Section 1 - Options

New Options

**FB CHECK DISPLAY**
Menu Text: Check Display
This option displays all payments included on a check that was issued after the payment conversion from CALM to the Financial Management System (FMS).

**FB PHONE MENU**
Menu Text: Telephone Inquiry Menu
This menu contains all options that are used to answer telephone inquiries from vendors and/or veterans regarding payments or checks.

**FB VENDOR/VETERAN PAYMENTS**
Menu Text: Payment Listing for Vendor/Veteran
This option prompts you to select the vendor who is calling and the veteran about whom information is being requested. It then calls VA List Manager to display a listing of payments for all Fee Basis programs in reverse chronological order by Service Date (with the most recent displaying first).

**FBAA AUTHORIZATION DISPLAY**
Menu Text: Authorization Display
This option displays an authorization on screen for a user-specified authorization number. The authorization number appears on the printed 7079.

**FBAA PAID SERVER**
Menu Text: Fee Basis Payment Message Server
This server processes incoming payment information sent from FMS.

**FBAA SUSPENSION LETTER INDIV**
Menu Text: Individual Suspension Letter Print
This option prints the suspension letters for an individual patient and/or vendor.

**FBCH MULTIPLE PAYMENTS**
Menu Text: Multiple Ancillary Payments
This option is used to enter identical ancillary services incurred while in a non-VA hospital for a specific patient and vendor. Only the date of service may differ.

**FBCNH RCS 10-0168 REPORT**
Menu Text: Nursing Home 10-0168 Report
This option generates the data for the Community Nursing Home Code Sheet 10-0168 (formerly the RCS 18-3 Report).

January 1995 Fee Basis V. 3.5 Release Notes
Section 3 - Package Changes

Payment Process

Version 3.5 of Fee Basis involves changes to the Austin Payment process. In prior versions, Fee Basis payments were processed using the following systems.

- DHCP Fee—Users enter payment data and submit batches of payment line items to Central Fee.
- Central Fee—A batch system that resides at the Austin Automation Center (AAC).
- CALM—Central Fee creates CALM code sheets for payment release.

Previously, the interface among the three systems only operated in one direction, and no payment information was sent back to DHCP Fee other than processing reports.

The Financial Management System (FMS) software replaces the former CALM payment system. Central Fee has been modified to send payment documents to FMS and return payment documents confirmed by the treasury to DHCP.

In order to facilitate the changes to the payment process, DHCP now asks an additional prompt in the Enter Payment options for Outpatient, Civil Hospital, and Ancillary payments. The prompt allows you to select which line items are for contracted services. Prompts do not appear in the Community Nursing Home or Pharmacy modules, as these values are defaulted to "always a contract service" and "never a contract service" respectively.

DHCP now receives check information back from FMS upon confirmation by the treasury. A new DHCP output is available to display check information for a selected check number. Additionally, each payment history, batch listing, invoice display, or other output which displays line item information has now been modified to include check information, date paid, and/or check cancellation information. Line items that had previously been cancelled will be annotated with a plus sign (+) preceding the display.
Section 3. Package Changes

CPT Modifiers/Fee Schedule

With the release of the CPT V. 5.0 software package, Fee Basis now has the ability to break down services provided to the modifier level. The software now prompts you to select a modifier after the selection of the CPT code in all Outpatient Payment options. Input of the field is optional and can be bypassed if the information is not available or applicable. All DHCP outputs that display a CPT Code now display the CPT-Modifier combination.

With the inclusion of CPT Modifiers, Fee Basis V. 3.5 now provides the functionality of calculating the Fee Schedule at the modifier level.

CNH Movements and the AMIS 349

Prior to version 3.5, users were required to exercise caution in selecting the appropriate patient movement types. If a wrong movement was entered, a movement was missed, or movements were incomplete, the Bed Occupants Remaining and Patient Days of Care totals were inaccurate on the AMIS 349 Print.

Version 3.5 of Fee Basis checks transfer and discharge types against the patient's previous movement. Screens have been placed on the Discharge or Transfer Types that are selectable based on the Last Movement Type.

Fee Basis Medical and Pharmacy Denials

The FEE BASIS MEDICAL DENIALS file (#163) and the FEE BASIS PHARMACY DENIALS file (#163.1) are being eliminated with this version of Fee Basis. A conversion allows merging of the medical denials data into the FEE BASIS PAYMENT file (#162). All future denials will be stored in the respective payment files. Suspension letters will still print in the same fashion.

Purpose of Visit Code

A change to the state abbreviation for Alaska has been made to Purpose Of Visit (POV) Code 35. The description now reads: NON-VA HOSP. CARE FOR NSC COND. (AK, VI AND HI ONLY).
Telephone Inquiry Menu

A telephone inquiry menu has been added to the Fee Basis Main Menu. This phone menu has been designed to assist users in retrieving payment and related information from DHCP quickly and easily when contacted by a vendor or veteran. The menu currently contains four options, the first of which is a check display. Choosing this option allows you to enter the check number provided by the vendor. The option displays all payments included on a check that was issued after the payment conversion from CALM to FMS and includes all line items paid for with that check number for all Fee Basis programs.

