1. Introduction

The Veterans Health Information System Technology Architecture (VistA) Audit Solution (VAS) was designed as a real-time web-based interface. VAS provides a nationwide Health Insurance Portability and Accountability Act (HIPAA) compliant Audit Tracking Solution with the ability to track and report on access logs for patients' Personal Identifiable Information (PII)/Protected Health Information (PHI) data across all VistA instances. VAS users are Privacy Officers, Information System Security Officers (ISSO), and their authorized representatives who need the ability to view the log of Create, Read, Update and/or Delete (CRUD) operations on patient information to respond to HIPAA, employee and Inspector General (IG) requests. This data originates from VistA and flows through in-memory database servers to be stored in the Veterans Affairs Enterprise Cloud (VAEC) Amazon Web Services (AWS). The VAS web-based User Interface (UI) will access and display the data stored in AWS.

Authorized VAS users may view the patient data that was accessed and modified, as well as the individual that performed the actions.

1.1. Purpose

Informational patch WEBS*2*9 announces the release of the Veterans Information System and Technology Architecture (VistA) Audit Solution (VAS) web application version 2.5.3.

1.2. Audience

This document targets users and administrators of the VAS and applies to the changes made between this release and any previous releases of this software.

2. This Release

The VAS 2.5.3 release includes the following updates:

Remediations

The VAS 2.5.3 release will deploy updated code in the workflow (registry locations and non-migrated secrets) to support the GHEC-US migration. In addition, implements fix for Redshift Issue with Users identified by email rather than UID.

Enhancements

None

2.1. Known Issues

The VAS 2.5.3 release will deploy updated code in the workflow (registry locations and non-migrated secrets) to support the GHEC-US migration.

3. Product Documentation

The following documents apply to this release:

- WEBS*2*9 Patch Description
- VAS 2.5.3 Release Notes

Appendix A - Acronyms

Acronym	Definition
ADT	Admission/Discharge/Transfer
API	Application Programming Interface
AWS	Amazon Web Services
CRUD	Create, Read/Inquire, Update, and Delete
DG	Registration package
DIBRG	Deployment, Installation, Back-Out, and Rollback Guide
