CONSULT PROCESSES AND PROCEDURES

1. REASON FOR ISSUE: This Veterans Health Administration (VHA) directive provides policy for consult scheduling processes and procedures.

2. SUMMARY OF MAJOR CHANGES:

   a. Amendment dated December 14, 2021:

   (1) Requires adherence to the Consult Timeliness Standard Operating Procedures (SOP), provides the link to the SOP and updates language in this directive accordingly.

   (2) Rescinds Appendix C: “Minimum Scheduling Effort Required for Outpatient Appointments” and updates all relevant references to the Minimum Scheduling Effort SOP, available on the following SharePoint site: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

   (3) Requires a change from the use of Discontinue to Cancel by consult receiving clinicians. The Discontinue option will remain available in the software but will not be used other than noted exceptions. Consults that are cancelled beyond 90 calendar days will be auto discontinued using the mandatory CPRS Patch GMRC*3*113.

   b. Amendment dated April 5, 2021 updates all website links in the directive to the most up-to-date versions and removes General Business Rules Uses of the Consultation Package regarding Community Care Consults to instead reference the Office of Community Care Field Guidebook for additional information (see Appendix B).

   c. Amendment dated June 28, 2019, adds and/or clarifies:

   (1) Updates the policy statement, changing consults PENDING status no more than 7 calendar days to 2 business days to align with the Deputy Under Secretary for Health for Operations and Management Memo dated June 5, 2017;

   (2) Responsibilities for Facility Chief of Staff, paragraph 5.h.; and

   (3) Responsibilities for Consult Receiving Services, paragraph 5.l.

   (4) The addition of Appendix C, Minimal Scheduling Efforts for Outpatient Appointments.
d. This revised VHA directive provides updates to policies, responsibilities, and definitions for consult processes and procedures. Consult business rules were developed to outline consult set up and usage. Consult processes have been standardized and oversight responsibilities defined. Policy is provided regarding disposition of consults, entry of clinically indicated date, and changes to permitted urgency statuses. All non-mental health consults may be cancelled without provider review after one no show or cancellation, or failure to respond to minimal scheduling efforts in all services as specified in this directive. Low risk consults may be cancelled without rescheduling attempts.

3. RESPONSIBLE OFFICE: The Deputy Under Secretary for Health for Operations and Management (10N) is responsible for the contents of this directive. Questions may be referred to the Executive Director, Access and Clinic Administration Program Office via email at 605-720-7174 or VHA10NC10Action@va.gov.

5. RECERTIFICATION: This VHA directive is scheduled for recertification on or before the last working day of August 2021. This directive will continue to serve as national VHA policy until it is recertified or rescinded.

/s/ David J. Shulkin,
M.D. Under Secretary
for Health

NOTE: Amendments to this directive and all active Deputy Under Secretary for Health Operations and Management (10N) memoranda are considered policy and will remain in effect until this directive is recertified. Applicable 10N/USH memoranda are located on the Office of Veterans Access to Care (OVAC) SharePoint site at the following link: https://dvagov.sharepoint.com/sites/vhaovac/SitePages/Policy.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

NOTE: All references herein to VA and VHA documents incorporate by reference subsequent VA and VHA documents on the same or similar subject matter.

DISTRIBUTION: Emailed to the VHA Publications Distribution List on 08/24/2016.

CONSULT – GENERAL BUSINESS RULES USES OF THE CONSULTATION
PACKAGE ....................................................................................................................B-1
CONSULT PROCESSES AND PROCEDURES

1. PURPOSE

This Veterans Health Administration (VHA) directive establishes policy for consult management. All national or local policies are superseded to the extent that they conflict with this directive, and will not be followed. VHA’s use of the electronic consultation package includes traditional clinical consultation, administrative communication, Community Care coordination (including purchased non-VA care and Department of Defense care), clinical procedures (diagnostic equipment vendor reports), prosthetics and future care. **AUTHORITY:** 38 U.S.C. 7301(b).

2. BACKGROUND

The Computerized Patient Record System (CPRS) electronic consultation software was not uniformly implemented in the past. This led to inconsistent implementation and management of consults. In order to improve the management of clinical consultation processes, VHA is standardizing certain aspects of electronic consultation. These standards aim to improve transparency and timeliness of consult completion while preserving the freedom to use the consult package for administrative uses, prosthetics, and other purposes.

3. DEFINITIONS

   a. **Administrative Consult.** An administrative consult is a consult document in CPRS used as one-way communication on behalf of a patient to make a clinical request to transfer care or communicate an order or series of orders. Administrative consult orders include requests to schedule where clinical review is not required.

   b. **Care Coordination Agreements.** A care coordination agreement is an agreement or understanding between two or more services within or between facilities, one of which sends work to the other(s), defining the workflow rules. This is a written document that is developed based on discussion and consensus between the involved services and facilities. The care coordination agreement is signed by service chiefs from the involved services. **NOTE:** See appendix A for recommended content for care coordination agreements. This definition does not refer to facility integration across systems or between VA and non-VA providers.

   c. **Clinical Consult.** A clinical consult is a consult document in CPRS used as two-way communication on behalf of a patient consisting of a physician or provider (sender) request seeking opinion, advice, or expertise regarding evaluation or management of a specific problem answered by a physician or other health care provider (receiver). The CPRS consult package must be used for all clinical consultations.

   d. **Clinically Indicated Date.** The clinically indicated date (CID), previously referred to as the earliest appropriate date, is the date care is deemed clinically appropriate by the VA sending provider. CID is entered into Consult Request in the field labelled
clinically indicated date. The CID determination is made based upon the needs of the patient and should be at the soonest appropriate date.

e. **Clinical Procedures Package with Vendor Interface.** A request for a clinical service when the response includes a computer-generated report that flows from diagnostic equipment (vendor) to the CPRS consult package. VA medical facilities may consider these clinical or administrative depending on whether the consult includes one way or two-way communication. The CPRS consult package may be used for clinical procedures with a vendor interface.

f. **Community Care.** Community Care includes NVCC Consults, Choice, and DoD Care.

g. **Consult.** A consult is a request for clinical services on behalf of a patient. In VHA, consult requests are made through an electronic document in CPRS communicating service requests and/or results.

h. **Consult Status Definitions.** The receiving service must receive the consult to update the status of pending as soon as possible and no later than 2 business days of the request receipt. Merely adding a comment without changing the status from pending is not acceptable.

   (1) **Active (a).** This status occurs when a consult is “received” and efforts are underway to fulfill a consult. A consult may also revert to “active” in other scenarios such as when an appointment is cancelled or no-showed.

