical services that are covered under the pilot program and are closer to the Veterans home.

The Project ARCH preferences presented to the provider in the reminder dialog are:

- ARCH: No service needed this visit
- ARCH: Does NOT consent at this time
- ARCH: Needs service & consents to program

Links are available in the reminder dialog to a consent form, a FAQ document, and the Care Coordinator's phone number and email.

If the Veteran doesn't need the service at this visit, clicking the first box will resolve the reminder until the next day.

If the Veteran does not consent to participate in the program, clicking the second box will resolve the reminder until the next day.

If the Veteran needs the service and consents to participate, clicking the third box will bring up a specific Project ARCH consult request that will be sent to the designated Care Coordinator.

Pre-Installation

Required Software for PXR*2*20

Package/Patch	Namespace	Version	Comments
Clinical Reminders	PXR	2.0	Fully patched
GEN. MED. REC. – VITALS GMR*5*25	GMRV	5.0	
Health Summary	GMTS	2.7	Fully patched
HL7	HL	1.6	Fully patched
Kernel	XU	8.0	Fully patched
MailMan	XM	7.1	Fully patched
NATIONAL DRUG FILE PSN*4.0*176	PSN	4.0	
Pharmacy Data Management PSS*1.0*133	PSS	1.0	
Outpatient Pharmacy PSO*7.0*299	PSO	7.0	
RADIOLOGY/NUCLEAR MEDICINE RA*5*56	RA	5.0	
TOOLKIT XT*7.3*111	XT	7.3	
VA FileMan	DI	22	Fully patched

Required Software for FB*3.5*119

Package/Patch	Namespace	Version	Comments
Fee Basis	FB	3.5	Fully patched

Installation

This section describes how to install the bundled patches, FB*3.5*119 and PXR*2*20.

This build can be installed with users on the system, but it should be done during non-peak hours. Estimated Installation Time: Less than 5 minutes.

The installation needs to be done by a person with DUZ(0) set to "@."

NOTE: We recommend that a Clinical Reminders Manager or CAC be present during the install, so that if questions occur during the install of Reminder Exchange entries, a knowledgeable person can respond to them immediately.

1. Retrieve the host file containing the multi-package build

Use ftp to access the build (the name of the host file (ARCH_PILOT_PROJECT_1_0.KID) from one of the following locations:

Albany	REDACTED	REDACTED
Hines	REDACTED	REDACTED
Salt Lake City	REDACTED	REDACTED

2. Install the build first in a training or test account.

Installing in a non-production environment will give you time to get familiar with new functionality and complete the setup for reminders and dialogs prior to installing the software in production.

3. Load the distribution.

In programmer mode type, D ^XUP, select the Kernel Installation & Distribution System menu (XPD MAIN), then the Installation option, and then the option LOAD a Distribution. Enter your directory name and ARCH_PILOT_PROJECT_1_0.KID at the Host File prompt.

From the Installation menu, you may elect to use the following options:

a. Backup a Transport Global

This option will create a backup message of any routines exported with the patch. It will NOT back up any other changes such as DDs or templates.

b. Compare Transport Global to Current System

This option will allow you to view all changes that will be made when the patch is installed. It compares all components of the patch (routines, DDs, templates, etc.).

c. Verify Checksums in Transport Global

This option will allow you to ensure the integrity of the routines that are in the transport global. If there are any discrepancies, do not run the Install Package(s) option. Instead, run the Unload a Distribution option to remove the Transport Global from your system. Retrieve the file again from the anonymous directory (in case there was corruption in FTPing) and Load the Distribution again. If the problem still exists, log a Remedy ticket and/or call the national Help Desk (1-888-596-HELP) to report the problem.

d. Print Transport Global (optional)

This option will allow you to view the components of the KIDS build.

