Profile of Post-9/11 Veterans: 2014

Prepared by the National Center for Veterans Analysis and Statistics
May, 2016
Introduction

Post-9/11 Veterans are the youngest cohort being served by the Department of Veterans Affairs (VA). The National Center for Veterans Analysis and Statistics (NCVAS) produced this profile to meet the demands for data and understanding of the Post-9/11 Veteran population. As of 2014, there are 2.6 million Post-9/11 Veterans. As an end date to the Gulf War Era has not been established, the Post-9/11 cohort will continue to grow. VA projects a Post-9/11 Veteran population of just under 3.5 million by 2019.

VA continues to deliver a wide array of benefits and services Veterans, eligible dependents, and survivors to help to ease the transition from the military to civilian life and to improve quality of life. These programs are overseen by three administrations:

- Veterans Health Administration (VHA) provides health care and Pharmacy services.
- Veterans Benefits Administration (VBA) provides Compensation and Pension disability benefits, Education Assistance, Life Insurance, Vocational Rehabilitation/employment services, and Home Loan Guaranty assistance.
- National Cemetery Administration (NCA) provides memorial benefits including graves, markers, flags, medallions, and burial allowance.

Key questions addressed in this profile are:

- How many Post-911 Veterans used VA benefits? How many did not?
- Which programs do Post-9/11 Veterans use most?
- What are the demographic and socio-economic characteristics of Post-9/11 Veterans and how do they differ from other Veterans and non-Veterans?
  - Gender
  - Age
  - Race
  - Marital Status
  - Education
  - Employment
  - Occupation
  - Health Insurance
  - Poverty
  - Income
Data Source and Methods

- Demographic data for this analysis come from the 2014 American Community Survey (ACS) Public Use Microdata Sample.
  - ACS is an ongoing survey that provides annual data on the social and economic characteristics of the U.S. population.
  - ACS uses a series of monthly samples to produce annually updated data for the same small areas (census tracts and block groups) formerly surveyed via the decennial census long-form sample.

- The universe for this analysis is the civilian population 17 years and older living in the United States and Puerto Rico.

- All comparative statements have undergone statistical testing and are significant at the 90% confidence level.
  - A “statistically significant difference” simply means there is statistical evidence that there is a difference; it does not mean the difference is necessarily large, important or significant in the usual sense of the word.
  - A “no statistically significant difference” means that there is statistical evidence that there is no difference in the comparative percentages/rate.

- For more information about the ACS, please see: [http://www.census.gov/acs/www](http://www.census.gov/acs/www)

A Veteran user is defined as any Veteran who received or used at least one VA benefit or service during the fiscal year. Veteran spouses, Veteran dependents, and active military service members who used VA benefits and services were not included in the analysis. Each Veteran is only counted once in the overall total even if he/she used multiple programs.

- **Health Care:** All Veterans who received either VA inpatient care, VA outpatient care, purchased (fee basis) care, VA long-term services and support, or VA pharmacy care were included. VA health care enrollees who did not seek care from VA during the current year were not included. Veterans who only sought care from a VHA Vet Center were not included.

- **Memorial Affairs:** All Veterans who were interred in a National, State, Interior, or Military cemeteries, or Veterans who were interred in private cemeteries and requested headstones/markers from VA were included. Due to data unavailability, Veterans who only received Presidential Memorial Certificates or a flag were not included.

- **Compensation & Pension:** All Veterans who received VA disability compensation or pension payments were included. Veterans who received Special Adaptive Housing benefits were also included in the analysis. Veterans with pending or denied claims were not included.

- **Education:** All Veterans who received benefits for Chapter 30, 32, 33, 1606, and 1607 education programs were included.

- **Vocational Rehabilitation:** All Veterans who participated in various stages of the Vocational Rehabilitation and Employment program were included.

- **Loan Guaranty:** All Veterans who had an active, new or re-financed VA-guaranteed home loan were included.

