Introduction

Overview

The scope of the Military Sexual Trauma (MST) portion of the Veterans Millennium Healthcare and Benefits Act, Public Law 106-117, Section 115 (a.k.a. Mill Bill) is to support the screening of veterans for MST, identify non-Veterans Administration workload associated with MST, and to enhance national MST reporting. This effort will impact Fee Basis, Women’s Health (WH), Health Eligibility Center (HEC/Enrollment), Clinician Desktop, Patient Information Management Systems (PIMS), the Corporate Databases, and VISIT software packages.

The enhancements will provide a means for identifying non-VA MST workload in the Fee Basis application, clinical reminders to clinicians, and specifications for the VA and non-VA workload reports to be generated at the Austin Automation Center (AAC). Also, PIMS and HEC will manage the MST status sharing between sites to minimize the instances in which a veteran is repeatedly asked about MST status. HEC will act as the authoritative database source.

Purpose

The purpose of this technical manual is to provide information to technical users who are responsible for implementing and maintaining the software.