4. Install the build.

From the Installation menu on the Kernel Installation and Distribution System (KIDS) menu, run the option Install Package(s). Select the build ARCH PILOT PROJECT 1.0 and proceed with the install. If you have problems with the installation, log a Remedy ticket and/or call the National Help Desk to report the problem.

```
Select Installation & Distribution System Option: Installation
Select Installation Option: INSTALL PACKAGE(S)
Select INSTALL NAME: ARCH PILOT PROJECT 1.0    3/28/11@10:08:12
=> ARCH PROJECT ;Created on Mar 28, 2011@07:34:52
```

Answer "NO" to the following prompt:

Want KIDS to INHIBIT LOGONs during install? NO// **NO**

NOTE: DO NOT QUEUE THE INSTALLATION. This installation may ask questions requiring responses and queuing will stop the installation. The most common are replacements for finding items or quick orders during the installation of Reminder Exchange file entries.

Installation Example

See [Appendix A](#).

5. Install File Print

If desired, you can use the KIDS Install File Print option to print out the results of the installation process. You can select the multi-package build or any of the individual builds included in the multi-package build.

```
Select Utilities Option: Install File Print
Select INSTALL NAME:
```

6. Build File Print

If desired, you can use the KIDS Build File Print option to print out the build components.

```
Select Utilities Option: Build File Print
Select BUILD NAME: FB*3.5*119
1.0
DEVICE: HOME//
```

7. Post-installation routines

Do not complete this step until Project ARCH services have been implemented at your site. The Office of Policy Analysis will inform each site when Project ARCH Services will begin.

The post-install routine, POST^FBARCH0, populates ARCH ELIGIBILITY entries in the FEE BASIS PATIENT file (#161).

The post-install routines, PXRMP20E and PXRMP20I, install the following:

ROUTINE

PXRMARCH

TIU TEMPLATE FIELD

ARCH SERVICE LIST
ARCH CONSENT FORM URL
ARCH OVERVIEW TEXT
ARCH FAQ URL
ARCH CARE COORDINATOR

HEALTH FACTORS

ARCH
ARCH-NO SERVICE NEEDED THIS VISIT
ARCH-SERVICE NEEDED THIS VISIT DECLINES

REMINDER COMPUTED FINDINGS

VA-PROJECT ARCH ELIGIBILITY

REMINDER DEFINITION

VA-PROJECT ARCH VISN CONTRACT CARE PILOT

REMINDER DIALOG

VA-PROJECT ARCH VISN CONTRACT CARE PILOT ELIGIBILITY

These post-install routines can be deleted after the installation is complete.

Back-out Procedures

In reference to back-out procedures or a back-out plan, Project ARCH has neither, as CPRS changes can be rolled back, but database changes cannot. If any issues occur involving this patch, Support staff will need to resolve them.

Set-up Instructions

Local sites can customize various portions of the Reminder Dialog in which they indicate whether a veteran will receive ARCH services.

- Each VISN has the ability to customize the services available at its location and/or to see services available at other locations.
- Each VISN can tailor its own links for consent forms.
- Each VISN can configure the type of order, or quick order, that is associated with the reminder when the Veteran consents to services offered.
- Under the “ARCH: Does NOT consent at this time” section of the Project ARCH Preferences, a user can record a health factor comment that contains the service the patient declined. This provides the ability to track the services in your VISN that are being declined.
- Under the “ARCH: Needs service and consents” section of the Project ARCH Preferences, a user can record a health factor comment that contains the service the patient accepted. This provides the ability to track the services in your VISN that are being accepted.

Set-up Steps

Edit the following Template Fields in the Template Field Editor (on the Options menu in CPRS, when you have the Consults or Notes tab open):