   (2) **Pending (p).** This status designates requests that have been sent, but not yet acted on by the receiving service.

   (3) **Scheduled (s).** This indicates that an appointment has been made and linked to the consult request. Scheduled status automatically sends an alert to the sending provider. The consult status should not be manually changed to “scheduled” in the consult package but should be linked to appointments so that the consult status changes when the appointment status is changed.

   (4) **Partial Result (pr).** This status designates partial but not complete resolution of the consult request.

   (5) **Complete (c).** This status designates completion of the requested service.

   (6) **Administrative Complete.** This function may be used by administrative or clinical staff to complete a consult without a consult titled progress note. This function must be used with extreme care in order to avoid compromising care. This status triggers an alert to the sending provider.

   (7) **Forward.** This action is selected by the receiving service when the decision is made to forward the consult to another service. This is not used to forward to a specific provider. Forwarding consults to NON-VA Care Coordination (NVCC) is not allowed. An
alert is sent to the sending provider.

(8) **Add Comments.** This function is used to enable and document communication including instructions to the scheduling clerk. Adding comments may trigger an alert to the sending provider depending on consult notification setup.

(9) **Significant Findings.** This function allows a sender or a receiver to flag a consult as containing vital or specific information for special attention. This triggers an alert to the sending or receiving provider.

(10) **Discontinue (dc).** The Discontinued (dc) action should no longer be used by consult receiving clinicians or staff responsible for consult management when the consult is no longer needed. Cancelled consults will change to a Discontinued status according to the number of days that are set in Veterans Health Information Systems and Technology Architecture (VistA) parameters in a Cancelled status and will therefore no longer be able to be resubmitted.

(11) **Cancel/Deny (x).** The Cancel/Deny action may be used by the appropriate staff responsible for consult management. Cancel/Deny should be used in all instances when the consult is no longer needed and replaces the Discontinue action.

(12) **Edit/Resubmit.** This action is used by the sending provider to resubmit a cancelled (denied) consult after appropriate modification. An alert is sent to the receiving service.

i. **Earliest Appropriate Date.** The earliest appropriate date (EAD) is the former name of the clinically indicated date (CID) field in the consult template.

j. **E-Consult.** The e-consult clinical consultation is provided by a clinician who provides diagnostic and medical management of a specific patient in response to a request seeking opinion, advice, or expertise. Utilizing information provided in the consult request and/or review of the patient’s electronic medical record, the consultant provides a documented response that addresses the request without a face-to-face visit. Sending services may request e-consult; however, receiving consults may choose whether to order a face to face appointment. The receiving service may also decide to complete a face to face consult as an e-consult, if appropriate. E-consults should be promoted to the extent possible because they often allow the consult question to be answered more quickly. E-consults should also be used in the case where the ordering provider did not complete necessary prerequisite tests or treatments. For further details on e-consults, refer to the E-Consults Guidebook at the following link: https://dvagov.sharepoint.com/sites/vhaovac/cpm/Shared%20Documents/Forms/AllItems.aspx?id=%2Fsites%2Fvhaovac%2Fcpm%2FShared%20Documents%2FGuidebooks%2FConsult%20Guide%20Book%20v%203%2E0%2Epdf&parent=%2Fsites%2Fvhaovac%2Fcpm%2FShared%20Documents%2FGuidebooks. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.
k. **Future Care Consults.** Requests for care where the earliest appropriate date/clinically indicated date is more than 90 days from consult initiation. Future care consults should not be used to address issues of access or availability. Future care appointments may be managed within the consult package using consult titles with the words “future care” or “FC” and with the earliest appropriate date/clinically indicated date field completed by the sending provider. Future care consults may remain in a pending or active status and be scheduled closer to when the appointment is needed. For further details on future care consults, see appendix B, paragraph 6.

l. **Low Risk Clinics.** For the purposes of consult processes, VHA has defined low risk clinics nationally to include: physical therapy, occupational therapy, kinesiotherapy, acupuncture, smoking clinic, MOVE clinic, massage therapy, chiropractic care and erectile dysfunction clinic. A full list of low risk clinics can be found in the Minimum Scheduling Effort SOP, located at: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. Facilities may cease efforts to reschedule appointments and cancel the consult without provider review after one no show or one patient cancellation in these clinics. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

m. **Community Care Consult.** The Community Care consult must be set up in CPRS and performed as outlined in the Office of Community Care (OCC) Field Guidebook: https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

n. **Urgency Status.** The urgency status is used by the sending provider to communicate a timeframe when the consult should be addressed. The only two acceptable urgencies are Routine and Stat:

1. **Routine.** A Routine consult indicates the patient should be seen in accordance with the clinically indicated date.

2. **Stat.** Stat consults will be defined as an “immediate” need. The sender of a stat consult is required to:

   a. Contact the intended receiver of the consult request to discuss the patients’ situation.

   b. Enter “Today” in the clinically indicated date/earliest appropriate date field of the consult.

   c. Enter “Stat” in the urgency field of the consult.

   d. Before the patient leaves the clinic either schedules an appointment or
documents when the patient will be seen.

(e) A stat consult must be completed within 2 business days of FED. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

- **Veterans Health Information Systems and Technology Architecture Option Group Update of Consult and Procedure Requests.** VistA Option Group Update of consult and procedure requests is a VistA menu option that allows the status of multiple consults be updated simultaneously. This process should generally be avoided because of the risk to closing the consult before the needed care. Any use of group closure should be used with strict oversight.

4. POLICY

a. It is VHA policy to ensure timely and clinically appropriate care to all Veterans by standardizing and managing consultation processes. The sending provider determines the CID, which is the date care is deemed clinically appropriate. The CID determination is made based upon the needs of the patient and should be at the soonest appropriate date care is needed. The CID should not be used to indicate the latest appropriate date. The CID may not be changed by the receiving service due to lack of availability of appointments. The date may only be changed if it was entered in error, (e.g. a future care consult with a CID of today). The date must either be manually entered into the consult order or generated through an order menu that includes the CID. The CID should be entered into the scheduling package when the appointment is made.

b. The consult/referral status must change within 2 business days of the File Entry Date (FED). The consult should be received, so that the status, at least changes from Pending to Active within that 2-business day timeframe but may also be Scheduled, Forwarded, Cancelled or Completed within that timeframe. (Exceptions include E-consults, Prosthetics and Pathology.)

c. All non-mental health consults can be cancelled without provider review after a single no show or patient cancellation. Low risk consults do not require rescheduling attempts prior to discontinuation after one no show or one patient cancellation.

