# 1 Introduction

The mission of the Department of Veterans Affairs (VA) Office of Information and Technology (OIT), Enterprise Program Management Office (EPMO) is to provide benefits to Veterans and their families. To meet this overarching goal, OIT is charged with providing high quality, effective, and efficient IT services and Operations and Maintenance (O&M) to persons and organizations that provide point-of-care services to our Veterans.

The VA's goals for its Veterans and families include:

- Make it easier for Veterans and their families to receive the right benefits, and meet their expectations for quality, timeliness, and responsiveness.
- Improve the quality and accessibility of health care, benefits, and memorial services while optimizing value.
- Provide world-class health care delivery by partnering with each Veteran to create a personalized, proactive strategy to optimize health and well-being, while providing state-of-the-art disease management.
- Ensure awareness and understanding of the personalized, proactive, and patient-driven health care model through education and monitoring.
- Provide convenient access to information regarding VA health benefits, medical records, health information, expert advice, and ongoing support needed to make informed health decisions and successfully implement the Veteran's personal health plans.
- Receive timely, high quality, personalized, safe, effective, and equitable health care, not dependent upon geography, gender, age, culture, race, or sexual orientation.
- Strengthen collaborations with communities and organizations, such as the Department of Defense (DoD), Department of Health and Human Services (DHHS), academic affiliates, and other service organizations.

To assist in meeting these goals, the Enterprise Health Benefits Determination (EHBD) program provides enterprise-wide enhancements and sustainment for the following systems/applications:

- The Enrollment System (ES) is the authoritative system for VA enrollment and Community Care static eligibility determinations.
- Income Verification Match (IVM)/Enrollment Database (EDB) assists in determining priority grouping for health care eligibility.
- Veterans Information Systems and Technology Architecture (VistA) Registration, Eligibility & Enrollment (REE) shares information with other VistA applications and enables registration and preliminary eligibility determinations and enrollment at VA Medical Centers (VAMC). ES makes the final eligibility determinations.
- The Veteran's On-Line Application (VOA), now referred to as Health Care Application (HCA), enables Veterans to self-enroll in VA health care and is another entry point for records to be added to ES.

Enrollment System Modernization (ESM) defines VHA Profiles (VHAP) for which a client (Veteran, service member, or beneficiary) is eligible and ties them to the authority for care. Key enhancements to be completed include pending eligibility determination, fixes to the Enrollment System, date of death, internal controls, workflow, Veterans Financial Assessment, converting of Military Service Data Sharing (MSDS) to Enterprise Military Information Service (eMIS), Manage Relationships, Veteran Contact Service, and support for Enrollment System Community Care (ESCC).

## 2 Purpose

The purpose of this Release Notes document is to announce the release of the ES 5.15.2. This release, developed in Java technology, contains ESM Phase 3 enhancements and defect fixes to support ESCC, Electronic Health Record Modernization (EHRM), and ES Sustainment.

## 3 Audience

This document targets users and administrators of ES 5.15.2 and applies to the changes made between this release and any previous release for this software.

## 4 This Release

ES will be upgraded from Version 5.15.1 to Version 5.15.2 and hosted at the Austin Information Technology Center (AITC).

The following sections provide a summary of the enhancements and defect fixes to the existing software and any known issues for ES 5.15.2.

### 4.1 Enhancements and Modifications

Table 1 shows the enhancements and modifications included in the ES 5.15.2 release as tracked in Atlassian Jira.

**Table 1: ES 5.15.2 Enhancements and Modifications**

Jira Epic #	Summary
VES-13942	Phase 2 - Add Federal Agencies (ES)

ES 5.15.2 adds seven (7) federal agencies to the “Other Federal Agency” list so that employees from those agencies may receive the COVID-19 vaccines from the Veterans Administration (VA).

For messaging with VistA, the corresponding abbreviated values are added to the VA-Specific Patient Information (ZPD) Segment, Sequence #35. See Table VA018 in the IVM Technical Manual for the full list of valid values

**Table 2: Federal Agencies Added in ES 5.15.2**

Federal Agency	Abbreviation
DEPT HOUSING AND URBAN DEV	HUD
DEPARTMENT OF THE TREASURY	USDT
DEVELOPMENT FINANCE CORP	DFC
DEPARTMENT OF EDUCATION	ED
DEPARTMENT OF ENERGY	DOE
DEPARTMENT OF LABOR	DOL
DEPARTMENT OF STATE	DOS

## 4.2 Defects and Fixes

No defect fixes are included in this release.

## 4.3 Known Issues

No known or open issues were identified in this release.

# 5 Product Documentation

The following documents apply to this release:

- ES 5.15.2 Release Notes are uploaded to the [VA Software Document Library](#) (VDL).
- Additional reference documentation related to this release is stored in GitHub.