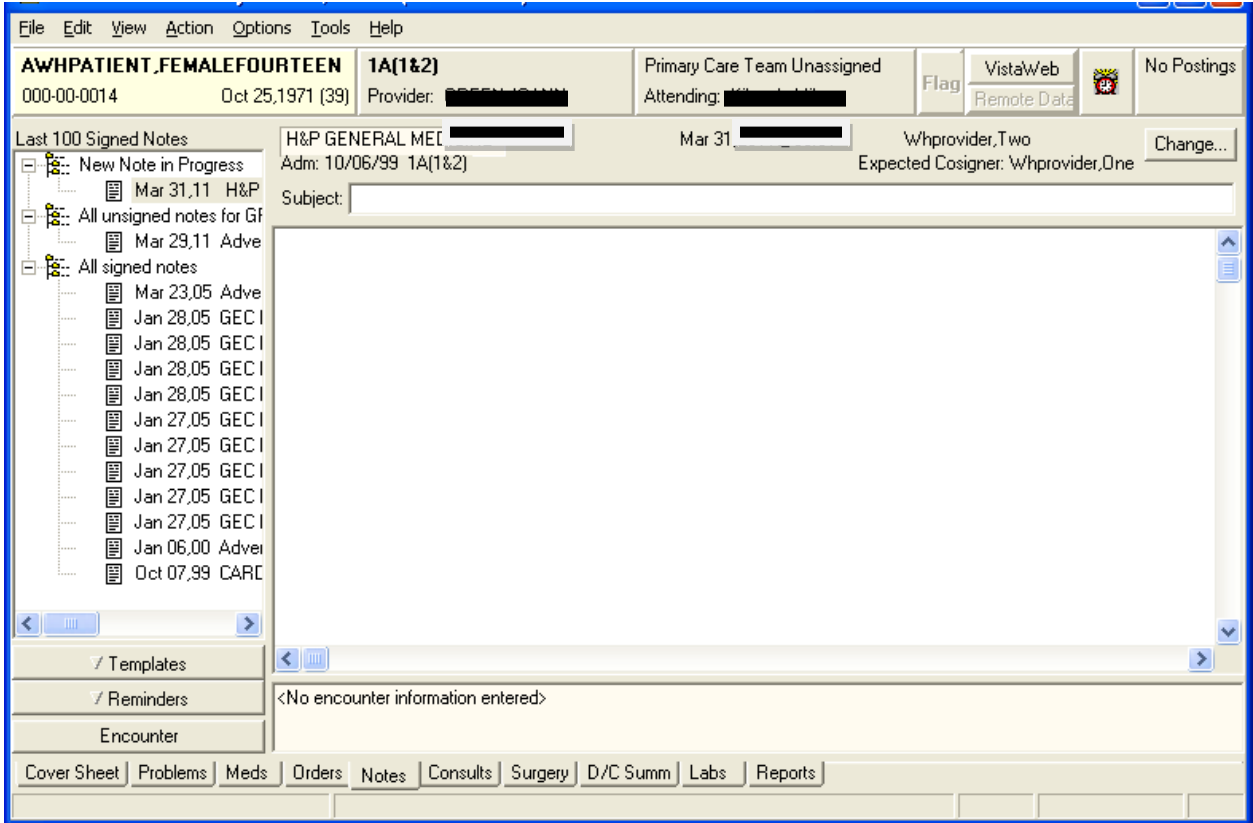

- ARCH CARE COORDINATOR
- ARCH CONSULT FORM URL
- ARCH FAQ URL
- ARCH SERVICE LIST

- ARCH OVERVIEW TEXT (This field can be edited, but it is not recommended.)

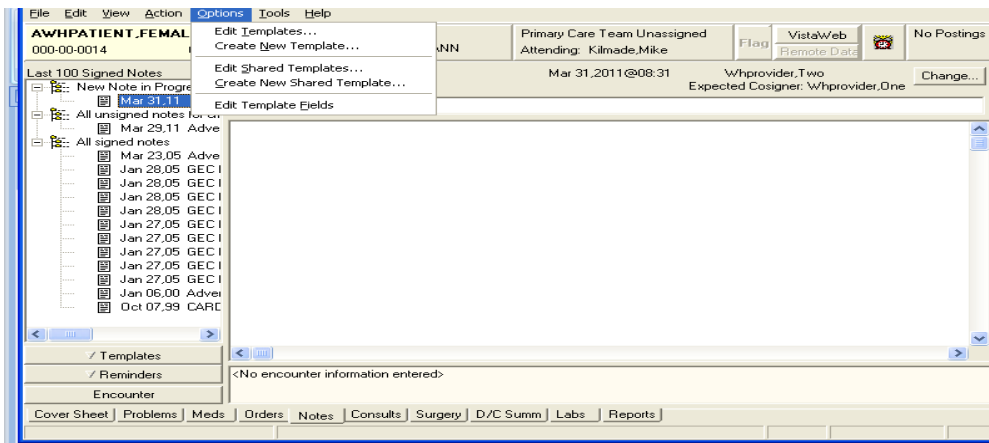

NOTE: In order to use the Edit Template Fields option to edit template fields used in Reminder Dialogs, the following need to be enabled or assigned:

- TIU Template Reminder Dialog Parameter (on the CPRS Parameter menu on the Reminder Manager Menu)
- TIU parameter TIU FIELD EDITOR CLASSES
- User Class of Clinical Coordinator

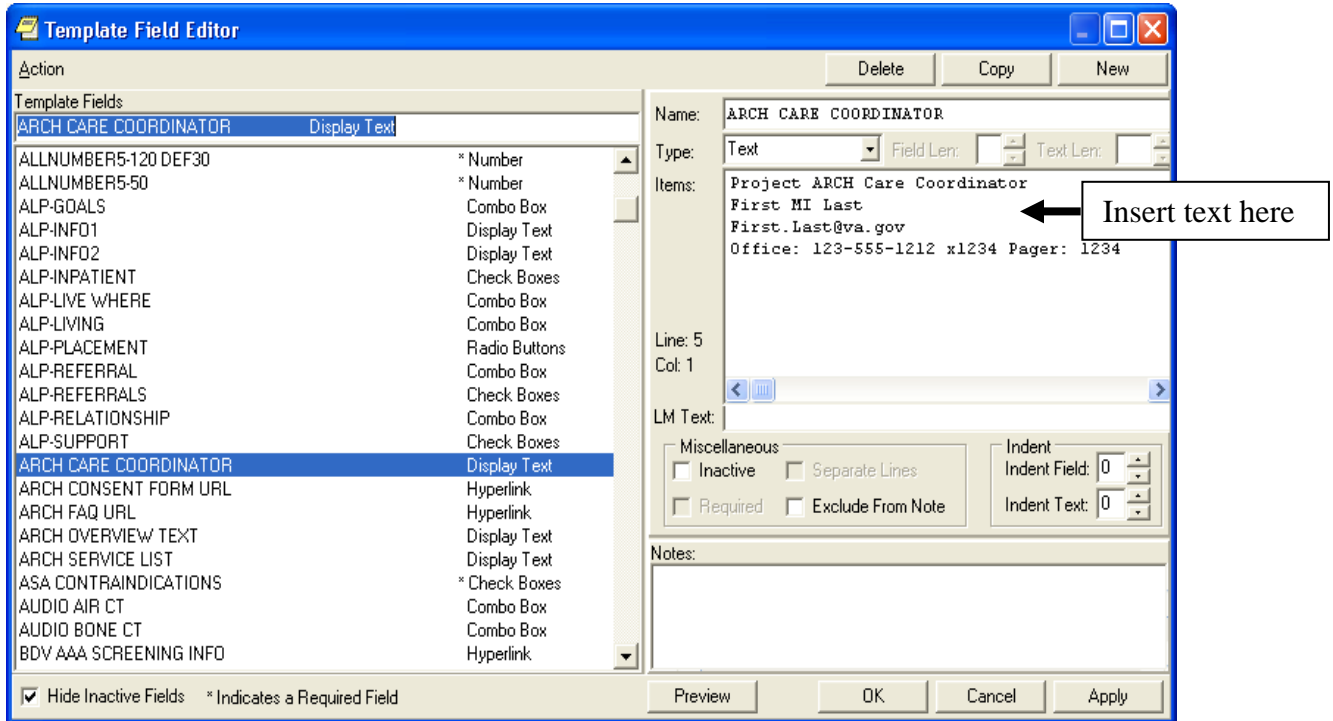