5. RESPONSIBILITIES

a. **Under Secretary for Health.** The Under Secretary for Health has the overall responsibility for consults in VHA.

b. **Deputy Under Secretary for Health for Operations and Management.** The Deputy Under Secretary for Health for Operations and Management has
responsibility for oversight of consults in VHA.

c. **Executive Director for Access.** The Executive Director for Access is responsible for consult policy and process education, improvement, and oversight. In addition, OVAC is responsible for establishing the national approved list of low risk clinics and publishing it in the Minimum Scheduling Effort SOP, located at: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

d. **Executive Director, Office of Compliance and Business Integrity.** The Executive Director, Office of Compliance and Business Integrity (CBI) is responsible for:

   (1) Providing guidance and training to CBI Officers related to auditing and monitoring facility procedures for consult management.

   (2) Evaluating field based audits to determine systemic causes and circumstances related to delays in consult management activities and accuracy of consult documentation, identifying systemic trends, educational opportunities, and recommending process improvements as necessary.

   (3) Providing periodic consult management reports to the Principal Deputy Under Secretary for Health through the Business Integrity Committee or its successor enterprise-wide compliance committee.

e. **Veterans Integrated Service Network Director.** The Veterans Integrated Service Network (VISN) Director is responsible for VISN oversight of policy implementation and performance management within the VISN including:

   (1) Overall responsibility to regularly review and apply corrective measures to address VISN data on consult quality outcomes.

   (2) Implementation of standardized processes for consult management and reporting across the VISN.

   (3) Assigning a VISN level point of contact to be responsible for coordination within the VISN and to serve as a liaison at the national level.

   (4) Supporting the role of the VISN CBI Officer.

f. **VISN CBI Officer.** The VISN CBI Officer is responsible for

   (1) Ensuring consistency in consult management auditing and monitoring practices at each facility within the VISN; evaluate the accuracy of quarterly consult management audit data submitted by facilities to the VHA Office of Compliance and
Business Integrity.

(2) Evaluating facility-based audits to determine VISN-wide causations and trends relating to delays in consult management activities and accuracy of consult documentation and providing quarterly reports to VISN leadership.

(3) Sharing facility-based audit results with the VISN Chief Medical Officer and relevant CBI Committee, making recommendations, as necessary.

(4) Ensuring VISN CBI Committees follow up on the status of consult management audit recommendations on a monthly basis until complete.

g. **VA Medical Facility Director.** The VA medical facility Director is responsible for:

(1) Oversight of the facility consult policy, processes, and outcomes.

(2) Regular monitoring and improvement of facility consult performance and results. This review should occur monthly and more frequently if outcomes are not being met.

(3) Allocating sufficient resources to enable management of consultations and timely delivery of care.

(4) Ensuring all new Licensed Independent Practitioners complete consult training in TMS.

(5) Ensuring new residents complete consult management training. Recommend the use of abbreviated resident consult training materials posted at the following link: [https://dvagov.sharepoint.com/sites/vhagroup-practice-manager-pilot/SitePages/AL-CL-Training.aspx](https://dvagov.sharepoint.com/sites/vhagroup-practice-manager-pilot/SitePages/AL-CL-Training.aspx). Resident Training can be found at the link below: [https://dvagov.sharepoint.com/sites/vhaconsults/Shared%20Documents/Forms/AllItems.aspx?id=%2Fsites%2Fvhaconsults%2FShared%20Documents%2FTraining%2FHPT%2DResident%2DConsultTraining%2Epdf&parent=%2Fsites%2Fvhaconsults%2FShared%20Documents%2FTraining](https://dvagov.sharepoint.com/sites/vhaconsults/Shared%20Documents/Forms/AllItems.aspx?id=%2Fsites%2Fvhaconsults%2FShared%20Documents%2FTraining%2FHPT%2DResident%2DConsultTraining%2Epdf&parent=%2Fsites%2Fvhaconsults%2FShared%20Documents%2FTraining). **NOTE:** These are internal VA websites that are not available to the public and are accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(6) Ensuring that consults are cancelled appropriately.

(7) Defining in local policy a process for managing the urgency of consults. The only two acceptable urgencies are Routine and Stat (see definition for urgency statuses).

(8) Ensuring specific consult set up rules, stop code alignment, and naming conventions are followed.
(9) Ensuring schedulers link a consult request to the appointment.

(10) Ensuring adherence to national timeliness and completion requirements as outlined in the Consult Timeliness SOP: [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(11) Ensuring Community Care is utilized in accordance with regulatory authority and guidance from the Office of Community Care.

(12) Following Non-VA Medical Care Coordination (NVCC) procedures including utilizing standardized NVCC consult templates, as appropriate.

(13) Supporting the role of the facility CBI Officer.

(14) Ensuring that the local Office of Information and Technology (OIT) or Clinical Informatics staff set the patch GMRC*3*113 Cancelled to Discontinued Consults to active as required in March 2019. This patch contains a new routine that runs overnight, changing cancelled status consults to discontinued according to the period of time specified in the parameter. This option must be set to active “Y” by OIT or Clinical Informatics, or personnel with access to the VistA Option: GMRC CX TO DC PARAMETER EDIT. For mandatory EHR patch GMRC*3*113, the time limit on the auto-discontinuation of cancelled consults must be set at or below 91 calendar days.

h. **Facility Chief of Staff.** The Facility Chief of Staff is responsible for:

(1) Regularly reviewing and improving facility consult performance and outcomes.

(2) Ensuring the CPRS consult package is used for all clinical consultations.

(3) Ensuring that the facility complies with the designation of low risk clinics approved by the ADUSH for Access. **NOTE:** Facilities may not designate individual clinics as low risk.

(4) Ensuring appropriate no show follow-up. See the Minimum Scheduling Effort SOP for additional information, located at: [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(a) Consults in low-risk clinics may be cancelled without provider review after a single no-show or patient cancellation without rescheduling attempts. See the Minimum Scheduling Effort SOP for additional information, located at: [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx)
NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(b) The following process is recommended: consults identified as lower risk state that the consult will be cancelled after a single no show; the appointment letter contains instructions if the patient cannot keep an appointment and that the appointment will be cancelled after a single no-show; the no-show letter informs the patient that the consult was cancelled and instructs them to contact their provider if they want the consult to be reinstated; notifications must be set to mandatory. See the Minimum Scheduling Effort SOP for additional information, located at: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx.

NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(5) Timely review and application of corrective measures as needed to address consult quality outcomes.

(6) Oversight and facilitation of effective relationships between services using Care Coordination Agreements.

i. **Service and Department Clinical Leaders.** Each Service and Department Clinical Leader is responsible for ensuring:

   (1) Adherence to any consult related national program office guidance.

