## Assessing Circumstances & Offering Resources for Needs

#### ACORN BACKGROUND

ACORN is a national Veterans Health Administration (VHA) quality improvement initiative conducted in partnership with the Office of Health Equity and the National Social Work Program, Care Management and Social Work Services.

ACORN aims to: 1) systematically screen Veterans for social needs in nine social risk domains; 2) provide clinical teams real-time information about Veterans' unmet needs; and 3) address identified needs through the provision of resources and referrals.

#### SIGNIFICANCE OF ACORN

Long a leader in the integration of medical care and social services, the VHA is well-positioned to address Veterans' unmet social needs. VHA routinely screens Veterans for food insecurity and housing instability but lacks a systematic screening process to broadly identify social needs. Building upon VHA's existing social risk screening processes and social needs interventions, ACORN enhances clinical care teams' capacity to understand and address the social and economic factors impacting individual Veterans.

ACORN aims to systematically identify and address unmet social needs among all Veterans to improve health and advance health equity.

#### THE ACORN MODEL

ACORN consists of two core components: 1) a standardized screening tool to identify social risks at the point of care and 2) provision of relevant resources and referrals to help address identified social needs.

ACORN screens across a range of social risk domains, including: food, housing, utility, transportation, education, employment, legal, social isolation/loneliness, and digital needs (including lack of phone/internet or technology access, as well as digital health literacy).

Veterans can complete ACORN screening prior to or during clinic visits as a self-administered screener on paper or as a staff-administered screener in the VHA electronic health record. Veterans who express unmet needs are offered referrals to Social Work or other relevant clinical services, support navigating resources, and/or geographically-tailored resource guides to VA and community services.

#### **USE OF ACORN IN CLINICAL PRACTICE**

ACORN has been implemented in a variety of clinical settings, including Primary Care, Women's Health, Mental Health, Geriatrics, Whole Health, and a range of specialty clinics, as well as in emergency departments and inpatient settings.

For more information on the ACORN initiative and implementation standards, the ACORN Team is available at <u>VHAACORN@va.gov</u>.