1. Open the Notes tab in CPRS and create a new progress note.

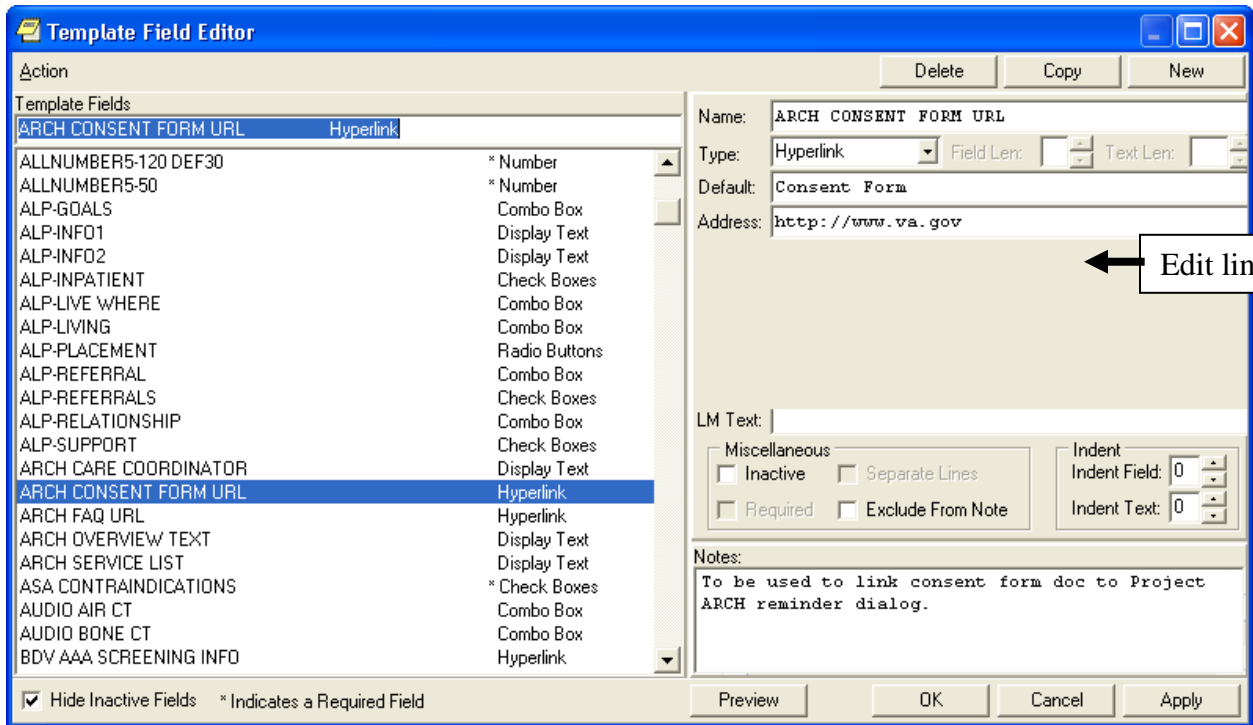

2. Select Options on the Menu bar:

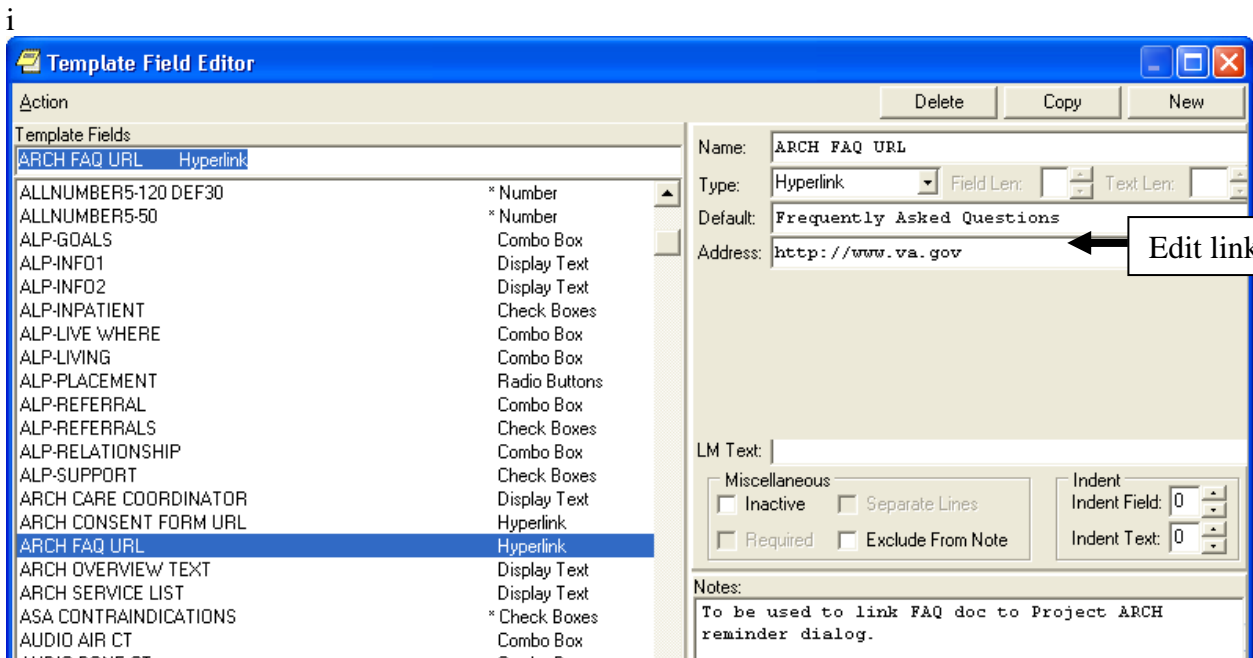

3. Customize Care Coordinator contact information, using the Template Field Editor, to add ARCH