   (2) Regular review and improvement of Service or Departmental performance gaps.

   (3) Managing patients effectively through the use of Care Coordination Agreements. Care Coordination Agreements must be established and utilized with a goal of optimizing referral relationships, establishing clear processes, and reducing the need for inspection and rework. Consult templates in CPRS are used to assist in the operationalization of Care Coordination Agreements and enhance the effectiveness of referrals.

   (4) Identifying, requesting, and managing resources needed to comply with consult performance measures.

   (5) Creating, managing, and improving access through local Care Coordination Agreements.

j. **Facility Consult Management Steering Committee.** Each facility must perform the following functions. These functions are assigned to individuals in this Directive. The following list identifies suggested functions of a facility Consult Management Steering Committee or an equivalent local functional committee.

   (1) Ensuring the CPRS consult package is used for all clinical consultations.
(2) Assisting the VA medical facility Director and Chief of Staff in the oversight, management, implementation and improvement of the facility consult process to include all consult services.

(3) Facilitating coordination between VHA Directive 1230, Outpatient Scheduling Processes and Procedures, SOPs, and any other documents, policies, or agreements that impact consult management processes.

(4) Ensuring specific consult set up rules, stop code alignment, and naming conventions are followed.

(5) Defining in local policy a process for managing the urgency of consults. The only two acceptable urgencies are Routine and Stat (see definition for urgency status).

(6) Facilitating alignment of consults with Care Coordination Agreements. Care Coordination Agreements must be established and utilized with a goal of optimizing referral relationships, establishing clear processes, and reducing the need for inspection and rework. Consult templates in CPRS are used to assist in the operationalization of Care Coordination Agreements and enhance the effectiveness of referrals.

(7) Including Committee members that are in clinical, administrative, and technical roles.

(8) Meeting regularly.

(9) Working collaboratively with national level consult work groups and performance improvement efforts.

(10) Reporting its findings or concerns to the facility or VISN CBI Committee as appropriate.

k. Consult Sending Service. The consult sending service is responsible for:

(1) Adhering to Care Coordination Agreements including completion of appropriate and timely pre-work.

(2) Documenting contact with the receiving service for any Stat consults.

(3) Assuring that patients understand and are willing to keep any consult appointments that are scheduled.

(4) Completing the consult order, including manual entry of the CID for all consults to be completed by the Sending Provider.

(5) Ensuring Future Care Consults have a CID that is greater than 90-calendar
days from the date the consult is entered.

   (6) Reviewing the status of ordered consults to make sure that the patient receives timely care.

   (7) Reviewing and acting on the results of completed consults for clinical services.

   (8) Reviewing discontinued or cancelled consults to determine if additional clinical measures are necessary.

   (9) Ensuring the Forward status is selected by the receiving service only when the decision is made to forward the consult to another service. This is not used to forward to a specific provider. Forwarding consults to non-VA care is not allowed. An alert is sent to the sending provider.

I. **Consult Receiving Services.** The consult receiving service is responsible for ensuring:

   (1) Adherence to the relevant Care Coordination Agreements.

   (2) Timely review and response to consult requests.

   (3) Consults are answered as e-Consults where appropriate and possible, including when prerequisite tests or treatments have not been provided.

   (4) Completion of E-consults/referrals within 3 business days of FED. Refer to the Consult Timeliness SOP:
   [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

   (5) Implementation of the “minimum scheduling effort” for non-responding patients. See the Minimum Scheduling Effort SOP for additional information, located at:
   [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

   (6) Implementation of the process of cancelling a consult without provider review if the patient does not respond to the minimum scheduling effort or no shows or cancels one or more times. See the Minimum Scheduling Effort SOP for additional information, located at:
   [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is
accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser. Cancelled consults should always document the reason for cancellation and can always be re-ordered or copied to a new order if appropriate. The Consult Resolution notification pathway must be set to mandatory so that a notification will be sent.

(7) Consults may be cancelled by administrative staff without provider review under the following conditions:

(a) Appointment not wanted by Veteran

(b) Care is no longer needed

(c) Does not meet criteria (explanation required)

(d) Duplicate request;

(e) Eligibility requirements not met

(f) Entered/Requested in error

(g) Established Patient, follow-up has been scheduled;

(h) Failed mandated scheduling effort

(i) Recommend alternative to consult (explanation required)

(j) Veteran deceased or incapacitated

(k) Provider documented instructions to cancel consult.

(l) Community care specific reasons, as captured in the CTB Community Care workflow’s standardized cancellation comments

(8) Ensuring reasons for status changes including next steps needed for timely resolution of consult are documented.

(9) A review of patients who failed to present for the scheduled visit and timely initiation of efforts to reschedule or cancel the consult according to the minimum scheduling effort described above. See the Minimum Scheduling Effort SOP for additional information, located at: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.
(10) The answer to the consult question is attached to the consult requests in the CPRS consult package. This enables the requestor to be alerted to the report’s availability and ensures that the results are available and easily identifiable.

(11) Consult notes are linked properly with the consult request.

(12) If consult questions are not completed by a progress note, the results are attached to the consult request by other means such as pasting them into the administrative complete dialogue.

(13) Compliance with requirement for consult reviews, as specified by Health Information Management Service (HIMS), the Joint Commission, and any National audits.

(14) Ensuring that staff responsible for consult management appropriately cancel, rather than discontinue, all consults that are not needed and only in accordance with reasons as outlined in the CTB.

(15) Ensuring appropriate use of all VHA approved consult management software and technology to include 3rd party software, such as Consult Toolbox (CTB) and Consult Tracking Manager (CTM).

m. **Facility CBI Officer.** The Facility CBI Officer is responsible for:

(1) Conducting a minimum of twice-yearly audits of consult management activities, in accordance with Consult Management auditing and monitoring procedures issued by the VHA Office of Compliance and Business Integrity.

(2) Reporting audit findings and recommendations to the facility Director, Consult Management Steering Committee, and VISN CBI Officer through the facility CBI Committee.

(3) Assuring audit recommendations are followed up on.

RECOMMENDED CONTENT FOR CARE COORDINATION AGREEMENTS

1. The Care Coordination Agreement is a written agreement made between any two or more parties, where one party sends work to the other, outlining the workflow rules. The agreements may exist within or between facilities. They are developed by consensus; signed by service chiefs from involved services; reviewed or updated as changes are needed, at a minimum annually; and audited.

2. The Care Coordination Agreement is available for reference by posting on the facility or Veterans Integrated Service Network (VISN) Web site, as appropriate.