- **Life Insurance:** All Veterans who had an active VA life insurance policy or were in receipt of a benefit from a policy that was administered or supervised by VA were included. VA insurance programs included in the analysis were National Service Life Insurance (NSLI), United States Government Life Insurance (USGLI), Veterans’ Special Life Insurance (VSLI), Veterans’ Reopened Insurance (VRI), Service-Disabled Veterans Insurance (S-DVI), Veterans’ Mortgage Life Insurance (VMLI), Traumatic Injury Protection (TSGLI), and Veterans’ Group Life Insurance (VGLI). The analysis does not include Service-members’ Group Life Insurance (SGLI) and Family Service-members’ Group Life Insurance (FSGLI).
Post-9/11 Veterans and All Other Veterans Comparisons

Sources: (1) U.S. Census Bureau, American Community Survey PUMS, 2014; (2) USVETS, 2014; (3) VetPop14
Prepared by the National Center for Veterans Analysis and Statistics
About 76 percent of Post-9/11 Veterans were under age 45 while about 79 percent of all other Veterans age 55 and over.

Age Distribution for Post-9/11 Veterans, All Other Veterans, and Non-Veterans
(in percent)

- Post-9/11 Veterans
- All other Veterans
- Non-Veterans

Age group 45 to 54 percentages are not significantly different between Post-9/11 Veterans and non-Veterans.
About 55 percent of Post-9/11 Veterans were married while about 66 percent of all other Veterans were married.

Marital Status Distribution for Post-9/11 Veterans, All Other Veterans, and Non-Veterans
(in percent)

- **Married**
  - Post-9/11 Veterans: 54.9%
  - All other Veterans: 65.8%
  - Non-Veterans: 47.9%

- **Divorced**
  - Post-9/11 Veterans: 13.9%
  - All other Veterans: 15.8%
  - Non-Veterans: 11.1%

- **Widowed, separated**
  - Post-9/11 Veterans: 4.1%
  - All other Veterans: 11.1%
  - Non-Veterans: 8.1%

- **Never married**
  - Post-9/11 Veterans: 27.1%
  - All other Veterans: 7.2%
  - Non-Veterans: 32.9%

Source: U.S. Census Bureau, American Community Survey PUMS, 2014

*No significant difference in percentages of “Uses VA Health Care” between Post-9/11 Veterans and all other Veterans.*
Post-9/11 women Veterans had higher median personal incomes than all other women Veterans. Post-9/11 male Veterans had lower median earnings and personal income than all other male Veterans.

Median Earnings of Year-Round Full-Time Workers by Sex and Veteran Status

- Post-9/11 Female Veterans: $41,851
- All other Female Veterans: $44,945
- Post-9/11 Male Veterans: $48,497
- All other Male Veterans: $52,926

Median Personal Income by Sex and Veteran Status

- Post-9/11 Female Veterans: $38,011
- All other Female Veterans: $27,934
- Post-9/11 Male Veterans: $29,931
- All other Male Veterans: $34,981

“Earnings” refer to salary, wages, and self employment income. “Year-round full-time(YRFT) refers to employment of 50 or more weeks per year and 35 or more hours per week. Median earnings are calculated for the YRFT employed population with earnings greater than zero.

“Income” refers to the total of earnings and other sources of income such as pension, Supplement Security Income, public assistance, etc. Median Income is calculated for the total population with personal income greater than zero.

Source: U.S. Census Bureau, American Community Survey PUMS, 2014
Prepared by the National Center for Veterans Analysis and Statistics
The Post-9/11 Veteran population is expected to increase 46 percent between 2014 and 2019.

Source: VetPop14
Prepared by the National Center for Veterans Analysis and Statistics

District of Colombia and Wyoming are the places with highest percent change in Post-9/11 Veteran population at 61% or higher.
Regarding VA programs/benefits participation, more Post-9/11 Veterans used Compensation and Pension, Education and Home Loan than their counterparts regardless of gender.

About 40% Post-9/11 Veterans and 27% of all other Veterans used at least one benefit provided by the Veterans Benefits Administration (VBA).

* Numbers do not sum to the total number of VA users. Veterans who used multiple programs are counted in each individual program, but only once in the overall total.
White, Hispanic and Asian/NHOPI Veterans used at least one VA benefit program at a higher rate than all other Veterans of same race or ethnicity.