coordinator information for your site.

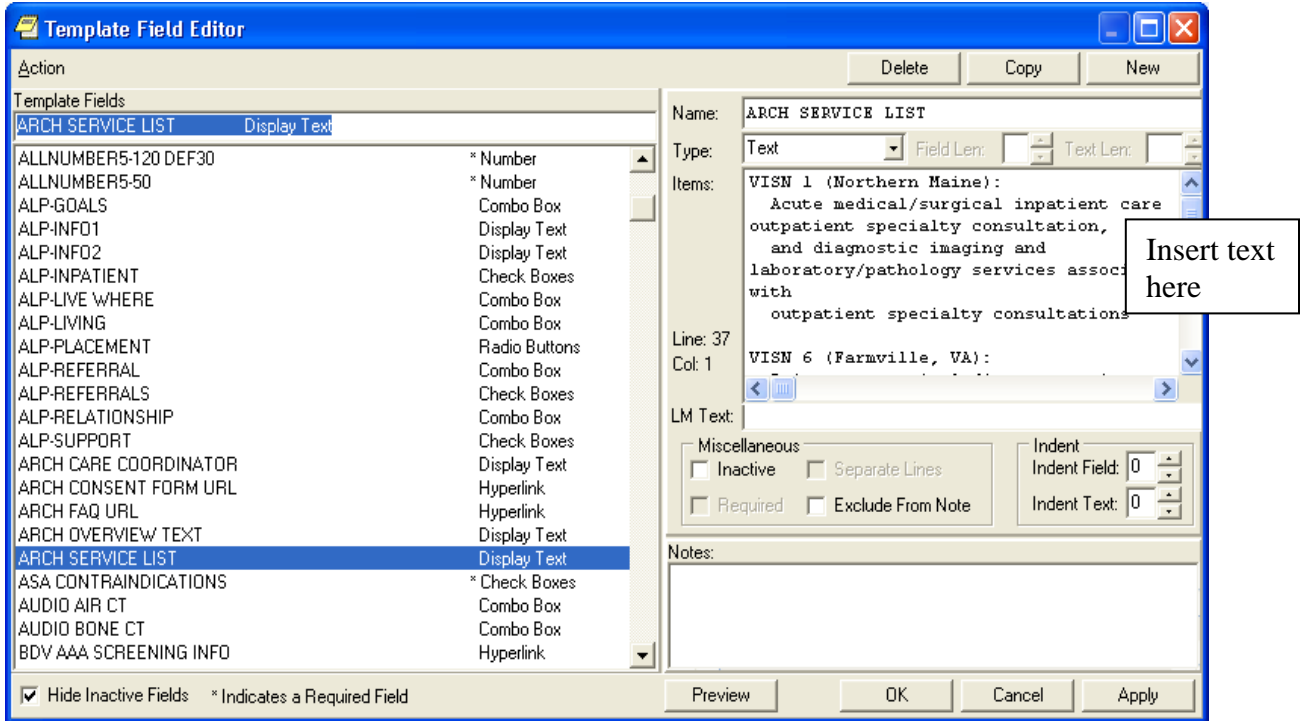

4. Configure linked consent (ARCH CONSENT FORM URL): Change the default address (<http://www.va.gov>) to point to the location where your ARCH consent form is stored,