3. The Care Coordination Agreement must contain, at a minimum, the following elements:
   
   a. The services covered by the agreement are listed and defined in order to clarify which topics are selected to be covered by the Care Coordination Agreement.
   
   b. The timeframe expected for response from the consultant is established.
   
   c. Judicious and appropriate history, physical, and diagnostic information from the sending provider is provided in order to put the consultant in a position to be able to make a patient care decision on the initial visit.
   
   d. Criteria for discharge from specialty care are stated. It is the expectation that patients will be discharged from the specialty clinic once consultation and any needed procedure and follow-up are completed. If ongoing care is co-managed by both the sender and consultant, responsibilities must be clarified.
   
   e. The method for communicating recommendations and treatment plan back to the referring clinician is delineated in order to simplify, standardize, and clarify communication.
   
   f. The agreement has a review and renewal date. **NOTE:** An annual timeframe is recommended.

4. Additional valuable elements may include:

   a. Concurrence signatures by the involved service chiefs, as well as the Chief of Staff (or the Chiefs of Staff and VISN Chief Medical Office in the event the request is for an Inter-facility Consult (IFC)).

   b. Definition of a method for accessing consultants outside of the formal consultation process, so questions may be asked, or advice given, potentially avoiding the need for formal consultation.

   c. Definition of a method for immediate access to the consulting service for
clinical issues that need urgent or emergent attention.

d. A description of how primary care and specialty care evaluate and monitor the Care Coordination Agreement, including identification of data sources.

   (1) Adherence to agreements is monitored by measuring the sender responsibilities of sending the right work (right requests) (see paragraph 3.a. of this appendix) packaged the right way (correct pre-work is included) (see paragraph 3.c. of this appendix).

   (2) The receiver responsibilities are measured by auditing adherence to agreed-upon timeliness response standards (see paragraph 3.b. of this appendix).

e. CPRS consultation referral templates
CONSULT – GENERAL BUSINESS RULES USES OF THE CONSULTATION PACKAGE

1. DEFINITIONS OF CONSULT REQUEST TYPES

   a. **Clinical Consultations.**

      (1) **Outpatient Consultation.** An outpatient consultation is a request for clinical evaluation where the sending provider and receiving provider are in the same parent facility and the receiving provider is treating the patient in an outpatient setting. Note that outpatient consults include virtual care and can be ordered while patients are admitted to an inpatient unit or in the emergency department.

      (2) **Inpatient Consultation.** An inpatient consultation is a request for consultative services expected to be completed during an inpatient admission, which must be completed, cancelled, or forwarded to outpatient prior to discharge. Note that some outpatient consults may be ordered on patients admitted to acute or long term inpatient units such as Community Living Center (CLC).

      (3) **Inter-facility Consultation.** An inter-facility consultation is a request for service between different parent facilities. They must either be Outpatient Clinical Consultation or clinical communications. The results of the request must be returned to the requesting site through the inter-facility consult request and is complete when the result is available.

   b. **Administrative Uses of the Consult.**

      (1) **Outpatient Clinical Request/Transfer of Care.** An outpatient clinical request/transfer of care is a request for transfer of care between providers where the only necessary response is acceptance or acknowledgement of the referral. The consult package is used as an order or notification, e.g., in a referral to Primary Care or Mental Health by the Emergency Department (ED/UC). Clinical consultation and administrative requests are not included in this category.

      (2) **Scheduling Order/Administrative.** A scheduling order/administrative is a request for scheduling within the service from the provider that does not meet the criteria for Clinical Consultation. An example is a cardiologist consulting for a cardiac catheterization they will perform. Another example is a request for laboratory or radiology services that are reported via another mechanism with separate view alerts. This also includes administrative orders such as travel or escort.

   c. **Non-VA Care Coordination (NVCC).** A Non-VA Care Coordination (NVCC) consult is a request for hospital care and/or medical services to be purchased in the community when the care/services cannot be physically furnished by VA
facilities; the Veteran cannot safely travel due to medical reasons; care cannot be furnished in a timely manner in VA facilities; or care cannot be furnished due to geographic inaccessibility. Non-VA consult/referrals are designated as administrative consults but are completed as a clinical consult with a consult result note (NON-VA CARE CONSULT RESULT NOTE) in Computerized Patient Record System (CPRS) and the scanning and attachment to this note title of any report or clinical documentation provided by the Community Care provider or facility. NVCC consults should be flagged as administrative based on guidance from the Office of Community Care (OCC). Refer to the Office of Community Care Field Guidebook: https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

d. **Clinical Procedures with Vendor Interface.** Clinical procedures with vendor interface is a request for a clinical service when interface with a vendor is necessary.

e. **Future Care Consult.** Future care consult is a request for clinical evaluation when the expectation is that the care is delivered beyond 90 days.

f. **E-Consult.** An e-consult is a clinical consultation involving a chart review which does not entail a face-to-face examination of the patient.

2. **CLINICAL CONSULTATIONS**

Clinical Consultations require the use of the Consultation Package. The Requestor receives clinical information in response to sending the consult for two-way communication.

a. **Outpatient Consultation.**

(1) **Build Requirements:**

(a) **Consult service name.** Must include 'Outpatient'. 'Outpatient' can be abbreviated as 'Outpt'.

(b) **Consult Service Names that Cannot be Used in Combination.** One naming convention or flag must be used for each consult service. Outpatient Consult Services should not include these names in the title: 'Inpatient', 'Inpt', 'Inter-Facility', 'Inter Facility', 'IFC', 'CP', 'FC' or 'Future Care'. The name should not include 'NON-VA CARE.' Do not place characters directly adjacent to the words 'Outpatient' or 'Outpt' without a space, such as placing a dash before or after or placing them in parenthesis. The administrative flag and prosthetics flag should not be set as 'Y' for these services.

(c) **Document Class.** Note titles used to respond to consults must be built in the
'CONSULTS' document class within the Text Integration Utility (TIU) package (except for procedures).

(d) **Urgency Fields:**

1. The only two approved urgency statuses are Stat and Routine.

2. If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: [https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx](https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx). **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(e) **Notifications.** 'Consult/Request Resolution' notification must be turned on and mandatory.

(2) **Status Changes.**

(a) **Pending.** Consult is automatically placed in pending status the status of the consult must be changed within 2 business days reflecting the appropriate action:

1. Active (Received);
2. Scheduled;
3. Completed;
4. Discontinue;
5. Forward; and
6. Cancel.

(b) **Active.** Consults which are pending more than 2 business days must be received into Active status. If a patient no-shows or the appointment is cancelled, the status will revert to Active status.