**Rate of Utilization by Race**
(in percent)

- **White**: 44.3% (Post-9/11); 42.6% (All other)
- **Hispanic**: 45.2% (Post-9/11); 42.8% (All other)
- **African-American**: 42.8% (Post-9/11); 46.2% (All other)
- **Asian/NHOPI**: 39.3% (Post-9/11); 38.0% (All other)
- **American Indian/Alaska-Native**: 33.0% (Post-9/11); 41.5% (All other)
- **Other/Multiple race**: 34.7% (Post-9/11); 37.4% (All other)

Source: USVETS, 2014
Prepared by the National Center for Veterans Analysis and Statistics
Lower percentage of Post-9/11 Veterans enrolled in VA health care than all other Veterans and used VA health care at a lower rate.

### VA Health Care Enrollment and Utilization
(in percent)

- **Enrolled**
  - Post-9/11 Veterans: 37.3%
  - All other Veterans: 46.5%

- **Enrolled and user**
  - Post-9/11 Veterans: 19.9%
  - All other Veterans: 29.1%

Source: USVETS, 2014
Prepared by the National Center for Veterans Analysis and Statistics
Among the service-connected disabled population, the Post-9/11 Veterans used VA health care at a lower rate than all other Veterans.

Service-Connected Disability: VA Health Care Veterans
(in percent)

- **User**
  - Post-9/11 Veterans: 60.7%
  - All other Veterans: 71.8%

- **Non-user**
  - Post-9/11 Veterans: 39.3%
  - All other Veterans: 28.2%

*About 23 percent of Post-9/11 Veterans had a service-connected disability versus 16 percent of all other Veterans.*

Summary of Post-9/11 Veterans and Non-Veterans Comparisons

According to data from the 2014 American Community Survey, Post-9/11 Veterans were more likely to be non-white non-Hispanic, more likely to be divorced, more likely to be insured, less likely to live in poverty, and had higher personal incomes than non-Veterans.

Post-9/11 male Veterans were more likely to be white non-Hispanic, work in management occupations, and more likely to work for local, state, or Federal governments than their non-Veteran counterparts. Post-9/11 male Veterans who worked year-round and full-time earned about $2,000 more than similar non-Veterans. The median age of Post-9/11 male Veterans in 2014 was 33 years while the median age of male non-Veterans was 41 years.

Post-9/11 women Veterans were less likely to be white non-Hispanic, less likely to be uninsured, less likely to live in poverty, and had higher personal incomes than women non-Veterans. Post-9/11 women Veterans were more likely to be divorced, work in management and professional occupations and more likely to work in local, state, or Federal government than women non-Veterans. Post-9/11 women Veterans who worked year-round and full-time earned about $3,500 more than similar non-Veterans. This gap may increase as the Post-9/11 women Veteran ages. The median age of Post-9/11 women Veterans was 32 and women non-Veterans was 46 in 2014.
Summary of Post-9/11 Veterans and All Other Veterans Comparisons

Post-9/11 Veterans are the youngest cohort of Veterans with a median age of 33 years old. This group was more likely to be nonwhite, to be single, to be uninsured, to have no income and to live in a household receiving food stamps than all other Veterans in 2014. Employed Post-9/11 Veterans were more likely to work in service occupations than their Veteran counterparts.

Post-9/11 male Veterans who worked year-round and full-time earned about $5,800 less than other Veterans. This may be because the median age of Post-9/11 male Veterans was 33 years while the median age of other male non-Veterans was 41 years in 2014. As for Post-9/11 women Veterans, the personal income was about $11,000 higher than other women Veterans. This could be attributed to the aging of the other female Veterans and a higher number of females serving in Post-9/11 Era.

Within the Post-9/11 Veteran population, women had higher educational attainment but were poorer and more likely to be in a household receiving food stamps than male Veterans in 2014. Post-9/11 male Veterans were more likely to have no health insurance coverage than women Veterans.

As for users of VA programs, about 44 percent of Post-9/11 Veterans and 43 percent of all other Veterans used at least one VA benefit or service. The Post-9/11 Veterans used the C&P program more than all other Veterans. More Post-9/11 Veterans had a service connected disability (SCD) than other Veterans; however, these Post-9/11 Veterans used VA health care less than other SCD Veterans.