5. Add a link for the FAQ document (ARCH FAQ URL), if needed. Change the default address (<http://www.va.gov>) to point to the location where your ARCH FAQ document is stored

6. Edit text of available services for your VISN. You can also remove all the VISNs other than your own.

A word of caution: The template field editor doesn't handle text wrapping very well, so it's a good practice to stretch that window out the full length of your screen. That will show the text of a given template field as it was intended to be seen. Also, when exiting this window, use the "X" or Cancel button. If you click OK to exit, you could adversely affect the formatting for a given template field.

7. Edit the ARCH COMMENT Additional Prompt. The list of services that add that comment to the health factor is shown. Go into the Reminders Manager's menu in VistA, select Reminder Dialog Management (DM), then Reminder Dialogs (DI). When the Dialog screen opens, select the action Change View (CV), and then select Additional Prompts.

Resolving Reminders

1. Log on to CPRS, select a patient, and select the *Notes* tab.
2. Click on the **New Note** button.
3. Select any title or type a new title in the title box.
4. Choose a visit with which to associate the note. You can use the TELEPHONE CLINIC selection for telephone notes.
5. When the note opens, "drawers" open in the lower left section of the screen. Click on the **Reminders** drawer to open it.
6. When the Reminders drawer opens, you can see the reminders on which you can act.

Reminder Resolution: Project ARCH Pilot Eligible

PLEASE NOTE:
 This Veteran is eligible for Project ARCH (Access Received Closer to Home). Project ARCH is a contract care pilot program operating in this VISN that is designed to improve access to specific health care services through contracted providers that are closer to the Veteran's residence. Project ARCH is voluntary and Veterans must consent to participate. Please inform this Veteran that s/he may be eligible for Project ARCH. Consult requests will only be processed for eligible Veterans requiring one of the services covered under the pilot:

VISN 1:
 Acute medical/surgical inpatient care, outpatient specialty consultation, and diagnostic imaging and laboratory/pathology services associated with outpatient specialty consultations

VISN 6:
 Primary care, including preventive services and diagnostic imaging and laboratory/pathology services associated with primary care

VISN 15:
 Primary care, including preventive services, mental health screenings and diagnostic imaging and laboratory/pathology services associated with primary care

VISN 18:
 Acute medical/surgical inpatient care, outpatient specialty consultation, and diagnostic imaging and laboratory/pathology services associated with outpatient specialty consultations

VISN 19:
 Acute medical/surgical inpatient care, outpatient specialty consultation, PET scans and diagnostic laboratory/pathology services associated with outpatient specialty consultations

Project ARCH Preferences

ARCH: No pilot service needed this visit

ARCH: Does NOT consent at this time

ARCH: Needs service & consents to program

Release Notes

Clinical Reminders changes included in PXR*2*20:

- A new clinical reminder and a new reminder dialog have been created to support identifying patients eligible to participate in Project ARCH, Access to Care Received Closer to Home. This project is only running in VISNs 1, 6, 15, 18 and 19.

- The reminder and dialog share the same name:

VA-PROJECT ARCH VISN CONTRACT CARE PILOT ELIGIBILITY

- The reminder uses a new computed finding (VA-PROJECT ARCH ELIGIBILITY), which calls a Fee Basis API to determine if a given patient is eligible to participate in the Project ARCH.

Fee Basis changes included in FB*3.5*119:

- The Fee Basis patch only imports the eligibility data; there are no additional or modified Fee Basis options
- File (DD) changes:

161 FEE BASIS PATIENT

Field Type Changes

161	161.011,.01	ARCH ELIGIBILITY DATE	0;1	DATE
161	161.011,2	ARCH ELIGIBILITY	0;2	SET