(c) **Scheduled.** Required using Veterans Health Information Systems and Technology Architecture (VistA) scheduling menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(d) **Cancel (Deny) Inappropriate Consults.** Used by receiving service when:
1. Consult pre-work is inadequate as outlined in care coordination agreement;

and

2. When service is not available.

(e) **Edit (Resubmit).** Used by requesting service when adequate information has been added as outlined in care coordination agreement or when additional information has become available prior to the appointment.

(f) **Cancel.** Used when the consult is:

1. Appointment not wanted by Veteran
2. Care is no longer needed
3. Does not meet criteria (explanation required)
4. Duplicate request;
5. Eligibility requirements not met
6. Entered/Requested in error
7. Established Patient, follow-up appointment scheduled;
8. Failed mandated scheduling effort
9. Recommend alternative to consult (explanation required)
10. Veteran deceased or incapacitated
11. Provider documented instructions to cancel consult
12. Community care specific reasons, as captured in the CTB Community Care workflow’s standardized cancellation comments

(g) **Forward.** When receiving service assumes the responsibility of handing off the request to the appropriate specialty service.

(h) **Add comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(i) **Significant Findings.** The Significant Findings uses the same alert pathway as consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Significant Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.
(j) Complete via CPRS Consult progress note. When appropriate documentation is available within CPRS and linked to the consult.

(k) Administrative Complete. When patients with an established relationship with the receiving specialty has been lost to follow up and the patient is rescheduled; when consults are greater than 5 years old and it is being done as part of consult maintenance review.

(l) Partial results. Automatic status change when consult has been linked to a note that is not signed or co-signed.

b. Inpatient Consultation.

(1) Build Requirements.

(a) Consult service name. Must include 'Inpatient'. 'Inpatient' can be abbreviated as 'Inpt'.

(b) Consult service names that cannot be used in combination. One naming convention or flag must be used for each consult service. Inpatient Consult Services should not include these names in the title: 'Outpatient', 'Outpt','Inter-Facility', 'Inter Facility', 'IFC', 'CP', 'FC' or 'Future Care'. The name should not begin with 'NON-VA CARE'Do not place characters directly adjacent to the words 'Inpatient' or 'Inpt' such as placing a dash before or after or placing them in parenthesis. The administrative flag and prosthetics flag should not be set as 'Y' for these services.

(c) Document class. Note titles used to respond to consults must be built in the 'CONSULTS' document class within the TIU package (except for procedures).

(d) Urgency Fields:

1. The only two approved urgency statuses are Stat and Routine.

2. If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(e) Notifications. 'Consult/Request Resolution' notification must be turned on and mandatory.

(2) Status Changes.

(a) Pending. Consult is automatically placed in pending status the status of the
consult must be changed within the timeframe specified in the VA medical facility policy.

(b) **Active.** Consults which are pending more than 2 business days from consult creation must be received into Active status. If a patient no-shows or the appointment is cancelled, the status will revert to Active status.

(c) **Scheduled.** May be used using Vista scheduling menu options to link the consult request to the scheduled appointment.

(d) **Cancel (Deny) Inappropriate Consults.** May be used for inappropriate or duplicate requests.

(e) **Edit (Resubmit).** May be used as needed, in the cases where the care is to be rendered during the inpatient stay.

(f) **Discontinue.** Do not use.

**NOTE:** If the consult request was not addressed during the inpatient stay and the requesting provider determined there is a need to receive the service as an outpatient, the hospitalist or PCP (local policy to dictate) will enter an outpatient consult.

(g) **Forward.** When receiving service assumes the responsibility of handing off the request to the appropriate specialty service for care to be provided during the inpatient stay.

(h) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(i) **Significant Findings.** The Significant Findings uses the same alert pathway as consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Sig Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.

(j) **Complete via CPRS Consult Progress Note.** When documentation is complete and linked to consult.

(k) **Administrative Complete.** Can be used after appropriate clinical review occurs and not able to be placed in either completed or cancelled status.

(l) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed.

c. **Inter-facility Consultation.**

(1) **Build Requirements.**
(a) **Consult Service Name.** Must include 'Inter-facility'. 'Inter-facility' can be abbreviated as 'IFC'.

(b) **Consult Service Names that Cannot be Used in Combination.** One naming convention or flag must be used for each consult service. Inter-Facility Consult Services should not include these names in the title: 'Outpatient', 'Outpt', 'Inpatient', 'Inpt', 'CP', 'FC' or 'Future Care'. The name should not begin with 'NON-VA CARE'. Do not place characters directly adjacent to the words 'Inter-Facility', 'Inter Facility', or 'IFC' without a space, such as placing a dash before or after or placing them in parenthesis. The administrative flag and prosthetics flag should not be set as 'Y' for these services.

(c) **Document Class.** Note titles used to respond to consults must be built in the 'CONSULTS' document class within the TIU package (except for procedures).

(d) **Urgency Fields.**

1. The only two approved urgency statuses are Stat and Routine.

2. If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(e) **Notifications.** 'Consult/Request Resolution' notification must be turned on and mandatory.

(2) **Status Changes.**

(a) **Pending.** Consult is automatically placed in pending status the status of the consult must be changed within 2 business days reflecting the appropriate action:

1. Cancel;

2. Scheduled; and

3. Completed.

(b) **Active.** Consults which are pending more than 2 business days must be received into Active status. If a patient no-shows, or the appointment is cancelled, the status will revert to Active status.
(c) **Scheduled.** Required using VistA scheduling menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(d) **Cancel (Deny) Inappropriate Consults.** Used by receiving service when:

1. Consult pre-work is inadequate as outlined in care coordination agreement;
2. When the service cannot be provided;
3. Not to be used to alleviate capacity issues - opposite of d/c for receiving and sending; and

(e) **Edit (Resubmit).** Do not use.

(f) **Cancel.** Sending facility: Use when:

1. Appointment not wanted by Veteran
2. Care is no longer needed
3. Does not meet criteria (explanation required)
4. Duplicate request;
5. Eligibility requirements not met
6. Entered/Requested in error
7. Established Patient, follow-up appointment scheduled
8. Failed mandated scheduling effort
9. Recommend alternative to consult (explanation required)
10. Veteran deceased or incapacitated
11. Provider documented instructions to cancel consult.
12. Community care specific reasons, as captured in the CTB Community Care workflow’s standardized cancellation comments

(g) **Forward.** When receiving service assumes the responsibility of handing off the request to the appropriate specialty service.

(h) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(i) **Significant Findings.** The Significant Findings uses the same alert pathway as
consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Sig Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.

(j) Complete via CPRS Consult Progress Note. When appropriate documentation is available within CPRS and linked to the consult.