New Option: Payment Listing for Vendor/Veteran
The option Payment Listing for Vendor/Veteran is a new option that prompts you for a vendor and a veteran. The option places you in the VA List Manager utility, where data is returned in List Manager screen format. You can view, move through, and print information through the use of various List Manager actions. (Please refer to Appendix B for more information about List Manager's generic actions.) The first screen displays a listing of all payments, regardless of Fee Basis program, for the vendor and veteran selected in reverse chronological order by Service Date (listing the most recent first). Possible actions appear on the bottom of the screen, similar to the following screen example. Please refer to the Fee Basis V. 3.5 User Manual for more detail about this option.

</tr>
</tbody>
</table>

Select Action: Quit

The option is designed to handle all inquiries from one screen, thus eliminating the necessity of jumping to different menus to obtain information from varying programs.

Yes/No Prompts
Most Yes/No prompts throughout the Fee Basis software now also accept numeric entries of "0" (zero) for a NO response or "1" (one) for a YES response.
Nursing Home 10-0168 Report

This option has been added to the Output Main Menu for the Community Nursing Home Program. The format of the report has changed. Version 3.5 of Fee Basis, when used with Version 2.0 of the Generic Code Sheet software, also allows you to create code sheets with a status of MARKED FOR BATCHING. The following table describes the fields included in the new 10-0168 (former RCS 18-3) Report.

</table>
Suspension Letters

The Suspension Letter Print option now prompts the user to print denials only. If the user answers YES, only the denial letters for the programs selected print. Answering NO to this prompt prints all letters for the programs selected (as in the past). This prompt was added to allow the site the flexibility of generating only denial letters. This flexibility was requested by the sites in order to avoid vendor confusion when the vendor receives both the DHCP suspension letters and the Explanation of Benefits letter from the Austin Automation Center. Since the Explanation of Benefits letter contains a listing of payments covered by the check, as well as the suspension reasons for any partial payments, many sites felt it only necessary to generate denial letters to vendors from DHCP. This change provides sites with that functionality.

A second suspension letter option was added to the Outputs Main menu under the Medical Fee program. This Individual Suspension Letter Print option was added to allow sites the flexibility to print letters for one patient and/or vendor.

Multiple Ancillary Payments

The Multiple Ancillary Payments option was added to allow sites the ability to add many ancillary payments that are identical (with the exception of date of service) as quickly and easily as possible. This option is similar to the Multiple Payment Entry option in the Medical program. The user is asked all similar payment information up front and is then allowed to enter multiple dates of service.

Nursing Home Payments through the CNH Module

It is imperative that all sites use the Post Commitments for Obligation option PRIOR to processing any payments against that obligation each month. When version 3.5 is installed, there must be an estimate on the 1358 for each payment you are processing in order to release the payment.

In version 3.0, if you did not post your commitments, the software did it for you when you released the batch. However, as new authorizations were set up during the month, these were posted by patient. This was due to backward compatibility with two versions of IFCAP. Now that all sites have been on IFCAP 4 for at least a year, Fee expects to find an entry on the 1358 for each of the CNH patients.
Section 4 - File (DD) Changes

New Files with Descriptions

162.95   FEE BASIS CHECK CANCELLATION REASON
This file stores the check cancellation reasons and codes used by the Financial Management System (FMS). These reasons will be returned to the site from FMS when a check is cancelled. This file is pointed to by all payment files. ***Per VHA Directive 10-93-142, this file definition should not be modified. ***

Obsolete Files

Section 5 - Security Keys, Mail Groups, Bulletins

There are no new security keys, mail groups, or bulletins issued with this version of Fee Basis. There are also no obsolete bulletins with this version.
Section 6. Appendices

Appendix A - Paid Server

The following is a sample PAID Server mail message.

Subj: Server Request Notice  [#183837] 27 May 94 11:15  20 Lines
From: POSTMASTER Page 1

May 26, 1994  2:50 PM

A request for execution of a server option has been received.

Sender: POSTMASTER@FOC-AUSTIN. VA.GOV
Option name: FBAA PAID SERVER
Subject: FPA/ #941461343846831
Message #: 183818

Comments: No errors detected by the Menu System.

This is the server bulletin XQSERVER
The 'AMOUNT PAID' has been altered on the Fee Payment Voucher Document in FMS for the following payments:

Check Number: 102 to SEAL POINT MEDICAL CNH for FEEpatient, One - 0000
From Date: 9/1/93 To Date: 9/5/93 Invoice Number: 1481

>>> For detailed payment information use the appropriate payment output. <<<
