# Pre-Installation

## Introduction

Library V. 2.5 introduces new functionality to maintain consistency of specific Library files. As part of the installation, the local files will be edited by removing non-utilized titles and by standardizing certain nationally controlled files. These files include:

- 680.1 - Publisher
- 680.2 - Frequency
- 680.5 - Title Authority
- 680.8 - Index Source
- 680.9 - Prediction Pattern

## General Information

1. **Namespace:** The Library Package has been assigned LBR as its namespace. For all Library routines, the next letter(s) in the routine name also provides guidance as to the module to which that routine belongs. The breakdown of the Library internal namespaces is as follows:

LBRL	InterLibrary Loan
LBRN	Library National Update
LBRT	Library TAF Update
LBRY	Library Serial Functions

2. **Package Dependencies:** The following packages must be installed for Library V. 2.5 to function properly.

Kernel	V. 7 or higher
VA FileMan	V. 19 or higher
IFCAP	V. 5 or higher
Generic Code Sheet	V. 2.0 or higher

3. **Library File Range:** 680 through 689
4. **Partition Size:** Library V. 2.5 needs a large partition size of 200k. FOR THE INSTALLATION ONLY.

5. **Auditing:** No fields in Library files should be audited.
  
6. **Pre-Install:** Before you begin the installation, create the mail groups LBRYUPDT and LBRYFORUM. Messages pertaining to the outcome of the installation will be directed to the mail group LBRYUPDT. Incoming messages from FORUM will also be directed to this mail group.

**It is highly recommended that the package be installed in a test directory first. First delete the LBRY global in test and then copy your live LBRY global into your test directory. You may then proceed to follow the installation steps. If conversion is successful, you may then run the installation in the production directory.**

Before running the install program, make sure you do not have the Library users on the system and that a backup has been made of your system! This backup could be a simple global output to tape of the master Library global, LBRY. To ensure that users do not log onto the system, you may also want to lock the Library package users out of the LBRY MANAGER, LBRYSER MGT, and LBRY SER MAIN MENU menus.

7. **Description of Installation:** The installation of V. 2.5 has three steps.
  - a. Standardize and remove non-utilized titles from the Title Authority file.
  - b. Standardize the nationally controlled files.
  - c. Install new functionality to the Library package.
  
8. The estimated amount of time needed to install Library on a 486 PC with MSM, no users or other jobs running, is 2-3 hours.
  
9. **During Installation:** If the installation has a problem, contact your support ISC. The release can be restarted at the point where the install stopped by doing LBRYNSTL again after the problem has been resolved. You can also restart the install from any point.
  
10. **Post-Installation:** Do the following after the successful installation of V. 2.5:
  - a. Add the mail group, LBRYUPDT to the bulletin LBRYFORUM. This mail group will be receiving messages from FORUM.
  - b. Add three processes to TaskMan; LBRY TRAN SEND which sends local serial title transactions to FORUM, LBRY TRAN PROCESS which will process the transactions received from FORUM, and LBRY TRAN PURGE which will purge processed transactions from the transaction file. Set them to run after normal working hours. It is recommended that LBRY TRAN SEND and LBRY TRAN PURGE be set to run nightly. LBRY TRAN PURGE can be set to run less at weekly or monthly intervals.
  - c. Remove the following routines from your system: LBRN\*, LBRT\* and LBRYI\*.
  - d. You may remove the XUMGR key from the Library Manager menu option. It will be removed permanently in the next release.
  - e. The menu trees may need to be rebuilt.

## Installation Procedure

NOTE: This package also contains BULLETINS

NOTE: This package also contains SORT TEMPLATES

NOTE: This package also contains INPUT TEMPLATES

NOTE: This package also contains PRINT TEMPLATES

NOTE: This package also contains HELP FRAMES

NOTE: This package also contains SECURITY KEYS

NOTE: This package also contains OPTIONS

**Do not be alarmed at some of these files. Your site is just receiving the data dictionaries for the other half of the Library package that resides on FORUM. This is the first step to merge the two separate parts into one managed package.**

When you have successfully loaded release 2.5, a mail message will be sent to the FORUM Librarians notifying them that you have successfully loaded release 2.5. Another mail message will be sent to the FORUM Managers as they need to add your domain address to two distribution lists in order for you to be able to download serial titles and receive special notices from FORUM.

The files that are populated are Publisher, Frequency, Indexing Sources, and Prediction Pattern. The Title Authority File is NOT populated for a virgin install. A library site must sign onto FORUM and download those titles that are to be maintained in their system.

## Sample Non-Virgin Installation of V. 2.5

Before running the install program, make sure you do not have the Library users on the system and that a backup has been made of your system! This backup could be a simple global output to tape of the master Library global, LBRY. To ensure that users do not log onto the system, You may also want to lock the Library package users out of the LBRY MANAGER, LBRYSER MGT, and LBRY SER MAIN MENU menus.

When you have successfully loaded release 2.5, a mail message will be sent to the FORUM Librarians notifying them that you have successfully loaded release 2.5. Another mail message will be sent to the FORUM Managers as they need to add your domain address to the two distribution lists in order for you to be able to download serial titles and receive notices from FORUM.

## Appendix

As part of the installation of V. 2.5, some records may not be able to be converted to the national standard. The users entered under the LBRYUPDT mail group might receive a mail message containing a list of titles and the specific information that was not able to be converted. It is the responsibility of the local medical center library staff to correct these records. A star will appear for those records when users are viewing title information.

### Example Message

```
Subj: RECORDS NOT CONVERTED  [#490]   08 Nov 93 20:24  1778 lines
From: POSTMASTER                in 'IN' basket.                Page
1
```

-----  
-

The following information was not converted but may be cleaned up during the Title Authority file cleanup.

```
Title:  HOSPITAL AND HEALTH SERVICES ADMINISTRATION  Frequency:  QUARTERLY,
NO PREDICT. PATTERN
Title:  NUTRITIONAL SUPPORT SERVICES  Publisher:  NUTRITION SUPPORT SERVICES
```

The real frequency is QUARTERLY, NO PREDICT. PAT.  
The real publisher is NUTRITIONAL SUPPORT SERVICES

Titles not matched with a title in the master Title Authority file will generate a local serial title transaction that will be sent to FORUM for review and disposition.