(k) Administrative Complete. When a consult is used solely as a request to reschedule an established patient without asking a new clinical question; when consults are greater than 5 years old and it is being done as part of consult maintenance review.

(l) Partial Results. Automatic status change when consult has been linked to a note that is not signed or co-signed.

3. ADMINISTRATIVE USES OF THE CONSULT PACKAGE

Optional Use of the Consult Package – Can be used for inpatients or outpatients for one way communication

a. Outpatient Clinical Request/Transfer of Care.

(1) Build Requirements.

(a) Consult Service Name. Specific note titles are not required since the administrative flag is selected for the specific services in the VistA File 123.

(b) Consult Service Names that Cannot be Used in Combination. One naming convention or flag must be used for each consult service. Administrative Consult Services should have an Administrative Flag set. They should not include these names in the title: 'Outpatient', 'Outpt', 'Inpatient', 'Inpt', 'Inter-Facility', 'Inter Facility', 'IFC', 'CP', 'FC' or 'Future Care'.

(c) Document Class. No note is specifically required prior to completing consult.

(d) Urgency Fields.

1. The only two approved urgency statuses are Stat and Routine.

2. If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.
(e) **Notifications.** Facility/Service decision.

**2) Status Changes.**

(a) **Pending.** Consult is automatically placed in pending status - the status of the consult must be complete within 30 days noting the action requested was completed.

(b) **Active.** Consults which are pending more than 2 business days must be received into Active status. If a patient no-shows, or the appointment is cancelled, the status will revert to Active status.

(c) **Scheduled.** Required using VistA scheduling menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(d) **Cancel (Deny) Inappropriate Consults.** Do not use.

(e) **Edit (Resubmit).** Do not use.

(f) **Discontinue.** Do not use.

(g) **Forward.** Do not use.

(h) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(i) **Significant Findings.** Do not use.

(j) **Complete via CPRS Consult Progress Note.** Do not use.

(k) **Administrative Complete.** With appropriate comment when the need is addressed.

(l) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed.

**b. Scheduling Order/Administrative.**

(1) **Build Requirements.**

(a) **Consult Service Name.** The administrative flag is selected for the specific services in the VistA File 123. Administrative consults used only for the purpose of scheduling an appointment must include ‘Appt Req Only’ in the consult service name.

(b) **Consult Service Names that Cannot be Used in Combination.** One naming convention or flag must be used for each consult service. Administrative Consult
Services should have an Administrative Flag set. They should not include these names in the title: 'Outpatient', 'Outpt', 'Inpatient', 'Inpt', 'Inter-Facility', 'Inter Facility', 'IFC', 'CP', 'FC' or 'Future Care.'

(c) **Document Class.** No note is specifically required prior to completing consult.

(d) **Urgency Fields.**

1. The only two approved urgency statuses are Stat and Routine.

2. If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(e) **Notifications.** Facility/Service decision.

(2) **Status Changes.**

(a) **Pending.** Consult is automatically placed in pending status the status of the consult must be complete within 30 calendar days noting appropriate action on the order.

(b) **Active.** Consults which are pending more than 2 business days must be received into Active status. If a patient no-shows, or the appointment is cancelled, the status will revert to Active status.

(c) **Scheduled.** Required using VistA scheduling menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(d) **Cancel (Deny) Inappropriate Consults.** Do not use.

(e) **Edit (Resubmit).** Do not use.

(f) **Discontinue.** Do not use.

(g) **Forward.** Used when the consult is received by wrong service.

(h) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(i) **Significant Findings.** Use as needed.

(j) **Complete via CPRS Consult Progress Note.** A note would be used to complete
an administrative consult for clinical procedures (either attached to the admin consult, as a CP consult or an alerted progress note).

(k) **Administrative Complete.** When care plan has been initiated in CPRS or when request has been met. Facilities must establish a policy that outlines timeframe for cleanup.

(l) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed.

4. **COMMUNITY CARE CONSULTS**

Please refer to the OCC Field Guidebook at the link below:
https://dvagov.sharepoint.com/sites/VHAOCC/CNM/CI/OCCFGB/SitePages/FGB.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

5. **CLINICAL PROCEDURES WITH VENDOR INTERFACE**

a. **Definition.** A request for a clinical service when interface with a vendor is necessary. Sites may consider these clinical or administrative depending on the consult service request.

b. **Build Requirements.**

(1) **Consult Service Name.** Consult service title must include the prefix 'CP'. CP consult titles may also have the words Future Care or FC in the title.

(2) **Consult Service Names that Cannot be Used in Combination.** One naming convention or flag must be used for each consult service. Clinical Procedure Services should not include these names in the title: 'Outpatient', 'Outpt', 'Inpatient', 'Inpt', 'Inter- Facility', 'Inter Facility', or 'IFC'. The name should not begin with 'NON-VA CARE'.

Do not place characters directly adjacent to the name 'CP' such as placing a dash immediately after or placing it in parenthesis. The administrative flag and prosthetics flag should not be set as 'Y' for these services.

(3) **Document Class.** No note is specifically required prior to completing consult.

(4) **Urgency Fields.**

(a) The only two approved urgency statuses are Stat and Routine.

(b) If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance
with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(5) **Notifications.** Facility/Service decision.

c. **Status Changes.**

(1) **Pending.** Consult is automatically placed in pending status the status of the consult must be changed within the timeframe specified in the facility policy.

(2) **Active.** Consults which are pending more than 2 business days must be received into Active status. If a patient no-shows or the appointment is cancelled, the status will revert to Active status.

(3) **Scheduled.** Required using VistA menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(4) **Cancel (Deny) Inappropriate Consults.** Do not use.

(5) **Edit (Resubmit).** Do not use.

(6) **Discontinue.** Do not use.

(7) **Forward.** Do not use.

(8) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification setup/preferences.

(9) **Significant Findings.** The Significant Findings uses the same alert pathway as consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Sig Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.

(10) **Complete via CPRS Consult Progress Note.** When image/procedure report is available in VistA Imaging and stub note is created and signed in CPRS.

(11) **Administrative Complete.** Use as needed with appropriate comment when the need is addressed.

(12) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed.

6. **FUTURE CARE CONSULTS**
Mandatory use of the Consult Package in cases where a decision is made at a consult will be needed 90 days into the future.

a. **Definition.** A request for clinical evaluation when the expectation is that the care is delivered beyond 90 days.

b. **Build Requirements.**

   (1) **Consult Service Title.** Consult Service title must include ‘Future Care’ or ‘FC’ in the title. In addition, the FC consult sender will complete the “Earliest Appropriate Date” field of the consult request with appropriate future date of requested care.

   (2) **Consult Service Titles that Cannot be Used in Combination.** One naming convention or flag must be used for each consult service. Future Care Services should not include these names in the title: 'Outpatient', 'Outpt', 'Inpatient', 'Inpt', 'Inter-Facility', 'Inter Facility', or 'IFC'. The name should not begin with 'NON-VA CARE'Do not place characters directly adjacent to the words 'Future Care' or 'FC', such as placing a dash before or after or placing them in parenthesis. The administrative flag and prosthetics flag should not be set as 'Y' for these services.

   (3) **Document class.** Note titles used to respond to consults must be built in the 'CONSULTS' document class within the TIU package (except for procedures).

   (4) **Urgency Fields.**

      (a) The only two approved urgency statuses are Stat and Routine.

      (b) If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

   (5) **Notifications.** 'Consult/Request Resolution' notification must be turned on and mandatory.

c. **Status Changes.**

   (1) **Pending.** Consult is automatically placed in pending status. The consult/referral status must change within 2 business days of the File Entry Date (FED). Consults, including those with a PID in the future, should be received, so that the status at least changes from Pending to Active within that 2-business day timeframe but may also be Scheduled, Forwarded, Cancelled or Completed within that timeframe. (Exceptions include E-consults, Prosthetics and Pathology. Future care consults are no longer an exception.) Refer to the Consult Timeliness SOP.
SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. **NOTE:** This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(2) **Active.** Optional. The need for the 'active' status change should be decided by each facility based on local need.

(3) **Scheduled.** Required using VistA menu options to link the consult request to the scheduled appointment except for types of appointments that are not usually scheduled.

(4) **Cancel (Deny) Inappropriate Consults.** Used by receiving service when consult pre-work is inadequate as outlined in care coordination agreement; when service is not available and NVCC consult will be entered for the same reason.

(5) **Edit (Resubmit).** Used by requesting service when adequate information has been added as outlined in care coordination agreement or when additional information has become available prior to the appointment.

(6) **Discontinue.** Do not use.

(7) **Forward.** When receiving service assumes the responsibility of handing off the request to the appropriate specialty service.

(8) **Add Comment.** Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(9) **Significant Findings.** The Significant Findings uses the same alert pathway as consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Significant Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.

(10) **Complete via CPRS Consult Progress Note.** When appropriate documentation is available within CPRS and linked to the consult.

(11) **Administrative Complete.** When patients with an established relationship with the receiving specialty has been lost to follow up and the patient is rescheduled; when consults are greater than 5 years old and it is being done as part of consult maintenance review.

(12) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed.
7. E-CONSULTS

Best practice where possible that allows consult question to be answered without face to face examination of the patient. It is always the discretion of the receiving service whether a consult can be answered as an e-consult.

a. Build Requirements.

(1) Consult Service Title. Consult Service title must include e-consult in the title. In addition, the consult sender will complete Clinically Indicated Date field of the consult request with appropriate date of requested care.

(2) Document Class. Note titles used to respond to consults must be built in the 'CONSULTS' document class within the TIU package (except for procedures).

(3) Urgency Fields.

(a) The only two approved urgency statuses are Stat and Routine.

(b) If the consult is Stat, there must be a documented discussion between ordering and receiving provider. Stat consults/referrals must be completed within 2 business days of FED. In all other circumstances, the consult should be completed in accordance with the clinically indicated date. Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(4) Notifications. ‘Consult/Request Resolution’ notification must be turned on and mandatory.

b. E-consult Variations.

(1) Ordering provider orders an e-consult believing that the consult question can be answered without an in-person visit. Not all sites allow this.

(2) Receiving provider can determine that the consult question can be answered without an in-person visit.

(3) Ordering provider fails to order prerequisite tests or treatments and the receiving provider completes the consult as an e-consult with instructions to obtain prerequisite tests or provide prerequisite treatment.

(4) Ordering provider orders an in-person consult but the receiving provider may determine that the consult question can be answered through a phone call or Secure Messaging interaction.

(5) Note that consults that were initially ordered for an in-person visit, can be
completed as an e-consult at the discretion of the receiving service without the need to forward to an e-consult.

(6) It is not necessary to document patient consent prior to completing the e-consult.

c. Status Changes.

(1) Pending. Consult is automatically placed in pending status. The consult/referral status must change within 2 business days of the File Entry Date (FED). Consults, including those with a PID in the future, should be received, so that the status at least changes from Pending to Active within that 2 business days timeframe but may also be Scheduled, Forwarded, Cancelled or Completed within that timeframe. (Exceptions include E-consults, Prosthetics and Pathology. Future care consults are no longer an exception.) Refer to the Consult Timeliness SOP: https://dvagov.sharepoint.com/sites/vhaovac/cpm/SitePages/AccessPolicyResources.aspx. NOTE: This is an internal VA website that is not available to the public and is accessible by Chrome if using a web browser (do not use Microsoft Edge). If the link to a VA website does not work, copy and paste the link directly into a Chrome browser.

(2) Active. E-consults must be “received” so that they acquire the status of Active if they are not completed within 2 business days.

(3) Scheduled. An e-consult may be forwarded to a general consultation where an appointment could be scheduled.

(4) Cancel (Deny) Inappropriate Consults. Used by receiving service when an appropriate e-consult question was not asked or in insufficient information was provided.

(5) Edit (Resubmit). Used by requesting service when adequate information has been added. Cancelled consults should not be resubmitted if they are more than 90 days old.

(6) Discontinue. Do not use.

(7) Forward. When receiving service assumes the responsibility of handing off the request to the appropriate specialty service. E-consults may be forwarded to a general consult and general consults may be forwarded to an e-consult. General consults can also be completed as an e-consult without having to forward to an e-consult.

(8) Add Comment. Add comment may not deliver a notification to all staff depending on notification set up/preferences.

(9) Significant Findings. The Significant Findings uses the same alert pathway
as consult completion, which will result in a notification to the ordering provider. The Significant Findings action is used by a Service/ Specialty to mark a consult has having significant findings. When the Sig Findings flag is set to “Y” an asterisk is placed next to the consult in the review display.

(10) **Complete via CPRS Progress Note.** When appropriate documentation is available within CPRS and linked to the consult.

(11) **Administrative Complete.** When patients with an established relationship with the receiving specialty has been lost to follow up and the patient is rescheduled; when consults are greater than 5 years old and it is being done as part of consult maintenance review.

(12) **Partial Results.** Automatic status change when consult has been linked to a note that is not signed or co-signed
